RACKETS IN INDIA

COLONEL A. R WINSLOE

PRESS OPINION.

"Colonel Winslot is well-known as a player and as an enthusiast, wherever rackets is played in India. In "Rackets in India" he gives a short history of the game in India, note on the tournaments and Indian Markers and the results of championships and tournaments from their inception in different parts of India Most important are the chapters devoted to racket balls, rackets and courts, their preservation and the vay to look after them. The greatest enemy of the game of rackets is its cost, and Colonel Winsloe gives most practical advice how the price of playing the game may be kept down. The map showing places with racket courts is interesting and, to rackets players visiting or resident in India, of extreme importance book is dedicated to Major-General S H Sheppard, CB, CMG, DSO, who has written a foreword to it "

VI PRLIACI

With the object of introducing Dalgado's work to those interested in such studies. I read before the Bombay Branch of the Royal Asiatic Society a paper entitled. The Portuguese Legacy to the East or the Influence of Portuguese on the Languages of the East with special reference to the Languages of the Bombay Presidency. This was in 1922. A paragraph from its concluding part will bear quotation here in as much as it explains my motive in reading it and, at the same time, makes an avoidal of my indebtedness for my materials to the Vocabulario.

'It remains for me to acknowledge my great and grateful debt to Dr S Rodolfo Dalgado's Influencia do Vocabulario Portugues em Linguas Asiaticas (abrangendo cerca de cinquenta idiomas) The student who wishes to study from a scientific and philosophical standpoint the process by which the gradual transplantation of the exotic words on Asiatic soil was affected will find the introduction to this great work of absorbing interest The book which is published by the University Press Coimbra, and brought out under the auspices of the Academy of Sciences Lisbon is in Portuguese a language unknown to the majority of scholars in India I am sure that on this very account a few brief remarks on the character of this work as well as on the career and achievements of the indefatigable orientalist and philologist, its author, will not be out of place' And the very same reasons have determined the inclusion of a sketch of the author's life and work in this volume

The paper was published in the Society's Journal No LXXIV, Vol XXVI, and it was not long before I had the satisfaction of finding that my object had in some measure been realised. The few inquiries which had reached me before, consequent on the brief summary of the paper having appeared in the Times of India, Bombay, now increased both in number and in purposefulness. Almost without a single exception my correspondents regietted their inability to read the Monsignor's works in the original and also the absence of an English translation of the most important of them. The Vocabulario,

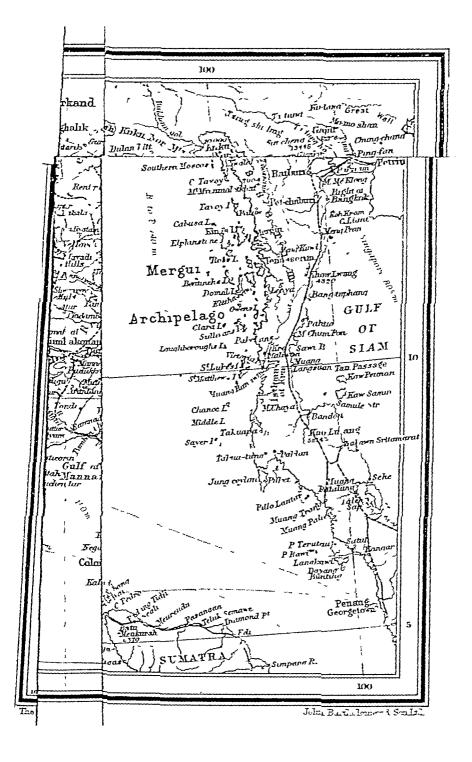

vii PRLIACL

made its appearance, much published material—new volumes, in the Hakluvt Society's publications in Foster's Letters, and English Factories in India, and of the Indian Antiquary, etc., . . . had become available. The New Oxford English Dictionary which the author does not appear to have known or consulted was also approaching completion.

In view of all this I decided that it would enhance the utility of my translation if I incorporated in it the alterations of additions that the new material had made necessary or possible. The additions have been in the main with reference to Anglo-Indian terms which owe their existence to Portuguese, and they have not been confined to etymological investigations alone but been extended to various other fields—historical, sociological, botanical, zoological, etc. which I thought might provoke the reader's interest, and at the same time relieve to some extent the baldness as a rule, inseparable from a Vocabulary

The author, as is but natural considering the nature of his work, quotes usually from the early Portuguese chronicles in support of the currency of a Portuguese vocable in the East I thought that it would promote both enquiry and interest among English-speaking readers if I were to give the reference to the relative passage in the English version of the text when such existed, and there are not a few of them in the Hakluyt Society's series. This, with very few instances excepted, I have done.

There are many Anglo-Indian words in the Vocabulario for which the author provides quotations, in the case of quite a number of others, he does not do so—the nature of his study did not demand them. I have endeavoured to supply the lacunæ, and, when this had to be done in regard to vocables which had been already dealt with in Hobson-Jobson, I aimed at providing, whenever possible, citations other or earlier in point of time than those given by Yule and Burnell. In furnishing references for the various forms sometimes assumed by a term, I have chiefly been moved by considerations of tracing

Y PRITACT

insoluble had it not been for the gracious and personal interest which the Maharaja Gaekwad of Baroda took in the work and the decision of His Highness' Government to finance its publication

The spontaneous generosity of this great Prince in assisting enterprises that conduce to the cultural or social advancement of his countrymen has become proverbial both in the East and the West. Himself a keen student of languages. Indian and European he has given proof of his interest in linguistic researches by having had the Shree Sayayi Shastama Shabda Kalpatri—a comparative dictionary of administrative terms in seven Indian languages—compiled and published, and everyone in India who has at heart the unification and cultural progress of India is aware how much the movement for making Hindi the lingua franca of India owes to this Ruler. I venture to take this opportunity of recording my indebtedness and grateful thanks to His Highness and his Government.

It remains for me now to thank, besides the many friends who have shown interest in my work, rendered help, and put up with and answered not a few importunate questions, Miss Olive da Cunha BA, for offering to let me use her copy of the Vocabulario presented to her by the author, which contained corrections and additions made by him—the latter have been shown within parallel lines in the present edition, Dr Mariano José Saldanha, Professor of Sanskrit, Lisbon University, for his advice regarding the transliteration of certain Konkani phonetics, Mr Vitus P de Sá, Solicitor, Bombay, for placing at my disposal letters from Orientalists in Europe received by his uncle, the Monsignor, from which I have quoted, and my daughter Florence who has rendered me very useful assistance in the dreary task of preparing the language lists and the general index and in revising their proofs

His eminence in the field of Oriental studies is unquestion-He was one of the very few Indians enrolled among the 'thirty' whom the Royal Asiatic Society of London at any one time honours with its honorary membership, and we shall at this stage for bear mentioning honours, that came to him from other learned societies not as well known to readers in India. There is one fact however, connected with his life and work which calls for mention even now and it is sure to secure from scholars in India and the East the sympathy and admiration which those of Europe felt for him. During the years he was engaged in compiling his monumental works in order to avoid worse consequences to his health, he had to undergo surgical operations requiring the amputation of both his legs, one after the other, at the short interval of about three years. And the picture of this aident and untiling Oriental scholar, alone and away from his home, his only constant companions and faithful friends, the dictionaries of Eastern tongues and Portuguese and other European chronicles, his truncated body resting in an invalid's chair—a veritable Procrustean bed —from which he lectured to his students and on which, with heroic resignation, he worked away at his books, is as moving as it is sustaining

His works are in Portuguese—a language which till the middle of the eighteenth century was the lingua franca of India, but to-day is practically unknown here except to a microscopic section of the population and that limited to a small proportion of the Portuguese possessions in India Again, he bore a name which could easily lead the indiscriminating to regard him as a non-Indian. What wonder then that his countrymen, had they even heard of him and his works, should have failed to pierce the disguises of name and language and discover in him one of their kindred?

For Sebastião Rodolfo Dalgado was born in Assagão, Bardez, Goa, of a distinguished Brahmin family which for generations had occupied a place of prominence and privilege in the economy of the village. In the sixteenth century, Christianity

hold in various parts of India and in Cevlon brought him into contact with the idioms and cultures of different people and enabled him togather materials for the two enduring monuments he was to raise in after venis

From Rome he went to Lisbon where, by a Government order of the 19th November, 1884, he was nominated a missionary of the Crown, with India as his field of activities. He arrived in Goa in April 1885 and in quick succession was appointed to several ecclesiastical offices. We shall refer here only to such as have a direct bearing on his researches in the field of Oriental studies.

On the 19th March, 1886, he was appointed Vicar General of Ceylon and took charge of his office on the 14th May As the result of a Concordat between the Holy See and the Portuguese sovereign, the Portuguese Mission in Cevlon became extinct on the 2nd January, 1887, and Dr. Dalgado returned to Goa, but not before he had acquired a working knowledge of Simhalese and Malay From May 1887 to April 1890, he was the Vicar General of Bengal with his headquarters in Calcutta, long enough for him to acquire proficiency in Hindustani and Bengali In 1893 he was appointed Vicar Forane of Honawar, and he continued in this office till 1895, employing his leisure in learning Kanarese and Tamil A large part of the three years preceding his taking up his office at Honawai he spent at Savantwadı, a State on the frontiers of Goa, with his eldest brother. Dr Gelasio D Dalgado, who was the Civil Surgeon there, studying Marathi and Sanskrit It was evidently during these years and studies that he realised how closely his own mother tongue. Konkani, was related to Sanskrit, and the recognition of this fact led him to undertake a scientific investigation of the structure and vocabulary of this vernacular Research was fruitful in helping him to bring out his Konkani-Portuguese Dictionary in 1893, and to write a Grammar of Konkam, on which he was busy at the time of his death and which in its manuscript form he bequeathed to the Public Library of Nova-Goa

number of these latter were adopted by the French and the English

It is possible to realise the magnitude and the monumental character of the work, embodying as it does the result of a quarter century's reading and research, by turning to the Bibliography. Its five hundred and more names of works. several of them running into many volumes—cover practically every book in Portuguese dealing with the East a very large number of such in Latin. French. Italian, Dutch, Spanish and English, and some even from Arabic. Persian and Chinese sources.

Upon the appearance of the Glossano the author was overwhelmed with appreciations from Oriental scholars in different parts of the world. In England, Wr. Longworth Dames the then Vice-President of the Royal Asiatic Society, reviewed it in the Society's Journal (April 1921) and went so far as to say that he hoped students in England and India who were not acquainted with Portuguese, would endeavour to obtain a sufficient knowledge of that language to enable them to avail themselves of the mass of invaluable information contained in the two volumes. Not long after he was elected an Honorary member of the Royal Asiatic Society.

But his great aspiration was to be a full member of to use the Portuguese term, 'Socio effectivo' of the Lisbon Academy of Sciences, under whose auspices and at whose cost most of his important books had been published. The number of the 'Socios Effectivos', as of the 'Immortels' of the French Academy, is limited, but the death of one of them Dr. Anselm Jose Braacamp had created a vacancy and Dr. Dalgado's name was selected to be placed before the general body at a session on the 27th April, but Providence had willed otherwise, for on the 4th of the same month Dr. Dalgado was summoned by his Maker to receive the due reward of his exemplary sanctity of life, unturng industry, wise use of his rare gifts and his heroic resignation in suffering

The Portuguese people mourned the passing away of this Indian scholar as a national loss, for they had come to look upon

PREFACE

,

THI labor has to then many correspondent who during the past year way of the book. The Indian Year Pool of attended boxe all to be a book of teleroce, and as completeness and convenience of an oration must necessarily depend to a great extension the part of enemy of the months of the public who most use it.

The help extended to the I ditors by various officials, and more particularly by the Director of Information and Labour Intelligence, Bombay, and the Indian Commercial Intelligence. Department, has again been readily given and is most oratefully adaptively.nowledged. Without such help it would be impossible to produce the Year Book with up-to-due statistics.

Surgestions for the improvement or correction of the Year Book may be sent to the leditors at any time, but those which reach them before October have a better chance of being adopted than later suggestions which only reach them after the work of revision has been partly completed

The Times of India, Bombay, January, 1932.

made relentless efforts to suppress the language of the soil not unlike those once made by the Normans against Anglo-Saxon speech, and as unsuccessfully. Monsignor Dalgado was surely acquainted with these, but he must have presumed that a newer order had yielded place to the older one.

His intense devotion to India is understandable, but how is it that this Indian with not a trace of Portuguese blood in his veins came to feel the affection he did for Portugal? A sentence in his preface to this work bears witness to its intensity. I have pursued this task with an ardent zeal and unflagging enthusiasm inspired above all by my devotion to Portugal and thought for her glory. We shall allow Dr. Dalgado himself to answer what on the surface appears to be a very intriguing query.—

"The influence of Portugal in the East which many foreign and some Portuguese writers have characterised as eruel, intolerant and of few beneficial results, presents nevertheless on careful investigation, an aspect and a type which are wholly peculiar, in as much as it has been highly sympathetic and It is an influence which other nations who warm-hearted regard themselves as being more civilised and more liberal have not up to this day succeeded in exerting in spite of presentday advance in social doctrines. The most striking evidence of this influence, which in itself constitutes a glorious record of the relations that have existed between the conquerors and the conquered, is their effective and legal recognition of political and social equality, without any difference whatsoever, between the Portuguese and their colonials, be they Indians, Chinese, Oceanians or Africans—a policy which as yet remains a desideratum among non-Portuguese colonies, however rich, extensive and cultured

According to the general theory of the Portuguese, their colonies are not dependencies or centres for exploitation. On the contrary, they are patches of Portugal sown, for her glory, in different climes with races, colours, castes, usages and customs, it is true, very unlike those of the mother country, but not on

Bran-In Hindi (also Gujarati Vesar) — | Woman's noso ring

Brwan.—Name in Central Provinces for shifting cultivation in jungles and hill-sides, svn taungva, Burma; jhum, North-Eastern India

Branoi —Early autumn crop, Northern India reaped in the month Bhadon

BHAGAT OF BHARTA -A devotee

Brig-Batti —System of payment of land revenue in kind

BRAIDAND—Relation or man of same caste or community

BRUBINDI -- Yepotism

CHAVRI (CHORO, GUJARATI) -- Village head quarters

CHERTAH -Hunting leopard

CHELA —A pupil, usually in connexion with religious teaching

CHHAONI -A collection of thatched huts or barracks, hence a cantonment

CHHATRAPATI —One of sufficient dignity to have an umbrella carried over him

CHHATRI —(1) An umbrella, (2) domed building such as a cenotaph.

CHIEF COMMISSIONEP—The administrative head of one of the lesser Provinces in British India

CHIKOR --- A kind of partridge, CACCABIS

CHIKU—The Bombay name for the fruit of ACHPAS SAPOTA, the Sapodilla plum of the West Indies

CHINAR .-- A plane tree, PLATANUS ORIENTALIS

CHINKABA —The Indian gazelle, GAZELLA BENNETTI, often called 'ravine deer'

the East, there are others, however, who believe, and Dr Dalgado is one of them, that the true criterion of estimating the success of colonial administration is the affectionate memory and grateful esteem of the rulers by the subject population and, tested by this the success of the old Portuguese colonial policy has been very great indeed

It is the earnest desire of present-day statesmanship to see the East and the West understand each other and to have them extend to each other the hand of fraternal sympathy. Dr. Dalgado's Locabulario and Glossario will remain abiding monuments of such an alliance between the two civilisations, and he himself—whether regarded as man, priest, or scholar is a splendid exemplar of the happy result to be derived from an intimate association of the East and the West DHAMNI - A heavy shighram or tonga drawn by bullocks

DHARALA.—Bhil, Koll, or other warlike castes carrying sharp weapons

DHARMA.—Religion (Hindu)

DHARMSALA —A charitable institution provided as a resting-place for pligrims or travellers, Northern India

DHATURA -A stupefying drug, DATURA AFSTUOSA

DHED —4 large untouchable caste in Gujarat, corresponding to Mahar in Maharashtra and Holeya in Karnatak.

DHENKLI -Name in Northern India for the lever used in raising water, syn picottah

DHOBI -A washerman

Dhoti -The loincloth worn by men

DIN - Religion (Mahomedan)

DISTRICT —The most important administrative unit of area

Division —(1) A group of districts for administrative and revenue purposes, under a Commissioner, (2) the area in charge of a Deputy Conservator of Forests, usually corresponding with a (revenue) District, (3) the area under a Superintendent of Post Offices, (4) a group of (revenue) districts under an Executive Engineer of the Public Works Department

GHAZI —One who engaged in "Ghazy," a holy War, se, against kafirs.

GHI, Ghee -Clarified butter

GINGELLY -See TIL

Godown—A store room or warehouse Anglo Indian word derived from the gadang' noticed at once that it was not only in Portuguese India but also in British India that many Portuguese words were current, this fact I had on a previous occasion, though of course on a scale much smaller, observed when I was the vicar general and administrator of the Portuguese missions in Ceylon and Bengal. In my Konkani-Portuguese dictionary published in 1903, I indicated by initials placed before the respective word, the six or seven languages, Aryan or Diavidian which used them and which I then knew

Accepting the suggestion of a friend, I sent him from India in 1892 a very short manuscript study to be put before the International Congress of Orientalists which was to have been held in Lisbon but eventually was not held there. It was a brief study consisting of two distinct parts of the Indo-Portuguese dialect of Ceylon, and of the Portuguese terms, grouped under certain heads, which had been introduced into half a dozen languages of India.

The Geographical Society of Lisbon published, as my contribution to the celebrations in honour of the fourth centenary of the discovery of the sea-route to India, an enlarged study of the Portuguese dialect of Ceylon—But I could not then accede to the pressing request of the late Luciano Cordeiro to put through the press the second part of my essay because I wished to extend the scope of this part of the work and, at greater leisure, to co-ordinate it in the best possible manner

Since then I have carried on, with interruptions more or less protracted and occasionally with flagging zeal, the arduous task of going through, more than once, a large collection of dictionaries and vocabularies of some fifty languages, some of them voluminous, rare and costly, of acquiring incomplete but published lists of words, of obtaining fresh ones through the help of obliging friends scattered over India, and finally of casting anew the materials thus brought together. And all this has been done in the midst of constant physical sufferings, oftentimes of an exeruciating nature, and of not a few moral smarts.

NAWAR—A title borne by Musalmans, corresponding roughly to that of Raja among Hindus Originally a Viceroy under the Moghal Government, now the regular leading title of a Mohammedan Prince, corresponding to "Maharaja" of the Hindu

NAWABZADA -Son of a Nawab

NAZAR, nazarana —A due paid on succession or on certain ceremonial occasions

NAZIM -Superintendent or Manager

NET ASSETS—(1) In Northern India, the rent or share of the gross produce of land taken by the landlord, (2) in Madras and Lower Burma, the difference between the assumed value of the crop and the estimate of its cost of production

nace, customs, and language. But there are other aspects by no means of less consequence and which, at the same time, are important factors of civilisation, the introduction of new objects the flora, the fauna, agriculture and industries.

There is no colonial nation which has less racial egotism and is more inclined to identify itself with the indigenous population than the Portuguese.2 The discerning mind of Albuquerque found no better means of knitting together the East and the West and of consolidating the Empire which he was founding than by the fusion of the conquerors and the conquered, and towards this end he concentrated all his efforts. If his judicious policy was not resolutely maintained or if it encountered grave difficulties, it did not fail any the less to achieve considerable Even at the present time there are to be met with in results various parts of Asia groups of families, some small others large, which pride themselves on being the descendants of the European people who were the earliest in modern times to bring their civilisation to the East These families also glory in designating themselves Portuguese and are proud of their Lusitanian patro-

¹ Traces de Portugais dans les principales langues des Indes Orientales Necrlandaises

^{2 &#}x27;The Portuguese have always been in this matter very tolerant—and this one of the great qualities of colonisers—and they would never think it is disgrace to contract marriage alliances with the high castes of India, the people with the purest Aryan blood in their veins' Conde de Ficalho, Garcia da Orta e o seu tempo, p. 169

³ See João de Barros, Dec II, V, 11.

^{&#}x27;And already at this time there were in Goa four hundred and fifty married men, all servants of His Majesty, the King, and of the Queen, and of the Lords of Portugal, and those who wished to marry were so numerous that Afonso de Albuquerque could hardly grant their requests, for he did not give permission except for the men of proved character to marry' Commentaries of Afonso Albuquerque, III, Ch 9 [Hak Soc, Vol III, p 41—Ep]

^{&#}x27;The Portuguese make a mary ellous profit all over India Where they are well received they associate with the natives of the country, who in their turn accompany them in their voyages, so much so, that even all the crews of their ships and pilots are Indians, either Mohammedans or Hindus' Pyrard de Laval, Viagem, Vol 1, p 373 [Hak Soc, Vol 1, p 438—ED]

profess. And as these converts recall to mind with gratifulde the names of those who were the earliest to bring over to them their faith, with ample good will they forgive the Portuguese nation for the lapses they may well have been guilty of ¹. And among the cultured Hindus, who are championing the cause of national self-rule, there are not wanting some who regret as I myself have had occasion to hear that Portugal had not converted to her religion the greater part of India.

The Portuguese also promoted the civilisation of the East by her immense trade bringing over from Europe objects unknown in these parts, introducing these into the domestic life of the people, and by carrying very many objects from parts of Asia to others more remote in the continent, this last fact is testified to by the names of the articles with which are associated their place of origin ²

The flora of Asia and in a especial degree, that of India owes to Portugal the introduction of very many plants most of

I 'With regard to the influence of Portugues' colonisation on the customs of the indigenous peoples, it is enough to say that since the very beginning Portuguese missionaries preached Christianity and founded Christian schools. It is unnecessary to add that the work of the missionaries introduced at the same time, the first elements of European civilisation, and that the views of the conquerors, in respect of indigenous customs, began to be mellowed under the influence of Christianity. Dr. Hoyligers, op. cit

^{&#}x27;These Catholic populations, which even now are to be found there in lands over which for long years we have lost our sway, and which combine with reverence for their faith their regard for the name of our land (Portugal), go to prove how deep the teaching and the influence of the Portuguese missionary had penetrated 'Conde de Ficalho, op cit, p 160

^{2 &#}x27;Our ancient intercourse has, however left indelible traces in the language Bengarajima, Chaujima and Santomejima are fabries which were imported from the Indian cities of Bengal (Port Bengala), Chaul and St Thomas (Port San Tomé) Amakaua sango are corals from Macau (formerly called Amacao), Indengawa, leather from India, and Perusyagawa, that from Persia' Dr N Murakámi, The Influence of Early Intercourse with Europe, etc

^{&#}x27;They have also a great quantity of cloths from Cambaya, Chaul, and Dabul, and from Bengal they bring many synabasos which are a sort of cloth' Duarte Barbosa, Livro, p 261 [Hak Soc Longworth Dames's Translation, Vol I, p 93]

national sovereignty has passed away. This is the case with the Portuguese in Bengal, on both the coasts of the Indian pennisula, and in Malacca and Singapore

But the phenomenon which one notices in Ceylon is nothing short of a marvel. There, not only the descendants of the Portuguese, but even the children of the Hollanders who exercised a sway over the island during as long a period as the Portuguese and generally speaking all the Euro-Asiatics and even some of the indigenous inhabitants, have adopted Portuguese as their mother tongue. Besides these, there are the Europeans and the natives who learn the language for the convenience of trade, domestic requirements, or religious services.

And it is yet again a matter for surprise and not a little amazing, that a section of the indigenous population, which cannot lay claim to a drop of Portuguese blood in its veins, should have repudiated its own vernacular and adopted, together with the Christian religion, Portuguese as its mother tongue. This is a phenomenon which one notices in the Presidency of Bombay and also in some parts of the Malabar Coast.²

The expansion of the Portuguese language over Asia during the past centuries is astounding. 'The history of the discovery of the Portuguese conquests is likewise the history, generally speaking, of the spread of the Portuguese language.' says Dr. Schuchardt very aptly, and he establishes his thesis with much erudition. To this may be added that the history of the spread of Portuguese missionary activities is, in an equal measure, up to a certain point, the history of the diffusion of the Portuguese language. In those early days Portuguese was

^{1 &#}x27;Already the language of the Dutch, which they sought to extend by penal enactments, has ceased to be spoken even by their direct descendants, whilst a corrupted Portuguese is to the present day the vernacular of the lower classes in every town of importance' Emerson Tennent

Manners and Customs.

varies from fair to that the tourist's aften ton in India is drawn by their dress and perennal locarities. In its simplest form a Hindu's dress complets of a piece of cloth round the loins. Many an a cette who regards dress is a lixury wears nothing more and he would dispens with even so much if the police al-hwel him to. The Mahamedan always covers his less generally with transers sometimes with a piece of cloth field round the waist and reaching to the ankles. Hill men and women who at one time were a few leaves before and behind and were totally innocent of clothing do not appear to-day within the precincts of civileation and will not meet the touriet's eve. Children, either abrolutely nude or with a piece of metal hanging from the waist in front, may be seen in the street; in the most advanced cities and in the homes of the rich The child Krishna with all the lewels on his person, is nude in his pictures and images

Dress—The next stage in the evolution of the Hindu dres brings the loineloth nearly down to the feet. On the Malabar coast, as in Burms, the ends are left loose in front. In the greater part of India, they are tucked up behind—a fashion which is supposed to belit the warrior, or one end is gathered up in folds before and the other tucked up behind. The simplest dress for the trunk is a scarf, thrown over the left shoulder, or round both the shoulders like a Roman toga. Under this garment ls often worn a cost or a shirt. When an Indian appears in his full indigenous dreed, he wears a long robe, reaching at least down to the calves, the sleeves may be wide, or long and sometimes puckered from the wrist to the clow Before Europeans introduced buttons, a coat was fastened by ribbons, and the fashlon Is not ob-olete. The Mahomedan prefers to button his coat to the left, the Hindu to the right. A shawl is tied round the waist over the long coat, and serves as a belt, in which one may carry money or a weapon, if allowed The greatest variety is shown in the head-dress More than seventy shapes of caps, hats, and turbans, may be seen in the city of Bombay In the Punjab and the United Provinces, in Bengal, in Burma and in Madras other varieties prevail. Cones and evilinders other varieties prevail Cones and cylinders, domes and truncated pyramids, high and low, with sides at different angles folded brims, projecting brims long strips of cloth wound round the head or the cap in all possible ways, ingenuity culminating perhaps in the "parrot's beak" of the Maratha turban—all these fashions have been evolved by different communities and in different places, so that a trained eye can tell from the head-covering whether the water is a Hinda Mahamedan or Parsl and wearer is a Hindu, Mahomedan or Parsi, and whether he halls from Poona or Dharwar, Ahmedabad or Bhaynagar

Fashion Variations —Fashions often vary with climate and occupation The Bombay fisherman may wear a short coat and a cap, and may carry a watch in his pocket, yet, as

Next to the complexion of the people, which I be much work for long hours in water, he would not cover his legs, but suspend only a coloured for hiel from his waist in front. The Pathan of the cold north west affects loose baggy trousers, a tall head-dress beatting his stature and covers his care with its folds as if to keep off cold. The poorer people in Bengal and Madras do not cover their heads, except when they worl in the sun or must appear respectable Many well to do Indians werr European dress at the present day, or a compromise between the Indian and European costumes; notably the Indian Christians and Parsis Most Parala however have retained their own headdress, and many have not borrowed the European collar and culfs. The majority of the people do not use shoes, those who can afford them wear sandals ellipses and shoes, and a few cover their feet with stockings and boots after the Furopean fashion in public

Women's Costumes —The usual dress of a woman consists of a long piece of cloth tied round the walst, with folds in front, and one end brought over the shoulder or the head The folds are sometimes drawn in and tucked up behind In the greater part of India women wear a bodice on the Valabar coast many do not, but merely throw a piece of cloth over the breast. In some communities petticoats, or drawers, or both are worn. Many Mussalinan radies wear gowns and scarls over them. The vast majority of Mahomedan women are gosha and their dress and persons are hidden by a self when they appear in public a few converts from Hinduism have not borrowed the custom In Northern India Hindu women have generally adopted the Mussalman practice of seclusion In the Dekhan and in Southern India they have not.

As a rule the hair is daily oiled, combed, parted in the middle of the head, plaited and rolled into a chignon, by most women high caste Hindu widows sometimes shave their heads in imitation of certain ascetics, or monke and nuns. Hindu men do not, as a rule, completely shave their heads, Mahomedans in most cases do The former generally remove in most cases do The former generally remove the hair from a part of the head in front, over the tempies, and near the neck, and grow it in the centre, the quantity grown depending upon the fancy of the individual Nowadays many keep the hair cropped in the European fashion, which is also followed by Parsis and Indian Christians Most Mussalmans grow beards, most Hindus do not, except in Bengal and elsewhere where the Mahomedan influence was paramount in the past Parsis and Christians follow their individual inclinations Hinduscettes known as Saddus or Balradis as discortes known as Saddus or Balradis as disascetics, known as Sadhus or Bairagis as dis-tingulahed from Sanyasis, do not clip their hair, and generally coil the uncombed hair of the head into a crest, in irritation of the god

Hindu women wear more ornaments than others of the corresponding grade in society Ornaments bedeck the head, the ears, the nose, the neck, the arms, wrists, fingers, the walstIt is true that to-day the radiu of the circulation of Portuguese in Asia is no longer what it used to be, it is much reduced. It has ceased to be the lingua franca and, of it several dialects, some are extinct, others are in airculo mortis, and it may well be that yet others shall after the lapse of ages, have entirely disappeared. But when perchance Portuguese shall have ceased to be spoken in the East, the words from the beautiful tongue of Camoens adopted and naturalised in a hundred and one of the vernaculars of the East, will continue to exist as long as the vernaculars themselves endure and stand as living and abiding monuments of the Portuguese dominion and civilisation in those parts.

As was to be expected, the languages which most felt the influence of Portuguese were those of India and the Eastern Archipelago. And these are precisely the languages which are the subject of this study, and to these for one reason or another are superadded others. It is on this account that the philological notes that follow in the succeeding chapters have most reference to India.

III The Languages of India General Observations

India, on a par with her other riches, is rich also in languages and dialects of various species and gradations, which are spoken by an indigenous population of over 300 millions in an area which is equal to that of half Europe ¹

Especially in the mountainous tracts inhabited by numerous tribes, nomadic and savage or semi-savage there exist so many diverse forms of speech that it is difficult to say whether they are distinct languages, well-defined dialects, or mere variants. In the plains the more important languages spread themselves out as the result of a process of absorption, and many dialects ordinarily limited to provinces or districts are easily reduced to one common

¹ [According to the Census of 1921, the population of British India, excluding Ceylon, was reported to be 318,942,480—Ep]

Indian Names.

Tir personal name of most Hindus denotes a material object colour, or quality, an animal a relationship, or a delty. The unclusted than, who cannot correctly pronounce long can left words, is content to call his child, father, brother, uncle, or mother, or eleter, as the east may be. This practice survives as the fire into the limit practice kurtyves among the higher classes as well. Appa Saheb, Anna Rao, Babaji, Bapu Lai, Bhai Shani ar, Tatacharya, Jijibhal, are names of this description, with honorine titles added. It is possible that in early society the belief in the re-birth of departed Linsmen lent popularity to this practice. Nothing could be more natural te-birth of departed Linsmen lent popularity to this practice. Nothing could be more natural the names of the seven heavenly bodies continuous call a man white, black, or red gold cerned. When they begin to assume the or eliver gem, diamond, ruby, pearl, or merely mames of the Hindu delties, they practically

a stone small or tall, veal or strong a lion, a shale, a parrot, or a dog and to name a woman after a flower or a creeper. Thus, to tale a few manner from the epics. Pandu means white and ro does Arjuna Krishna black Bhlina ter-Ible Natula a mongoose Shunaka a do, Shul a a parrot Shrin, a a horn Among the names prevalent at the present day Hira is a diamond. Ratan or Ratan a jewel. Sonu or Chinna gold. Velli or Belli, in the Dravidian languages, means white metal or silver. Men are often called after the days of the week.

writings in connection with the language of the East have come exclusively from the preacher of the Gospel and in modern times the cultivation of these language is principally then work $^{\rm t}$

Since the last fifty years and especially during very recent years the study and the cultivation of the more important living languages has grown apace thanks to the persistent efforts of missionaries and inclologists and to the sustained stimulus and generous pationage of the British Government. Everywhere there are to be found mixed vernacular schools, and every year there is published a large number of books in the characters of the various vernaculars, most of them of a didactic nature, not to speak of the large number of periodicals and journals which are read with great avidity by the present generation.²

It is, therefore, not to be wondered at that up to now there has been no investigation on scientific lines of the total number of languages and dialects in India nor has there been a unanimous consensus of opinion regarding the limits of the Indian language-field which, of course, varies a great deal from the geographical and political boundaries of India. Robert Cust enumerates no less than two hundred and forty-three languages and two hundred and ninety-six of the dialects grouped under eight families, but he unduly extends the range of the language-field including in it Timor, Madagasear, and the island of Formosa, owing, as he says, to linguistic and ethnic affinities.

In a zone much more circumscribed, but which however included Burma and Siam, Beames in 1868 counted hundreds of

^{1 &#}x27;To one class of labourers Science is more indebted than to any other I allude to the Missionaries, both Protestant and Roman Catholic, who have vied with each other in letting light into dark places' Robert Cust, A Sketch of the Modern Languages of the East Indies, p 21

² About eight hundred indigenous periodicals are published in India, they are printed in nineteen different languages. And about seven thousand books are printed each year in the vernacular languages.

Splendid there and fortres is were built at Madra, helld, Ages Lettebpere Sikri and Bijapur, and the example thus ret was copied by the Hindu reforms at Julyar, Adulpur and elsewhere in In its. The application of great architectural trestment, unequalled in extent eleewhere, is to be reen in the Ghauts or steps enclosing lakes and on the banks of rivers. The most notable con tractional contribution of the Mahomedans to Indian architecture was the introduction of the true arch and dome

Sculpture —The use of sculpture and paint ing in I obted works of art was practically non exi tent in India until modern times. One or two relicis and certain glyantic figures may be quoted as exceptions, but taken generally it may be stated that these arts were employed as the decorative adjuncts of architecture No civil statuary, such as is now understood by the term, was executed, for no contempo-rary portrait figures, or busts in marble, or bronze, have come down to us from the rules of ancient India, as they have from those of I gypt, Greece and Rome Sculpture has been and to this fact may be attributed the stereo typed forms to which it became bound. The favish use of sculpture on Indian temples often styles differ little in executial plan, all having a typed forms to which it became bound une thing for the god, preceded by pillared portains use of sculpture on Indian temples often the The outer forms vary. The northern exceeds good taste, and mars the symmetry Hindi, Punjabi, Sindhi Bihari, Bengali, Marathi Konkami, Gujarati, Assamese, Oriya, Kashmiri, Nepali, Sinhalese ¹ Sir Grierson adds to these eleven others which he designates as Aryan but non-Sanskritic and these are spoken in Gilgit, Chitral, and Kafiristan. The total population of those who speak the Aryan tongues is more than 220 millions ²

To the Dravidian family belong Tamil, Malayalam, Telugu, Kanarese, Tulu Kodagu Toda, Kota, Kurukh (or Uraon), Malhai (or Rajmahah), Gond Khond, Kandh, Kolami The first five and perhaps the Kodagu are cultivated, the rest are not cultivated. The population that employs the Dravidian languages is more than 57 millions.

paratice Dictionary of the Bihari Language, Introduction—But it is necessary to make a distinction—Sanskrit properly so called or classic Sanstrit could not have been a mother tongue, learnt at the breast of the mother but yet it is undeniable according to the data provided by Yaska, Panini, and Patanjali that it was spoken by the cultured classes throughout the length and breadth of Ariavarta (from the Himalayas to the Vindyas), in the same way as Portuguese is in Goa. See Arthur Macdonell—I History of Sanskrit Librature—And it is to be noted that in the census of 1901—seven hundred and sixteen—individuals declared Sanskrit to be their language.

Sanskrit was evolved from the dialect spoken on the banks of the Sarasvati river almost in the same way as Latin was from the Italian dialect of Latium Bālabhāshā (literally 'the language of children') corresponds to Low Latin which was spoken by the masses. In many of the Indian languages, inclusive of the Dravidian, the literary idiom differs much from the spoken, as must also have happened, though perhaps not to the same extent, with Latin and Greek Vid Robert Caldwell, A Comparative Grammar of the Dravidian Languages

- 1 With respect to the classification of this language, there is a difference of opinion among indologists and to this we will refer hereafter
- 2 The words in the early Indo Aryan language, mentioned in the Vedas, found their way into the new Indo Aryan idioms through two channels directly, through the original Prakrit—a spontaneous and common evolution and indirectly, through classic Sanskrit, by the labours of the learned. The former are called $tadbh\bar{a}vas$, and the latter tatsamas, which again are divided into ancient and modern. To comprehend the difference—the Portuguese terms $ch\bar{a}o$ (ground), cheio (full), auto (action), and feito (deed) are $tadbh\bar{a}vas$, with reference to Latin plano (plam), pleno (full), acto (action), and facto (deed) are tatsamas
- 3 Brahui, spoken in Baluchistan by about 160,000 people according to the 1921 census report is a remote branch of the Dravidian group. The ancient

of architecom were adopted for public and private Lufflings in Calcutta, Reinbay and ladras Legause these were found to be more er table for their purpose than buildings of Indicenous pattern. The practical result was the same, for the Indian craftsmen employed upon their erection were confronted with styles affording no scope for the application of their implificant oraliest and concerning which thry had no knowledge or sympathy As there were no sculptors in India capable of modelling or carving civil sculpture, the monuments to distribuish public rereauls were all imported from Ingland and the portraits or other paintings which d cornted the interior walls of the buildings, were firmlified by I propose painters who writed India or by artists in England Although a considerable amount of research wore of a voluntary nature was done by Archieologists, no official interest was taken in artistic education until the Government of India was transferred to the British Crown in 1859. England Itself, the first fifty years of the nine-tenth century was a p nod of gross commer-cialism and artistic degradation, but with the advent of the International Exhibition of 1851 the eyes of the nation were opened to the value of art as applied to industry

Schools of Art then instituted throughout I ngland were imitated in a timid and tentative manner in India and were attached to the educational system, which had been previously modelled upon a definitely European basis Tre work of the Schools of Art in re. d to industrial art is referred to else re, and as swerrl of them have confined neir activities almost exclusively to this branch of the subject it is sufficient to mention only the worl of the Schools at Calcutta and Bombay in the present article. The Calcutta school, except for occasional experi ments in the application of the graphic arts to lithography, engraving and stained glass, has become a school of painting and drawing. That at Bombay covers a wider field, for in addition to classes for modelling, painting and design it possesses a special school of architecture, and a range of technical workshops, in which instruction is given in the applied arts, It is in the principles underlying the instruction in painting that the schools at Calcutta and Bom bay have taken almost diametrically opposite roads to reach the end they both have in view, namely, the revival of the art of painting in India by means of an indigenous school of Indian painters Mr Havell, who several years ago was the Principal of the Calcutta School, (he left India in 1907) banished from within its walls every vestige of European art, and claimed that the traditional art of India, in its old forms, is not dead, but merely sleeping or smothered by the blanket of European culture laid upon it for the last 150 years, and needed but to be released from this incubus to regain its pristine vigour Well equipped with literary ability, backed by intense enthusiasm for the views he held, he imposed upon his students an exclusive and severe study of the Moghul and Rajput schools of painting. He was fortunate in finding a willing and equally enthusiastic friend in Mr. Abinandranath Tagore, an artist of imagination and fancy, combined with a serious Pottery

devotion to his art. He with other Bengal printers, inspired by Mr Havell's precepts, founded, about thirty years ago, what has since become known as the Calcutta School of paint-In their early work the painters of this school closely adhered to the conventions of Moshul and Rajput artists, whom they took as their models, and these early examples made a great impression upon all Luropean critics who can them They were welcomed as the first sign of a genuine revival of Indian painting, hased upon traditional lines, and it was con fidently hoped that the movement would meet with the support it merited from Indians of all classes. Interesting as many individual works of the school undoubtedly are the anticipations which greeted its inception have scarcely been fulfilled by the Calcutta school. The painters fulfilled by the Calcutta school. The painters themselves have never reached the high technical standard of the artists who produced the best works of the Moghul or Rajput schools, and, as time has passed, their outlook appears to have shifted, and, while stemming the flood of western influence, they appear to have drift-ed into a backwater of Japanese conventions. The Indian public has failed to give the school the support it was hoped they would afford and the movement has had to depend for encouragement mainly upon Europeans in England and India

Bombay School of Art -The attitude towards the development of art in modern India taken by its successive Principals Messis Lockwood kipling, Griffiths, Greenwood, and Ceell Burns, was on wider lines than that favoured by Mr Havell In general the view this School of Art has taken is that with European literature dominating the system under which the educated classes in India are trained and with Luropean ideas, and science permeating the professional commercial, industrial, and political life of the country, it is not possible for modern Indians now to recapture the spirit which alone gave vitality to the great works of the past, that without this spirit, the conventions the ancient artists adopted are mere dead husks, and that to copy these would be as anprofitable as it would be for the artists of Europe to harness themselves to the conven-tions of the Greek and Roman sculptors or to those of the medieval painters, that with European pictures, often of inferior quality illustrating every educational text book, and sold in the shops of every large city, it is essential for the proper education of art students that they should have before them the masterpieces of European art, and that, with the wide adoption of Luro pean styles of architecture in India, it is necessary for a school of art to possess the best examples of ornament applicable to the great historic styles, for the purpose of study and refe-There are certain basic principles common to the technique of all great art, such as fine and accurate drawing in its widest sens, composition and design, and the science of colour harmony

Among the developments during Mr. Burns' administration were the founding of the Architectural School, the extension of drawing classes in the Government Schools, and the appointment of an Inspector of T a inspect and on the drawing schools

V Geographical Distribution

It is evident that in the present state of our knowledge, which is far from complete, it is not possible to trace with mathematical accuracy the lines which divide each of the living languages of India, nor would this be possible in respect of certain localities.

Apart from the difficulty referred to above, of determining the territorial boundaries of the languages of India, there arises another of ascertaining whether the hill peoples who are ethnically distinct are also separated by language differences and if their languages belong to one and the same family ¹

There are countries where two or more mother tongues or vernaculars exist side by side spoken by different tribes or races, this phenomenon is due to immigration in the remote past

Besides this two or more languages become so blended along the frontier of a continuous stretch of territory that, they either go to form one separate dialect with elements taken equally from each language and without any genealogical subordination or one of the two rises superior to the other and preserves its ties of family likeness

It is not to be expected, therefore, that the linguistic maps which have till now been published are accurate in respect of all the languages, some of them err through excess—by double designation or enlargement of the language-field—others through defect—by omission or contraction of the language area

The zone of each of the more important languages is sufficiently well known in its general lines and will be marked out in the description that follows of each of these

^{1 &#}x27;In the Himalayas the two families, as far as we have data for them, are so intermixed, that it is difficult, if not impossible, to lay down definite boundaries

Especially is this the case in the large kingdom of Nepal which is still a terra incognita in many respects' Beames, Outlines of Indian Philology, p 9

Buddhist Work

Fergusson's first architectural period ia then the Buddhist, of which the great tope at Sanchi with its famous Northern gateway is perhaps the most noted example we have the Gandharan topes and monasterles Perhaps the examples of Buddhist architecture of greatest interest and most readv access to the general student are to be found in the Chaltya halls or rock-cut caves of Karli, Ajanta, Nasik, Ellora and Kanheri A point with relation to the Gandhara work may be alluded to in passing This is the strong European tendency, variously recognized as Roman, Byzantine but most frequently as Greek, to be observed in the details The follage seen in the capitals of columns bears etrong resemblance to the Greek acanthus, while the sculptures have a distinct trace of Greek influence, particularly in the treatment of drapery, but also of hair and facial expression From this it has been a fairly common assumption amongst some authorities that Indian art owed much of its best to European influence, an assumption that is strenuously combated by others as will be pointed out later

The architecture of the Jains comes next in order Of this rich and beautiful style the most noted examples are perhaps the Dilwars temples near Mount Abu, and the unique "Tower of Victory" at Chittore

Other Hindu Styles

The Dravidian style is the generic title usually applied to the characteristic work of the Madras Presidency and the South of India. It is seen in many rock-cut temples as at Eliora where the remarkable "Kylas" is an instance of a temple cut out of the solid rock, complete, not only with respect to its interior (as in the case of mere caves) but also as to its exterior It is, as it were, a life-size model of a complete building or group of buildings, several hundred feet in length, not built, but sculptured in solid stone, ar undertaking of vast and, to our modern ideas, unprofitable industry The Pagoda of Tanjore, the temples at Srirangam, Chidambaram, Veliore, Vijayanagar, &c, and the palaces at Madura and Tanjore are among the best known examples of the style

The writer finds some difficulty in following Fergusson's two next divisions of classification, the "Chalukyan" of South-central India, and the "Northern or Indo-Aryan style." The differences and the similarities are apparently so intermixed and confusing that he is fain to fall back on the broad generic title of "Hindu"—however unscientific he may there by stand confessed Amongst a vast number of Hindu temples the following may be mentioned as particularly worthy of study —Those at Mukteswara and Bhuvaneswar in Orissa at Khajuraho, Bindrabun, Udalpur, Benares, Gwallor, &c The palace of the Hindu Raja Man Singh at Gwallor is among the most beautiful architectural examples in India So also are the palaces of Amber, Datiya, Urcha, Dig and Udalpur

Indo-Saracenic

Among all the periods and styles in India undisputed simil the characteristics of none are more easily medan and Hindrecognizable than those of what is generally between Indian

"Indo-Saracenic" called the which develoned after the Mahomedan conquest Under the new influences now brought to bear on it the architecture of India took on a fresh lease of activity and underwent remarkable modifi-cations The dome, not entirely an unknown feature hitherto, became a special object of development, while the arch, at no time a favourite constructional form of the Hindu builders, was now forced on their attention by the predilections of the ruling class The minarct also became a distinctive feature The requirements of the new religion,—the mosque with its wide spaces to meet the needs of organized congregational acts of worshipgave opportunities for broad and spacious treatments that had hitherto been to some extent denied The Moslem hatred of idolatry set a tabu on the use of sculptured representations of animate objects in the adornment of the buildings and led to the development of other decorative forms Great ingenuity came to be displayed in the use of pattern and of geometrical and foliated ornament Moslem trait further turned the attention of the builders to a greater extent than before to proportion, scale and mass as means of giving beauty, mere richness of sculptured surface and the esthetic and symbolic interest of detail being no longer to be depended on to the same degree

Foreign Influence

There would appear to be a conflict between archæologists as to the extent of the effect on Indian art produced by foreign influence under the Mahomedans The extreme view on the one hand is to regard all the best of the art as having been due to foreign importation The Gandharan sculptures with their Greek tendency the development of new forms and modes of treatment to which allusion has been made, the similarities to be found between the Mahomedan buildings of India and those of North Africa and Europe, the introduction of the minaret and, above all, the historical evidences that exist of the presence in India of Europeans during Mogul times, are cited in support of the theory On the other hand those of the opposite school hold the foregoing view to be iue to the prevailing European preconception that all light and leading must come by way of Europe, and the best things in art by way of Greece To them the Gandharan sculp-ture, instead of being the best, is the worst in India even because of its Greek tincture They find in the truly indigenous work beauties and significances not to be seen in the Greco-Bactrian sculptures, and point to those of Borobuder in Java, the work of Buddhist colonists from India, wonderfully preserved by reason of an immunity from destructive influences given by the insular position, as showing the best examples of the art extant It is probable that a just estimate of the merits of the controversy, with respect to sculpture at any rate, cannot be formed till time has obliterated some of the differences of taste that exist between East and West

To the adherents of the newer school the undisputed similarities between Indo-Mahomedan and Hindu buildings outweigh those between Indian and Western Mahomedan

VII Evolu Llements

No Asiatic language, generally speaking and no Indian language in particular, can pude itself on possessing a vocabulary which is purely vernacular, free from a very considerable and, at the same time very necessary admixture indeed of heterogeneous elements. The exotic elements were first introduced by Sanskrit, whose influence direct or indirect on the Dravidian languages (and on a smaller scale on the Malayan languages) is comparable to that which Latin continues to exercise on the non-Romance languages of Europe. It is divided into old Sanskrit which is in common use and the modern which is confined to literary purposes.

The Mahommedan invasion, in its turn brought into the country many Arabic and Persian terms but these enriched the vocabularies more of the Aryan than of the Dravidian languages its influence on these was similar to what it exercised on the languages in the peninsula of Spain

After them the Portuguese as was to be expected, gave a large number of words of their own language to almost all the languages, cultivated or uncultivated, what time they themselves were absorbing a large number of words from them into their own tongue. This they effected by direct or induced means, and they also helped to spread over the country some vernacular expressions derived from one or the other language after they had undergone sometimes a phonetic modification at their hands

The Dutch, as has been said before, have left very few vestiges of their language and these almost exclusively in Sinhalese, nor, in spite of their long domination, is the influence of their language very great in the languages of Malay, as is admitted by Dr Fokker

¹ Sanskrit herself borrowed from the Latin dināra, denarius, and from the Greek kalama, a reed used for writing, horā, hour, and other astronomical terms

$1\mathrm{X} = The$ Morphology of the Large

The greater number of the imported word a made up a is natural, of substantive which are either the name of per on or objects, and of some abstract noun and the eare employed sometimes in an extended and at other and limited and

Abstract terms and derivatives are formed and the noundedined in conformity with the general rule of each language. To take an instance, beblo (drunkard) in Konkani gives beble par or beblokay (drunkenness), bebalaira, in Sinhale e, gives bebalaillama. From lazār, also used as a sub-tantive in Konkani in the sense of 'marriage', is derived. lāzai; (marriage), lāzārātso (marriageable) lāzio ('marriage' in a depreciative sense).

Some substantives are employed in an acceptation peculiar to the local Portuguese dialect as in the Sinhalese, râmira (from the Port dialect, ramo) for mould', rendame (from the Port dialect, renda) for 'rent, 'toll, tax payable to the State'

Verbs have very little adaptability and are never much in demand for borrowing purposes. And yet we meet many of them in Konkam and in the Malayan group. In Konkam they remain as a rule unchanged and are conjugated with the vernacular verb corresponding to 'to make' or 'to be' according as it is transitive or intransitive and reflexive. The Malay verbs have no inflexions

Some words with a verbal form have, in addition or exclusively, the meaning of the substantive, as casar (to marry and marriage), pintar (to paint and a painting), jogar (game of dice), confessar (confession)

Some adjectives occur in a few languages, which are also used adverbially as the result of indigenous influence, as, in Goa, júst (just and justly), sert (certain and certainly) Adverbs proper, conjunctions and prepositions occur only in the Malay group But we meet with contra (against) in Konkani

- 3 The final vowel when preceded by a strested vowel may also sometimes be dropped as in almāni from 'aimáno' (ward-robe), basí from 'bacia' (plate), in Konkani all the post-tonic vowels are eliminated, thus we have ālmān from 'armāno' (ward-robe), vijān from 'vijāno (vicai), muza from música (music) and musico (musician), lambr from camara' (chamber)
- The final a after a consonant is treated in diverse 4 In the Arvan languages of the South (except Sinhalese) it is silent as in phit from 'fita' (ribbon), kamis or lamin from camisa' (shirt), bomb from 'bomba' (pump) In those of the North, ordinarily, it is lengthened out or stressed as in phītā, pīpā, gīrjā, kamij, mēj from 'fita' (ribbon), pipa' (barrel), 'igreja' (church), 'camisa' (shirt), 'mesa' (table) In the Dravidian it is changed into u, a favourite termination with lamisu (Tam kamisci), pistúlu, rípu, váru from 'camisa' (shirt), 'pistola' (pistol), 'ripa' (lath), 'vara' (vard) In the Malayan, the final a is retained in some words, whilst in others it is changed into the closed 6 renda, rendô, from 'renda' (tax or hire), roda, rodo from 'roda' (wheel), ronda, rondo from 'ronda' (patrol)
- The final e mute oscillates between the tonic i (Aryan languages) and the atonic i (Dravidian and Malayan languages) bāldi, báldi from 'balde' (bucket), chāvi, chávi from 'chave' (key), pādii, pádii from 'padre' (priest) In Konkani and Marathi it is dropped many times, being preceded by the simple consonant kôb from 'couve' (cabbage), gaiád from 'grade' (railing), búl (Konk) from 'bule' (tea-pot), kôch (Konk) from 'coche' (coach).

Indian Time.

For many years Indian time was in a state of | chaotic confusion What was called Madras or Railway time was kept on all the railways and each great centre of population kept its own local line, which was not based on any common scientific principle and was divorced from the standards of all other countries. It was with a view to remedying this confusion that the Government of India took the matter up in 1904, and addressed to the Local Governments, and through them to all local bodies, a long letter which reviewed the situation and made suggestions for the future The essential points in this letter are indicated below

In India we have already a standard time, which is very generally, though by no means universally, recognised It is the Madras local universally, recognised It is the Madras local time, which is kept on all rullway and telegraph lines throughout India and which is 5h 21m. Similarly, 103 in advance of Greenwich Rangoon local time is used upon the railways and telegraphs of Burma, and is 6h 24m 47s ahead of Greenwich But neither of these standards bears a simple and easily remembered relation to Greenwich time

"The Government of India have several times been addressed by beientific Societies, both in India and in England, and urged to fall into line with the rest of the civilised world And now the Royal Society has once more returned to the attack. The Committee of that Society which advises the Government of India upon matters connected with its observatories, writes - 'The Committee think that a change from Madras time to that corresponding to a longitude exactly 51 hours east of Greenwich would be an improvement upon the existing arrangements, but that for international scientific purposes the hourly zone system, making the time 5 hours in advance of Greenwich in the west, and Chours in advance in the cast of India would be preferable

"Now if India were connected with I urope by a continuous series of civilient nations with their continuous rallway exetems all of which had 1 adopted the I propen hour zone sitten, it would : be imperative upon India to conform and to adopt the second suggestion. But as she is not, and

"It is believed that this will be the letter solution. There are obvious of jectors to drawing an arbitrary line right across the tichest and most populous portions of Irdia and so as to lisect all the mala lines of community ention, and keeping the endiffering by and e on opposite rides of that line. India nest come accirion i to a uniform riaminal in the fitters time of the relimans, and the sets, it than for it of a do the standard mould appear to be a retroctable rep; which it would be all includes the a retroctable rep; which it would be all includes the analysis of a retroctable rep; which it would be a retroctable rep; which it would be a retroctable rep; which it would be a retroctable rep; which it was a same the set of the results of t

authorities Moreover, it is very desirable that whatever system is adopted should be followed by all Europeans and Indians alike, and it is certain that the double standard would puzzle the latter greatly, while by emphasising the fact that railway differed from local time, it might postpone or even altogether prevent the acceptance of the former instead of the latter by people generally over a large part of India The one greatadvantage which the second possesses over the first alternative is, that under the former, the difference between local and standard time can never exceed half an hour whereas under the latter it will even exceed an hour in the extreme cases of Karachi and Quetta But this inconvenience is believed to be smaller than that of keeping two different times on the Indian system of railways and telegraphs.

"It is proposed, therefore, to put on all the railway and telegraph clocks in India by 8m 50s They would then represent a time 5; hours faster than that of Greenwich, which would be known as Indian Standard Time and the difference between standard and local time at the places mentioned below would be approximately as follows, the figures represent-ing minutes, and F and S meaning that the standard time is in advance of or behind local time respectively—Dibrugath 51 S., Shillong 35 S., Calcutta 24 S., Allahabad 2 F., Madras 9 F., Lahore 33 F. Bombay 39 F., Peshawar 44 F., Karachi 62 F., Quetta 62 F.

"This standard time would be as much as "4 and 55 minutes behind local time at Mandalay and Rangoon, respectively, and since the railway system of Burma is not connected with that of India, and already keeps a time of its own, namely, Rangoon local time it is not suggested that Indian Standard Time should be adopted in Burms. It is proposed, however, that instead of using Rangoon Standard Time as at present, which is 6h 24m 47s in alvance of Greenwich, a Burma Standard Time should be adopted on all the Burmers rails aye and telegraphs, which would be one loar in a trace of Indian Standard Time, or 61 ho as abeal of the second suggestion. But as she is not, and as she is as much isolated by uncivilised States as Cape Colony is by the occan, it is open to there to follow the example of that and some other similarly situated colonies and to adopt a further of the constant of the constant of the direct suggestion. munication with other courtd .

> "atan tand time will to unhave been Excited mills rate and to complie for the where of the Ir flam I mpire. It generals coupling to a specific to the latest white it is matter which must be I to the local community in each

> It is directly to profit, without a most of the literary to be recorded by the proposal to any the literary to be the literary

rule, because they are not to be met with in the majority of Asiatic languages, e.g. we have lareta from 'carreta' (light cart), amán from 'amarra' (cable), bora from bôrra' (wine lees), phór from 'fôrro' (liming)

- 12 Lh and nh which have no sounds corresponding to them are rendered respectively by by or l and ny or n. Thus we have twiding, twidla, twidla twidló from 'toalha' (towel) willn, cl. from 'velho (old), Lunyá from 'cunha' (wedge); barlín from 'barquinha' (a skiff). Konkani, Malayalam and some other languages preserve the original sound in some words representing it by ñ or ññ. Thus we get modiñ or modinh (Konk) from 'modinha' (song), viñn (Malayal) from vinho' (wine)
- 13 S intervocable (=z) is generally changed into j (sometimes into s sibilant) either because many of the languages have no such sound or because it is only associated with the syllables of certain vowels (a, o, u, as in Konkani, Marathi, Sindhi). Thus we have mêj from 'mesa' (table), kamij or kamis from 'canusa' (shirt).
- 14 R and l change places in those languages which have these sounds but in those which have only one of them the one is replaced by the other. Thus we have ladel, bhoblo from 'cadeira' (chair), and 'abobora' (pumpkin), boru, charamera (Jap) from 'bôlo' (cake), and 'charamela' (bagpipe), complador, patili (Pid-Engl) from 'comprador' (steward) and 'padre' (priest)
 - 15 Surd consonants frequently become sonant, but rarely does the reverse of this happen. Thus we

¹ In Konkanı j is usually changed into z after a, o, u imaz from Port imagem (image), relöz from Port relöjio (watch), āzud from Port ajuda (assistance)

Coinage, Weights and Measures.

ration of the rupee (containing 165 grains of district to district, and even from village to pure silver) was approximately equal to 2s, village, but in the standard system the tola is rone-tenth of a £, and for that period it is 180 grains Troy (the exact weight of the rupee), and to convert rupees into sterling by striking off the final cipher (Rs 1,000—£100) But maund 82 28 lb The standard is used in official reports is compared with gold throughout the world, here came a serious and progressive fall in the early a serious and progressive fair in the exchange, until at one time the gold value of the rupee dropped as low as 1s. In order to provide a remedy for the heavy loss caused to the Government of India in respect of its gold payments to be made in England, and also to relieve foreign trade and finance from the Inconvenience due to constant and any he inconvenience due to constant and unoreseen fluctuations in exchange, it was re-colved in 1893 to close the mints to the free colonge of silver, and thus force up the value of the rupee by restricting the circulation. The intention was to raise the exchange value of the rupee to 1s 4d., and then introduce a gold standard at the rate of Rs 15=£1 gold standard at the rate of HS 15=±1 From 1899 enwards the value of the rupee was maintained, with insignificant iluctuations, at the proposed rate of 1s 4d until February 1920 when the recommendation of the Committee appointed in the previous year that the rupee should be linked with gold and not with sterling at 2s instead of 1s 4d was adopted This was followed by great fluctuations (See article on Currency System). ions (See article on Currency System).

Notation -Another matter in connection with the expression of money statements n terms of rupees requires to be explained The method of numerical notation in India liffers from that which prevails throughout Europe Large numbers are not punctuated in hundreds of thousands and millions, but in akhs and crores A lakh is one hundred thousand (vritten out as 1,00,000), and a crore is one hundred lakes or ten millions (written out as 1,00,00,000) Consequently, according to the exchange value of the rupee, a lake of rupces (Rs 100,000) may be read as the equi-valent of £10,000 before 1873, and as the equivalent of (about) £0 667 after 1899, while a crore of rupees (Rs 1,00,00,000) may similarly be read as the equivalent of £1,000,000 before 187, and as the equivalent of (about) £666 667 after 1899 With the rupes at 18 6d. a lakh is equivalent to £7,500 and a crore is equivalent to £750,000

Coinage —Finally, it should be mentioned that the rupee is divided into 16 annas, a fraction commonly used for many purposes by both Indians and Furopeans The anna was formerly reckoned as 11d it may now be considered as exactly corresponding to 1d The anna is again sub-divided into 12 pies

Weights—The various systems of weights used in India combine uniformity of scale with immense variations in the weight of units

As the currency of India is based upon the The scale used generally throughout Northern upee, statements with regard to money are India, and less commonly in Madras and generally expressed in rupees, nor has it been Bombay, may be thus expressed one maund—ound possible in all cases to add a conversion 40 seers, one seer—16 chittaks or 80 tolas, not sterling Down to about 1873 the gold The actual weight of a seer varies greatly from

Retail -For calculating retail prices, the universal custom in India is to express them in terms of sees to the rupee Thus, when prices change what varies is not the amount of money to be paid for the same quantity, but the quanti ty to be obtained for the same amount of money In other words, prices in India are quantity In other words, prices in India are quantity prices, not money prices. When the figure of quantity goes up, this of course means that the price has gone down, which is at first sight perplexing to an English reader. It may, however, be mentioned that quantity prices are not altogether unknown in England especially at small shops where pennyworths of many groceries can be bought. Eggs, likewise, are commonly sold at a varying number for the From are commonly sold at a varying number for the e was shilling If it be desired to convert quantity atlons, prices from Indian into English denominations until without having recourse to money prices (which would often be misleading), the following scale may be adopted—based upon the assumption that a seer is exactly 2 lb, and that the value of the rupee remains constant at 1s 4d, 1 seer per rupee=(about) 3 lb for 2s, 2 seers per rupee=(about) 6 lb for 2s, and so on.

The name of the unit for square measure ment in India generally is the bigha, which varies greatly in different parts of the country But areas have been expressed in this work either in square miles or in acres

Proposed reforms—Indian weights and measures have never been settled upon an organised basis suitable for commerce and trade characteristic of the modern age. They vary from town to town and village to village in a way that could only work satisfactorily so long as the dealings of towns and villages were self-contained and before roads and rail ways opened up trade between one and the other it is pointed out that in England a hog-head of wine contains 63 gallons and a hogshead of wine contains 63 gallons and a hogshead of beer only 54 gallons, that a bushel of corn welghs 46 lbs in Sunderland and 240 lbs in Comwall, that the English stone weight represents 14 lbs in popular estimation, but only 5 lbs, if we are weighing glass, and eight for meat, but 6 lbs for cheese Similar instances are multiplied in India by at least as many times as India is bigger than England If we take, for instance, the maund denomination of weight common all over India, we shall find that in a given city there are nearly as many maunds as there are articles are nearly as many maunds as there are articles to weigh. If we consider the maund as be-tween district and district the state of affairs is worse. Thus in the United Provinces alone,

this is well high impossible in view of the enormous area and the immense variety of languages to be explored and investigated not to speak of other obvious difficulties.

Even a seasoned polyglot would find it very difficult to be able to acquire, at the end of many years complete personal knowledge of about half a dozen languages, and these of one or two language groups only. It is just on this account that there are as yet no comparative dictionaires just as there are comparative grammars of great value. Such as exist are small vocabularies or dictionaires of some dialects or of two or three of cognate languages.

Another way, supplementary but deficient withal, would be to obtain with the help of competent persons a list of Portuguese vocables that have found their way into their respective languages. This again is not easy, because there are few who would show any inclination for a task so thankless, involving the assembling of words which do not spontaneously present themselves to the mind when dissociated from any specific ideas. Even with the help of obliging friends it was not possible for me to secure more than three lists of Tamil, one of Bengali, one of Kanarese, and one of Telugu, and these too were incomplete and summary. I am not aware that such lists of Portuguese words have been made, incomplete though they be, excepting one relating to Hindustani (Schuchardt, op cit.) and some others bearing upon the languages of the Malayo-Polynesian group

Under these circumstances the only course to take was to run through, word by word, the dictionaries of such languages as

¹ John Beames, Comparative Grammar of Aryan Languages Robert Caldwell, A Comparative Grammar of the Drawdian or South Indian Family of Languages

² In 1868 Sir W W Hunter published a list of 186 vocables in 120 non-Aryan languages or dialects under the title of Comparative Dictionary of the Languages of India and High Asia F A Sevettenham likewise brought out his Comparative Vocabulary of the Dialects of the Wild Tribes inhabiting the Malayan Pennisula

The History of India in Outline.

No history of India can be proportionate; and the briefest summary must suffer from the Even a wholesale acceptance as history of mythology, tradition, and folklore will not make good, though it makes picturesque, the many gaps that exist in the early history of India. and, though the labours of modern geographers and archæologists have been amazingly fruitful, it cannot be expected that these gaps will ever be filled to any appreciable extent. Approximate accuracy in chronology and an outline of dynastic facts are all that the student can look for up to the time of Alexander, though the briefest excursion into the by-ways of history will reveal to him many alluring and mysterious fields for speculation There are, for example, to this day castes that believe they sprang originally from the loins of a being who landed "from an impossible boat on the shores of a highly improbable sea ", and the great epic poems contain plentiful state-ments equally difficult of reconciliation with modern notions of history as a science But from the Jataka stories and the Puranas, much valuable information is to be obtained, and, for the benefit of those unable to go to these and other original sources, it has been distilled by a number of writers

The orthodox Hindu begins the political history of India more than 3,000 years before Christ, with the war waged on the banks of the Jumna between the sons of Kuru and the to leave the Indian provisons of Pandu. Recent excavations by the by war but not hellenized Archæological Department in the Indus Valley at Harappa in the Punjab, but more particularly at Mohenjc Daro in Sind, carry us back even further They have uncovered sites of cities bearing the marks and containing the relics of a high civilisation stated by the Department to be Sumerian The excavations are proceeding under special direction and have excited the greatest interest in scientific circles throughout the world, but the general critic omits several of those remote centuries and takes 600 BC, or At that time thereabouts as his starting point much of the country was covered with forest, but the Aryan races, who had entered India from the north, had established in parts a form of civiliza-tion far superior to that of the aboriginal savages and to this day there survive cities, like Benares, In like manner founded by those invaders the Dravidian invaders from an unknown land, who overran the Deccan and the Southern part of the Peninsula, crushed the aborigines, and at a much later period, were themselves subdued by the Aryans Of these two civilizing forces, the Aryan is the better known, and of the Aryan kingdoms the first of which there is authentic record is that of Magadha, or Bihar, on the Ganges It was in, or near, this powerful kingdom that Jainism and Buddhism had their origin, and the fifth King of Magadha, Bimbisara by name, was the friend and patron of Gautama Buddha. The King mentioned version of Asoka were amazing. He was not was a contemporary of Darius, autocrat of intolerant of other religions, and did not enfertia (521 to 485 BC) who annexed the deavour to force his creed on his children. Indus valley and formed from his conquest. But he initiated measures for the programman Indian satrapy which paid as tribute the of his doctrine with the result that Buddim

equivalent of about one million sterling tailed history, however, does not become possible until the invasion of Alexander in 326 B C

Alexander the Great

That great soldier had crossed the Hindu Kush in the previous year and had captured Aornos, on the Upper Indus In the spring of 326 he crossed the river at Ohind, received the submission of the King of Taxila, and marched against Porus who ruled the fertile country between the rivers Hydaspes (Jhelum) and Akesines (Chenab) The Macedonian carried all before him, defeating Porus at the battle of the Hydaspes, and crossing the Chenab and Ravi But at the River Hyphasis (Blas) his weary troops mutinied, and Alexander was forced to turn back and retire to the Jhelum where a fleet to sail down the rivers to the sea was nearly ready. The wonderful story of Alexander's march through Mekran and Persia to Babylon, and of the voyage of Nearchus up the Persian Gulf is the climax to the narrative of the invasion but is not part of the history of India Alexander had stayed nineteen months in India and left behind him officer to carry on the Government of the Lingdoms he had conquered but his death at Babylon, in 323, destroyed the fruits of what has to be regarded as nothing but a brilliant raid, and within two years his successors were obliged to leave the Indian provinces, heavily scarred

The leader of the revolt against Alexander's generals was a young Hindu, Chandragupta, who was an illegitimate member of the Royal Family of Magadha He dethroned the ruler of that kingdom, and became so powerful that he is said to have been able to place 600,000 troops in the field against Seleucus, to whom Babylon had passed on the death of Alexander This was too formidable an oppostion to be faced, and a treaty of peace was concluded between the Syrian and Indian monarchs which left the latter the first paramount Sovereign of India (321 BC) with his capital at Pataliputra, the modern Patna and Eanklpore of Chandraguptas court and advisor the control of the control o ministration a very full account is preserved in the fragments that remain of the hi-tory compiled by Megasthenes, the ambastador sent to India by Schueus His memorable reign ended in 297 B C when he was succeeded by his son Bindusara, who in his turn was succeeded by Asoka (269—231 B C) who inscriptions This king, in an unusually bloody war, added to his dominions the king dom of Kalinga (the Northern Cucars) and then becoming a convert to Buddhism, re-olved for the future to abstain from conquest beforce of arms. The consequences of the consuch as tabaco (tobacco), arratel (pound weight) chá (ten) café (coffee) whether certain terms are in fact not instances of parallelisms, sometimes with very slight change of meaning, such as chapa (stamp or mark) tanque (tank) varanda (veranda).

XII The Method observed in this Worl

Among the Portuguese words in this work, there are some whose etymology is evident or almost certain, there are others whose source in the indigenous languages is doubtful or improbable and, finally, there are a few of which it can be said with certainty or with great probability, that they are not the originals of the Asiatic vocables.

Those which come under the second head I have marked with a note of interrogation placed at the very beginning when the doubt embraces all the languages mentioned, or placed before one or more of them when the uncertainty is limited to these. Those of the third class I have distinguished with an asterisk, and I have indicated the reasons for the inclusion of such in my list and also for rejecting them as the etymons of the Asiatic words, I have done this lest it might appear that I had omitted to mention them because I was not acquainted with them

There are some words which are not genuine Portuguese words and which, therefore, the Portuguese could not have carried with them from Europe, they belong to an Asiatic language or group of languages. But as such words form part of the Asio-Lusitanian vocabulary and were adopted and disseminated by the Portuguese I thought they should have a place in this work after due reservation had been made

^{1 &#}x27;Derivations of names are much better ascertained in the countries where they originate, and where we know the languages well, than in strange countries where we searcely know a word much less know the derivations' Garcia da Orta, Colloquios dos Simples e Drogas da India, LVIII (Markham's Translation p 462)

dom which exercised an influence on India ings, stand out with distinction wholk disprepertionate to its size. The only other Lingdom of Importance was that of Kanaui-in the Doab and Southern Oudhwhich still retained some of the power to which it had reached in the days of Har-ha, and of which the renown extended to China and Irabla

With the end of the period of anarchy, the political history of India centres round the Raiputs One clan founded the kingdom of another held Malwa, another (the Chauhans) founded a kingdom of which Ajmer was the capital, and so on Kanauj fell into the hands of the Rathors (circ 1040 A D) and the dynasty then founded by that branch of the Gaharwars of Benares became one of the most famous in India Later in the same century the Chauhans were united, and by 1163 one of them could boast that he had conquered all the country from the Vindhyas to the Himalayas, including Delhi already a fortress a hundred years old. The son of this con-queror was Prithwi Raj, the champion of the Hindus against the Mahomedans. With his death in battle (1192) ends the golden age of the new civilization that had been evolved out of chaos, and of the greatness of that age there is a splendid memorial in the temples and forts of the Rajput states and in the two great philosophical systems of Sankaracharya (ninth century) and Ramanuja (twelfth cen-The triumph of Hinduism had been achieved, it must be added, at the expense of Buddhlsm, which survived only in Magadha at the time of the Mahomedan conquest and speedily disappeared there before the new faith

Mahomedan India

The wave of Mahomedan invaders that eventually swept over the country first touched India, in sind, less than a hundred years after the death of the Prophet in 632. But the tirst real contact was in the tenth century when a Turkish slave of a Persian ruler founded a kingdom at Ghazni, between Kabul and Kandahar A descendant of his Mahmud (967-1030) made repeated raids into the heart of India, capturing places so far apart as Multan, Kanauj, Gwallor, and Somnath in Kathlawar, but permanently occupying only a part of the Punjab Enduring Mahomedan rule was not established until the end of the twelfth century, by which time, from the little territory of Ghor, there had arisen one Mahomed Ghori capable of carving out a Lingdom stretching from Peshawar to the Bay of Bengal Prithwi Raj, the Chauhan ruler of Delhi and Ajmer, made a brave stand against, and once defeated, one of the armies of this ruler, but was himself defeated in the following year Mahomed Ghori was murdered at Lahore (1206) and his vast kingdom, which had been governed by satraps, was split up into what were practically independent sovereignties of these satraps, Qutb-ud-din, the siave ruler of Delhi and Lahore, was the most famous, and is remembered by the great mosque he built near the modern Delhi Between his rule and that of the Mughals, which began in died in 1605, leaving behind him a record that 1526, only a few of the many Kings who governed and fought and built beautiful build-who married the Persian lady Nur Jahan,

One of these was Ala-ud-din (1206-1318), whose many expeditions to the south much weakened the Hindu Kings, and who proved himself to be a capable administrator Another was Shah, of the house of Tughlag, whose administration was in many respects admirable, but which ended, on his abdication, in confusion. In the reign of his successor, Mahmud (1398-1413), the Lingdom of Delhi went to pieces and India was for soven months at the mercy of the Turkish conqueror Talmur It was the end of the fifteenth century before the kingdom, under Slkandar Lodi, began to recover His son, Ibrahim, still further extended the kingdom that had been recreated, but was defeated by Babar, King of Kabul, at Panipat, near Delhi, in 1526, and there was then established in India the Mughal dynasty

The Mahomedan dynastics that had ruled in capital other than Delhi up to this date were of comparative unimportance, though some great men appeared among them Gujarat, for example, Ahmad Shah, the founder of Ahmedabad, showed himself a good ruler and builder as well as a good soldier, though his grandson, Mahmud Shah Begara, was a greater ruler-acquiring same at sea as well as on land In the South various kings of the Bahmani dynasty made names for themselves especially in the long wars they waged on the new Hindu kingdom that had arisen which had its capital at Vijayanagar Of importance also was Adli Khan, a Turk, who founded (1490) the Bijapur dynasty of Adil Shahis one of his successors who crushed the Vijavanagar dynasty, and built the great mosque for which Bijapur is famous

The Mughal Empire

As one draws near to modern times it be comes impossible to present anything like a coherent and consecutive account of the growth of India as a whole Detached threads in the story have to be picked up one by one and followed to their ending, and although the sixteenth century saw the first European settlements in India, it will be convenient here to continue the narrative of Mahomedan India almost to the end of the Mughal Empire How Babar gained Delhi has already been told. His son Humayun, greatly extended his kingdom, but was eventually defeated (1540) and driven into exile by Sher Khan, an Afghan of great capabilities, whose short reign ended in 1545, The Sur dynasty thus founded by Sher Khan lasted another ten years when Humayun having snatched Kabul from one of his brothers, was strong enough to win back part of his old king-When Humayun died (1556) his eldest son, Akbar, was only 13 years old and was confronted by many rivals. Nor was Akbar well served, but his career of conquest was almost uninterrupted and by 1594 the whole of India North of the Ne budda had bowed to his authority, and he subsequently entered the Ahmednagar and captured Deccan great ruler, who was as remarkable for his religious tolerance as for his military prowess,

different languages, I have prepared separate lists of each of them, in these especial lists I have included words employed exclusively in Konkani or in Teto or Geloh, but which I had omitted from the body of the work

The Portuguese words or such as are presumed to be of Portuguese origin which I have listed in the different Asiatic languages are almost all which are known after reliable scientific inquiry to have been really employed in these several languages. As the result of mere conjectures or inferences, it would have been possible to augment greatly their number in cognate languages.

XIII Buef Notes on each of the Languages 1

In this chapter I shall present a brief survey of each of the languages which enter into this study in the order in which they figure in it. Besides the filiation and the nature of the language I shall set out the area, the population, the dialects, characters, the antiquity of its literature etc. I shall indicate also the vehicles by which the Portuguese words found their way into each. In respect of each of these languages I shall quote the various authorities whose studies have reference to the subject of this work.

appalling To cope with such conditions strong men were needed, and the Company was in this respect peculiarly fortunate, the long list of its servants, from Oxenden and Aungler to Hastings and Raffles, contains many names of men who proved themselves good rulers and far-sighted statesmen, the finest Empire-builders the world has known

Attempts to compete with the English were ado of course But the schemes of the made of course Emperor Charles VI to secure a share of the Indian trade were not much more successful than those made by Scotland, Denmarl, Sweden, and Russia By the French, who founded Pondicherry and Chandernagore to wards the end of the 17th century, much more was achieved, as will be seen from the follow ing outline of the development of British rule

The French Wars

When war broke out between England and France in 1744, the French had acquired a strong position in Southern India, which had become independent of Delhi and was divided into three large States-Hyderabad, Tanjore, and Mysore-and a number of petty states under local chieftains In the affairs of these States Dupleix, when Governor of Pondicherry, had intervened with success, and when Madras was captured by a French squadron, under La Bourdonnais (1746) Dupleix wished to hand it over to the Nawab of Arcot-a deputy of the Nizam's who ruled in the Car-natic. The French, however, kept Madras, repelling an attack by the disappointed Nawab as well as the British attempts to recapture it The treaty of Alx-la-Chapelle restored Madras to the English The fighting had shown the Indian powers the value of European troops, and this was again shown in the next French war (1750-54) when Clive achieved enduring fame by his capture and subsequent defence of Arcot This war arose from Dupleix supporting candidates for the disputed successions at Arcot and Hyderabad while the English at Madras put forward their own nominees One of Duplets's officers, the Marquis de Bussy, persuaded the Nizam to take into his pay the army which had established his power, and in return the Northern Circars, between Orissa and Madras, was granted to the French This territory, however, was cap-tured by the English in the seven years war (1756-3) Dupleix had by then been re-called to France Lally, who had been sent to drive the English out of India, captured Fort St David and invested Madras But the victory which Colonel (Sir Eyre) Coote won at Wandiwash (1760) and the surrender of Pondicherry and Gingee put an end to the French ambitions of Empire in Southern India Pondicherry passed more than once from the one nation to the other before settling down to its present existence as a French colony in miniature

Battle of Plassey

While the English were fighting the third French war in the South they became involved | in grave difficulties in Bengal, where Siraj-ud- received the revenues and maintained the

Kelgwin in Bombay threatened to stifle the Daula had acceded to power. The head-infant settlement. The public health was quarters of the English at Calcutta were bad and the rate of mortality was at times threatened by that ruler who demanded they should surrender a refugee and should cease fortifications They refused and building he marched against them with a large army. some of the Linglish took to their ships and made off down the river, the rest surrendered and were cast into the jail known as the "Black Hole" From this small and stifling room 23 persons, out of 146, came out alive the next day Clive who was at Madras, largerighted a scaled for Calcutta with Admired immediately sailed for Calcutta with Admiral Watson's squadron, recaptured the town (1757), and, as war with the French had been proclaimed, proceeded to take Chandernagore The Nawab Siraj-ud-Daula then took the side of the French, and Clive, putting forward Mir Jafar as candidate for the Nawab's throne, marched out with an army consisting of 900 Europeans 2,000 sepoys and 8 pieces of artillery against the Nawab's host of over 50,000 The result was the historic battle of Plassey (June 23) in which Clive, after hesitating on the course to be pursued, routed the Nawab Mir Jafar was put on the throne at Murshidabad, and the price of this honour was put at £2,340,000 in addition to the grant to the Company of the land round Calcutta now known as the District of the twenty-tour Parganas In the year after Plassey, Clive was appointed Governor of Bengal and in that capacity sent troops against the French in Madras and in person led a force against the Oudh army that was threatening Mir Jafar, in each case with success From 1760 to 1765 Clive was in England During his absence the Council at Calcutta deposed Mir Jafar and, for a price, put Mir Kasim in his This ruler moved his capital Monghyr, organized an army, and began to intrigue with the Nawab Wazir of Oudh soon found, in a dispute over customs dues, an opportunity of quarrelling with the English and the first shots fired by his followers were the signal for a general rising in Bengal About 200 Englishmen and a number of sepoys were massacred, but his trained regiments were defeated at Gheria and Oodeynullah, and Mir Kasim sought protection from the Nawab of Oudh But in 1764, after quelling a sepoy mutiny in his own camp by blowing 24 ring leaders from the guns, Major (Sir Hector) Munro defeated the joint forces of Shah Alam, the Mughal Emperor, and the Nawab of Oudh in the battle of Buxar In 1765 Clive (now Baron Clive of Plassey) returned as Governor "Two landmarks stand out in his policy First, ne sought the substance, although not the name, of territorial power, under the fiction of a grant from the Mughal Emperor Second, he desired to purify the Company's service, by prohibiting illicit gains, and by guaranteeing a reasonable pay from honest sources. In neither respect were his plans carried out by his immediate successors. But our efforts towards a sound administration our efforts towards a sound administration date from this second Governorship of Clive as our military supremacy dates from his vic-tory at Plassey" Before Clive left India, in 1767, he had readjusted the divisions of Northern India and had set up a system of Government in Bengal by which the English

enriched by Portuguese and Kanarese words. The language spoken in Illias (the insular portions of Goa) partakes of the characteristics of the dialects of the two afore-mentioned districts.

With regard to the nature and the origin of the Konkani language I shall transcribe what I wrote in my Konkani-Portugues. Dictionary—'From what precedes I will briefly sum up my conclusions—(1) Konkani is an Arvan language and inflexional not Diavidian and agglutinative—(2) it resembles Bālabhāshā, (3) it is less removed from Sanskrit in its grammatical structure and in its vocabulary than is Marathi. (4) it is not a dialect or corruption of Marathi—(5) it approximates more to ancient Marathi (which in its turn comes very near to Bālabhāshā) than to the modein, (6) it is allied very much in its phonetic structure to the Gaurian languages of the North—specially Bengali, (7) it represents with much probability Sarasvati which orientalists regard as being extinct, for those who introduced it into the Konkan were emigrants from Tirhotra or Tirhut.

In Goa, for the purposes of writing, Roman characters with Portuguese sound values are employed, in the north, Marathibālbodh or modi characters are used, in Kanara Kanarese or Roman characters. Old writings in Kanarese as well as in Devanagri are extant and the scripts of these two languages must be regarded as the proper alphabets of Konkani

The territory in which Konkam is most spoken being under Portuguese rule for four centuries, it is but natural that it should have admitted Portuguese words more largely than any other language. A tenth or perhaps more of the colloquial speech of the Velhas Conquistas is made up of Portuguese words or of words that are derived from Portuguese. In the Dictionary referred to above I included the following. (1) All words of Portuguese origin which had been adopted by one or more of the Oriental

¹ See Sahyādri-Lhanda, edited by Dr Cunha Hoernle and Grierson find, ⁴ Konkani has intimate relationship with Hindi the direct representative of ancient Maharastri, ³

Sikh Wars

Lord Illenborough's other wars-the conquest of Sind by Sir Charles Napler and the supprection of an outbreak in Gwallor-were followed by his recall, and the appointment of Sir Henry (lat Lord) Hardings to be Governor General A soldier Governor General was not unacceptable, for it was felt that a trial of strength was imminent between the British and the remaining Hindu power in India, the Silhs Ranjit Singh, the founder of the Sikh Kingdom, had died in 1839, loyal to the end to to the census of 1901, in this I have included the Konkani that is spoken in British territory. Its zone which takes in a vast area extends from Goa to the river Damaun (Daman Ganga), and on its eastern boundaries impinges on Kanarese and Telugu. It has three principal dialects. Khandesi, Dakhini and Konkani, to these some philologists add Gomantaki, more correctly called Konkani.

Marath owing to its importance occupies the second place in the Gaurian languages. It is much cultivated, there are primary schools in all parts where it is taught and it possesses a rich literature, especially suited for school purposes ¹, its oldest literary specimens which are poetical and religious belong to the 13th century

Marathi has two alphabets $B\bar{a}lbodh$ (or $B\bar{a}lbod$) which is, with slight variations, the same as Devanagei or Sanskrit, and is employed in the schools and in the piess, Modi or Mod, which is peculiar to it, has fewer characters and makes no distinction between short and long vowels (i, \tilde{i} , u, \tilde{u}), it is written in a cursive manner without any separation of letters and is employed for correspondence and in manuscripts

Its copious vocabulary, consisting of 20,000 words, is made up of the aboriginal Turanic stock, of Prakrit through Magadhi (the ancient language of Behar), of the Sanskrit, through its literature, of Arabic and Persian owing to the Mussulman domination and the influence of Hindustani, and of Portuguese and English

The infiltration of Portuguese words into the language is due to the former Portuguese dominion over Bombay, Thana, Bassein and Chaul, to commerce (Surat, Bijapur), to the vicinage of Goa and Damaun, to the Portuguese missions in the greater part of the Marathi language-field, and to the Portuguese dialect of the Indian Christians who now go by the name of

¹ Molesworth's and Candy's dictionaries deserve especial mention as models in their class

Nicholson formed up his troops within the walls By nightfall the British, with a loss of nearly 1,200 killed and wounded, had only secured a footbold in the city. Six days' street fighting followed and Delhi was won, but the gallant Nicholson was killed at the head of a storming party. Bahadur Shah was taken prisoner, and his two sons were shot by Captain Hudson.

Massacre at Cawnpore

At Cawnpore the sepors mutinied on June 27 and found in Nana Sahib, the helr of the last Peshwa, a willing leader in spite of his former professions of loyalty. There a Luropean force of 240 with six guns had to protect 870 non-combatants, and held out for 22 days, surtendering only on the guarantee of the Nana that they should have a safe conduct as far as Allahabad. They were embarking on the boats on the Ganges when fire was opened on them, the men being shot or hacked to pieces before the eyes of their wives and children and the women being mutilated and murdered in Cawnpore to which place they were taken back Their bodies were thrown down a well just before Havelock, having defeated the Nana's forces, arrived to the relief. In Lucknow a small garrison held out in the Residency from July 2 to September 25 against tremendous odds and enduring the most fearful hardships. The relieving force, under Havelock and Outram, was itself invested, and the garrison was not finally delivered until Sir Colin Campbell farrived in November Fighting continued for 18 months in Oudh, which Sir Colin Campbell finally reduced, and in Central India, where Sir Hugh Rose waged a brilliant campaign against the disinberited Rani of Jhans!—who died at the head of her troops—and Tantia Topl,

Transfer to the Crown

and the end of the mutiny there began a new era in India, strikingly marked at the outset by the Act for the Better Government of India (1858) which transferred the entire administration from the Company to the Crown By that Act India was to be governed by, and in the name of, the Sovereign through a Secretary of State, assisted by a Council of fifteen members. At the same time the Governor-General received the title of Viceroy. The European troops of the Company, numbering about 24,000 officers and men were—greatly resenting the transfer—amalgamated with the Royal service, and the Indian Navy was abolished On November 1, 1858, the Viceroy announced in Durbar at Allahabad that Queen Victoria had assumed the Government of India, and proclaimed a policy of justice and religious toleration. A principle already enunciated in the Charter Act of 1833 was reinforced, and all of every race or creed, were to be admitted as far as possible to those offices in the Queen'z service for which they might be qualified. The aim of the Government was to be the benefit of all her subjects in India—"In their prosperity will be our strength, in their contentment our security, and in their gratitude our best reward." Peace was proclaimed in July 1859, and in the cold weather Lord Canning went on tour in the northern provinces, to receive the homage of loyal chiefs and to assure that the "policy of lapse" was at an end A number of other important reforms marked

the closing years of Canning's Viceroyalty. The India Councils Act (1861) augmented the Governor-General's Council, and the Councils of Madras and Bombay by adding non-official members, European and Indian, for legislative purposes only By another Act of the same year, High Courts of Judicature were constituted. To deal with the increased debt of India Mr James Wilson was sent from England to be Financial Member of Council, and to him are due the customs system, income tax. Ilcense duty, and State paper currency The cares of office had broken down the Viceroy's health His successor, Lord Elgin, lived only a few months after his arrival in India, and was succeeded by Sir John (afterwards Lord) Lawrence, the "saviour of the Punjab"

Sir John Lawrence

The chief task that fell to Sir John Lawrence was that of reorganising the Indian military system, and of reconstructing the Indian army. The latter task was carried out on the principle that in the Bengal army the proportion of Europeans to Indians in the infantry and cavalry should be one to two, and in the Madras and Bombay armies one to three the artillery was to be almost wholly European The re-organisation was carried out in spite of financial difficulties and the saddling of Indian revenues with the cost of a war in Abyssinia with which India had no direct concern, but operations in Bhutan were all the drain made on the army in India while the re-organising process was being carried on Two severe famines—in Orissa (1866) and Bundelkhand and Upper Hindustan (1868-9)-occurred, while Sir John Lawrence was Viceroy, and he laid down the principle for the first time in Indian history, that the officers of the Government would be held personally responsible for taking every possible means to avert death by starva-tion. He also created the Irrigation Department under Col (Sir Richard) Strachey. commercial crises of the time have to be noted. One seriously threatened the tea industry in Bengal The other was the consequence of the wild gambling in shares of every description that took place in Bombay during the years of prosperity for the Indian cotton industry caused by the American Civil War. The "Share Mania," however, did no permanent harm to the trade of Bombay, but was, on the other hand, largely responsible for the series of splendid buildings begun in that city during the Governorship of Sir Bartle Frere Sir John Lawrence retired in 1869, having passed through every grade of the service, from an Assistant Magistracy to the Viceroyalty Lord Mayo, who succeeded him, created an Agricultural Department and introduced the system of Provincial Finance, thus fostering the wild gambling in shares of every descripsystem of Provincial Finance, thus fostering the impulse to local self-government He also laid the foundation for the reform of the salt duties, thereby enabling his successors to abolish the inter-provincial customs lines Unhappily his vast schemes for the development of the country by extending communications of every kind were not carried out to the full by him, for he was murdered in

4 Hindi

Hindi is the most important language in India, occupying almost the centre of its language-field whether we look at it from the standpoint of area covering 248,000 square miles, or of the numbers that speak the language—almost 73 millions, or from its vitality in ever spreading itself and absorbing other languages, or from the number of its dialects—fifty-eight according to Cust, some of which can pass for real languages. There are philologists who consider that Gujarati, Panjabi and Nepalese should be considered as dialects of Hindi. Beames mentions the following as the principal dialects of the language. Maithili, Magadhi, Bhojpuri, Kosali, Brijbasha, Kanauji, Rajputani (group of dialects), Bundelkhandi. Sir Grierson divides Hindi into two parts. Eastern and Western.

Though Hindi is derived from Indo-Aryan, nevertheless, it contains a large number of words of Turanic descent and a considerable admixture of Arab-Persian loan words. It is generally written in the Devanagri script. Literary Hindi has passed through three stages, archaic, that is at least 700 years old, Hindi of the middle period and the current language.

The influence of Portuguese on it is principally mediate through the intervention of other neighbouring languages. It appears scarcely likely that the influence could have proceeded from politico-commercial relations which were not very frequent ¹

5 Hindustani

Without entering into the question whether Hindustam is a language by itself or rather a dialect of Hindi, as it is generally supposed to be, I am treating it under a separate head owing to the especial nature of my work. Formed from 16th century Persian which was the language spoken by the Mahommedan

¹ Shakespear assigns to Hindi a large number of the Portuguese words introduced into Hindustani

6 Laskarı-Hındustanı

Lascari or lascarim from the Persian lashkari, first employed by the Portuguese and subsequently adopted by the Dutch and the English in its original meaning, 'soldier',' came afterwards to denote the indigenous sailor and is in this sense synonymous with the Arab-Hindustani 'khalasi'. And as it is generally the Mussulmans who are the crews of vessels bound on long voyages their speech was given the name of Lashkari-Hindustani

Now, it is but natural that in the formation of this dialect of sea-faring men there should figure very many words from the language of those Europeans who were the first to cross the seas to India and who exclusively dominated them for a long period. The English language is to-day playing a similar, and in an equal measure, a supplementary part. The vocabulary of Lashkari-Hindustani is therefore an admixture of Hindustani, properly so called, of the Portuguese of the 16th and 17th centuries, and of the present-day English.

The study of this 'confusion of tongues' has a special interest because of the variety of forms and the phonetic changes which are represented in the Portuguese words which have issued from the speech of an unlettered people during the long space of

^{1 &#}x27;What was given as soldo (soldiers pay) and rations to the lascarins who were in the City' Castanheda, Historia do Descobrimento e Conquista da India

^{&#}x27;They divide among the soldiers of their flag ships who are called lascarins 'Damião de Góis, Chronica del Rei D Manuel, II, Ch 6

^{2 &#}x27;There were Portuguese sailors fewer than were needed and in their place Mohammedan lascaris who as they were interested only in their personal gain and had no experience in the handling of ships were a sort of hindrance' Antônio Bocarro, Dec XIII, p 25

^{&#}x27;With the exception of some (Portuguese) who go as masters or pilots on their own ships or on those of His Majesty, the crew and company are all Mohammedans who are called Laschares (whence it is that the soldiers were commonly designated Lascharis)' João de Lucena, Bk IV, Ch 1

^{3 &#}x27;Dass ursprünglich die ganze Seemannssprache des Laskaren portogiesisch war, das zu vermuten dürfte mit Hinblich auf die vorstehender Abhandlung dargelegten Thatsachen nicht allzuküher sein 'Schuchardt, Beiträge, etc

thus showing that the Legislative Assembly had no real control over finance The responsibilities of the Assembly were few Since the Government could override its decisions, its decisions became irresponsible In the Provinces, however, there was less irresponsibility, and consequently the members of the Legislative Councils were often the allies of Government But it took time for Indian opinion to realise that the Legislative Councils, however imperfect, were the instruments of order and good government Some years later, the boycett broke down. Mr C R Das, one of Mr Gandhi's chief lieutenants, decided to associate with the Legislature—ostensibly to destroy the reforms, but actually because he and many others had grown tired of a policy of mere negation The downfall of non-co-operation was further signalled by the election of a great Swarajist, Mr V J Patel, to be President of the Legislative Assembly—an office which he held until the summer of 1930

When Lord Irwin succeeded Lord Reading in 1926, the prospects of peace improved It was ordained by Statute that a Commission should examine the Indian Reforms within ten years of the inception of the Government of India Act In 1927 both the British Government and the Government of India agreed that the Commission should be appointed as early as possible Accordingly, in the autumn, it was announced that Sir John Simon and other members of Parliament should be members of a new Statutory Commission Their appointment was the occasion of a new outburst Neither Mr Gandhi's followers nor the moderates would support the Commission It was to be boycotted from the start The chief complaint was that all the members of the Commission were Europeans The Congress party, and even the moderates, demanded in its place a Round Table Conference and the promise, if not the immediate offer, of Dominion Status The boycott, however, was not very effective One by one the Provincial Councils decided to cooperate with the Simon Commission the Legislative Assembly, almost alone among the Legisla-tures stood consistently for boycott Yet it is tures, stood consistently for boycott Yet it is significant that before the Simon Commission had published its report, the Viceroy not only announced that the goal of Government in India was Dominion Status, but invited representatives of India to a Round Table Conference in London he stood where the moderates and half the Congress had stood two years before Meanwhile, Congress became still more extremist In January 1929, Mr Gandhi announced that if India was not given Dominion Status within a year, he would lead the campaign for Indepen dence He kept his word, and the Lahore Congress of December 1929, under the guidance of Pandit Tawharlal Nehru rather than Mr Gandhi, voted in favour of Independence

The new struggle began in earnest in March, 1930 Mr Gandhi first decided to break the Salt Laws He made an imposing march from Ahmedabad to the coast, where he ceremoniously manufactured salt that could not be taxed Non-co-operation was in full swing For a short time Bombay was virtually a Congress frankly disastisfied and City There were numerous arrests, and before the year closed, there were to be in India no less than fifty thousand people incarcerated for political offences.

The Government of Lord Irwin was assailed on all sides Some condemned it because was weak. others condemned it because it was repressive Its conduct had a curious reaction upon political opinion in England, possessed the dubious advantage of a minority Government At one time the Conservatives were demanding the recall of Lord Irwin Similarly, Provincial Governors were criticised for alleged inactivity In the summer few predicted any success for the Round Table Conference The Simon Commission published a Report that was condemned by practically every party in India it was practically a still-born Report Events had moved too rapidly The Round Table Conference, however, proved to be the culminating point of a worldwide interest in the Indian political struggle The Princes, at first, assumed the lead. They stood for a Federal Government in which the States and British India should be partners once the extremists, who had intended to ignore the Conference, showed the keenest concern Conference, despite all evil prognostications, represented the voice of India

In February 1931 the Round Table Conference delegates returned to India on the understanding that there was to be a second Round Table Conference in London, but that meanwhile certain problems, such as that of separate communal electorates, were to be worked out among themselves in India The first thing they did on their return was to attempt to persuade Congress to call off the Civil Disobedience Movement and participate in the Conference Congress, however, were in bitter mood, many local committees even did their best to prevent the decennial census in February from being an accurate index to the state of the population There were a number of leverish conferences between Lord Irwin, Mr Gandhi, and Sir Tej Bahadur Sapru. Mr Gandhi and other prominent Congress leaders were released from prison specially to confer with Government officials and the conferences were conducted in a friendly and informal fashion. The upshot was the signing of the Irwin-Gandhi Pact at Delhi in March which provided on the one hand for Congress to call off the civil disobedience movement the next to be a second of the civil disobedience. movement, the no tax campaign, the boycott of British goods, and other cognate activities, and on the other hand for Government to extend an amnesty to political prisoners, to permit the manufacture of salt on the coast, and make a number of similar concessions

When in April Lord Willingdon arrived in India to take up his duties as Viceroy and Governor-General, Lord Irwin left the country amid many tributes to his statesmanship Lord Willingdon's first few months were spent in preparing the way for the second Round Table Conference, the opening of which was fixed for November At first Congress refused to participate, alleging that Government had broken the Irwin-Gandhi agreement, but after much wavering Mr Gandhi set sail for England at the end of August. The Conference almost broke down over the communal problem Mr Gandhi was frankly dissatisfied and landed in India on December 28 hinting at a renewal of the civil disobedience campaign Early in January 1932 the struggle began again Mr Gandhi and the Congress leaders were imprisoned

immediately from the ancient speech of Magadha, the home of Buddhism ¹

Oriya has several dialects—the Northern, the Southern, that of Sumbhulpur, of Kalakundi, but that of Cuttack is regarded as the standard—Its alphabet is based on Devanagri with modifications in different parts of the language-field—It is the only one of the North Indian characters to adopt the curvilinear form of the upper strokes which in the other are horizontal ² Its earliest literary monuments date back to 400 years

The Portuguese influence on Oriya is chiefly mediate, through the intervention of Telugu in the south and Bengah in the north, though in former times there was commercial intercourse between the Portuguese and Orissa ³

9 Bengali

Bengal, as the name indicates, is the vernacular of Bengal spoken by more than 44 millions, Hindus as well as Mahommedans. It is at the present day much cultivated by the Babus, which is the most cultured and progressive class among the peoples of India. The literary tongue differs a great deal from the spoken, not only in respect of the vocabulary but even in its morphology.

¹ In this work I could not take in Bihari because of the absence of the lexicographical material Rudolf Hoernle and George Grierson began in 1885 the publication of A Comparative Dictionary of the Bihari Language, of this work only two parts have appeared which do not come up to the end of the first letter of the alphabet Bihari has four principal dialects Baisvari, Bhojpuri, Magadhi, and Maithili The last named passed for the standard because it is the most developed and cultivated and because it has literary monuments which go as far back as the 14th century. The natural presumption is that there would be found in it the same Portuguese words as are met with in Hindi

² Cust tries to explain this peculiarity by saying that it was necessitated by the writing materials being an iron stylus and a leaf of the fan-palm, straight moised lines would have split the palm. But such materials are or were common to other languages

^{3 &#}x27;The principal sovereigns with whom we had intercourse because of their domains being on the sea coast were The King of Bisnaga, of Orixá, of Bengal, of Pegu, of Siam, and of China 'João de Barros, Dec I, IX, 2

The annual contribution is in no case to be subject to increase in the future and if reduction of the aggregate is found possible by the Government of India reductions are to be made in fixed projections from the quota of the several provinces.

Responsibility—The first steps towards responsibility were to transform the Provincial Legislative Council Into a body of sufficient size and with a sufficiently large elected majority (which the Act fixes at 70 per cent as a minimum) to represent adequately public opinion in the province, and to create an electorate. The first franchise rules have given the vote to about 5,000,000 of the adult male population, and have enabled the Legislative Council of any Governor s province; to extend the franchise to women. The

Neither the Ahoms, invaders of the Tai family, in spite of their long domination, nor the Burmese and the Kacharis, members of the Tibeto-Burman family, nor the Mahommedans have left any trace on the language which is closely akin to Bengali

Assamese is laden with Sanskrit loan words which have been introduced in modern times and, at times, with a modified meaning and pronunciation. It has a script of its own in which the Bible has been translated, but the characters of Bengah are also employed. Since the last two or three centuries it has a literature in prose and verse. The language of the larger number of the poetic compositions differs from that of the Buronjies or Histories which are in prose. At present, as it is the official language of the Provincial Government, it is hoped that it will be extensively cultivated.

The Portuguese words which found an entry into it did so by way of Bengah and Hindustani

11 Sindhi¹

Sindhi is the language of the valley of the lower Indus from Multan to the sea, on the east it merges into the Rajputana dialects of Hindi, and on the west into the Beluch dialects. It is spoken by about three million people made up of Hindus and Mussulmans. It is generally written in Arabic characters, with many modifications to represent the cerebrals and aspirates of an Aryan language. Its principal dialects are. Siraí, Vicholi, Lari, Uch, and Kachi.

The vocabulary of Sindhi like that of Hindustani, with the exception of its own original stock, is made up of Sanskrit, Arabic and Persian words—The influence of Pushtu, its Iranic neighbour is especially notable—All the words terminate in vowels as they do in Italian, all those ending in an u and o being masculine

¹ See George Stack, A Dictionary English and Sindhi

² As Sindhi has more sounds than those which are provided for by Devanagri characters, whenever it employs this alphabet, it uses discritical marks with the ordinary letters in order to distinguish these sounds

relates to the fourth General Election under the Act of 1919. In two cases however, those of the Council of State and the Burma Legislative Council, it relates to the third election under that Act, held in the case of the Council of State in 1930 and in the case of the Burma Council in 1928 These divergencies are due to the statutory duration of the Council of State being five instead of three years, and to the fact that the Reforms were introduced in Burma two years later than in other Provinces.

In the ordinary course of events the fourth general election would have been held in 1929 in two Provinces, Bengal and Assam, the elections to the Provincial Legislature were in fact held in that year, since in those provinces the local political situation had led to dissolutions in that year But in the case of the Legislative Assembly and of the remainder of the Provincial Councils the statutory three

year period was extended under the powers conferred by the Government of India Act in order to postpone the general election until after the publication of the Report of the Indian Statutory Commission in the Summer of 1930. The elections were therefore held in the autumn of 1930

The figures given for the number of electors who voted and the percentages of the number who voted to the number on the electoral roll are, in the case of plural member constituencies, approximate only In these constituencies, each elector has as many votes as there are seats to be filled, and the figures are calculated on the assumption that each elector used all his votes, that is, the figure given as the number of Electors who voted is the result of dividing the number of votes polled by the number of seats to be filled

grammar or a dictionary worthy of the name. It is therefore a spoken language, Persian being the language of the court and of correspondence. Even as such, there are three varieties of Kashmiri spoken—that of the Brahmins, loaded with Sanskrit words, the form used by Mahommedans and sown thickly with Arabic and Persian words, and lastly the one used by the common people, which preserves the old local form and dialectical variations

This language might well have been left out by me in this work in view of the fact that there exists till now only a vocabulary of the language, in which not even half a dozen of Portuguese words can be traced, some of them being of an uncertain origin But it appears to me natural that there should be more of them, connected with objects carried into the country by the Mussulman conquerors

14 Sinhalese¹

Besides the Vedas, the aboriginal inhabitants of Ceylon whose number is at the present day very much reduced ² the two indigenous races that people the island are, the Dravidian, in the north, which emigrated from India in some time immemorial, and the Aryan, brought there by Vijaya in the 6th century B C The vernacular of the former is Tamil, and of the latter, Sinhalese or Chinglá, as it is called in the creole language ³

It is a much debated question among philologists of the Indian languages as to whether Sinhalese should be classified as an Aryan or a Dravidian tongue Clough, Max Muller, Cust,

¹ See B Clough, A Dictionary of the Sinhalese and English Languages R C Childers, Notes on the Sinhalese Language James D'Alwis, On the Origin of Sinhalese Language

^{2 &#}x27;There is a class of people whom they call **Bédas** in colour they are almost like us, and some are dark brown, their language is not understood by any Chingalá or other people of India, and their converse is only with one another 'João Ribeiro, Fatalidade Historica da Ilha de Ceilão, Bk 1, Ch 24

³ Ceylon is a colony—Crown Colony—separated from India It was on this account not included in the census of India taken in 1901 and 1911.

It is necessary to realise that this result was in a large measure due to the existence of the creole Portuguese language

15 Tamıl¹

Tamil is the principal member of the Dravidian family whether we consider it with reference to its splendid culture, of the copiousness of its vocabulary, or the antiquity and the wealth of its literature. No other language, says Rice, 'combines greater force and concision, or is more exact and philosophic in its modes of expressions' 2

Its language-field extends from the Ghats to the gulf of Bengal and from Cahcut to Cape Comorm It is also spoken in the southern part of Travancore and in the northern portion of Ceylon and in some other regions. The people speaking the language number about 16½ millions. It has an alphabet of its own which employs 30 letters for its own script and besides four more for writing Sanskrit words which in the latter case is known as Grantha. It includes two forms or dialects, the classical or the ancient and the colloquial or the modern called respectively

¹ See, especially, for the Dravidian languages the monumental work of Robert Caldwell, from which I have quoted before, and Rev. Henry Rice, Nature Life in South India

^{&#}x27;The proper spelling of the name Tamil is Tamir, but through the change of r into l it is often pronounced Tamil and it is often (though erroneously) written Tamil by Europeans' Caldwell 'The kingdom of Charamandel, where the language is Tamil' Duarte Barbosa, Livro, p 201 [Hak Soc ed Longworth Dames, Vol I, p 184]

² The Portuguese, according to their practice of giving to a language the name of the country wherein it was spoken called Malayalam, the language current on the West Coast, Malabar, and also by this name designated the language that was in vogue as far as the Coromandel coast, there being a similarity between the two—The other European nations adopted this designation which is at present falling into disuse—'First of these races whom I call foreigners who dwell in Malabar is a caste called *Chatis*, natives of the province of *Charamandel*——They speak a tongue which differs from that of Malabar in the same way as Castilians speak a language different from that of the Portuguese' Duarte Barbosa, p 340—[Hak Soc ed Longworth Dames, Vol II, pp 71 and 73]

Again from or through Malabar were introduced many Indian terms into Portugal, such as manga (mango), carro (con), bétel (betel), ola (palm-leaf), teca (teak-wood), chatim (merchant), there were some that were introduced into Indo-Portuguese, like jagra (jaggery or unrefined sugar), chuname (lime), pinaca (cocoanut or sesame cake), mainato (washerman)

17 Telugu¹

Telugu or Telinga, in respect of its culture and its glossarial copiousness ranks next to Tamil in the list of the Dravidian languages, but surpasses it in point of euphonic sweetness and the number of those that speak it, viz over 20 millions ²

It ranges from Pulicat to Chicacole and on the west impinges on the boundaries of Marathi. It has a character which is a variation of the Aryan, and its literature dates back as far as the 12th century of our era. Its present-day vocabulary is greatly strewn with exotics, the greater part of which are Sanskrit and Hindustani.

The influence of Portuguese on Telugu is evident from the close and constant relations, political and commercial, that existed between the rulers of Bisnagar or Bisnaga (Vijayanagar) and also from its contiguity to Tamil and Marathi and its contact with Hindustani

The number of Portuguese words that have been adopted in the popular form of the language is very large and some of them are exclusively borrowed by it and by no other language

¹ See C P Brown, A Dictionary of the mixed Dialects and foreign words used in Telugu

It is interesting to note how the name Gentoo (from the Port gentio, gentile) came to be used by the English for a long time in a restricted sense to the Teluguspeaking Hindus. The Portuguese spoke of this people more correctly as Badagas, Tamil Vadugar, Kanarese Badaga. 'The next province which marches with the kingdom of Narsyngua, they call **Telingu.**' Duarte Barbosa, p. 291 [Hak Soc ed Longworth Dames, Vol I, p. 183]

 $^{^2}$ 'He was appointed Governor of the District of the Talingas, who are the Hindus whose language is more developed than that of any other people in the Deccan' Diogo do Couto, Dec IV, X, 4

A further important, though indirect, result of the Morley-Minto Act was the appointment of an Indian member to the Ix cutive Council of the Governor-General and to such Provincial I xecutive Councils as were then in existence and subsequently created

Old System—But although the Legislative Councils (which, originally created in two provinces only in addition to the Governor General's Legislative Council, existed in 1919 in nine provinces) had steadily acquired a more and more representative character and a large share of the normal functions of a legislative assembly as generally understood, they still remained in theory up to the passing of the Act of 1919 mere accretions to the Lyccutive Government of the provinces for the purpose of advising on, and

enacting, legislation. It is true that the nonomeial element in the Provincial Councils as conflicted by Lord Morley's Act of 1909 had an interd a confiderable measure of control over leaf left in, in view of the fact that in most provinces that Act and the rules framed under it flar if the non-official members in a slight indically over their official colleagues, but for various reasons this control over in the sphere of leaf action can hardly be described as definite papers and over matters outside the left in the propers of the Councils had no controlling votes at all

The Changes—The most important changes and by the Act of 1919 in the powers of the Irovincial Councils were—

- s) the power to vote (and con equently to withhold) supplies
- (ii) a greatly enhanced freedom of initiation in the matter of legi lation, and
- (11) power to frame their own rules of procedure in matters of detail, subject to the Governor representations.

A further right which the Councils will acquire after four years from the time of their commence ment is the right to elect their own President. At the out of the President is nominated by the Governor, but from the start every Council has an elected Deputy President. The Governor (who formerly was exofice President of his test that Council) no longer has any direct connection with its proceedings. The first-named of these newly acquired powers is of sufficient importance to require a detailed explanation of its scope, which can best be given in the terms of the Act Itself (section 72D).

72D—(1) The provisions contained in this section shall have effect with respect to business and procedure in governors legislative councils

(2) The estimated annual expenditure and revenue of the province shall be laid in the form of a statement before the council in each year and the proposals of the local government for the appropriation of provincial revenues and other moneys in any year shall be submitted to the vote of the council in the form of demands for grants. The council may assent, or refuse its assent, to a demand, or may reduce the amount therein referred to either by a reduction of the whole grant or by the omission or reduction of any of the items of expenditure of which the grant is composed.

Provided that-

(a) the local government shall have power, in relation to any such demand, to act as if it had been assented to, notwithstanding the with holding of such assent or the reduction of the amount therein referred to, if the demand relates to a reserved subject, and the governor certifies that the expenditure provided for by the demand is essential to the discharge of his responsibility for the subject, and

(b) the governor shall have power in cases of emergency to authorise such expenditure as may be in his opinion necessary for the safety or tranquillity of the province, or for the carrying

on of any department, and

ture, except for some legends inscribed on palm leaves, it is one of the most highly developed languages of the Dravidian family and is more closely allied to Kanarese than to Malayalam, and has some dialects—Sanskrit, Kanarese, Malayalam, and Hindustani words are grafted on to its original stock—The Malayalam alphabet was formerly employed, but now the Kanarese script has become inseparably associated with the language

The number of Portuguese words adopted in the language is considerable and more even than in the adjacent languages. I am unable to furnish a reason for this, unless it be the emigration of Hindus from Goa. Religious terms in Portuguese were introduced by Protestant missionaries.

20 Anglo-Indian Vocabulary 1

The English language has not begotten any bastard variety of itself in India, nor is it likely that any will issue from it in course of time—But the vocabulary of English spoken in India is sown thick, as is but natural, with indigenous terms

When the English arrived in India, a corrupt form of Portuguese was the *lingua franca* of the country, as much between Europeans and Indians as between the Europeans themselves who belonged to different nationalities

It is no matter for surprise, therefore, if Portuguese should have furnished a large contingent of words to Anglo-Indian vocabulary, directly or through the medium of the vernaculars. Even so, many indigenous terms found entry into it by way of Portuguese, such as areca, betel, benzoin, coin, copia, coige, congee, godown, mandarin, mango, palanquin, monsoon, typhoon, etc²

Many of the words derived from Portuguese are now obsolete, whilst some are in vogue only in certain parts. On the other

¹ See Yule and Burnell, Hobson-Jobson Whitworth, An Anglo-Indian Dictionary Wilson, A Glossary of Judicial and Revenue Terms

² 'Even amongst the English, the number of Portuguese terms in daily use is remarkable' Emerson Tennent, Ceylon

which, in his judgment, was incompetible; with the maintenance of peace and tranquillity, yet the powers of control vested in the Legislative Council over the transferred sphere are undoubtedly great and it was the opinion at all events of the Joint Select Committee that legislature and Ministers should be allowed to exercise them with the greatest possible freedom "If after hearing all the arguments" observed the Committee, "Ministers should "decide not to adopt his advice, then in the " opinion of the Committee the Governor should "ordinarily allow Ministers to have their way, "fixing the responsibility upon them, even if "it may subsequently be necessary for him to "vote any particular piece of legislation "is not possible but that in India as in all other "countries, mistakes will be made by Ministers "acting with the approval of a majority of the "Legislative Council, but there is no way of "learning except through experience "the realisation of responsibility"

Provision of Funds—The terms of the Act leave the apportionment of the provincial revenues between the two halves of the executive for the financing of reserved and transferred subjects respectively to be settled by rules, merely providing that rules may be made ' for "the allocation of revenues or moneys for the "purpose of such 'administration' ie, the "administration of transferred subjects by the "Governor acting with Ministers' Probably the best description available of the method adopted by the rules for the settlement of this matter is the recommendation of the Joint Select Committee whose proposals have been followed with one modification only to enable the Governor to revoke at any time, at the desire of his Council and Ministers an "order of allocation" or to modify it in accordance with their joint wishes The passage is as follows—

The Committee have given much attention to the difficult question of the principle on which the provincial revenues and balances should be distributed between the two sides of the provincial governments. They are confident that the problem can readily be solved by the simple process of common sense and reasonable give-and-take, but they are aware that this question might, in certain carcumstances, become the cause of much fric-

THE CENTRAL GU

The structural changes made by the Act of] 1919 in the system of government outside the nine "Governors provinces" are of comparatively minor scope, though the spirit of the Act requires as has already been shown, considerable modification of the relationship hitherto subsisting between the Provincial Governments on the one hand and the Government of India and the Secretary of State in Council on the other The only concrete changes made in the constitution of the Central Government are the removal of the statutory bar to the appointment of more than six members of the Governor-General's Executive Council (which, however has had the far-reaching consequence that three of the eight members of the Council are now Indians), and the reconstitution in a much more enlarged representative and independent form of the central legisla-

tion in the provincial government, and they are of opinion that the rules governing the allocation of these revenues and balances should be framed so as to make the existence of such friction impossible They advise that, if the Governor, in the course of preparing either his first or any subsequent budget, find that there is likely to be a serious or pro-tracted difference of opinion between the Executive Council and his Ministers on this subject he should be empowered at once to make an adocation of revenue and balances between the reserved and transferred subjects which should continue for at least the whole life of the existing Legislative Council The Committee do not endorse the suggestion that certain sources of revenue should be allocated to reserved and certain sources to transferred subjects but they recommend that the Governor should allocate a definite proportion of the revenue, say, by way of illustration, two-thirds to reserved and one-third to transferred subjects, and similarly a proportion, though not necessarily the same fraction of the balances. If the Governor desires assistance in making the allocation, he should be allowed at his discretion to refer the question to be decided to such authority as the Gover-nor-General shall appoint Further, the Committee are or opinion that it should be laid down from the first that, until an agreement which both sides of the Government will equally support has been reached, or until an allocation has been made by the Governor, the total provisions of the different expenditure heads in the budget of the province for the preceding financial year shall hold good

The Committee desire that the relation of order the two sides of the Government in this matter as in all others, should be of such mutual sympathy that each will be able to assist and influence for the common good the work of the other, but not to exercise control over it. The budget should not be capable of being used as a means for enabling Ministers or a majority of the Legislative Council to direct the policy of reserved subjects, but on the other hand the Executive Council should be helpful to Ministers in their desire to develop the departments entrusted to their care. On the Governor personally will devolve the task couns-fric
of holding the balance between the legitimate needs of both sets of his advisers."

THE CENTRAL GOVERNMENT.

ture It has already been observed that this body was, in origin, like all other legislative bodies in India, the Governor-General's Executive Council with the addition of certain "additional members" appointed to assist the Executive Council in the formulation of legislation Despite its steady growth in size and influence, and despite the introduction of the elective system, the existence of "additional members," who of course under Lord Morley's Act greatly preponderated in numbers over the members proper, i.e., he Executive Councillors, still persisted up to the passing of the Act of 1919 That Act, however, has entirely remodelled the "Indian Legislature," as it is now called, which has become like the Legislature Council in a Governor's province a legislature with all the inherent powers ordinarily attributed to such a body save such

I do not know of any other work on the subject besides the one cited by me and I turned my attention to Indo-French only at the eleventh hour when I felt convinced that the Portuguese influence on it was not insignificant. It is, therefore, very natural that the list of Portuguese vocables in Indo-French furnished by me should be incomplete

22 Garo

In the lower part of the Assam valley there is a group of languages of small importance, called Bodo, belonging to the Tibeto-Burman family, and spoken by about 600,000 individuals. One of these languages is Garo, spoken by about 186,000, it has various dialects and the language itself has been sufficiently studied. There are schools in which it is taught and school and religious books written in it, this is due to American missionaries who, however, in teaching it make use of English books in place of the Bengali, and employ largely English terminology in addition to the Aryan

The Portuguese words which have penetrated into Garo have done so by way of Assamese, and of Bengali, and some of them, perhaps, through the medium of the missionaries

23 Burmese

Burmese spoken by 7½ millions is an agglutinative and cultivated language. It has many Aryan words which were introduced by Buddhism, the prevailing religion, side by side with Pali literature. It has an alphabet of its own, derived from the Indian. Its principal dialects are Arakanese, Tavoyee or Taneagsari, and Yo

Besides Tibetan, Burmese is the only other important member of the Tibeto-Burman linguistic family. Its literature dates back several centuries, but the language of the literature does not differ much from Siamese.

The influence of Portuguese on it, to judge from the single vocabulary which has come to my hands, is very limited. Some

the I recutive Government of India remains supplies are, as conferred on the Governor-legally responsible as a whole for the proper fulfill General in his relationship with the Indian ment of its charge to the Secretary of State and I regislature, less restricted in their operation Parlament, it follows that the powers conferred than in the provinces, that is to say, they on provincial Governors to disregard an adverse cover the whole field and are not confined in vote of the Legislative Council on legislation or their application to categories of subjects

THE INDIA OFFICE.

changes, Indian The Act makes no etructural in the part placed by the India Office in with this change, it is now possible to defray the administration of Indian affairs Slight alterations have been effected in the number and tenure of office of the members of the Secretary of State's Council, and some relaxations have been made in the statutory rigidity which formerly bound their procedure and that of the Office in general But provisions now exist which will undoubtedly as time goes on have a material effect on the activities of the Office as it is now constituted A High Commissioner for India has been appointed for the purpose of taking over, as the direct agent of the Government of India, that portion of India Office functions which is of the nature of agency, as distinct from administrative super-vision and control. The process of separation of staff and functions for the purpose of this transfer will necessarily be somewhat slov, but a substantial beginning has been made by handing over to the direct control of the High Commissioner the large departments which are concerned with the ordering and supply of stores and stationers in England for Government use in India, with the payment of pensions to retired members of Indian services resident in the United Kingdom, and with the assistance of Commission

students in England Concurrently from British revenues the salaries of the Secretary of State and of the Parliamentary Under-Secretary, and that portion of the cost of salaries of India Office staff and general maintenance which is attributable to the exercise of its administrative as distinct from purely agency **functions**

In due course the apportionment to British estimates will be the cost of the India Office as it exists after the transfer of functions to the High Commissioner has been completely effected, then the salaries of the High Commissioner and his staff will be the only expenses in the United Kingdom chargeable to Indian revenues. Until that time arrives, however, an estimate was the only basis for settlement, and for five years from 1920 21, the cost of the India Office payable from British revenues has been fixed at 130,500l, which includes the salaries of the Secretary of State and of the Parliamentary Under Secretary, and a contribution of 40,000l, which has for some years been made by the Treasury towards Indian expenditure, as the result of the recommendations of the Welby

PERSONNEL AND PROCEDURE.

The Governor-General and the "Executive" members of his Council are appointed by the Crown No limit of time is specified for their tenure of office, but custem has fixed it at five years There are seven Executive Members of Council These Members hold respectively the portfolios of Education, Health and Land, Home, Finance, Commerce, Industries and Labour, Law The Viceroy acts as his own member in charge of Foreign affairs Rail ways are administered by a Chief Commissioner, with the assistance of a Railway Board, and are for administrative purposes grouped under the ægis of the Commerce Department Commander-in-Chief may also be and in practice always is, an "Ordinary" member of the Council He holds charge of the Army Department The Governors of Madras Bombay and Bengal become "extraordinary" members if the Council meets within their Presidencies The Council may assemble at any place in India which the Governor-General appoints

In practice it meets only in Delhi and Simla
In regard to his own Department each Member of Council is largely in the position of a Minister of State, and has the final voice in ordinary departmental matters But any question of special importance, and any matter in which it is proposed to over-rule the views of a Local Government, must ordinarily be referred to the Viceroys Any matter originating in one department which also affects another must be referred to the latter, and in the event of the Departments not being able to agree, the case is referred to the Viceroy The Members of Council meet periodically as a Cabinet—ordinarily

once or twice a week-to discuss questions which the Viceroy desires to put before them, or which a member who has been over-ruled by the Viceroy has asled to be referred to Council If there is a difference of opinion in the Council the decision of the majority ordinarily prevails, but the Viceroy can over-rule a majority if he considers that the matter is of such grave importance as to justify such a step Each depart mental office is in the subordinate charge of a Secretary, whose position corresponds very much to that of a permanent Under-Secretary of State in the United Kingdom, but with these differences—that the Secretary is present though does not speak at Council meetings at which cases under his cognisance are discussed that he attends on the Viceroy, usually once a week, and discusses with him all matters of importance arising to his Department, that he has the right of bring ing to the Viceroy's special notice any case in which he considers that the Viceroy's in which he considers that the Viceroy's concurrence should be obtained to action proposed by the Departmental Member of Council, and that his tenure of office is usually limited to three years. The Secretaries have under them Deputy, Under and Assistant Secretaries, together with the ordinary clerical establishments. The Secretaries and Under-Secretaries are often, though by no means exclusively, members of the Indian Civil Service The Government of India has no Civil Service of its own as distinct from that of the Provincial Governments, and officers serving under the Government of India are borrowed from the Provinces, or, in the cose of Specialists, recruited direct by contract

or Kossia In this part is situated Shillong the seat of the Government of the Province of Assam Morphologically, Khassi belongs to the monosyllabic order, genealogically Beames includes it in the Lohotic or Burmese class. Cust regards it as a family by itself and Grierson basing himself on the authority of Kuhn, affiliates it to the sub-family Mon-Khmer of the Indo-Chinese family.

It has neither character nor literature of its own, the Roman character on account of its convenience has now been adopted in the composition of a grammar and dictionary of the language by English missionaries and in writing school texts ¹

It has several dialects, the common being the Cheara, it has also a rich vocabulary, composed in a great measure of onomatopoetic terms, and containing an infiltration of Bengali and Hindustani words. It is through the medium of these two languages that Portuguese words have passed into it, without these semi-savages ever having heard the name of Portugal And this is exactly what will happen in analogous cases ²

26 Kambojan

The Kambojan language is at the present day the principal representative of the sub-family Mon-Khmer, Khmer being the indigenous name of the country, now in a state of great decay, and likewise of the people who profess Buddhism. It is spoken by about a million in Cambodia and by about 500,000 in Siam and Annam. It has three dialects, Xong, Samre, and Khamen-Boran.

Kambojan is monosyllabic like the other branches of the family but it has no tones, it is so full of Siamese words that for a long time it was mistaken for Siamese. It likewise has loan words from Pah, Malay, Annamite, and Peguan contracted in the

¹ The attempt to introduce the Bengali alphabet was not successful

 $^{^{2}}$ Nissor Singh refers to Hindi almost all the Portuguese words introduced into Khassi

enormous religious and secular literature and three dialects that of the sacred Buddhistic books, that of the ligher orders, and that of the people—Its glossary according to Michell consists of 14,000 words and contains very many foreign words, most of them mutilated and derived from Pah Sanskrit, Kambojan, Malay, Chinese, and the European languages

In view of the various kinds of relations that Portugal had with Siam, one should have expected that Siamese would contain many Portuguese vocables, but there is a very small number of such that figure in their dictionaries, and this is a phenomenon that one notes also with regard to the other monosyllabic languages ¹ The educated people coin terms from the Sanskrit to denote new inventions such as telegraph, telephone stenography, and the journals, and the people in contact with the Europeans prefer words borrowed from the English ²

28-29 Annamite and Tonkinese

By Annamite or better still Annamese is understood the language either of the ancient kingdom of Annam or in a more restricted sense, the Cochin-China dialect, to distinguish it from Tonkinese ³

Philologists are not in accord with regard to the classification of Annamese in general Logan allies it to Mon-Khmei, con-

¹ There are in Siam 43 Portuguese, Catholics, who are permanent residents of the place. There are also 250 Portuguese of Chinese origin who have their names inscribed in the register at the consulate. Finally there are 68 more protected Portuguese of Chinese descent residing in Siam. In all 361 Portuguese are to be found in the register. (Journal of the Geo. Soc. of Lisbon.) See Fr. João dos Santos, II, Ch. 6, and Frederico Pereira, Relação de Portugal com Sião, in Journal Geo. $30 \quad \text{Malay}^2$

Of the Asiatic languages, Malay is after Konkani, one of the most important for my work and it was this which induced me to extend the orbit of my investigations outside the limits of India proper ³

The Malay language is spoken in Malacca and in the islands of Sumatra (mixed up with other languages), Banca, Billiton, in the Moluccas (or Maluco) 4 and in some other parts. It is said to be spoken by more than 10 million people. There is the Malay language properly so called and what is spoken of as Low Malay. The former, which is the language spoken in Singapore and Malacca, possesses a literature both in prose and verse, written in a modified form of Arabic characters. The other or Low Malay, devoid of difficult sounds (gutturals) and complicated forms, is the lingua franca of the whole of the Archipelago, as Hindustani is of India, and as such is spoken by the indigenous population of the maritime ports, even though they be not Malay by race, it is commonly written in Roman characters.

^{3 &#}x27;It has a language of its own which is called Malay, it is very sweet and easy to learn' Castanheda, II, Ch 112 'On account of its refinement and its sweetness, Malay has deserved the just claim of being called the Italian of the East' Favre

 $^{^4}$ 'But the most common language and which all use is Malay , every one took a liking to it because of its sweetness and its agreeable pronunciation' Diogo do Couto, Dec. IV, VII, 7

^{5 &#}x27;The people of the country are called Malay, and the language of the country is likewise called by the same name, for purposes of the trade of Malacca with the neighbouring islands, this language is used by almost all the islands and is understood among them 'Lucena, Historia da vida do Padre Francisco de Xavier, Bk III, Ch 10

The Imperial Legislatures.

The gradual evolution of the Indian constitution is fully triced in the article on "The Government of India" which procedes this so also are the great charges made by the Refo in Act of 1919. For the purposes of easy reference the powers of the Legislatures, as well as the special powers received to the Governor General for the discharge of his responsibilities which are fully set out in the Act are reproduced below—

21 (1) I very Council of State whall continue for flive very, and every Legislative Assembly for three very from its fir t meeting

Provided that-

- (e) either chamber of the legislature may be sponer dissolved by the Governor-General and
- (1) any such period may be extended by the Governor-General if in special circumstances, he so thinks fit, and
- (c) after the dissolution of either chamber the Governor-General shall appoint a date not more than six months or with the sanction of the Secretary of State, not more than nine months after the date of dissolution for the next section of that chamber
- 22 (1) An official shall not be qualified for election as a member of either chamber of the Indian legislature, and, if any non official member of either chamber accepts office in the terrice of the Crown in India his seat in that chamber shall become vacant
- (4) Every member of the Governor General a Executive Council shall be nominated as a member of one chamber of the Indian legislature, and shall have the right of attending in and addressing the other chamber, but shall not be a member of both chambers
- 24 (3) If any Bill which has been passed by one chamber is not, within six months after the passage of the Bill by that chamber, passed by the other chamber either without amendments or with such amendments as may be agreed to by the two chambers, the Governor-General may in his discretion refer the matter for decision to a joint sitting of both chambers Provided that standing orders made under this section may provide for meetings of members of both chambers appointed for the purpose, in order to discuss any difference of opinion which has arisen between the two chambers
- (4) Without prejudice to the powers of the Governor General under section sixty-cight of the principal Act, the Governor-General may where a Bill has been passed by both chambers of the Indian legislature, return the Bill for reconsideration by either chambers
- (7) Subject to the rules and standing orders affecting the chamber, there shall be freedom of speech in both chambers of the Indian legislature. No person shall be liable to any proceeding in any court by reason of his speech or vote in either chamber, or by reason of any.

thing contained in any official report of the proceedings of either chamber

- 25 lupiar Pupger—(1) The estimated annual expenditure and revenue of the Governor General in Council shall be laid in the form of a statement before both chambers of the Indian legislature in each year
- (2) No proposal for the appropriation of any resenue or moneys for any purpose shall be made except on the recommendation of the Governor General
- (3) The proposals of the Governor-General in Council for the appropriation of revenue or moneys relating to the following heads of expenditure shall not be submitted to the vote of the legislative assembly, nor shall they be open to discussion by either chamber at the time when the annual statement is under consideration unless the Governor-General otherwise directs—
- (1) interestand sinking fund charges on loans and
- (ii) expenditure of which the amount is prescribed by or under any law, and
- (111) saleries and pensions of persons appointed by or with the approval of His Majesty or by the Secretary of State in Council, and
- (ir) valuries of chief commissioners and judicial commissioners, and
- (r) expenditure classified by the order of the Governor-General in Council as—
 - (a) ecclesiastical.
 - (b) political,
 - (c) defence
- (4) If any question arises whether any proposed appropriation of revenue of money, does or does not relate to the above heads the decision of the Governor-General on the question shall be final
- (5) The proposals of the Governor-General in Council for the appropriation of revenue or moneys relating to heads or expenditure not specified in the above heads shall be submitted to the vote of the legislative assembly in the form of demands for grants
- (6) The legislative assembly may assent or refuse its assent to any demand or may reduce the amount referred to in any demand by a reduction of the whole grant
- (7) The demands as voted by the legislative assembly shall be submitted to the Governor-General in Council, who shall, if he declares that he is satisfied that any demand which has been refused by the legislative assembly is essential to the discharge of his responsibilities, act as if it had been assented to, notwithstanding the withholding of such assent or the reduction of the amount therein referred to, by the legislative assembly

the dictionary of Senhor Gonçalves Viana deserves especial mention because in a great measure it takes in its fore-runners

31 Achinese¹

Achinese is one of the languages spoken in Sumatra and which has, as its name indicates, its home in Achen (correctly Acheh) which hes in the northern extremity of the island and belongs to Holland ² It presents a very close affinity to the Malay language, but is less cultivated and less rich in its vocabulary. Its literature consists of poetical and theological compositions, and of many chronicles. The population is almost entirely Mahommedan and uses the Arabic character.

The influence of Portuguese on this language is not very large, and must have been due directly or indirectly to Malay The Portuguese had constant relations, as a rule hostile, with the Achinese who in the 16th and 17th centuries represented the most powerful indigenous power in Sumatra ³

friend sent me a copy on loan from the library of Cardinal Mezzofanti, now brought together in the College of the Propaganda Fide

¹ See The Encyclopædia Britannica

² 'The Portuguese generally called it *Achem* (or frequently, by the adhesion of the genitive preposition, *Dachem*)' *Hobson Jobson* António Nunes makes a distinction between 'Dachem grande' (Great Achem) and 'Dachem pequeno' (Little Achem) *Livro dos Pesos da Ymdia*

^{3 [}Luis Camoens, the poet, composed an ode to Dom Francisco Coutinho, Count of Redendo, who was Viceroy of Portuguese India from 1561–1564, for the Viceroy had sanctioned the publication of Garcia d'Orta's Colloquies on the Simples and Drugs of India and Camoens was d'Orta's intimate friend. This ode is published in d'Orta's book and contains an eloquent address to the Viceroy Among other things he says of him that perhaps his thoughts are busy with pernicious war (guerra infesta) or with bloody Taprobanic Achen, the scourge of the sea (sanguinolento Taprobanico Achem, que o mar molesta). This reference to Achen bears witness to the hostile relations between it and the Portuguese in the 6th century. It is also interesting as proof of the fact that Camoens like many other educated men in his age identified Taprobana of the Greeks in this passage with Sumatra and not with Ceylon—ED.]

^{*} Elected President. ** Entitled to representation in rotation

The influence of Portuguese on its vocabulary, which is purer than that of other languages which are allied to it is both direct and indirect as in the case of Javanese. There existed in Sunda a large Portuguese colony of which Fernão Pinto and other writers make frequent mention.

34 Javanese

'From the linguistic standpoint, Javanese is without doubt the most important of all the Malayo-Polynesian group. It is spoken by many millions of men, belonging to a tribe which occupies unquestionably the first place among the peoples of the Archipelago in development and civilisation. This language, which extends towards the centre of the island of Java as well as towards the east is distinguished by the copiousness of its vocabulary and its forms, as well as by the richness of its literature' Heyligers

It has three principal dialects High Javanese—a ceremonial dialect, Low Javanese—the popular dialect, Middle Javanese—the colloquial dialect. There also exists a poetic form of language, called Kavi, which is charged with Sanskrit terms. The foreign ingredients in the language are the same as in the Malav. Its characters are derived from the Indian but are much modified and complicated.

It is true the Portuguese never conquered the island but, all the same, they visited its harbours very often and maintained political and commercial relations with it—It is by this means and by the contact of other languages, principally Low Malav, that many Portuguese terms found their way into Javanese

Some of these as the result of special evolution passed into Krama or High Javanese, in harmony with the nature of the dialect

35 Madurese

Madurese is the indigenous language of the island of Madura and of the immigrants who have been established for centuries Province or body represented

The Portuguese had a factory at Bonneo (1590–1643) But the Portuguese vocables in this language appear to have found their way chiefly through Malay and other allied tongues. When we consider the way these have been transmitted and the scale of the civilisation of the people and of the language wherein they have been admitted, we must confess that the number of the words thus introduced is remarkable

38 Macassar¹

Macassar is the language of the southern part of the Celebes Island which is called by the same name, and belongs to a special group ² It is a language that is cultivated, has a literature, and its own characters, preserving the classification of the Devanagri

In its glossary of words there figure many Malay, Javanese, Sundanese, Chinese, and Arabic terms—It is thus through the agency of Malay and Javanese as well as through direct influence, principally religious, which was very intense that Portuguese words found their way into it

Bugui5

Bugui or Vugui (Bugi or Wugi) is another important language of the Celebes, very much resembling Macassar, and which, according to Cust, has exerted an influence upon the languages of the other islands. It has a copious vocabulary in which many Arabic words have found their way through the influence of Mahommedanism, it has also a rich literature, ancient and

¹ See Matthes, Malassarsch-Hollandsch Woordenboek

² 'According to Crawfurd this name (Celebes) is unknown to the natives, not only of the great island itself but of the Archipelago generally, and must have arisen from some Portuguese misunderstanding or corruption' *Hobson-Jobson* Fernão Pinto calls it 'The Island of Selebres'

³ See Diogo do Couto, Dec V, VII, 2

⁴ It is not known when and by whom the Portuguese terms belonging to the card game of quadrille were introduced, they are not to be met with in any other of the languages except this and in Bugui

⁵ See Matthes, Boegineesch Hollandsch Woordenboek

chumbo (lead), sal (salt), lebre (hare), cabra (goat), which are not to be found in the other languages ¹ The others which are met with in Nicobarese must have found their way in a great measure through Malay Again there were Catholic missions on these islands during the 17th century

41 Teto2

The Portuguese colony of Timor has an indigenous population of a million which is composed of Malay new-comers, and the aboriginal negritos. They speak in the country five languages or principal dialects which are very closely related and having local variations, they are Teto Galoh Uaima Macaque and Midic ⁸

Teto is the one generally used over the island ⁴ it is an uncultivated language and possesses neither a literature nor its own alphabet. The speech of Dili, which is the capital city differs from the language of the interior as much in its vocabulary as in its structure and syntax ⁵

^{1 &#}x27;There are five or six islands which have very good water and anchorages for shipping inhabited by poor Heathen, these islands are called Nacabar Duarte Barbosa, p 374 [Hak Soc Longworth Dames's Transl, Vol II, p 181] 'Francisco de Almeida on his way from India to Sumatra died of fever in the islands of Nicubar' Fernão Pinto, Ch XX 'Returning to D Paulo de Lima (who had been becalmed among the islands of Nicobar) Fr João dos Santos, II, p 210

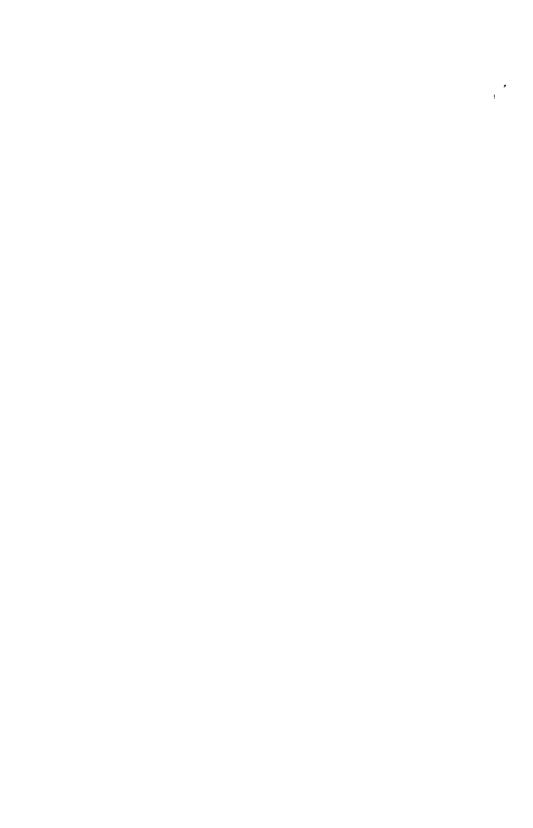

² See Aparicio da Silva, Diccionario de Portuguez-Tetum Rafael das Dores, Diccionario Teto Português Dr Alberto Osorio de Castro, Flores de Coral, su Timor

See Dr Castro, op cit, p 189

⁴ It is spoken in Dili, Viqueque, Luca, Lachute, Alas Suai Monofahi, Berique, Dotic, Bibiçuçu, Samoro, Batugadi, Sanir, Balibó, Cova, Joanilo, Silacan, and Fialaran

^{&#}x27;Tetum is almost the *lingua franca* of this country, just as Galoh is among the people on the littoral to the east of Dilli' Dr Castro, p 189

^{5 &#}x27;The dialect which is spoken in Delly, which is *Teto* or *Tetum*, is understood over all the island nevertheless the Teto spoken in Lachute and in other parts is very different from that dialect' José dos Santos Vaquinhas, *Timor*, in *Journal* Geo Soc of Lisbon, 4th ser, p 276

to Africa, but its ethnic and linguistic affinities are with Asia ¹ It is on this account that Cust includes Malagasy, which is the language spoken in the island, in his 'Languages of the East Indies' ² Its population is about two millions and a half and it is divided among numerous tribes which differ from one another in their physical appearance, the result of a mixture in a greater or smaller degree of the African with the Malay, Arab, or Indian ³ But all speak a common language, which has ten dialects, of which the Hova is the chief and the one that is understood by the bulk of the population ⁴ It has no peculiar character, and therefore commonly employs the Roman

The affinity of Malagasy to the Malayo-Polynesian Language Family was observed four centuries ago and has now been confirmed by the investigations in modern times of Van der Tuuck Marie, Marin, and W. E. Cousins ⁵ But the roots of the words

^{1 &#}x27;The names Madagascar and S Lourenço are foreign Among the native population no general name for the whole island has been found' Rev Luis Mariano, Relação da joinada e descobrimento da ilha de S Lourenço (1613), in Journal, Geo Soc of Lisbon, 7th ser, p 315

^{2 &#}x27;This island of San Lourenço, which writers call Madagascar All this island is inhabited by peoples not as black as the negroes, nor as fair as the Mohammedans of all that coast. The presumption is that this island was conquered by the Jáos (Javanese) and that the inhabitants are a half breed people, the result of the fusion of the conquerors with the former natives of the country who must have been the Caffres (negroes) from the other side of the mainland 'Diogo do Couto, Dec VII, IV, 5

^{3 &#}x27;The second Mohammedan king who reigned in Cambay and who was a great conqueror sent certain ships to the coast of Melinde — these touched at the island of San Lourenço, and as they were unseaworthy, they remained there and their crew helped to people some of the ports' — Commentarios de Afonso de Albuquerque, IV, Ch 23

^{4 &#}x27;The language in use all over is Buque, and it is so uniform all over the island that the natives from the southernmost point understand it just as well as those from the northernmost, its vocabulary is poor, but on that account as easy to learn as to pronounce' Rev Mariano, op cit, p 353

 $^{^5}$ 'In the interior of the island, and other parts and the coasts, only Buque is spoken, which is the language of the natives, entirely different from the Caffre (negro) language, but very similar to Malay, this is almost a sure proof that the first settlers came from the ports of Malacca Id, p. 323

The I ducational Department is administered by a Director, with an Inspector in each Divicion and a Deputy or Assistant Inspector in each district

Hither education in the Presidency is controlled by the Bombay University which was established in 1957. The constitution of the University has recently undergone, however, considerable changes in virtue of a new enactment known as the Bombay University Act of 1928. This Act altered the whole constitution of the University so as to make it adequately representative with a view to bringing into, closer association with the public the industrial commercial and civic life of the people of the Presidency to enable it to provide greater facilities for higher education in all branches of learning including Technology and to undortake on a larger scale than heretofore post-graduate

European and American foreigners, and sometimes even among the Chinese themselves who speak very different dialects

'In its first and low form,' says Leland, 'as it is given in the vocabularies published for the use of servants, Pidgin is a very rude jargon, in which English words singularly mutilated, owing to the difficulty of expressing their sounds in written Chinese, are set forth according to the rules of the Chinese grammar In fact, it is a translation, word by word with little effort at inflection or conjugation, in view of the fact that such grammatical forms, as we understand them, do not exist in Chinese The result of this, naturally is that the vocabulary being very limited, a Chinaman learns Pidgin-English with no more difficulty than is presented by the acquisition of a few hundred words, whose pronunciation and grammar have been modified to accommodate themselves to his own language In this it resembles exactly posh an posh or the corrupt Romany dialect spoken by the Gipsies in England in which Hindi-Persian words follow English grammatical structure 1

It is owing to the facility with which the Chinese learn this dialect and the good will of the foreigners to go and meet them half-way, that it has spread to such an incredible extent, thus preparing the ground to make English the language of the Pacific And as the Chinaman learns more easily a Romanic language than pure English, it is probable that were it not for the Pidgin jargon, corrupt Portuguese would have formed the popular means of communication between the foreigners and the natives of China—the large number of Portuguese words which at present exist in Pidgin-English appears to prove it'

The word *pidgin* is supposed to be a corruption of the English word *business*, but with a meaning much more extensive and varied. And as commerce is the one great bond between the

^{1 &#}x27;Pitchin English (business English) is the commercial language of the ports of China, it is bad English with some Portuguese words, the grammatical construction being English' J H Calado Crespo, Cousas da China, p 16

The dialectical differences which are noticeable in different localities are of minor importance and do not stand comparison with those that are to be found in China. The dialect of the group of islands, known as Riukiu, deserves especial mention masmuch as it preserves its archaic character. The speech of the Aino tribes of the island of Spezo is totally different from pure Japanese and is therefore not understood by the people of the other islands.

In their writing they generally employ Chinese ideographs, which run to about 3,000 in number. The proper Japanese script is syllabic made up of 47 syllables, and is known as Kana, of which there are two varieties—the Katakana and Hinagana Japanese is written in vertical columns from the right to the left. Its literature goes as far back as the 7th century 2

Portugal was the first European nation which came into contact with Japan and for a long period maintained commercial and missionary relations with it—It left, as in almost every other part, indelible traces of its language in the vocabulary of Japan most of which were due to the introduction of new objects and of a new religion—Some of the terms have acquired such citizen rights that it is difficult to trace their foreign origin—The ancient books of the Japanese abound, according to the testimony of Dr Murakami, in religious terms of foreign origin and only a few of these have entered into the common speech of the people ⁸

¹ The modification of some of these syllables raises the total number to seventy-three See Ballhorn, Alphabete orientalischer und occidentalischer Sprachen

² 'Fourteen kinds of letters distinguished not only in their form but in their peculiarity and meaning, the young fidalgos study in the monasteries of the Bonzos' Lucena, Historia da vida do Padre Francisco de Xavier, Bk VII, 5

³ Dr Murakámi, Director of the School for Foreign Languages in Tokio, was kind enough to send me a list of such terms which he had not published in his work to which I have referred above. In recent times many English words have been introduced as also words which, though not English, have found their way into the language through English, such as alcali, alcool, blanket, butter,

47 Arabic

There are very many works treating of the Arabic influe on the Spanish languages but very few dealing with the influe of the Spanish languages on Arabic. The reason for this in certainly he in the fact that the influence of the languages the Theric peninsula upon the language of the Mahomme conquerors was neither so intense, nor lasting nor general most important work on this subject known to me is that Simonet, but it does not appear to be a safe guide because m of the terms, which he sets down as having been taken over finding the Arabs, had, one is inclined to suspect, a difference origin and a limited range.

Arabic is the sacred language of the Mahommedans of Ir where there are schools in which it is taught. But very Portuguese words must have been introduced into it by this very Those that I have recorded in the present work are only such belong to Eastern Arabic and not to that which is in use Africa, which has many more. Even these do not offer, gener speaking, a sure clue to their Portuguese origin. Lexicograph refer many of them, as I have noted in various instances Greek, Latin, French, and Italian sources. Arabic and Pers therefore, occupy in my work a secondary place.

48 Other Languages

Besides the languages already referred to, there are a others whose vocabularies were not the direct object of investigations they are the Chinese, Jewish Turkish, and languages of the Philippines. The dictionaries of the or languages which I waded through, incidentally mentioned so Romanic words which are found in these vocabularies. But of these are, for certain, of Poituguese origin as leilão and pare in the Chinese language, the other Romanic words in

declaration on oath two deeds were drawn up, the one in Persian and the one Portuguese' Diogo do Conto Dee V. I. 19

The remodelling, the systematisation, and the adaptation of the Semitic characters to the Indo-European phonetics resulted in the alphabet which is called Brahmi and this in the 5th century. And it is from this that all the modern alphabets of India are derived, even the Diavidian, though these might appear so different at the present day. The most important of the derived alphabets is the Nagari (the city alphabet) or Devanagri (that of the city of God) in which are chiefly inscribed the literary monuments of the Sanskiit language and which in its written form dates as far back as the 8th century B C

The following languages follow Devanagri Hindi, Nepah, Bihaii, and Kashmiri, Sindhi and Hindustani use this as well as the Arabic-Persian characters, then Marathi, Konkani only partially, and Guzarati make use of this script Punjabi, Bengali, Oriya, Assamese, Sinhalese, Telugu, Kanarese, with Tulu and Malayalam, have their peculiar characters, which differ from the Devanagri in their form but not phonetically or in their arrangement. Many of these languages, however, do not use all the Devanagri sounds, and there are some that have one or other especial sound or additional sounds and letters.

Among the Dravidian languages only the Tamil alphabet differs a great deal from the Nagri, as much owing to the want of many letters as by the addition of some consonants, and, even more, owing to the use of certain consonants to convey two or three different sounds

The Arab-Persian characters are employed by Hindustani, Sindhi, with a special system of diacritical marks, Malay and Achinese

Burmese, Tibetan, Siamese, Kambojan, Batta, Javanese, as well as Sundanese and Balinese and Madurese use their own characters, derived from the Aryan script, but a great deal modified. The alphabet of Bugui and Macassar have been co-ordinated according to the Devanagri system.

Garo, Khassi, Dayak, Nicobarese, Teto, Galoli, Malagasy, and to a partial extent, Konkani, Low Malay, and Sundanese, use the suffered from the present commercial depression. The manufacturing activities which are at present under the direction of the Department of Industries are mainly confined to the production of soap The match making industry is just raising its head in Madras There are 23 indigenous match factories run on cottage lines In 1927, the Council complied with a demand made by the minister in charge of Industries for funds for appointing a special officer to conduct an exhaustive survey of the existing and potential cottage industries The Special Officer has Presidency concluded his survey His reports have been published The report of the Cottage Industries Committee appointed at the instance of the Legislative Council, to examine the Special Officer's report and to submit proposals to Government for an effective organisation of such of the industries as deserve encouragement has also been published for general information The recommendations of the Committee were carefully considered by Government but owing to financial stringency they decided that such of the recommendations as involved additional expenditure should be postroped for the present. expenditure should be postponed for the present They have however passed orders on those recommendations which are merely administrative in character and do not involve additional expenditure. The aggregate value of feet in tional expenditure The aggregate value of ships Vessels up to 30 feet draught and 510 seaborne trade of the Presidency which was shortly be available for taking any ship up to 510 feet long and 20 feet draught. Rs 1,11,48,56,961 in 1929-30 As in provinces, the forest resources are exploited by Government There are close upon 19,000 square miles of reserved forests

Education

The Presidency's record in the sphere of education has been one of continuous progress There are at present about 56,000 public institutions, ranging from village primary schools to arts and professional colleges, their total strength being about 2,729,000 Special efforts are being made to provide education for boys! belonging to the Depressed Classes The Council passed a resolution in the year 1927 at the instance of a nominated member that poor from metre to broad-gauge, and is to be extended girls reading in any educational institution in the province—Government, local fund, Municipal or aided—should be exempted from School carrying the metre-gauge system through to the carrying the metre-gauge system through the metre-gauge fees in any Standard up to III Form The total, harbour is under investigation expenditure of the province on Education is in ments will enhance the utility of the port to the the neighbourhood of Rs 542 lakhs The planting and agricultural areas in that part of principal educational institutions in the vince are the Madras, Andhra and Annamalai Universities, the Presidency College, the Christian College the Loyola College, the Pachalyappa's College, and the Queen Mary's College for Even more pregnant with future possibility Women, Madras, the St. Joseph's College, the is the scheme for the development of the Trichinopoly, the Government Kumbakonam, Government College, the Rajamundry, the Maharaja's College, Trivan-drum, the Agricultural College, Coimbatore, lopment of the port at this place have been the Medical Colleges at Madras and Vizaga-patam and the Engineering College at consideration since 1859, but the suc-patam and the Engineering College at consideration of direct reliance to the cons-Madras (Gulndy) Madras (Guindy)

Cochin Harbour Scheme

provide a ready outlet for agricultural and other produce from an area which is at present not adequately served by a convenient or well-equipped harbour The scheme involves cutting a passage through the bar which litherto blocked the entrance from the sea to an extensive backwater and by dredging and reclamation, forming a sheltered harbour accessible and giving full protection and facilities at all seasons of the year. An agreement has been reached between the Government of Madras and the Darbars of Travancore and Cochin States Indicating how the work is to be carried out and outlining the financial arrange-ments necessary A trial cut was made in 1923 and the effects of the monsoon thereon were observed The results recorded were examined by a Committee of Harbour Engineers in England reported favourably on the prospects of the scheme

The first cut through the bar 400 feet wide by 321 feet deep was completed on 30th March 1928 The channel through the outer bar is now 3 miles long by 450 feet wide and has an average depth of 35 feet at low water The dredging of the mooring area has been completed Since March 1930 the Harbour has been in constant and regular use by all ships Vessels up to 30 feet draught and 510 700 feet long and 30 feet draught

Proposals are being formulated for the next stage of the works which include the construction of deep water jetties with railway connections, construction of godowns and transit sheds, the installation of rapid handling cranes and other transport facilities improvements are to be made on the new reclamation of which 175 acres have been formed already by dredging from the harbour intended to connect this to the main land by a railway bridge across the backwater Reclamation is still in progress and when completed it will provide sufficient space for about 20 or 30 These develop-

Vizagapatam Harbour Project

College, Vizagapatam harbour The Vizagapatam College, Harbour is constructed under the control of the truction of direct railway communication between Vizagapatam and the Central Provinces, for the quantity of trade which could be obtained from the littoral itself is insuffi-The importance of this project lies in the fact clent to justify the capital expenditure which that a good harbour at Cochin would lead to the would be required. In May 1925 the Governdevelopment of a valuable hinterland and ment of India declared Vizagapatam a major II In the Dravidian and in some of the Neo-Aryan languages e and o are short and long. I represent them as \bar{e} and \bar{o} when long and unstressed. Sinhalese has in addition e diphthong (=e), short and long, much palatalised. I transliterate it generally as e and e, or better, as e and \bar{e} . Konkam has e and o open and closed, I represent them when necessary by e and e when open and accented, and by e and e when closed. The Dravidian languages have many terminations ending in e very short, which it is usual to represent by e or e Grammarians, according to Caldwell, give to such a quarter of the length of a long vowel

III Many of the Neo-Aryan languages do not pronounce the short a at the end of a word and frequently also not when it occurs in the middle of a word, although they write the consonant whole (without the $vir\bar{a}ma$) as though the vowel was a part of it—Thus they write TH Rāma, but pronounce it Rām In such cases I drop the a in transliteration

IV The Dravidian and many of the Neo-Aryan languages have the sound as well as the letter ϖ la cerebral, which in Sanskrit is only to be met with in Vedic writings

V Konkam, Marathi, and Telugu have two letters with two distinct sounds each of them, without any graphic sign to distinguish the phonetic changes, the normal (before e and i) ch explosive (like the italian c before e and i) and ts almost equivalent to zz in Italian, j explosive (as in English) and z (or dz) ¹ I have marked the difference when transcribing such sounds

VI For very especial and weighty reasons I have made the following alterations in the rules for the transliteration mentioned above ch, chh, I represent by c, ch, x (palatal) by c (or d) and d, I have employed d, as a rule, not only to convey the sound of the nasal dental consonant, but also the guttural d and the palatal d All the nasals, when they figure in the middle of a word and unaccompanied by a vowel, are commonly represented

¹ Beames calls ts and dz 'non-assimilated palatals'

Social Legislation

T1 : Hitz Str Polizions Indominents Act a lich has for its object the betterndmini tration riol governance of certain Hindu religious en los ments come into force carly in 1925 It provide for the appropriation of the surplus funds of the endowments to religious, educastiff the chrowness of regions, concerning and of traine in women and girls was thought and charitable purposes not inconsitent introduced in the Council by Mr K R Venkata-with the objects of the institutions to which rains tyxar on 5th September 1923 and was they are attached. The Act has been work-passed into law on 31st January 1930. The law as attached and I churry 1930 and of the Governor-General on passed into law as Act No II of 1927. The 28th March 1930. It has not however been new Act came into force on 8th I chruirs 1927 Another piece of legislation—a non-official Bill—which has ruled a heated controversy is the Malabar Tenane, Bill, which aims to confer, has yet to receive the assent of the Governor subject to certain conditions, occupancy rights and the Governor General. The amending Act on lanom tenants and actual cultivators of enables the Local board to bring the Act into the soil. As there was a sharp difference of opinion on the very principles of the Bill, the Governor withheld his assent and a committee was appointed to go into the matter thoroughly and its findings have been submitted and the "ame have been published with a view to receive objections and suggestions "The recommenda-Round Tible Conference consisting of the Advisory Committee thereon, Government have representatives of the Jennies, Tenants and of the Government The objections and suggesting the Government The objections and suggesting the Government Theorem of the tions made by the representatives at the ing drinks Conference were carefully considered by the

Covering and the Government restricted to I'm and a dintroduced it in the Council on that it 192). The Bill west passed by the traction tath October 1929. His I we flency that it is not or of opinion that changes were at the first pact of or oin clutter of the 1911 114 the Council and has accordingly fri I part of the Fill to the Leading to all under Sett 181 & (1) of the Government of India Act for remideration. The Leading to the Leading on C 1 to the Act of the Assent " His las Il nex the Governor on the 28th t rich to it. The net of His Excellence the Covernor Ceneral to it is awaited worths amount other efforts at leal lation for erelal reform was the non-official resolution pa 11x th Council prominending to Governme it to und stake had latten or to recommend the troversian at of India to do so to put a top to the practice of dedicating young corren and kirks to Hindu temples which as a rally resulted in exposing them to immed purpose under the pretext of caste Mr. Muthalalalania Reddi, Ix Deputs Presi dent of the Legelative Council introduced a bill in the Jegishtive council on 5th September 19 8 so as to entranchise or free the lands held b harmholding Deviduels on condition of rvice in Hin in temple a from such condition The bill was passed into law on let February 1929 The Act received the as ent of the to ernor on 12th April 1929 and of the Goverpor teneral on 1 ith May 1020. Rules have been framed to give effect to the provisions of the Act and the enfrinchisement of Devadasi inams is now in progress. On 21th January 1920 Mr. Muthulakshmi Reddi introduced mother bill in the Delalative Council with the object of putting an end to the dedication of voing women and girl- not only among hamholding Deviders but among Devadesis as a whole. The bill was discussed in the Council and circulated to elicit opinion. As in the meantime Mr. Muthulal shmi Reddi resigned her membership in the Council the bill was not proceeded with Sub quently, the Council also dissolved and the bill layed A bill for the suppression of brothels and of traffic in women and girls was brought into force yet owing to certain practical difficulties An amending Act was passed by the least tive Councils on 30th October 1931 It force in selected areas and to extend it gradualy to other areas as circumstances permit and also to bring into force such of its provisions as may be practicable in any particular area. It was also resolved to ask Government to fix as their goal local prohibition of drink in the presidency within 20 years In pursuance of this resolution

III K, ch, t, t, p, being medial and simple, that is, when not double, sound as g, j (very little used in vernacular words), d, d, b Ch initial, and even intervocalic, is represented at times by the unstressed i or the Sanskrit i or i, the same is also used to mark the sibilant dental i I transcribe i, i, and i, but not i which is not much used. The i intervocalic in Tamil and Malayalam is very soft like i in English in than, that I am not differentiating it from simple i, nor does Caldwell make a difference between them. In foreign words there occur high sounding initial syllables

IV The Tamil rule regarding sonorous medials is likewise observed in Malayalam, but with distinct letters, except k medial which sounds like g weak, almost like k, and is transliterated by a special sign which I omit

V The consonants peculiar to this language are \underline{l} , l n. The first which also occurs in Malayalam 'is pronounced differently in different districts,' says Caldwell According to this writer the normal sound of this resembles the English l in farm, more liquid and post-palatal According to Percival it is a mixture of l, l, and of the Fiench l Telugu substitutes it by l cerebral and modern Kanarese by l cerebral

VI The $\it i$ hard, at present used in Tamil and Malayalam, has a sound which is midway between the cerebials $\it d$ and $\it l$ as in the English $\it crack$

VII N, the last letter of the alphabet, is not differentiated phonetically from the n dental, it has, on this account, no discriminating mark

VIII Some of the vowels shade off into different sounds before certain consonants which I find unnecessary to describe The diphthong ai occurs but raiely ¹

¹ The Dravidian languages generally retain the tonic accent of Portuguese words in the syllable on which it falls

VI Malay does not use in its vernacular speech the following Arabic letters th, h, kh, z, sh, s, d, t, z, ', gh, f, and employs the following in addition to those which it has from the Arabic ch, ng, p, g, \tilde{n} , or ny

VII Dutch writers in accordance with the genius of their language transliterate the letters ch, \jmath , and \tilde{n} from Malay and the other languages of the Archipelago by $t\jmath$, $d\jmath$, and $n\jmath$, and these they pronounce exactly as in Devanagri 'Ch is always pronounced as ch in church' Swettenham 'Or like the Spanish word muchacho' Favre 'J ought to be pronounced as in jury, justice, jew' Rigg ' \tilde{N} is pronounced as gn in agneau, it is the Spanish \tilde{n} ' Favre '

¹ 'The Dutch language does not contain this sound (ch), and it is consequently represented by them by tj, which does not convey the sound even according to the Dutch use of letters, as j with them has the power of the English j. It rather conveys the force of the French letters so applied 'Rigg

are Barristers, Civilians or Vakils. Relow the the power and duties necessary for the manage High Court are the District and Additional ment of village affairs and entrusted Judges, the Small Causes Court and Subor dinstr Judges and Munciffe 01 (hear officers, the District and Additional Judges and a certain number of subordinate Judges are also andoned with the powers of a Criminal Court while the remainder have jurisdiction in Civil matter only. Criminal Justice is administered by the High Court, the Courts of Smelon and the tours of the various classes of Magistrates On its appellate side, the High Court disposes of appeals from the order of a Court of Seesion, and it also confirms, modifies or annuls sentences of death passed by Sessions Courts. Calcutta tas six Stipendiary Presidency Magistrates including one emporary Additional Magistrate In charge of the Traffic Court and the Children It has also two Municipal Magistrates and also a number of Honority Magistrates and it possesses a Court of Small Causes with Judges who dispose of cases of the class that are usually heard in County Courts in England

In addition a number of Union Benches and Courts have been established in selected rural areas for the di po al by honorary agency of petty criminal cases and civil disputes

Local Self-Government

Ly Bengal Act III of 1831 which regulates municipal bodies in the interior and its sub sequent amendments the powers of Commis sioners of municipalities have been increased and the elective franchise has been extended cipal expenditure now comprises a large number of objects, including veterinary institutions employment of Health Officers and Sanitary Inspectors and the training and employment of female medical practitioners. The Commissioners also have large powers in regard to the water supply and the regulation of buildings. The supply and the regulation of buildings. The municipal Government of Calcutta is governed by Act III of 1922. This Act, which replaced Act III of 1922. This Act, which replaced Act III of 1899, makes the Corporation for implication. The Act provides for the administration. The Act provides for the appointment of a Mayor, who replaces the Chairman of the old Act, a Deputy Mayor, and Deputy Executive with the supply of water for irrigation in cases Officers, all elected by the Corporation. The in which a supply is available appointment of the Chief Executive Officer. The total number of councillors is 85, with The total number of councillors is 85, with 5 aldermen, elected by the councillors of the councillors are nominated by Government, and by the general or special consti There are separate constituencies for tuencies Mahommedans In order to improve the insanitary and congested areas of the city. the Calcutta Improvement frust has been ereated with extensive powers In the mofuesil, District and Local Boards exercise considerable powers, with regard to Public Works, Education and Medical relief and Union Committees bave been formed which deal for the most part with the control of village roads sanitation and water-supply

, ort

. (^

1919 introduced the Bengal Act V of system of self government bу creation of village authorities vested with cadre comprises Assistant Superintendents,

entrusted with powers of self-taxation. The new village authorits, called the Union Board, replaces, the old Chaulidari panchavats and the Union Committee and deal with the village police, village roads, water supply canitation, primary schools and dispensaries. The Act also empowers Government to create out of the members of the Union Boards, Village Benches and Courts for the trial of petty criminal and civil cases arising within the union The Act has been extended to all Districts in the Presidence except Midnapur and up to Murch 1930 over 4,500 Union Boards were sanctioned, or which nearly 4,300 were actually constituted

Public Works

The Public Works Department consists of I' W and Railway Departments and is under the charge of Secretary to Government in the Department of Agriculture and Industries.

The P W D deals with questions regarding the construction of public buildings and roads

The Railway Department deals with questions regarding acquisition of lands required by the several Railways, the alignment of new lines of Railways, and with Tramway projects

There is a Chief Engineer who is the principal profession dadviser of Government

Marine

The Varino Department deals with questions connected with the welfare of sermin, the idininistration of the port of Calcutta and inland navigation, including the control and administration of Government launches except the police launches, and the Government Dockyard, Narayangani

Irrigation

The Bengal Police force comprises the Military Police, the District Police, the Railway Police, and the River Police. The Bengal Police are under the control of the Inspector General of Police, the present Inspector-General being a member of the Imperial Police Service Under him are of the Imperial Police Service Deputy Inspectors General, for the Dacca Range, the Rajshahi range, the Presidency range, the Burdwan range and the Bakargani range and also one Deputy Inspector-General in charge of the C I. D and the Intelligence Branch Each district is in charge of a Superintendent, and some of the more important districts have an Additional Superintendent The Railway Police is divided into three distinct each under a Superintendent Ti charges The River cach Police la also under a Superintendent

in its various manifestations over indigenous civilisation, whether stationary or progressive. So large, in fact, is the number of Portuguese words adopted in so many languages distinct in their genius, seeing that they belong to diverse families and possessing the most varied grammatical structures, that we cannot help inferring that excluding the Greeks and the Romans perhaps no other people, unless they be the Arabs, succeeded in spreading a part of its vocabulary through so many diverse language fields and this without affecting the integrity of these languages, no matter whether the words found an entry into these tongues through the spoken word or through written compositions, above all liturgical

With regard to the grouping of the vernacular languages, the learned and worthy orientalist follows the system employed by the renowned English glotologist Robert Cust, well-known for his model of a book—'The Modern Languages of the East Indies,' not to speak of other works—I am of the opinion that he acted well in doing this, notwithstanding that the classification and its characteristics are not in complete agreement with the theories of the celebrated philologist, the late Frederick Muller, some of which are perhaps antiquated while others are too personal, and in spite of differing from the most recent doctrines and theories put forward by Finck with regard to grammatical structures which has reduced from a morphological standpoint to eight types all the languages known in the five continents of the world

I hold that in deciding to follow Cust the choice was most happy in relation, at least, to the Asiatic languages, which was the sole field of the author's investigations

I have already mentioned that Monsignor Dalgado in the absence of any existing model for his work or of one even resembling it to guide him, had to set up a method entirely new. In fact if we put aside some of the studies of Dr. Hugo Schuchardt on the Portuguese dialects in Asia one of Aristides Marre and two of mine regarding Malay, the first of which was published in

ordinary reader keen on being informed, so clear and delightful is his exposition, its strictly scientific character however, being in no way affected by his extraordinary conciseness both of treatment and expression

In the whole work the author has employed Portuguese vernacular idioms with the most meticulous care and has avoided the use of even pardonable neologisms or words that betray their foreign descent, the unique exception is the case of certain ethnic names, such as khmer, cashmirês, which in my opinion could have been reduced to our systems of orthography and written as cmer, caremirês like the others to which the author skilfully gave a Portuguese guise. The result in consequence is, that he has imparted an atmosphere truly national to the whole of his work, which because of its worth and originality does much honour to our scientific attainments in a field of human knowledge, which unfortunately among us has but few scholars of eminence though it must be said that these are held everywhere in great respect and regard

It is on this account that the work, as I have said, is of the greatest interest, not only to us Portuguese, as testifying to our enduring interest, in distant nations and peoples with whom we had been and are in contact, but as much also for those outside Portugal, who with great honour and distinction give themselves up to linguistic studies in their multifarious aspects

I feel certain that the publication of this monumental study will receive the approbation and applicate of scholars of all nations dedicated to this branch of learning, and from the public in general, and that it will redound to the glory of our country, to the well-merited honour of our Academy, and above all to the credit of him who with the greatest selflessness and dedication, a spirit truly scientific, and burning patriotism, took upon himself to carry out in an exemplary manner a work so well conceived and so useful and withal so difficult and one which belongs to a field of knowledge which till now has scarcely been explored

In view of all these reasons I am of the opinion that the

the trace of the state of the s

[The meaning and origin of] this word has been fruitful of much discussion Yule and Burnell (Hobson-Jobson, s abada) observe that "more than one authority makes it the female rhinoceros, and in the dictionaries (Portuguese) the word is feminine" Crooke in the 1903 ed quotes, in support of the above view, a suggestion of W W Skeat that "the female was the more dangerous animal, or the one most frequently met with, as is certainly the case with the crocodile" The plain fact of the matter is that in Poituguese the gender of a substantive is one thing and the sex another Abada is a feminine substantive in Portuguese like many such ending in a zêbra, girafa, gazela, and denotes the species as also the female The use of the word by the old Portuguese writers is perfectly consistent with this view

Some hold that, if the original of the word is the Malay $b\bar{a}daq$ the elimination of the final consonant has to be accounted for But Portuguese has calamba ('aloes wood') from Mal calambaq, and

pucho ('the costus of the ancients, the fragrant root of the Saussurea Xappe') from Mal puchuq Again, the initial a of abada though not found in the Malay original may have been due to the agglutination of the Portuguese article a, an instance of which we have in the English 'alligator' from the Spanish el or al lagarto, or what is more likely it may be a case of prosthesis such as we have in the Portuguese words alacre ('lac'), alanterna ('lantern'), atambor ('tambour') Dalgado's Contribuições etc. and Glossario Luso—As s v abada, calamba, and pucho, also Hobson-Jobson s v calambac, and putchock 1

Abafado (subst, 'a dish of stew', in the Port dialects of the East bafado) Konk bāphád—Beng. bāphādû Cf temperado.

Abano (old Port and Indo-Port avano, 'a fan') Sinh

^{1 &}quot;With the King of Cananor there came two pages . carrying large avanos made of peacock feathers with which; they were fanning him" Gaspar Correia, Lendas da India, I, p 171.

from the Port pipa ('barrel'),
phint from the Port fita
('ribbon')

The etymology of the word abóbora, which is used only in the Iberic Peninsula-and then not in the whole of it—has not till now been definitely established by lexicographers. The Portuguese dictionary, Contemporaneo, says its derivation is uncertain, Dr Adolfo Coelho is of the opinion that it is from aboborar, 'to turn soft like over ripe fruit', Cândido de Figueiredo derives it from Low Latin apopres, which does not find a mention in the Glossarium of Du Cange, Francisco Simonet asserts that it is from the Hispano-Latin or Iberic apopores, mentioned by St Isidore, Bk XVII, ch 10, as equivalent to the cucurbita

If the word was taken over from Portugal, as I believe it was,¹ and introduced into the Konkan country and into Japan, at the same time as the plant, whose place of origin says Dr D G Dalgado in his Flora of Goa and Savantvad: 18 uncertain, it is remarkable that it should have given rise in Marathi to so many figurative compounds, with different meanings, enumerated by Molesworth, who does not, however, say what the origin of the word is These are bhomplá-devatá, "a tom-boy, a hoyden " Bhomplá-suti (ad), "coarse, gross, rude, rough, disorderly, slovenly " Bhompli-kharbúz, "a species of musk melon" Bhomplyá-rôg, "corpulency, obesity"

There are vernacular terms for the other varieties of the pumpkin dudhi, konknó dudhi, mahāró dudhi, kāló dudhi, kumvāló, in Konkani, kovhālá, kusmand, kāsi-phal, dudhyá, kālá dudhyá, devdan-

^{1 &}quot;They brought many aboboras and cucumbers" Roteiro da Viagem de Vasco da Gama, 2nd ed, p 92

[&]quot;Brinjelas, lemons, abobaras, which articles none may sell in retail except the farmer of this excise, or some one who has his permission" Simão Botelho, Tombo do Estado da India, p 49

[&]quot;Melons, aboboras of Portugal and of Guinea, water melons and combalengas" Gabriel Rebelo, Informação das Cousas de Maluco, in Collecção de Noticias para a Historia e Geographia das Nações Ultramarinas, Vol XII, p 172 [Combalenga is a species of pumpkin]

indicate the exact pronunciation of Portuguese words, taken over into Malay, nor does he employ any special discritical marks. He says, "the words are entered here (in his dictionary) not as they are written or joined together, but as they are pronounced"

Achar (an Indo-Port term used to signify 'fruits conserved in vinegar or salt,' equivalent to the English 'pickles') Marāchár, vern term lonchém (as in Konkani) — Hindi, Hindust. achár — Or, Ass, Punjāchár. — Sindhācháru, vern. namesāthānô, sāndhanô — Sinhachchár — Anglo-Indachar — Indo-Frachar, achars — Maláchar — Tet, Galachár, asár, vern term budú

The word has its origin in the Persian $ach\bar{a}r$. it was probably met with by the Portuguese in the Malay Peninsula and introduced by them otherinto $_{
m the}$ languages, directly or indirectly The of Hobson-Jobson authors think it likely that Western Asiatics got it originally from the Latin acetaria

It is worthy of note that the term did not find its way into

Konkanı, although current ın the Portuguese dialect of Goa ¹

Açoitar (to whip) Mal. açotar (Haex)

In Konkanı sait is used in the sense of 'a whip,' and saitái-kādhunk is 'to whip'

Acudir (to aid, to assist).

Mal cudir (Haex) —Tet, Gal.

kudir

Adem (a duck) Malayal. ádr —Tet rádè

Adeus (adieu) Konk ādês, the vern term in vogue among the Hindus is $R\bar{a}m$ - $R\bar{a}m$, and salám among the Mohammedans $\bar{A}d\hat{e}s\ karunk$, 'to bow in token of salutation'—Tet, Gal adeus, vern term bá-ôna ²

^{1 &}quot;When it (Semecarpus anacardum) is green they make a conserve of it with salt (which they call achar), and this they sell in the market, as we do olives" Garcia da Orta, Coloquios dos Simples e Drogas da India, Col v [ed. Sir Clements Markham, p 33] "Achar, appetizing curry, and conserves in salt" Dr A O de Castro, Flores de Coral, p 137

² From Ram-Ram Gonçalves Viana derives the Portuguese ramerrão ['onomatopoeic sound suggesting routine or every day affair'] See Apostilas aos Dicionarios Portugueses The same writer admits in Palestras Filológicas that "it is possible that this curious word may have come

months are in use, outside Goa (in Kanara, Savantvadi, Malvan) and in other languages, English names of the months are adopted Indian months are lunar and do not coincide with the European months Some of the Malay names, like Júlu, Mársu, testify very clearly to their Portuguese source, the origin of others is doubtful, as of Jun, Octuber

In Sinhalese, Mártu, Júni, Júli, are evidently from the Dutch, Maart, Junnij, Julij The names of the other months may be either Dutch or English

Agradecer (to thank) Mal agradecer (Haex) —Tet, Gal agradéci

Agua benta ('Holy water'). Konk āg-bént, more commonly used is ālmét—Beng agbent—Mal aguabenta (Haex) [In Konkani the form almént is also met with]

In the Indo-Portuguese dialects $\acute{a}gua$ is contracted into $\acute{a}gu$ or ag, and bento into bent. In $alm\acute{e}t$, l takes the place of g and m of b, with the absorption of the nasal following

The Hindus call their sacred water by such names as tirth,

gangá, gangodak. The Christians could have used the term pavitr udak, in the same way as in Teto they speak of bé saráni, 'water Nazarene or Christian, i e., Holy'

[Aguila, Aquila (the name of an aromatic wood, Aquilaria Agallocha, Roxb or of Aloexyllum Agallochum, grown in Cochin China and at one time highly prized in Europe) Anglo-Ind eagle-wood—Indo-Fr bois d'aigle 1

¹ ["There (in Champa, coast of Cochin China) also grows abundance of aloes-wood which the Indians call Aguila Calambua Barbosa, The Book, ed Longworth Dames, Vol II, p 209]

["In Ceylon there is a wood with a scent (which we call aguila brava), as we have many another wood with a scent, and at one time that wood used to be exported to Bengala under the name of aguila brava, but since then the Bengalas have grown more knowing, and buy it no longer "Garoia da Orta, Coll xxx, ed Markham p 254]

["A big bon-fire of sandal-wood, Aaquila, and other aromatic woods" Damião de Góis, Chronica de D Manuel, II, ch 6]

["From the bois d'aigle, which is more or less perfect, according as it is more or less resinous" Raynal, Histoire, II, p 41, cit in Glossario]

["The eagle-wood, a tree yield-

about a fourth are Hindus and a very few They are widely distributed over the Both Jats and Rajputs of the Pun jab provide many of the best recruits for the Indian Army In fact all the agricultural classes of the Punjab, except in the southwestern districts, made a magnificent response to the appeal for recruits in the great war and province's contribution of upwards of 400,000 men to the man power of the Empire speaks for itself The Gujars are an important agricultural and pastoral tribe, chiefly found in the eastern half of the province and in the extreme north-west In organisation they closely resemble the Jats and are often absorbed into that tribe. There are many minor agricultural tribes, priestly and religious castes (Brahmans, Savads and Kureshis), most of whom are landholders, the trading castes of the Hindus (Khatris, Aroras and Banlas), the trading castes of the Mahomedans (Khojas, Parachas and Khalhas) and the numerous artisan and menial castes. There are also vagrant and criminal tribes and foreign elements in the population are represented by the Baluchis of Dera Ghazi Khan and neighbouring districts in the west, who number about half a million and maintain their tribal system, and the Pathans of the Attock and Misnwall districts Pathans are also found scattered all over the province engaged in horsedealing, labour and trade A small Tibetan element is found in the Himalayan districts

Languages

The main language of the province is Punjabi, which is spoken by more than half the population Western Punjabi may be classed as a separate language, sometimes called Lahndi, and is spoken in the north and west The next most important languages are Western Hindi, which includes Hindustani and Urdu (the pollshed language of the towns) Western Pahari, which is spoken in the hill tracts, and Rajasthani, the language of Rajputana Baluchi, Pushto, Sindhi and Tibeto-Burman languages are used by small sections of the population

Agriculture

Agriculture is the staple industry of the province affording the main means of subsistence to 60 5 per cent of the population is essentially a country of peasant proprietors About one-sixth of the total area in British districts is Government property, the remaining five-sixths belonging to private owners, and a large part of the Government land is so situated that it cannot be brought under cultivation without extensive irrigation Thus the Lower Chenab Canal irrigates 2,103,000 acres of what was formerly waste land, the Lower Jhelum Canal, 41 33,000 acres and the Lower Barl Doab Canal, adds 1,078,000 acres to this total On account of the opening of the Sutlej Valley canals an area of about 1,314,000 acres more have been brought under cultivation Large areas in the hills and elsewhere which are unsuited to cultivation are preserved as cultivation extensive irrigation without are unsuited to cultivation are preserved as forest lands, the total extent of which is about 6,000 square miles Of the crops grown, wheat Public Works Department, there are five Sccreis the most important and the development taries (Chief Engineers), one in the Buildings and

of irrigation has led to a great expansion of the wheat area. Next in importance to wheat Other important staples are barley, rice, millets, maize, oilseeds (rape, toria and resamum), cotton and sugarcane In the canal colonies large areas of American cotton are grown but in the cotton growing districts the short staple indigenous varieties are predominant The country being preponderantly agricultural, a considerable proportion of the wealth of the people lies in live-stock Large profits are derived from the cattle and dairy trades and wool is a staple product in Kulu and Kangra and throughout the plains generally production of hides and skins is also an important industry

Industries

The mineral wealth of the Punjab is small, rock salt, saltpetre and limestone for road building being the most important products There are some small coal mines in the Jhelum, Shahpur and Mianwali districts Gold washing is carried on in most of the rivers not without remunerative results Iron and copper ores are plentiful but the difficulty of carriage and the absence of fuel have hitherto prevented smelting on a large scale. The Punjab is not a large manufacturing province, the total number of factories being only 640 the majority of which are cotton ginning and pressing factories Blankets and woollen rugs are produced in considerable quantities and the carpets of Amritsar are famous Sitk weaving is also carried on and the workers in gold, silver, brass, copper and Earthenware are fairly numerous Ivory carving is carried on extensively at Amritsar and Leiah and also in the Patiala State Mineral oil is being extracted and refined in the Attock and Rawalpindi Districts and a cement factory is established at Wah near Hassanabdai There is also a match factory at Shahdara and a factory for the hydrogenation and refining of oils at Ludhiana

Administration

Prior to the amendment of the Government of India Act in 1919 the head of the administraof India Act in 1919 the head of the administra-tion was a Lieutenant-Governor, drawn from the ranks of the Indian Civil Service Under the amended Act the province was raised to the status of a Governorship, with an Executive Council and Ministers, the Governor-in Council being in charge of the Reserved Subjects and the Governor with his Ministers of the Transferred Subjects The general system of provincial administration under this scheme is sketched in the section "Provincial Govern-ments" (a v) where is also given a list of the ments" (q v) where is also given a list of the Reserved and Transferred Subjects with the Governor and the Council and Ministers is an enlarged Legislative Council, with wide powers, whose scope and authority are given in the section "Legislative Councils" (q v), the system being common to all the major provinces. The business of Government is carried on through the usual Secretariat which consists of five Secretaries, designated (1) Chief, (2) Home, (3) Finance, (4) Revenue and (5) Transferred Departments, one Deputy Secretary, two Under-Secretaries, and one Assistan' Secretary

current in the East 1 The modern Portuguese dialect of Malacca has injabel, injubel, 'on one's knees, to kneel', that of Singapore injilhá 'to kneel', of Ceylon injoelho, injivelho, injevejo, injivejo (adv), 'on one's knees, having knelt' that of Damaun injoelh, 'on one's knees, having knelt, of Bombay injvelh, 'on one's knees' (pusá injevelh, 'to kneel'), of Macau dizelo, from de joelhos, 'on one's knees '2

Bengali has injuvel, enjil, 'knee', used by the Christians Enjil deon' to kneel'

Ajudante (assistant, adjutant) Konk ājudánt (us in a restricted sense) — Mal ajudán

Ajudar (to assist, to help)
Konk ājudár-karunk (especially in the sense of 'serving Mass'), vern terms ādhár divunk, hát divunk —Tet, Gal aidúda

In Teto and Galoli there does not exist the sound j, on this account the Portuguese j is replaced by d, thus we have hieda from Port igreja ('church'), duiz from Port juiz ('judge'), $kaid\hat{u}$ from caju (Anacardium occidentale).

Alar (to haul) L-Hindust. $\bar{a}l\acute{a}$ (us only in the imperative form)

Alâmpada (a lamp in a church) Beng ālamp (in use among the Christians) See lâmpada

Alavanca (hand spike used as lever for moving heavy bodies) Konk lavang, from this has arisen the expression lavangám pārayō ulaunk, which is figuratively equivalent to uttering high-sounding words, or undertaking a work beyond one's scope or powers—Sinh alavānguva—Tam alavāngu.—Mal alabanka, albanka—Gal lavanka s

In Konkani the term is only used of the big hand-spike;

^{1&}quot; He stood em giolhos ('on his knees') with his hands raised aloft" João de Barros, Dec II,x,3

² Cf impé ('to be on one's leg'), impedo impido ('being on one's leg') in the Portuguese dialect of Ceylon, impe, in that of Cochin, and empido, in that of Macau

^{3 &}quot;The Governor ordered the factor Gaspar Paes to get ready plenty of lime, timber, mattocks, alavancas, pickaxes, mortar-pans, baskets, barrows for the fortress" Gaspar Correia Lendas, III, p 619

Public Health.

The Department of Public Health is controlled by the Director of Public Health (also a member of the Indian Medical Service) who has, working under him four Assistant Directors of Public Health, 34 District Medical Officers of Health, and twenty-eight District Sanitary Inspectors In addition there is a temporary staff of 10 Sub-Assistant Health Officers and 15 Sanitary Inspectors for assistance in combating epidemic The ancillary services comprise

- (1) A Vaccine Institute which is in charge of the Assistant Director of Public Health, Of the Assistant Director of Public Incatal, Punjab (Technical) Vaccination, assisted by a Superintendent and which prepares sufficient vaccine lymph to meet the needs not only of the Punjab, but of the Army in Northern India and of several provinces and Indian States in and beyond the confines of India
- upon public health problems is carried out

(3) An Education Burcau, to which is attached a photographer who is an expert in cinematography

(4) A Chemical Laboratory in charge of a fully trained chemist whose duties comprise the chemical analysis of water samples and food stuffs

(5) A Public Health Equipment Depot which supplies Government Institutions, local bodies, etc., with reliable disinfectants, vaccine

sera, etc (6) A Public Health School, the staff of which is responsible for the training of health visitors The Principal, who is also Inspectress of Health Centres, supervises the maternity and child welfare work throughout the province

In matters connected with sanitary works the Director of Public Health works in close touch with the Superint ading Engineer, Public Health Circle, Punjab, who acts as technical adviser of the Public Health Department in (2) An epidemiological burcau, which is in engineering matters. This officer and the charge of the Epidemiologist to Government where, in addition to routine bacteriological advisors of the Urban Sanitary Board whose examination, research work in matters bearing duty it is to examine and report upon sanitary schemes put forward by local bodies

The Purm is a horizon the bull of the pour lates, belong to the Thetan group and their lands, belong to the Theta Chinese family. They are in it if my a failural people, 20 per ont of the architum of the country being in their hands. The Purm s and mo to of the bill trib and o, proce. Buddhi m, but Arimian, or the word the of nature spirits, is almost unity real. The Interest taken by the Burmers in the course of the war, their response to the call for regains and their generous contributions to arlow and charitable funds are no show that their apathy towards the government of the country is giving way to an intelligentically a state of the raise.

of its a selo descrit natural theroughfaces the courts. At all sections of the year to its a determine the Irrawaddy, are full of its a determine that In the Delta the civil of waterway 19 indeed practically the total of communication. The Irrawaddy it it is bella rivers and creeks appended river to the Delta rivers and creeks appended river to the

The Burma Railways has a length of 2007.3 mill open line. The principal lines to Lon Pongoon to Mandalay, from Sagaing to Maittain, the most northern point in the attention line, which serves Moulmein on the further bank of the Salween River.

Industry

Agriculture is the chief industry of the province and supports nearly three fourths of the population. The next total cropped area i 161 million acres of which nearly i million acres are cropped more than once Irrigation work supply water to nearly i million acres. India is very largely dependent on Burma for her supplies of kerosene, benzine and petrol which rank second to rice in order of importance. Teak wood is exported in large quantities from Burma to India.

Force is play an important part in the industrial life of the Province. The forest reserves cover some 33,018 square miles, while unclassed for sts are estimated at about 1,14,025 square miles. Government extracts some 45,341 tons of teal annually private firms, of whom the Bombay Burma Trading Corporation and Steel Brothers are the chief, extract over 3,49,679 tons Other timber extracted by licer to ever 2,79,116 tons and firewood

Tin and wolfram are fou Taxoy and Mergul Districts are found together in most Portuguese professed Christianity and were keen on the spread of their religion, farangi became a synonym for 'Christian',

In the Dravidian languages the word is also used to mean a 'cannon or \mathbf{a} piece ordnance' Tam, Malayal perangi, Tel, pirangi, phirangi, phiringi, Kan, Tul. pirangi, phirangi In Kambojan parēang means 'a European' and parēang-sês from Port francês, 'a Fienchman' In Persian, Firangistan is the name for Europe.

Ancora (anchor) Sinh änkara, ankáraya, vern term nēgurama — Mal jang-kar (Bikkers), dyankar, the vern terms are saú, lábu — Pers, Ar anjar, anjara

Francos, for by this name they call us in these parts" Roteiro da Viagem de Vasco da Gama, 1838, p 99

"Pointing out that since the Portuguese—Frangues, as they call them—were so powerful, it would be no wonder if they would enter this port (Jeddah) and destroy the House of Viafoma" Duarte Barbosa, Livro, p 248 [Hak Soc, ed Longworth Dames, Vol I, p 48]

1 "And letters which spoke of franque, which means Christian" Gaspar Correia, II, p 344

Dr. Hugo Schuchardt connects dyankar with the English 'the anchor', 1

*Andor ('palanquin,' oi 'a litter') ² Konk āndôi, āndôl —Hindust handolá — Beng āndôla —Sinh andôreva ('a Kandyan litter,'' Clough) —Malayal andôlam —Kan andana — Kodagu (Dravidian language) andala —Tet andoi ³

What is the etymon of andor and its original meaning? the word is not a very old one in Portugal, it is used to signify an ornamented contrivance consisting of a square board with four arms, one at each end, on which images of the saints

¹ The word langar or nangar, which is to be met with in the Indian languages, whether Aryan or Dravidian (and in Persian, langar), also in the sense of 'a plough,' comes from the Sanskrit lāngala

^{2 &}quot;Vasco de Gama was carried in andores, which are like litters (leytos dandas) except that they are uncovered and almost without any back, so low are the sides" Castanheda, I, 16

^{3 &}quot;I hereby order all pundits and Hindu physicians not to ride through this city (of Goa) or the suburbs there of on horseback, nor in andores and palanquins" Proclamation of the Governor of Goa, 15th December, 1574

(handūl) qui est semblable à une litière, soutenue sur les épaules de quelques piétons " ["The same person has told me that in Ceylon, the kings and those who go about in the manner of kings are carried in handouls, which resemble a litter, borne upon the shoulders of some carriers "]

Shakespear derives the Hindust handolá, not from Arabic or Persian, but from the Sansk hindola, "a swing, a swinging cradle or hammock, a swing or ornamented litter in which are borne the images of Krishna during the Swinging-Festival"

From this it can be concluded that andor went to Portugal from India where it was used in a restricted sense ² See palanquim

The author, who makes

a further exhaustive exposition of the various meanings of andor, its origin, and the difference between it and such other vehicles machila as (Anglo-Ind 'muncheel') and palanguim, in his Contribuições etc, and the Glossario, published subsequent to the present work, is definitely of the opinion that the Portuguese borrowed the word from India and in the form andola which it has in Malayalam, for it was in Malabar that they first heard it used Andola, in its passage to Portuguese, would normally take the form andor Cf the Port form Moghor from the Pers Mughal]

Anel (naut., a piece of rope that fastens the oars to the thole-pins, also a piece of cable used in fastening the anchor) L-Hindust. ānıla

Anil (indigo) Anglo-Ind anile, neel (obs, the term now used is 'indigo')—Indo-Fr anil, anir

The original of the Port anil is the Ar al-nil, from the Sansk $n\bar{\imath}l\bar{\imath}$, Neo-Aiyan nil nil 1

¹ Konk hindulo, hindló, Mar hindolá, hindulá, Hindi hindola

^{2 &}quot;The andores are to-day uncommon and they are used exclusively by Hindu high priests, and in pagodas, under the name of palqui. The use of these, like that of the Umbrella and the Torch, was conceded by the Government in return for services rendered to the State" O Gabinete Litterario das Fontainhas (Pangim), III, p. 155

^{1 &}quot;The and is so called by Arabs and Turks, and in all languages, but only in

Schools are divided into schools for pereral education and schools for special education. The latter are schools in which in truction is given in a special branch of technical or profe sional education. The main divisions of schools for general education is into Primary and Secondary. In the Primary and Secondary In the Primary and Secondary In the Primary trace of the Irrivative Control on (1961). The Irrivative Primark of the department Associated from the Boods and Buildings Practice of Primary and Secondary In the Primary In the P Primary and Secondary In the Primary

" All this our men will see for themselves in port of the Cananor, in which there are very large vessels, which the Captains will send their men to see, so that they might give an account of everything they had seen when they go to Portugal, on these ships there are no pumps, only some pails made of thick cow's hide, tanned in such a way, that they last long, and with these they bale the water out by hand, these pails they call baldes (I, p. 123)

"Luis de Mello de Mendoça set out with his companions to help at the baldes, with which they began to bale out the water" (1546) Diogo de Couto, Dec. VI, 111, 3.

Indian dictionary-writers give the Portuguese word as the original "Balty, s H bālti, 'a bucket', is the Portuguese balde" Hobson-Jobson

Bálsamo (balsam, ointment) Konk bálsm — Hindust balsan —? Mal balasan (Ar) ? Mac, Bug balasáng — Jap bársan, bārusamo — Ar bálsam, balsám, bolasán, bolsán

Baluarte (bulwark) Mal.

baluvárdi — Jav baluvárti, balovárti, balúrti.

Bambu (bot, Bambusa vulgaris, bamboo) Anglo-Ind bamboo, [bambou] —Indo-Fr bambou 1

The origin of the word is very obscure Marsden mentions it as a pure Malay word, but the common name for it is Crawfurd considers it halah to be a term that belongs to the west coast of Sumatra. Wilson regards it as coming from the Kanarese, and Reeve mentions it as such, but the usual terms are biduiu (Tulu beduru) and gala It appears to me that the most probable source of the word is the Marathı bāmbú (the same ın Gujarati), which is the generic and common name of the plant.

The form mambu, which occurs in the Portuguese chroniclers, might have been

^{1&}quot;They regarded death as certain either from the blows of Bambús (ht 'from scourges of bamboos'), or from perpetual captivity in the prisons of Cantom" Lucena, Bk X, ch 26

[&]quot;He wished to reduce the weight by taking away from the canga $(q \ v)$ a bambu" Λ F Cardim, p 199.

It is not known for certain when and by whom the word 'banana' was introduced into India, which, according to Garcia da Orta, came from Guinea "They also have figs in Guinea, where they call them bananas" It appears that the term made its entry

Duarte Barbosa, Livro p 239 [Hak. Soc, ed Longworth Dames, Vol I, p 21]

"Bannanes which the Portuguese call Indian figs" Pyrard de Laval, Voyage, 1615 [Hak Soc Vol I, p 113]

"He ordered cooked rice to be served out there, and this they served upon the green leaves of the figueira ('the banana-tree'), which are broad like a sheet of paper" Gaspar Correia, I, 17

1 "It is possible that there is reason for this, it can safely be said that the word is not Asiatic in origin, and it also does not appear to be American" Conde de Ficalho, Col xxii

"But it is the commonest fruit which is to be found everywhere all the year round, and in great abundance, not only in these Indies (West), but also in our India, and all over Guinea and Brazil, where it exists, and where we saw more and better species than these, and where they call them plantanos, and in our India figos, and in Brazil bananas" Padre Gabriel Afonso, in Historia tragicomaritima, Vol VI, p 50

(through the Portuguese ?) in the seventeenth century as being more appropriate, or, rather, to mark the difference between the fruit of the Musa paradisiaca and of the Musa sapientum, now reduced to only one species ¹

Anglo-India employs generally the term 'plantain', which is a corruption of the Spanish plantano, another name for the 'banana.' See goraba

[Mocquet, Voyages (ed 1645), calls 'bananas 'fiques de platane Watt (The Commercial Products of India) says "The name 'banana' is very seldom used by the English in India, though it is universal in the fruit-shops of In India all kinds England indiscriminately called plantains "Yule quotes Robertson Smith, the great Arabic scholar, who points out that the coincidence of the name 'banana' with the Ar banān, 'fingers or toes', and banāna, 'a single finger or toe'.

^{1 &}quot;Books distinguish between the Musa sapientum or plantain, and the Musa paradisiaca, but it is hard to understand where the line is supposed to be drawn" Hobson-Jobson

proclamation') Konk bánd, vern. terms dāngoró, dāndoró
—Tet, Gal bándu

Bandola (a shoulder-belt)
Mal, Mac, Bug. bandóla,
bandála — Ach bandála

[Banean, Banian (a Jain trader, and especially of the Province of Gujarat or Cambay) Anglo-Ind Banyan ¹

The word was adopted from Guj vāniyo, sing, vaniyā, pl (which form appears to be the

1 ["And in this kingdom (of Guzerate) there is another sort of Heathen whom they call Baneanes, who are great merchants and traders

This people eats neither flesh nor fish, nor anything subject to death, they slay nothing, nor are they willing even to see the slaughter of any animal "Duarte Barbosa, The Book, ed. Longworth Dames, Vol I, p 110]

[" the Banianes of Cambaia which observe Pythagoras lawe" Linschoten, Voyage (Hak. Soc.), Vol. I, p. 223.]

["The baniani are a certain class of Hindus who eat neither flesh nor fish, and consume grain, vegetables, milk, and a great deal of butter

If the talk is of business, they give a ready answer, and are such strong anthmeticians that in the shortest time they can make any sort of calculation, never making a mistake of a single figure. They hold it a sin to kill any animal." Manucci, Storia do Magor, I, pp. 155-156]

immediate source of the Port. word), which itself comes from the Sansk vani, 'a trader', and vanij-jana, 'a tradesman' Yule thinks that it is probable that the Portuguese found the word already in use by the Arab traders Among the humours of philology might be mentioned P F Vincenzo Maria's (1672) explanation that the Portuguese called Hindu traders of Guiarat Bagnani, "because of the frequency and superstition with which they washed themselves throughout the day ". Bagnáre in Italian means 'to bathe'. The early European travellers applied the term to the followers of the Hindu religion generally The old Portuguese writers, with the exception of da Orta, say that "all the baneanes follow the doctrine of Pythagoras", whereas truth is that Pythagoras drew a large part of his doctrine from India There is a third sense in which the term is or was used in Calcutta, viz, of an Indian broker who is generally attached to European business houses in India

some of the words seems to indicate that their source is English

Baptizar (to baptise)
Sinh bavtisár karanavā (lit.
'to make to baptize') In
Konkani the common expression is bāvtijm divunk, 'to give baptism'.

Baralhar (to shuffle cards) Konk bārālhár karunk — Tet barálha, vern term kákul

Baralho (a pack of cards)
Konk. bārálh—? Mar, Guj.,
Pers (according to Molesworth)
barát—? Tel baredo In Marathi and Persian it means
'one of the suits of cards, sequence of cards'

The origin of the Portuguese word is uncertain. Spanish has baraja Hindi and Hindustani, more allied to Persian, do not use barát Ganjiphá, used in the Indian languages for 'a pack of cards', is of Persian origin

Barba (beard) Mal barba (Haex), vern term jángut

Barcaça (a big bark or boat) Konk, Guj bārkas — Malayal varkkas — Ar barkús ¹ Barqueta (a small bark)
Mar barkatá "A small barque
or boat, the same as barkin or
barquenha" Molesworth

Barquinha (a small boat)
Mar barkin "A little barque
or boat of a particular description Barkuni (current
in the Malwán-pránt) A small
kind of hodí or planked boat."
Molesworth 1

Barracas (a rude shelter, hut, tent). Tel bānkásu, barkásu

Barriga (belly) Mol barrga, camphor of medium quality ² See cabeca and pé

¹ "He boarded a big barcaça " Diogo de Couto, Dec. VI, iv, 5

[&]quot;But the men of the barcaças and galleys, which now here, now there were firing their guns" Id, Dec VIII, 1, 35

^{1 &}quot;He himself carried Dom André in the barquinha to the shore" Bocarro, Dec XIII, p 485

² Garcia da Orta says (Col xii) "The Hindus, Banians, and Moors, who buy this article, divide it into four kinds, viz, Cabeca ('head'), perto ('breast'), pernas ('legs') and pé ('foot') " And Conde de Ficalho makes the following comment "Rumphius (Herbarium Amboinense) also describes the qualities according to which it is classified big pieces, each approximately as big as a nail, they call Cabessa, which he says means 'head', grains or very thin layers are called Barriga, or 'stomach', and the kind in the form of powder or in very

Mahomenans and Hindus on communal lines | will re and early marriage are among them. The Hindus killed in sympaths with their Both the birth and death-rates of the Province co-religionists in the Punjab demanded the are abnormally low. The birth rate in the renalon of the administered districts of the Province with the Punjab or, if that were not attsinable then the placing of the judicial administration of the Province under the Punjab High Court at Labore The Mahomedans on the other hand claimed the right of their Province to a status corresponding with that enjoyed by other Provinces of India and to immediate re forms initiating and providing for progressaling that line. The Hinlus argued that a separate Pathan Province on the I rontier would cause a dangerous sentimental division from the rest of India, with leanings towards the allied racial clements outside British India. The answer to that was that a contented Pathan Province would be a valuable butteres against hostile feeling across the Lorder The Committees de liberations ended in disagreement, the two Hindu members writing each a separate report favour able to the Hindu viewpoint already explained and the majority of the Committee, comprised of all its other members recommending advance on a Provincial basis. Their principal recommendations were for-

Tracts as a separate unit in charge of a minor administration under the Government of India,,

Larly creation of a Tegislative Council for ! the Settled Districts and appointment of Member of Council and Minister.

Appointment of a second Judicial Commissloper which has since been sanctioned and of the judicial administration in various directions, including interchange of officers with the Punjab, so that the member, of the Service in the smaller Province should have the advantage of experience in the larger one

'If (concluded the Majority) the Pathan nationality is allowed self-determination and given scope for that self-development within the In dan Empire under the Reforms Scheme after which it is now striving we are assured tha, with a contented Frontier population India can face with calm resolution the future that the Frontier has in store for her"

The People.

The total population of the N -W F P (1931) is 4,682,685, made up as follows -

Pazata 669,636 Trans-Indus Districts 1,753,744 Trans-Border Area 2,259,305

This last figure is estimated There are only 361 3 females per 1,000 males in the towns, and 872 2 females per 1,000 males in rural areas

This disproportion of the sexes cannot at present be explained in the N-W F P any more than in other parts of Northern India where it also appears

The discrepancy is greater for the sexes cannot at present the sexes cannot at the s here than in any other Province of India is no ground for believing that the neglect of girls in infancy has any effect in causing the phenomenon On the other hand, the female population has to face many trials which are unknown to men The evils of unskilled midare abnormally low. The birth rate in the administered districts, according to the last available official reports, is 25 8 and the deathrate 21 0

The dominant language of the Province is Pashtu and the population contains several lingual strata. The most important sections of the population, both numerically and by social position, are the Pathans They own a very large proportion of the land in the ad ministered districts and are the ruling race of the tribularen to the west. There is a long list of Pathan, Baluch, Rajput and other tribal Gurkhas have recently settled in the Province The Mahomedan tribes constitute almost the whole population, Hindus amounting to only 5 per cent of the total and Sikhs to a few thousands The occupational cleavage of the population confuses ethnical divisions

Under the North-West Frontier Province Law and Justice Regulation of 1901, custom governs all questions regarding successions, betrothal, marriage, divorce, the separate betrothal, marriage, divorce, the geparate property of women, dower, wills, gifts, parti Retention of the Settled Districts and Tribal tions, family relations such as adoption and guardianship, and religious usages and institutions, provided that the custom be not contrary to justice, equity or good conscience In these matters the Mahomedan or Hindu law is applied only in the absence of special custom

Climate, Flora and Fauna

The climatic conditions of the N-W T P which is mainly the mountainous region, but includes the Peshawar Valley and the riverine tracts of the Indus in Dera Ismail Khan District, are extremely diversified The latter district is one of the hottest areas of the Indian continent, while on the mountain ranges the weather is temperate in summer and intensely cold in winter The air is generally dry and two wet seasons, one the S-W Monsoon season, when moisture is brought up from the Arabian Sea and the Bay of Bengal other in winter, when storms from tamia, Persia and the Casplan Districts bring widespread rain and snowfall Both sources of supply are precarious and not infrequently either the winter or the summer rainfall fails almost entirely The following description of the Daman, the high ground above the Indus, stretching across Dera Ismail Khan to the mountains on the west, occurs in an account written some years ago by Captain Crosthwaite "Men drink once a day and the cattle every second day Washing is an impossible luxury It is possible in the hot weather to ride thirty miles and neither hear a dog bark nor see the smoke of a single fire " With the exception of the Kunhar River, in Hazara, which flows into the Jhelum, the whole territory drains into the Indus. The flora of the Province varies from the shrubby jungle of the south eastern plains to barren hills, pine forests and fertile mountain valleys

Tigers used to abound in the forests but are

(p 237) "And for two flarazes ('porters') two pardaus each per month, and four tangas for bata " The editor of Botelho's Tombo do Estado da India, Rodrigo Felner, remarks that bata appears to stand for bate, 1e, 'paddy', or 'rice in the husk' But there is no error in the text, because bate is itself a corruption of bata, (a), Marathi-Konkani bhát Kanarese bhatta 1 But the author does not use the word in this sense, but in that of 'ration', as is seen from the text and the item that follows " And for the chief gunner, thirty eight thousand nine hundred and twenty reis per year, inclusive of mantimento" In this case, bata is the same as the Hindust bhata, bhatta, or bhātá, Mar bhatta bhātá, or bhātém, Konk bhātém

Reeve says that bhatta is a Kanarese corruption of a Sansk word, which cannot be other than bhakta, 'food' in general, and 'cooked rice'

in particular, which is the principal diet of the Indian people ¹ In this last acceptation bhát (masc) is current in Hindustani and Marathi, but in Konkani it is less used than \$1t, in Sinhalese bhakta, batta, and bat

With the lapse of time bhát (neut) came to be the prevailing name in Marathi and Konkani of 'rice in the husk' and of the 'rice-plant' itself, supplanting other terms like sál, dhán, it then passed into Kanarese and was found side by side with the vernacular něllu ²

Naturally, bhát in its twofold meaning, of 'cooked rice'
and 'rice in the husk', did not
take long to designate, first,
'ration of cooked rice', then,
'uncooked rice' or 'money
to buy the allowance of uncooked rice', and finally,
'food-stuffs, allowances, gratuities' And to denote these

cruzados towards mantimento, cash in hand "Gaspar Correia, II, p 267

¹ Cf the Portuguese cate or (cato) from kata ('catechu'), bétele from tettila ('betel-leaf')

^{1 &}quot;In Calcut there is little rice, which is the chief mantimento ('staple food'), as wheat is among us'' Castanheda I, ch 73

² Nélt is used in the Port dialect of Malacca, and Cândido de Figueiredo mentions it as a term old and inedited

inserted with eximinal and eisil and resenue pieces, and are needed in modelatelletts. win exercise only culminal and a sense powers nome anti-district are in charge of Additions co I stong for et of Commission of The sill I on community characteristic of some patte of Inita is not in the none among the Pathans. its plann at a son al unit is to some extent token ty the tribe, which is beli tower or his the tick of limiting and applications of the real or imaginam Modern municip I local posemment has been introduced in the towns. There are also district bounts. The district is the unit are three brane. The direct is the unit for police mosterland concentional administration and the collings start includes a District Superintensers of Police a Civil Surpeon the Superintensers of Police a Civil Surpeon the Superintensers of Schools The Province forms a similar force of Schools The Province forms the force division that of Hazara There are four divisions of the Roods and Buildings of the Roods and Buildings of the Roods and Suidings of the Roots and Suidings of the Practi of the Public Works Department, each under an Executive Ingineer The frieriton Department of the P W D is in charge of a Chief Engineer, irrigation, who is also execute Secretary to the Chief Commissioner. The administration of the eivil police force of the districts is vested in an Inspector General There is a special force of Irontier Constabulary. The revenue a special and expenditure of the Province are wholly Imperial Of the Agencies only Kurram and Tochi Valley pay land revenue to the British Government. The revenue administration of all five administered districts is controlled by the Bevenue Commissioner. For the administration of civil and criminal justice there are two Civil and Sessions districts, each presided over by a District and Sessions Judge The two Judicial Commissioners are the controlling authority in the Judicial branch of the administration, and their Courts are the highest criminal and appellate tribunals in this Province The improvements needed to bring the judicial administration up-to-date, in accord with the growth of the business of administration, are dealt with in the Inquiry Committee's report to which reference was made above

A Governor's Province -In January 1932 It was announced that the Province would be constituted as a Governor's Province, and the application to the Province of the provisions of the Government of India Act was gazetted, subject to the following modifications -

(a) that the number of members of the

Legislative Council shall be forty,
(b) that the maximum annual salary of the Governor shall be Rs 66,000, and of a member of the Executive Council Rs 42,000, and

(c) that Section 58 of the said Act shall cease to have effect in its application to the Province This notification shall have effect from such date or dates in respect of any or all provisions as may be notified

Electoral rules were notified in February 1932

The Hon'ble Sir Steuart Pears, KCIE, CSI, 1 c.s , from 10th May 1930 to 9th September 1931

The sweet potato (Convolbatatas). native of ขนโนธ America, was introduced into India by the Portuguese, together with its name in the place of origin, which some of the languages preserved, whilst others replaced it with vernacular ones Subsequently, the English imported the ordinary potato (Solanum tuberosum), and this as Yule and Burnell observe robbed the former of its name The Portuguese in India must have distinguished kınd from the the one other by the names batata doce ('sweet potato'), and batata de Surrate ('Surat potato') or Inglesa ('English potato'), and the vernacular languages must have restricted the use of the name batata to one species or the other.

Bate ('rice in the husk', also 'growing rice') Anglo-Ind battee or batty, formerly used in the south of India, now supplanted by paddy

The source-word is the Marathi-Konkani bhát See bata 1

The Anglo-Indian paddy is from the Malay pádi, Jav pári, which Crawfurd identifies with bate and seems to think that the Malayo-Javanese word may have come from India Portuguese with the Yule and Burnell think "this is impossible, for the word pārī, more or less modified, exists in all the chief tongues of the Archipelago, and even in Madagascar, the connection of which last with the Malay regions certainly was long prior to the arrival of the Portuguese"

[&]quot;There is another which produces tubers similar to the small English potatoes' (In Agricultor Indiano, of B F da Costa, II, p 339) In the island of St Nicholas, Cape Verde, they also speak of batata inglesa (See Jour Geo Soc Lisb, 3rd ser, p 354) In the Island of Madeira, the sweet potato is called batata, and the other kind semilha Spanish uses batata of the sweet-potato, and the kitchen variety it calls patata

^{1 &}quot;(At Baçam) the mura (q v) of batee, which is rice in the husk, contains three candis" António Nunes, Livro dos Pesos, p 40

[&]quot;From this rice which they call bate, the kingdom is called Batecalou, which is interpreted as meaning the Kingdom of Rice" João de Barros, Dec III, 11, 1

[&]quot;In the fields (of Ceylon) there is plenty of rice, which they call bate" Lucena, Bk II, ch 18

Baú (a trunk, box) Konk bāú, vern term pét —Gu] bāú, bávum.—Hindust bāolá —Gal baban baú ²

?Bazar (a permanent market or street of shops) Mal (bazar, according to Bikkers), Low Jav, Sund, Mad, Batt. pásar — Mac pásarā — Bug pása —Tet, Gal básar

'From Persian bāzār, a permanent market or street of shops The word has spread westward into Arabic, Turkish, and, in special senses, into European languages, and eastward into India, where it has generally been adopted into the vernaculars" Hobson-Jobson

But Dr Heyligers says that in the Malayan languages it was probably introduced by the Portuguese, who might have received it from the people of the Levant or from the Moors of the Iberic peninsula, "because it is not at all probable that before that time Persia had commercial relations with the Far East" But the Arabs and the Indians had such relations, and they must have been then employing the Dr Schuchardt's conjecture is that the Malays received it from Southern India "The people of Kling (Kalinga, on the Coromandel Coast) car ried on a big trade with the Archipelago before the arrival of the Europeans" Rigg 1

João de Sousa observes that bazar is an old word in Portuguese but little known, and Simão Botelho (1554) explains what the bazar of Chaul is 'The rent of the bazar, that is of the shops where things

^{1&}quot;The other day they dealt with the manner of directing bateria against the fortress" Bocarro, Dec XIII, p 643

^{2&}quot;A small baull valued at a thousand and five hundred reis" (1601) A Tomás Pires, in Jour Geo Soc Lisb, 16th ser, p 724

¹ The old Portuguese writers when speaking of Malacca frequently mention *Quelins*, mercadores Quelins ('Quelin merchants') and the *Quelin* quarter of the City

[[]Quelin is the Portuguese trans literation of Këling, the name applied in the Malay countries to the Tamil traders settled in those parts. The Anglo-Indian form is 'Kling' "The name is a form of Kalinga, a very ancient name for the region known as the "Northern Circars" Hobson Job son]

and weights of India (Lyvro dos Pesos da Ymdia e asi Medidas e Moedas), savs monies exhibit such variations that it is impossible to write anything certain about them To have an approximate idea of the coins mentioned either in the text or the citations, it will be useful to know that in the early sixteenth century. for purposes of account, a tanga branca, equivalent to 120 reis, was divided into 4 barganins, and each barganim into leaes, and each pardao into 5 tangas For barganim Hobson-Jobson, s. v bargany]

Beatilha (the name of a kind of muslin) Anglo-Ind betteela, beatelle —Mal bitila 1

[Yule thinks that the Sp or Port beatilla or beatilla, 'a veil', is derived, according to Cobarruvias, from "certain beatas, who invented or used the like" Beata is a religieuse Compare the modern English use of 'nun's veiling' Crooke quotes from the Madras Admin Man Gloss p 233 to show that beatilha is the same as what is known at present under the name of 'organdi']

Bêbado (a drunkard) Konk bebdó, vern terms sarekár (which likewise signifies 'a liquor-seller'), saró piyetaló, saró-lāglaló, and similar others Bebdúl, a sot Bebdikáy, bebdepan, drunkenness—Sinh bêbaduva, bêbaduvu, bêbadda, bêbayiyā, vern terms bímatkaráyā, bónayā, viri Bêbedukáma, drunkenness

Beijoim, benjoim (a kind of incense, derived from the resin of the Styrar benzoin, Dryander, in Sumatra) Anglo-Ind benzoin, benjamin Indo-Fr benjoin ¹ [See Hobson-

^{1 &}quot;From Chaul and Dabul they bring thither great store of beirames and beatilhas" Duarte Barbosa, p 275 [Hak Soc, ed Longworth Dames, Vol I, p 129 Beirame is a very fine cotton stuff—calico—in various colours, formerly produced in India It is the Pers bairam, bairami]

[&]quot;Very finely woven pieces of beatilha from Bengal" Antonio Tenreiro, Itinerario, ch. xvii

AJMI R MERWARA

Almer Merwara 14 nn Isolated British Pro The first are composite and sin the Bay of Bengal vince in Rajputana. The Agent to the Gov Merwara with a total area of 2,711 square miles and a population of 501,30. At the close of the Pindari war Daulat Rao Scindia, by a treaty, dated June 25, 1818, ceded the district to the Pritish Lifts five per cent of the population are supported by acciculture, the industrial population being principally employed in the cotton and other industries. The principal crops are maire, millet, barley, cotton oil seeds and wheat

> Chief Commissioner, The Hon. Sir Lonard Ili snolda, kc 11,081

The word is originally Sanskrit ($bhant\bar{a}k\bar{\imath}$), brought to the Spanish Peninsula by the Arabs and carried by the Portuguese, with the vegetable from India, to Malacca See Hobson-Jobson

[Yule says that probably no word of the kind which has undergone such extraordinary variety of modifications, whilst retaining the same meaning, as this $bhantar{a}kar{\imath}.$ "The Skt 18 bhāntā, baigan, baingan, badıngan, badılgan, Ar badınjān, Span alberengena, berengena, Port beringela, bringiela, bringella, Low Latin melangolus, merangolus, Ital melangola, melanzana, mela insana. French aubergine (from alberengena), melongène, merangène, and provincially belingéne, albergaine, albergine, albergame

It looks as if the Skt word were the original of all The H baingan again seems to have been modified from the

P badingān, [or, as Platt asserts, direct from the Skt vanga, vangana, 'the plant of Bengal',] and baingan also through the Ar to have been the parent of the Span berengena, and so of all the European names except the English 'egg-plant'"]

Bétele, bétel, betle, betere, betre (bot, the betel, the leaf of the Piper betel) Anglo-Ind betel—Indo-Fr bétel

From the Malayal vettila "All the names which are not Portuguese are Malabar (Malayalam). For instance betre, chuna, which is lime, mayanato, which means washerman, patamar, a courier" Garcia da Orta, Col red Markham, p 477 The Malayal vettila is itself a com-'simple or pound of veru mere,' and ila, 'leaf,' 'simple or mere leaf' Neo-Aryan languages also use

goas which are like Berengelas" P Baltasar Afonso (1585) in Jour Geo. Soc Lisb, 4th ser, p 376 [We have not been able to identify manguegoas Portuguese dictionaries do not mention it]

^{1 &}quot;This betele we call folio Indio, ('the Indian leaf'), it is as broad as the leaf of the plantain herb" Duarte Barbosa, p 286 [Hak Soc, ed Longworth Dames, Vol I, p 168 The 'plantain herb' referred to is the Plantago lanceolata, the common plantain weed, and not the Indian plantain or banana]

appointed and in 1904-05 the boundary of the | r Hinterland or Protectorate, as it now began to be called, was demarcated It was agreed on the one side that the Aden authorities should have no dealings with any indigenous ruler under Turkish suzerainty beyond the boundary then fixed, and on the other, that the Turks should not concern themselves with affairs inside that boundary Matters continued thus until the outbreak of the Great War in 1914, when the Turks invaded the Protectorate and endeavoured to blockade the Settlement For strategic reasons the direction of opera-tions against this menace was transferred from Army Headquarters in India to the London War Office in 1917 and control of political relations with the Aden tribes and rulers necessarily accompanied this strategic The civil Administration of the Settlement as part of the Bombay Presidency was in no way affected by this change After the war it was suggested that this too might be transferred, but the Indian Government objected and the project was dropped Matters until 1927, remained there, when much correspondence about the incidence of Aden expenditure, the arrangements of 1917, originally adopted as a war measure, were confirmed, and administrative as well as strategic control of the units composing the Aden garrison was also vested in His Majesty's Government

The present position, therefore, is -

- (1) The Aden Settlement to which Indian interests are confined, remains part of British India, included in the Bombay Presidency
- The affairs of the Protectorate, in which India is not concerned, are dealt with by the Resident, who is also chief executive officer of the Settlement and Commander-in-Chief of the forces, under orders from the Colonial Office in London
- Administrative and strategic control of the military and air forces in Aden is under the War Office in London

The Resident is consequently under three authorities, namely -

- (1) The Government of Bombay,
- (2) The Government of India, and
- (3) His Majesty's Government in London, arrangement which makes smooth and an efficient working very difficult

The area of the Settlement of Aden and expendit is 75 square miles, the population in 1921 was a follows -

about 53,000 The	racial	composition	of the
population is as unde	er	1

The Island of Perim has an area of about 5 square miles and a population of 2,075 Aden Protectorate comprises an area of about 9,000 square miles and has an estimated population of 656,400

Administration.—The chief executive officer (1 e, the Resident and Commander-in-Chief) has under him three Assistant Residents, the first and the third being officers of the Indian Political Department, and the second, an officer appointed by the Colonial Office in London, who is also the Protectorate Secretary, Judicial work is performed by a Judicial Assistant who is a member of the Indian Civil Service and is an Additional Sessions Judge The Police are under the control of an officer of the Indian Police Service The Island of Perim is also under the administration of the Resident The civil administration generally follows the lines in force in India

Finances -Until 1900 the entire civil and military expenditure in connection with the Aden was borne by Indla, although as early as 1886, the Gover ment of Indla arged the propriety of the expense of Aden being divided between Great Britain and India In 1895 the In 1895 the Welby Commission was appointed to examine the question They recommended that the equity of the case would perhaps be met if the United Kingdom were to contribute one half of the military charges As a result of these recommendations His Majesty's Government made with effect from the 1st April 1901 a net annual contribution of £72,000 to Indian revenues towards the military charges of Aden, which continued up to 1927 With effect from 1st April 1927, His Majesty's Government have become responsible for the whole of the political and military expenditure of Aden, subject to an annual contribution of £250,000 from the Government of India for the first three years, to be reduced thereafter to £150,000 or a third of the total cost whichever may be less

Civil expenditure in Aden is borne partly by the Government of Bombay and partly by the Government of India The figures of revenue and expenditure (Provincial and Central) are

The Home Government.

The Home Government of India represented for sixty vers the gradual evolution of the governing board of the old rast India Company. The affairs of the company were originally managed by the Court of Directors and the General Court of Proposition. of Proprietors In 1784 Parliament established a Board of Control, with full power and autho-tity to control and direct all operations and concerns relating to the civil and military. Associated with the Secretary of State and government, and revenues of India By de-trees the number of the Board was reduced India Office, housed at Whitehall Appointgrees the number of the Board was reduced India Office, housed at Whitehall Appoint-and its powers were exercised by the President, ments to the establishment are made by the the lineal procursor of the Secretary of State Secretary of State in Council, and are subject to for India With modifications this system the ordinary Home Civil Service rules in lasted until 1858, when the Mutiny, followed all respects by the assumption of the Government of the by the assumption of the Government of the Crown, demanded a complete change under the Act of 1858 (merged in the consolidating measure passed in 1915) the Secretary of State is the constitutional adviser of the bution amounting to £50,000 a year The bution amounting to £50,000 a year The constitutional adviser of the bution amounting to £50,000 and a year The constitutional adviser of the spirit of the 1919 Act, an arrangement inherited generally all the powers and duties which were formerly vested either in the Board of Control, or in the Company, the Directors of State is placed on the Home estimates and and the Secret Committee in respect of the most of the outlay needed for the controlling and government and revenues of India

power to give orders to every officer in India, Office administrative expenses is about £115,000 including the Governor-General, and to superintend, direct and control all acts, operations

The Indian States.

The area enclosed within the boundaries of India is 1,773,165 square miles, with a population of 315 132 537 of people-nearly one fifth of the human race. But of this total a very large part is not under British Administration The area covered in the Indian States is 675,267 equate miles with a population of millions The Indian States embrace the widest variety of country and jurisdiction They vary in size from petty states like Lawa, in Rajputana with an area of 19 square miles, and the Simh Hill States, which are little more than small holdings, to States like Hyderabad as large as Italy with a population of thirteen millions. They include the inhospithirteen millions. They include the himopartible regions of Western Rajputana, Baroda, part of the Garden of India, Mysore, rich in agricultural wealth and Kashmir one of the globe

Relations with the Paramount Power

So diverse are the conditions under which i the Indian States were established and came into political relation with the Government of India that it is impossible even to summarise But broadly it may be said that as the British boundaries expanded, the states came under the influence of the Government and the rulers were confirmed in their nosees-To this general policy however there was, for a brief period, an important departure the regime of Lord Dalhousle During the Government introduced what was called annexation through lapse. That is to say, when there was no direct heir, the Government considered whether public interests would be secured by granting the right of adoption Through the application of this policy, the states of Satara and of Nagpur fell in to the East India Company, and the Lingdom of Oudh was annexed because of the gross misgovern ment of its rulers Then came the Mutiny It was followed by the transference of the dominions of the East India Company to the Crown, and an irrevocable declaration of policy toward the Indian States In the historic Proclamation of Queen Victoria it was set out that "We desire no extension of our present territorial possessions, and while we will permit no aggression on our dominions or our rights to be attempted with impunity, we shall allow no encroachments on those of others We shall respect the rights, dignity and honour of the Native Princes as our own, and we desire that they, as well as our own subjects, should enjoy that prosperity and that social advancement which can only be secured by internal peace and good government." Since the issue of that proclamation there has been no encroachment on the area under Indian rule by the Government of India On the contrary, the movement has been in the opposite direction In 1881 the State of Mysore, which had been so long under British administration that the traditions of Native rule were almost forgotten, was restored to the old Hindu ruling house In 1911 the Maharajah

of Benares, the great taluqdar of Oudh, was granted ruling powers over his extensive possessions. On many occasions the Government of India has had to intervene, to prevent gross misgovernment or to carry on the alministration during a long minority, but always with the understring intention of restoring the territories as soon as the necessity for intervention passed. Almost all states possess the right of adoption in default of heirs.

Rights of Indian States

The rights and obligations of the Indian States are thus described by the Imperial Gazetteer The Chiefs have, without exception, gained protection against dangers from without and a guarantee that the protector will respect their rights as rulers. The Paramount Power acts for them in relation to foreign Powers and other Indian States habitants of the Indian States are the subjects of their rulers, and except in case of personal jurisdiction over British subjects, these rulers and their subjects are free from the control of the laws of British India Criminals escaping to an Indian State must be handed over to it by its authorities, they cannot be arrested by the police of British India without the per mission of the ruler of the State The Indian Princes have therefore a suzerain power which acts for them in all external affairs, and the same time scrupulously respects their in ternal authority The suzerain also intervenes when the internal peace of their territories is seriously threatened Finally they partcipate in all the benefits which the protecting power obtains by its diplomatic action, or by its administration of its own dominions, and thus secure a share in the commerce, the railways, the ports, and the markets of British India Except in rare cases applied to maritime states, they have freedom of trade with British India although they levy their own customs, and their subjects are admitted to most of the public offices of the British Government

Obligations of Indian States

On the other hand, the Indian States are under an obligation not to enter into relations with foreign nations or other states, the authority of their rulers has no existence outside their territories. Their subjects outside their dominions become for all intents and purposes. British subjects Where foreign interests are concerned, the Paramount Power must act so that no just cause of offence is given by its subordinate allies. All Indian States alike are under an obligation to refer to the British every question of dispute with other states. Insumuch as the Indian States have no use for a military establishment other than for police, or display, or for co operation with the Imperial Government, their military forces, thir equipment and armament are

Bota (boot) Konk bót — Tet bota

Bota-fora (the act of launching a vessel, used familiarly also of bidding farewell to a traveller by accompanying him up to the place of departure) Mal botafóra, botapóra, batapóra, coin to go into a money-box

Botão (button) Konk butámv — Mar butāvém, vern term gundí — Hindust bótám, vern term tukmá— Beng botam — Sinh bottama — Tam bótan — Tel butaum, bottam — Gar butam — Khas budam — Mal bútan, bótam, vern term kanching — Tet, Gal butã — Jap bútan, bótan Hazaribútan, an ornamental button

Hepbuin derives the Japanese bótan from the English button, Botton, another Sinhalese form, betrays its English origin

? Bote (boat) Konk, Mar bôt —Siam bote —Mal bot

In Konkani, as in Marathi, ág-bôt (lit 'fire-vessel') signifies 'a steamship' The cerebral t leads one to suspect that the original of the word is the English 'boat,' pronounced in the same way as the Port bote. As Malay and Siamese have no cerebral t, it is also possible that bote and bot are derived from the same English source.

Bóto in Japanese has also the same origin, which is testified to by the expression boto-reisu = 'boat-race'

? Botelha ('bottle') Konk

^{1 &}quot;From Japan the Portuguese brought with them the following names — biombo (biobu or biombu), screen, bonzo (bóuzu or bônzu), a religious person" Gonçalves Viana, Palestra * Filológicas

HYDERABAD.

The Niram exercises full sovereignty within his dominions, grants titles and has the power of life and death over his subjects | Before 1919, the Government consisted of a Prime Minister responsible to the Nizam, with Assistant Minis ters, but in this year, an Executive Council was established which now consists of seven members of whom 12 are official 6 non-official and 2 extraordinary is responsible for making The administration is carried on by a regular system of departments on lines similar to those followed in British India The state Is divided into two divisions—fellingma and Mahratwara—to Districts and 10d Falukas Local Boards are constituted in each District and Taluka The State maintains its own and Taluka The State maintains its own currency which consists of gold and silver coins and a large note issue. The rupee, known as the Osmania Sicca, exchanges with the British Indian rupee at an average ratio of 116-10-8 to 100. There is a State postal tervice and stamps for internal purposes. The Aizam maintains his own army consisting of 18,226 troops of which 5,820 are classed as regular troops and 11,324 as irregular. In addition to these there are two battalions of Imperial Service Troops, 1,073 strong

Finance—Hyderabad State is far the wealthlest of the Indian States, having a revenue in its
own currency of about 8½ crores, which is
approximately the same as that of the Central
Provinces and Bihar and Orissa and double that
of any other State. After many vielssitudes,
its finances are at present in a prosperous
condition and it enjoys a large annual
surplus of revenue from which a reserve of 8
crores has been built up. This is being used
partly as a sinking fund for the redemption of
debt and partly for the development of the
resources of the State. The budget estimates for
the present year show a revenue of 785 lakies
under service heads and an expenditure of 702
lakies, inclusive of large sums set aside for
development, famine insurance and reserve for
re-organisation and development. The capital
expenditure programme provides for an expenditure of 150 lakies, which includes 43 lakies for the
large irrigation project known as "Nizam
Sagar" and other sanctioned projects and 97
lakies for the construction of feeder lines. The
year opened with a cash balance of 286 lakies
which is expected to be about 106 lakies by the
end of the year. The Government loans stand
at 102 for short term and 118-4-0 for long
term lesues.

Production and Industry—The principal industry of the State is agriculture, which maintains 57 per cent of the population The common system of land tenure is ryotwari About 55 per cent of the total area is directly administered by the State The rest consists of private estates of His Exalted the Nizam, which comprise about one-tenth of the total area of the State, and the estates of the Jagirdars and Paigah nobles The total land revenue is over 3 crores The principal food crops are millet and rice, the staple money crops cotton, which is grown extensively on the black cotton soils, and oilseeds Hyderabad is well known for

its Gaormi cotton which is the longest staple indigenous cotton in India. The total area under cotton exceeds 4 million acres. Hyderabad possesses the most southerly of the Indian coal mines and the whole of southern India is dependent on it for such coll as is transported by rail. The chief mine is situated at Singareni, which is not far from Berwada junction on the Calcutta-Madras line. The chief manufacturing industry is based on the cotton produced in the State. There are four large mills in existence and others are likely to be established, while about one third of the cloth worn in the Dominions is produced on local hand-looms. There are about 204 ginning and pressing factories in the cotton tracts and also a number of tanneries and flour mills the total number of factories (as defined in the Hyderabad Factory Act) of all klads in the State being 355. The Shahabad Cement Co which has been established at Shahabad on the Great Indian Penlasula Railway line, not far from Wadi, supplies the whole of southern India with cement and has at present an annual output of 99,439 tons.

Taxation —Apart from the land revenue which as stated above brings in about 3 crores, the main sources of taxation are evelse and customs. The receipts from each are estimated for the present year at 158 and 125 lakhs respectively. After these come interest on investments (50 lakhs), railways (31 lakhs) and Berar rent (29 lakhs). The customs revenue is derived from an ad valorem duty of 5 per cent on all imports and exports.

Communications —One hundred and thirtyseven miles of broad gauge line from Bombay
to Madras traverse the State, also 33 miles of
metre gauge line from Masulipatam to Maringoa
At Wadi, on this section, the broad gauge system of the Nizam's State Railway takes off and
running cast through Hyderabad City and
Warangal reaches the Calcutta-Madras line at
Bezwada, a total length of 352 miles. From
Kazlpet, near Warangal on this line, a new
link to Bellarshah strikes north thus providing
the shortest route between Madras and Delhi
From Secunderabad the metre gauge Godaverl Valley railway runs north-west for 386
miles to Manmad on the main line of the
Great Indian Peninsula Railway to Calcutta
A metre gauge line also runs south from Secunderabad through Mahbubnagar nearly to the
border and is now linked up with Kurnool
on the Madras and Southern Mahratta Ballway Branch lines exist from Purna to
Hingolt, Parbhani to Purta, Karipalli to
Kothagudium and Vikharabad to Bidar,
which last is being extended to Purte Thus,
with branch lines, there are now 637
miles of broad gauge and 628 of the metre
gauge in the State. The Barsi Light Railway
owns a short extension from Kurdwadi on
the Bombay Madras line to Latur in Osmanabad
District The Nizam's Guaranteed State Rail
way was worked by a Company until April,
1930, when it was purchased by the Nizam's
Government The road system is incomplete
at present but is being rapidly extended on
a well considered programme,

tion, granted the power of voting on the demands for grants. The Dewan is the Lx officio President of both the Representative Assembly and the Legislative Council

Council Tegislative a Public Accounts Committee which examines the audit and appropriation reports and brings to the notice of Council all deviations from the wishes of the Council as expressed in its Budget grant

Standing Committees -With a view to en large the opportunities of non official represen tatives of the people to influence the every day administration of the State three Standing Committees consisting of Members of the sentative Assembly and the Jegislative Council have been formed one in connection with Rail way, Flectrical and P. W. Departments, the second in connection with Local Self-Govern ment and the Departments of Medicine, Sanita tion and Public Health and the third in connec tion with Finance and Taxation

All the important branches of the administration are controlled by separate Heads of Depart-The combatant strength of the Military ments Force at the end of 1930-31 was 2,106 of which Ass were in the Mysore Lancers, 132 in the Mysore Horse, and the remaining 1,516 in the Infantry Animal Transport Corps, was replaced by the Mechanical Transport which consists of 2 lorries (six wheeler lorries) and 4 commercial lorries with the necessary staff. The total annual cost is about 17 laklis of rupees The cost of the Police Administration during 1929 30 was about 18 lakhs

Agriculture -- Nearly three-fourths of the population are employed in agriculture and the reneral system of land tenure is ryotwari The principal food crops are ragi, rice, jola, millets, gram and sugar cane, and the chief fibres are cotton and sun hemp. Nearly fifty thousand acres are under mulberry, the silk industry being the most profitable in Mysore next to Gold Mining The Department of Agriculture is popularising agriculture on scientific lines by means of demonstrations investigations and experiment There are six Government Agricultural Farms at Hebbal, Babbur, Marthur Nagenahally, Hunsur and the coffee experimental Station at Balehonnur A live stock section has been organised which has been taking necessary steps for the improvement of live stock. A cattle breeding station has been established at Parvatharayanakare, near Allampur in the Kadu District, with a sub station at Basur A Scrum Institute has been opened at Bangalore for the minufacture of scrum and varus for inoculation against rinderpest

Industries and Commerce - A Department of Industries and Commerce was organised in 1913 with a view to the development of Industries and Commerce in the State Its main functions are stimulating private enterprise by the offer of technical advice and other assistance for starting new industries, undertaking experimental work for pioneering industries and developing existing industries and serving as a general bureau of information in industrial and commercial matters. Mysore is the largest produce of Silk in India, and the care and development of this industry is entrusted to a Department of Sericulture in charge of a Superintendent subject to the general centrol of the Director of Industrics and Commerce Arrangements have been made for the supply of disease-free seed and a central and five tallul popular schools have lean doing good work. The sandalwood oil factory started on an experimental basis is now working on a commercial scale A factory is working at Mysore A large plant at a cost of more than 170 lakhs of rupers has been constructed at Bhadravathi for purposes of manufacturing charcoal, pig-iron tilling wood-alcohol, and developing subsidiary industries A new lipe foundry was opened there for the manufacture of pipes which are in great demand in several towns in India The works are on the borders extensive forest area and practically at the foot of the hills containing rich deposits of iron manganese and bauxite, and are not far from the Gersoppa Water Falls estimated to be capable of producing 100 000 horse-power of electric A Frade Commissioner in I ondon has been appointed to look after the interest of the trade and Industry of the State

Figures -The actual total receipts and disbursements charged to Revenue for the past five years together with the revised budget esti mate for 1930 31 and budget for 1931-32 were as below ~

1 car	Receipts	Disbursements	Surplus	Deficits

Hydro-Electric and Irrigation Works — The river Cauvery in its course through the State, possesses a natural fall of about 380 feet near the island of Sivasamudram, and this fall was harmesed in the year 1902 for the development of electric power, to the extent of about demands, the "Krishnarajasagara Reservoir' 12,000 H P for supplying power mainly to the called after the name of the present Maharaja Kolar Gold Mining Companies and incidentally was constructed. The storage from the reser-

for lighting the cities of Mysore and Bangalore In course of time, the demand for power increased and with a view to protecting the existing supply and augmenting the genera-tion of additional power to meet the growing demands, the "Krishnarajasagara Reservoir' called after the name of the present Maharaja

? Burrico (ass-colt) Malag borika, boriki

Burro (an ass) Konk búrr (us in a fig sense; in the ordinary sense, gadhum), vern term gaddhá—Sinh búruva, búreva, vern terms koṭaluvá, koṭalivá, garddabhayá Búre is used in the sense of 'asinine'

Why should the Portuguese word have found an entry into Sinhalese? Perhaps owing to its frequent use in the figurative sense, which was also the very reason for its introduction into Konkani

(

? Cá (abbreviated form of aqui, here) Mal ca (Haex)

Cabaia (a long tunic with wide sleeves used in the East) Konk, Tam kabáy (a kind of tunic) — Mar kabáy, kabāí — Sinh. kabáya (coat) — Mal, Sund, Jav, Tet, Gal kabáya — Mac, Bug kobáyā In the Indo-Portuguese dialect of Ceylon cabaya, cabai, cuobai are used in the sense of 'a coat'

From the Pers-Ar qabá (adopted in Hindustani), 'a vesture,' introduced into India by the Portuguese, according to Yule and Burnell Matthes derives it from the Persian qabay ¹

fitting garment" Castanheda, Bk I, ch 6

"A garment which they call cabaya, which the Moors commonly use in those parts it has long sleeves, is provided with a cincture, and is open in front with one flap over another in the manner of the dress of the Venetians" João de Barros, Dec II, 11, 2

"Cabaya is a garment such as the pelote is among us" Gaspar Correia, I, p 14 [Pelote in Portuguese is the name of a robe with broad flaps, used in former times]

"They brought to the King a costly cabaya, which he with his own hands put on the Governor, and this was the highest honour which he could bestow on him according to their usages" Id, III, p 620

"The Kabaia is a kind of white dressing gown made of cambric and furnished with lace. The complete outfit of a Malay woman is called Sarang-Kabaia" Albert Osorio de Castro, p. 145

1 In an analogous meaning the word quimão, from the Japanese limono, was used formerly in Konkani, but at the present day the term is used only of a bodice worn by girls "Dressed in a purple quimão in the manner of a long loose robe, embroidered with pearls" Fernão Pinto, ch civil

^{1 &}quot;He (the Sultan of Moçambique) used to be wrapped up in a cabaia of white cotton cloth which is a tight

appeals lie in certain cases, to the Maharaja, who decides them on the advice of the Hurur Yyara Sabha The State Arms consists of 5,086 Regular forces and 3.806 Irregular forces

Finance—In 1929 30, the total receipts of the State were Rs 2 65,34 000 and the disburge ments Re 2,42 66,000 The principal Revenue heads were —Land Revenue, Rs 1,19,40,000 Abkari, Rs 31,23,000 Oplum Rs 4,24,000, Railways, Rs 14,53,000, Interest, Rs 17,31,000, Tribute from other States Rs 9,59,000 British Currency was introduced in 1901

Industry -Agriculture Production and and pasture support 63 per cent of the people. The principal crops are rice, wheat, gram, castor oil, rapeseed, poppy, cotton, san hemp, tobacco, sugarcane maize, and garden crops The greater part of the State is held on ruoticars tenure The State contains few minerals, except sandstone which is quarried at Songar, and a variety of other stones which are little worked There are 70 industrial or commer-cial concerns in the State registered under the State Companies Act There are four Agricultural Banks and 874 Co-operative Societies in the Baroda State

AGENCY. BALUCHISTAN

The State includes the tribal territories of the Chiefs of the Brahui Confederacy of which the Khan of Kalat is head The divisions of the State are, Sarawan or the Highlands, Jhalawan or the Lowlands, Kachhi, Makran, the Lhanate of Kharan and the feudatory State of Los Bela The inhabitants are for the most part Brahuls or Baloch, both being Muhammadans of the Sunni sect The area of Kalat with Las

The relations of Kalat with the British Government are governed by the treaties of 1854 and 1876, by the latter of which the independence of Kalat was recognized, while the Khan agreed to act in subordinate co-operation with the British Government. There are also agreements with Kalat in connection with the construction of the Indo-European telegraph line, the cession of jurisdiction on the railways and in the Bolan Pass, and the permanent leases of Quetta, Nushki and Nasirabad

Kalat is bounded on the North by the Chaga i district, on the East by Sindh and the Marriducts the relations between the Government of India and the Khan, and exercises general Arabian Sea and on the West by Persia The Khan is assisted in the administration the Khan retains a civil list of Rs 3,50,000 per annum The present Khan is His Highness Beglar Begl Sir Mir Mahmud Khan of Kalat, GCIE He was born in 1864

Las Bela is a small State under the suzeraint) of Kalat The Hab river for the Southern part of its course forms the Eastern boundary with Sind, and the greater part of the State consists of the valley and the delta of the Purali river Belais 80,410 sq miles The country is sparsely inhabited, the total population being about chieffy Sunni Muhammadans The estimated average revenue is about Rs 3,52,600 The Chief of Las Bela, known as the Jam, is bound by agreement with the British Government to agreement with the British Government of the valley and the delta of the total Price and the valley and the delta of the total Price and the valley and the delta of the total Price and the valley and the delta of the total Price and the valley and the delta of the total Price and the valley and the delta of the total Price and the valley and the delta of the total Price and the valley and the delta of the total Price and the valley and the delta of the total Price and the valley and the delta of the total Price and the valley and the delta of the total Price and the valley and the delta of the total Price and the valley and the delta of the total Price and the valley and the delta of the total Price and the valley and the delta of the total Price and the valley and the delta of the valley and the valley and the delta of the valley and the delta of the valley and the delta of the valley and the valley and the delta of the valley and the valley and the delta of the valley and t conduct the administration of his State in accordance with the advice of the Governor-General's Agent This control is exercised through the Political Agent in Kalat The Jam also employs an approved Wazir, to whose advice he is subject and who assists him generally in the transaction of State business

> Agent to the Governor-General for Baluchistan.-Hon'ble Mr A N L Cater, CIE, ICS

also gave the name Cabra to one of the small islands, which in the vernacular is called Komváña In Indo-Port cabra includes also 'sheep' The Nicobarese mé, 'she-goat,' is onomatopoetic and, perhaps, of recent date

Caçar (to hunt). Mal kajar

In Konkani the form kás is used in the sense of 'game' Kas marunk [lit 'game to kill'] is 'to go out in pursuit of game'

Caçarola (casserole, a heatproof earthenware vessel) Mal hasrol (Marre).

Cacau (cacao) Konk $k\bar{a}k\acute{a}v$ —Tet , Gal kakau.

Cadeira (chair) Konk kadēi (lus), kadēl, vern terms are kurši, chaváy, as in Marathi, but little used—Beng kaderá, kadārá—Sindh kadela, gadela—Tam kadēra (lus), vern term pidam—Malayal kasēla—Mal, Mac, Bug kadēra—Nic katére Katére-ol-lál, sofa—Tet, Gal kadera

Cadernal (naut, lufftackle) L-Hindust katarnál ? Café (coffee) Konk kāphó (plant and the whole

berry, pl $k\bar{a}ph\acute{e}$, kā ph**i** ('coffee ground or prepared into a beverage ', —Mar, Guj, Or kāphi — Beng Ass káphi -Sinh kópi -Tam káppi kóppi - Malayal kāppi, kāppikkuiu — Tel $k\acute{a}pi$ — Kan, Tul káphi —Gai kapi —Bur kapphe -Khas Laphi -Kamb cafê -Siam kafē, kháofe -Ann, Tonk cà-phe —Mal, Sund, Mac, Bug kópi - Day $k\acute{u}p\imath$ —Tet, Gal, Malag kafé - | Chin kiá-fe |

It is not known by what way the term found its way into The first syllable of the Indian term for it (ka-) is identical with that of the Portuguese, and the second (-phi or -pi) with that of the English or Dutch (coffee, koffie). Turkish also has kaphe Hobson-Jobson gives no citation from any early Portuguese writer on this point use of coffee had already been introduced into Arabia in the fifteenth century

["The history of the introduction of coffee into India is very obscure. Most writers agree that it was brought to Mysore some two centuries ago by a Muhammadan pilgrim the third century have been found

Banswarn State is the southernmost State of Rajputana within the Political Agency of the Southern Rajputana States. The area of the State is 1 046 square miles and the population 2 60 670-ouls. It is thus in regard to size eleventh among the States of Rajputana Banswara with Dungarpur orlainally formed a country known as Bagar which was from the beginning of the thirteenth century until about the year 1529, held by certain Rajput Rulers of the Ghelot or Sishodiya clan, who claimed descent from in elder branch of the family now ruling in Udaipur After the death of Rawal Udai Singhii the ruler of Bagar about 1 (29) his territory was divided between his two sons Prithwi Rajji and Jagmai Singhii, and the descendants of the two families are now Inspectively the Rulers of Dungarpur and Joneyara Where the town of Banswara now stands there was a large Bhil pal or colony under a powerful Bhil Chieftain named Wasna, who was defeated and slain by Maharawal Jagmal Singhili about 1 (30). The name of Banswara is by tradition said to be a corruption of Washawara or the country of Wasna. Others assert that the word means the country (wara) of bamboos (bans) - Nearly three centuries after its founda-tion by Maharawal Jagmal Singhii, Maharawal Acarly three centuries after its founda-Bijai Singhil anxious to get rid of the supremacy of the Mahrattas offered to become a tributary to the British Government In 1818, a definite treats was made with his successor, Maharawal Umed Singhiji Banswara has been described as the most beautiful portion of Rajputana, it looks at its best just after the rains principal rivers are the Mahi, the Anas, the Lran the Chap and the Haran

The present Ruler is His Highness Rayan Rai Maharaja Dhiraj Maharawalji Sahih Shree Manaraja Dinraj Manarawalji Salio Shree Pirthi Singhji Bahadur, who was born on July 15, 1888, and is the 21st in descent from Maharawal Jagmal Singhji His Highness was educated in the Mayo College, and succeeded his father in 1914 His Highness is entitled to a salute of 15 guns The State is ruled by His Highness the Maharawalji Sahib Rahadur with the escentage of the Diversion Bahadur with the assistance of the Diwan and the Home Minister, and the Judicial and the Legislative Council, of which the Diwan is the President and the heir apparent, Maharaj-Itaj Kumar Sahib Shri Chandraveer Singhji Sahib, is Senior Member The revenue of the State is about 7 lakhs and the expenditure is about the

Ducan -Mr R K Chatterjee, BA, Bar-at-Law

Home Minister -Mr Nand Lal Banerjee

Dungarpur State, with Banswara, for merly comprised the country called the Bagar It was invaded by the Mahrattas in 1818 As in other States inhabited by hill tribes, it became necessary at an early period of British supremacy to employ a military force to coerce the Bhils The State represents the Gadi of the eldest branch of the Sisodias and dates its separate existence from about the close of the Lath Continue the close of the 12th Century Samant Singh, King of Chitor, when driven away by Kirtipal

numerous and stone Inscriptions dating from of lator, fled to Bagdad and killed Chowrasimal, Chief of Baroda, and founded the State of Dungarpur The present Chief is His Highness Rd Rayan Maharajadh raj Maharawal Shi Lakshman Singhji Bahadur born on 7th March 1908, succeeded on 15th November 1918 and assumed charge of the administration on the 16th Lebruary 1928 No railway line crosses the territory, the nearest railway station, Udalpur, being 65 mil s distant and Talad on thmed thad side, being about 70 miles distant Revenue about 64 lakhs

Partabgarh State, also called the hanthal, was founded in the sixteenth century by a descendant of Rana Mokal of Menar town of Partabgarh was founded in 1608 by Partabi Singh In the time of Jaswant Singh (1775-1844), the country was overrun by the Marathas, and the Maharawat only saved his State by agreeing to pay Holkar a tribute of Salim Shahi Rs 72,700 (which then being coined in the State Mint was legal tender throughout the surrounding Native States), in lieu of its 15,000 formerly paid to Delhi The first connexion of the State with the British Government was formed in 1804, but the treaty then entered into was subsequently cancelled by Lord Cornwallis, and a fresh treaty by which the State was taken under protection was made in 1818 The tribute to Holkaris paid through the British Government, and in 1004 was converted to Rs 36,350 British currency The present ruler is His Highness Maharawat Ram Singh Bahadur who was born in 1903 and succeeded in 1920. The State is governed by the Maharawat with the help of the Dewan, and, in judicial matters, of a Committee of members styled the Raj Sabha or State Council Revenue about 51 lakhs, expenditure nearly 51 lakhs The financial administration is under the direct supervision of the State

Jodhpur State, is the largest in Rajputana with an area of 35,016 miles and a population of 21 millions, of which 83 per cent Hindus, 8 per cent Musalmans and the rest Jains and Animists The greater part of the country is an arid region It improves gradually from a mere desert to comparatively fertile land as it proceeds from West to East The rainfall is scanty and capricious There are no perennial rivers and the supply of sub-soil water is very limited. The only important river is Luni

The Maharaja of Jodhpur is the head of the Rathor clan of Rajputs and claims descent from Rama, the defied King of Ayodhya cadets The carliest known King of the Clan named Abhimanyu, lived in the fifth century, from which time their history is increasingly clear After the breaking up of their kingdom at Kanauj they founded this State about 1212, and the foundations of the Jodhpur City were laid by Rao Jodha in 1459 He had abolished the tax levied by Hussain Shah of Jaunpur from Hindu pligrims at Gaya His descendant was the famous Rao Maldeva, the most powerful ruler of his time having an army of 80,000 Rajputs and the Lmperor Humayun when expelled by Sher Shah in 1542 A D had sought refuge with Raja Sur Singh, son of Raja Udal Singh, in recognition of his deeds of valour was created a 'Sawai Raja' with a mausab of 5,000 Zat

ben, bunu, buncha The earliest Arabic writers, however, used the Abyssinian name by itself combination thus ın Avicenna (11th century) calls it buncho, and Rhases bunco It was by them viewed as a medicinal plant and one very possibly that came Abyssinia, so that the appearance of the Arabic name kahwah may with safety be accepted as marking the progress into the final development as a beverage "]

Cafre (in the sense of 'negro') Konk khāpii Beng kāphii — Ass — káphii — Tam, Malayal, Tel káppii — Kan káphii — Tul. kápii, kapiii — Anglo-Ind caffre, caffei, caffiee, — Bur kap-pa-li — Mal kápii, kápii — Ach kafiii — Day kápii | Nona kápii is Anona reticulata |

In Konkani, khāpurdó (a diminutive form) is 'a little negro', khāparlém (neut), 'a negress,' and, khāparpan, 'coarseness, barbarousness' In Indo-Portuguese cafrona means 'a negress'

The word is derived from the Arabic káfir, 'infidel unbeliever'. In some of the languages

this sense is retained With regard to the kh aspirate in Konkani, cf camisa, cruz.

Cairel (narrow gold lace). Malayal karal

Cairo (the fibre of the coconut husk) Anglo-Ind coir — Indo-Fr caire

[Yule seems to be of the opinion that the Anglo-Indian form con was introduced by the English in the 18th century Crooke refers to the OED which gives 'coire' in 1697, 'coir' in 1779 'Coir' was less likely to have been used by the Portuguese because

^{1 &}quot;Beyond this country hes the great kingdom of Benametapa which belongs to the Heathen whom the Moors call Cafres" Duarte Barbosa, p 234 [Hak Soc, ed Longworth Dames, Vol I, p 9 The origin of Benametapa or Monomotapa is uncertain In some Bantu languages it means 'Lord of the Mountain']

[&]quot;And by another name which is common they also call them Cafres, which is to say people without law, a name which they give to every heathen idolater, this name of Cafres is applied among us to the many slaves which we have from this people" João de Barros, Dec I, viii 3

[&]quot;Among us, the Cafres are the Heathens from Cafraria" Fr João da Sousa ['Cafraria' is the land of the Cafres, or 'Kaffirs,' a very large tract in the southernmost part of Africa]

tactful administrator, whose same had spread | During throughout the country troublous times, he maintained Imperial authority in Kabul and was the brilliant character Maharija Sawai Jai Singh II (1700-44) was the first town planner in India He removed the capital of the State to Jaipur, so named after him | During his time, the State acquired great power and fame. He was a great mathematician and scientist of his age, and is famous for his astronomical observa torics which he built at several important cen-His court was visited by foreign Maharija Sawal Ram Singh, astronomers 1835-1880 He was one of the most enlightened princes in India at that time He encouraged art and learning He embellished the city In various wave and improved the administra tion and material condition of the people Unbaraja Sawai Madho Singh II, 1880 1922 He was a very wise and intelligent ruler who followed in the foot-steps of his father Re maintained and steadily improved all the useful measures initiated by the late Mahamja His administration was characterized by great liberality, catholicity and a broad outlook on affairs. His deep religious devotion and picty and unrivaled generosity and genuine and active sympathy are well known His staunch loyalty and maintenance of the tradi tions of his house raised him in the estimation of the paramount power He passed away after a long reign of 41 years His late Highness' donations and subscriptions to works of charity are enormous and too numerous to detail His Highness the present Maharaja Sawai Man Singh II Bahadur was born on 21st August 1911 He was adopted by His late Highness on 24th March 1921 He is a scion of the Rajawat House of Isarda, and ascended the gadi on the 7th September 1922, and was married to the sister of the present Maharajah of Jodhpur on the 30th January 1924 He studied at the Woolwich Military Academy in England and promises to be an ideal ruler having given abundant evidence already of the keen and sympathetic interest be takes in all that concerns the welfare of his people and mankind in general

Kishangarh State is in the centre of Rajputana and consists practically of two narrow strips of land separated from each other with an area of 858 square miles (population 00,000), the northern mostly sandy, the southern generally dat and fertile The Ruling Princes of Kishangarh belong to the Rathor clan of Rajputs and are descended from Maharaja Kishan Singh (second son of Maharaja Udai Singh of Jodhpur) who founded the town of Kishangarh in 1611 The present ruler is His Highness Umdae Rajhai Buland Makan Maharajah Dhiraj Dikshit Yagnarain Singh Bahadur He was born on the Rs 31,30,027

26th January, 1896, and was educated at the Mayo College, Ajmer, where he passed the Diploma Examination He was married to the sister of Raja Bahadur Maksudangarh in May, 1915. He went to England and travelled on the Continent with His Late Highness in 1921 On the demise of His Late Highness on 25th September 1926, he succeeded to the Gadi on the 24th November, 1926 He auministers the State with the help of a Council Revenue about 9 lakhs and expenditure 8 lakhs

Lawa State, or Chief of Rajputana is a separate chiefship under the protection of the British Government and independent of any Native States It formerly belonged to Juipur and then became part of the State of Tonk In 1867, the Nawab of Tonk murdered the Thakur's uncle and his followers, and Lawa was then raised to its present State The Thakurs of Lawa belonged to the Naruka sect of the Kach waha Rajputs The present Thakur, Bansperdeep Singh was born on September 24, 1923 and succeeded to the chiefship is under minority Administration Revenue about Rs 50,000.

Bundi State is a mountainous territory in the south-east of Rajputana The Ruler or Bundl is the head of the Hara sect of the great clan of Chauhan Rajputs and the country occupied by this sect has for the last five or six cen-turies been known as Haraoti The State was founded in the early part of the thirteenth cen-tury and constant leads with Mowar and Malwa Iollowed It threw in its lot with the Mahomedan emperors in the sixteenth century later times it was constantly ravaged by the Marathas and Pindaries and came under British protection in 1818 at which time it was paying tribute to Holkar The present ruler of the State is His Highness Maharao Raja Shri Ishwari Singhii Saheb Bahadur He was born on 8th March 1893 and succeeded to the Gadi on 8th August 1927. His Highness is entitled to a Salute of 17 guns Revenue about 12 lakhs Expenditure nearly the same

Tonk State —Partly in Rajputana and partly in Central India, consists of six Parganas separated from one another The ruling family belongs to the Salarzai Clan of the Bunerwal Afghan tribe The founder of the State was Nawab Muhammad Amir Khan Bahadur, General of Holkar's Army from 1798-1806 Holkar bestowed grants of land on him in Rajputana and Central India and the land so granted him was consolidated into the present State The present Ruler of the State is His Highness baid ud-Daula, Wazir-ul-Mulk, Nawab Hafiz Muhammad Saadat All Khan Bahadur Saulat Jang who ascended the Masnad in 1930 The administration is conducted by the Nawab in consultation with the Council of four members, nz, (1) Major D de M S Fraser, I.A, Principal Official and Adviser, Vice President and Finance Member, (2) Khan Bahadur Shelkh Rahim Bahsh, O B E, Revenue Member, (3) E T D Ferguson, Judicial Member. (4) Sahibzada Muhammad Abdul Tawwab Khan, Home

Secretary -Malik Muhammad Din.

Revenue Rs 23,82,446 Expenditure Rs 31,30,027 The Malays have a name ("Būwa frangi", Flax, p 64), which shows that it is not indigenous in the Archipelago, though they also use "kaju". Burnell in Linschoten (Hak Soc), Vol II, p 27

The evolution of a new form cadiu in Anglo-Indian vocabulary is evidenced by the following passage taken from The Times of India, June 23, "The story of a leper 1928 living among the beasts of the jungle and subsisting entirely being used to on fruit ıs support the claim that the Cadju fruit (Anacardium Occidentale) is a cure for the disease "1

The suffix-s in Malay and in Teto and Galoli are due to the Portuguese plural form, cajus, as in meias ('socks'), uvas ('grapes'), tiras ('strips of cloth'), apas ('rice-cakes')

The word is Brazilian acaju
The cashew-tree is one of the
most useful plants introduced
by the Portuguese into India
and is now perfectly naturalised 1

[Garcia da Orta does not mention the tree in his Colloquies (1563), but Christoval Acosta does in his Tractado etc (1578) Linschoten writing about 1590 speaks of them as being in great numbers all over India 1

Calabaça (calabash). Anglo-Ind calabash, the dry rind of a gourd used as a bottle or float

[The Portuguese word is itself derived from the Arabic garah, 'a gourd', and arbasah, 'dry']

Calafate (a caulker) Hındı kālapattı — Hındust kalpattı, kalápattı yá—Or kalāpāti — Beng kālāpāti — Sınh galapattı (-kara navā, 'to caulk') — Tam kalappar-radī, to caulk,

See Conde de Ficalho in the Colloquies of Garcia da Orta, Vol I, p 67 [In the passage referred to above Conde de Ficalho expresses surprise that da Orta makes no mention of the canu tree, which, a few years later, was de scribed by Acosta (1578) and by Lins choten From this he concludes that the interval between the publication of the Colloquies (1563) and Acosta's Tractado de las Drogas y Medecinas de las Indias Orientales (1578) marks the period when the tree must have been introduced into India from America 1

The present Ruler, Lieuten int-General His Highness Maharajadhiral Raj Rajeshwar Narendra Shiromani Maharajah Sri Sir Ganga Singhii Bahadur, Gesi, Geif, Elst of Singhii Ren, Ade, ILD, is the Geit, Ren, Ade, and the renowned tong line of distinguished rulers renowned for their brayers and state-manship He a long line of distinguished rulers renowned for their brakery and extremanship and was born on the 3rd October 1880 and assumed full ruling powers in December,

1809 He was awarded the first class Kalsar 1807 He was awarded the first class Adisur-1-Hind Medal for the active part he took in re-lieving the famine of 1899 1900, and soon after he went on active service to China in cometion with the China War of 1900-1901 in command of his famous Ganga Risala and was mentioned in despatches and received the China Year of the Year of doned in despatches and received the Clina Medal and KCIE The State Forces consist of the uai and KCIE The State Forces consist of the Camel Corps, known as Ganga Risala, whose enctioned strength is 465 strong, an Infantry Battallon 505 strong canctioned strength is 465 strong, an Infantry Battalion 595 strong, a Regiment of Civalry 142 strong including His Highness, 275), 142 strong including His Highness, 275), 275 and 276 strong and (amel Battery 20 and 276 strong and (amel Battery 30 the outbreak of the Great War in 1914, His Highness immediately placed the geravices of himself and his State forces and all the vices of himself and his State forces and all the vices of numericand his State forces and all the resources of the State at the disposal of His Imperial Majests the King-Tmperor, and the Ganga Risala reinforced by the Infantry Regiment, which became incorporated in the Camel Corps in the field rendered very valuable services in which became incorporated in the Camel Corps in the field, rendered very valuable services in Egypt and Palestine An extra force was also raised for internal security His Highness personally went on active service in August 1914 and enloys the bonour of having fought hoth in and enjoys the honour of having fought both in

rance and Egypt, and thus has the distinction of having fought for the British Crown three Continents of Asia France and tion of having fought for the British Crown on three Continents, viz, Asia, Europe and Africa He was mentioned in despatches both in Egypt and France His Highness also the pelar terry conspicuous political part during the priod of the War when he went twice to Europe as the Representative of the Princes of India, once in 1917 to attend the meetings of the Importance in 1917 to attend the meetings of the Importance in 1917 to attend the meetings of the Importance in 1917 to attend the meetings of the Importance in 1917 to attend the meetings of the Importance in 1917 to attend the meetings of the Importance in 1917 to attend the meetings of the Importance in 1917 to attend the meetings of the Importance in 1917 to attend the meetings of the Importance in 1917 to attend the meetings of the Importance in 1917 to attend the meetings of the Importance in 1917 to attend the meetings of the Importance in 1918 to attend the meetings of the Importance in 1918 to attend the Importance as the hepresentative of the Trinces of multiple once in 1917 to attend the meetings of the Imperial War Cabinet and Conference, and again in 1918-19 to attend the Peace Conference where he was one of the signatories to the treaty where he was one of the signatories to the Iredian of Versallies His Highness led the League Delegation to the 11th Assembly of the Indian of Versions of Communication and Indian to Versions of Communication and Indian Indian of Nations at Grace 2 and represented the Indian States at the Imperial Conference in 1930 States at the Imperial Conference in 1930 His Highness also attended the Indian Round Table Conference and the Federal Structure Sub-

Comm thee both in 1930 and 1931 His Highness enjoys a salute of 10 guns (per sonal) whilst the permanent local salute of the state is also 19 helic cleated the free chansonal) whilst the permanent rocal same of the State is also 10 His Highness has also in the honour of being elected the first Chancelor of the Chamber of Princes, an office which he filled most creditably for 5 years till 1925

Calção (in the sense of 'trousers') Konk kālsámv, Motvém kalsámy, kalsámy or 'shorts' -Sinh breeches kalasama — Tamkalısama, kāl-chatter (lit 'puts on trousers') —Malayal kāl-chchatta __? Malag kalisanina (perhaps from the Fr caleçon) —Jap In Galoli kálsa. Larusan trousers 1

Calção, properly speaking, signifies in Portuguese 'breeches,' but in Indo-Portuguese it is used in the sense of 'trousers'

It appears that kaus, 'shoe', of the languages of the Malay Archipelago, is not derived from the Port calça which formerly meant, according to Viterbo, 'sock or stocking', 2

nor from the Dutch lous, 'sock' It makes its appearance already in the first quarter of the seventeenth century "Caous (pronounced laus), sock, caous sa-paris, a pair of socks" (Haex) Swettenham and Favre attribute it to an Arabic origin, but in Arabic there is no such word says that in Sundanese kaus signifies, at the present day, 'sock' and admits it is from Dutch The same 18 opinion of Hardeland in respect of Dayak, and of Matthes with reference to the Macassar káusu and Bugui káusu & koso Langen doubtfully gives 'kaus' as corresponding to the Achinese laus It is quite possible that kaus is the abbreviation of kásut, from calçado, 'shoes', which in Macassar loses the t, or it may subsequently have felt the influence Dutch

Caldeirão (a boiler, a large kettle) Sing *kaldérama*, *kal*darama

Gwallor—The house of Scindla traces its descent to a family of which one branch held the hereditary post of patel in a village near Satara. The head of the family received a patent of rank from Aurangzebe The founder of the Gwallor House was Ranoji Scindla who held a military rank under the Peshwa Baji Rao In 1720 the Peshwa granted deeds to Puar, Holker and Scindla, empowering them to levy 'Chauth' and "Sardesmukhi" and retain half the amount for payment to their troops In 1736 Ranoji Scindla accompanied Baji Rao to Delhi where he and Mulhar Rao Holker distin gaished themselves in military exploits Ranoji fixed his headquarters at the ancient city of Ujjain, which for the time became the Capital of the Scindla dominions During the time of Mahadji Scind'a and Dowlat Rao Scindla Gwallor played an important part in shaping the history of India Despite the partial reverse which Mahadji Scindia's troops suffered at the hands of the British in 1780, reverses which led to the treaty of Salbai (1782), Scindia's power remained unbroken For the first time he was now recognized by the British as an independent sovereign and not as a vassal of the Peshwa

In 1790 his power was firmly established in Delhi While he was indulging ambitious hopes he fell a prey to fever which ended his remarkable career on 12th February, 1794 Himself a military genius, Mahadji Scindla's armies reach ed the zenith of their glory under the disciplined training of the celebrated French adventurer—De Boigne Mahadji was succeeded by his grand nephew Daulat Rao in whose service Perron, a Military Commander of great renown played a leading part The strength of Scindla's Army was, however, considerably weakened by the reverses, sustained at Ahmednagar, Arsaye Asirgarh and Laswari Daulat Rao Scindla died in 1827 Till his death he remained in undisputed possession of almost all the territory which belonged to him in 1805

Daulat Rao was succeeded by Jankoji Rao who passed away in the prime of life. On his demise in 1843 intrigue and party spirit were rampant and the Army was in a state of mutiny with the result that it came into collision with the British forces at Maharajpore and Pannihar

Jankoji Rao was succeeded by Jiaji Rao whose adherence to the British cause during the dark days of Mutiny, when his own troops deserted him, was unshakable. In 1861 he was created a Knight Grand Commander of the Most Exalted Order of the Star of India and in 1877 was made a Councillor of the Empress. Subsequently he received other titles and entered into treaties of mutual exchange of territories with the British Government. He died on the 20th June 1886 and was succeeded by his son Lieutenant-General H. H. Maharaja Sir Madho Rao Scindia, Alijah Buhadur, Govo, Gosi, Gbe, ADC to the King He succeeded in 1836 and obtained powers in 1894. In 1901 he went to China during the war, he held the rank of honorary Lieutenant General of the British Army and the honorary degrees of LLD, Cambridge, and Dol, Oxon. He was also a Donatof the Order of St. John of Jerusalem in England. He died in June 1925 and was succeeded by his son H. H. Jeewajirao Scindia During His Highness' minority the administration of the State is being conducted by a Council of Regency

The ruler of the State enjoys a salute of 21 guns. The State is in direct relations with the Government of India.

The northern part of the State is traversed by the G I P Railway and two branches run from Bhopal to Ujjain and from Bina to Baran The Gwalior Light Railway runs for 250 miles from Gwalior to Bhind, from Gwalior to Sheopur and from Gwalior to Shivpuri The main industries are cotton ginning, which is done all over the State, fine muslins made at Chanderi, leather work, etc The State maintains three regiments of Imperial Service Cavalry, two battalions of Imperial Service Infantry and a transport corps Lashkar, the capital city, is two miles to the south of the ancient city and the fort of Gwalior Annual income about 2 crores and expenditure about 175 lakhs

Indore—The founder of the House of the Hollar of Indore was Malhar Rao Hollar, born in 1693 His soldlerly qualities brought him to the front under the Peshwa, who took him into his service and employed him for his conquests. When the Maratha power was weakened at the battle of Panipat in 1761, Malhar Rao had acquired territories stretching from the Deccan to the Ganges as a reward for his career as a Military Commander. He was succeeded by his grandson. On his death without issue his mother Ahilya Bai became the Ruler and her administration is still looked upon with admiration and reverence as that of a model ruler. She was succeeded by Tukoji Holkar who indeed had been associated with her to carry the Military Administration and had in course of it distinguished himself in various battles. Tukoji was succeeded by Kashirao, who was supplanted by Jeswant Rao, his step brother a person of remarkable daring strategy as exhibited in a number of engagements in which he had taken part. The brilliant success he obtained armies of Peshwa and Scindia made him a dictator of Poona for some time and he declared in consequence the independence of Holkar State.

qámaia | — Rab kamaión²

Dr Hugo Schuchardt 1efuses to accept the Portuguese origin for the Mal kámar, as also for musik ('music') and pistol ('pistol'), and prefers instead the Dutch kamer, musiek, pistool, as the originals of the Malay forms He lays down that "the criterion for distinguishing one from the other is principally the termination which these words have Malay if it is vocalic, the immediate source of the word is Portuguese, if consonantal, then it is Dutch" And Goncalves Viana observes that "these two laws to which Dr Schuchardt refers are of the greatest importance"

It appears that the above criterion is not after all very

safe, because there are other words the Portuguese origin of which is unquestioned which have a consonantal ending, that is, after losing the vowel termination of the parent word, as for example karpus from Port carapuça ('a kind of cap protecting one from cold'), martil from martelo ('a hammer'), gargalet from gorgoleta ('water-jug'), bulin from bolina ('bow-line'), prum from prumo ('a plummet')

In respect of kamer and musik, it may be said that the especial reason for the elimination of their last syllable is the necessity of getting rid of words the ante-penaccented on ultimate syllable, in view of the fact that the Malayo-Polynesian languages have no pro-If it can be paroxytones. established that mármai ('marble') is derived from the Port mármore, then we have another instance in proof of our view Perhaps, almári from or lamán Port the armano ('cupboard'), obey the same law 1

Camarada (a comrade)

¹ Matthes derives this term from the Port cama ('a bed'), and mentions the compound kamáli—levuranna, "temand's slaap kamer, bed room"

^{2 &}quot;Withdrawing with him to a camara, he spoke to him these words" Diogo do Couto, Dec VII, 1 9

SIKKIM.

Sikkin is bounded on the north and north east by Tibet, on the contheast by Bhutan on the south by the British district of Darjeeling, an on the west by Nepal. The population consists of Bhutas, Lepchas and Nepalese. It forms the direct route to the Chumbi Valley in Tibet. The main axis of the Himalayas, which runs east and west forms the boundary between Sikkin and Tibet. The Singalila and Chola ranges, which run southwards from the main chain, separate Sikkin from Nepal on the west, and from Tibet and Bhutan on the east. On the Singalila range rise the great snow peaks of kinchinjunga (28,146 feet), one of the highest mountains in the world. The Chola range which is much loftier than that of Singalila, leaves the main chain at the Dongkya La

Tradition says that the ancestors of the Rajas of Siklim originally came from eastern Tibet. The State was twice invaded by the Gurkhas at the end of the eighteenth century. On the out break of the Nepal War in 1814, the British formed an alliance with the Raja of Sikkim and at the close of the war the Raja was rewarded by a considerable cession of territory. In 1835 the Raja manted the site of Darjeeling to the British and rewived Rs 12,000 annually in lieu of it

The State was previously under the Government of Bengal, but was brought under the direct supervision of the Government of India in 1906 The State is thinly populated, the area being 2,818 square miles, and the population 1,99,657, The most im chiefly Buddhists and Hindus portant crops are malze and rice. There are several trade routes through Sikkim from Darjeeling District into Tibet In the conven tion of 1800 provision was made for the opening of a trude mart but the results were disappointing, and the failure of the Tibetans to fulfil their obligations resulted in 1904 in the despatch of a mission to Linasa, where a new convention was signed Trade with the British has increased in recent years, and is now between 40 and 50 A number of good roads have been n recent years The present ruler, lakhs yearly constructed in recent years His Highness Maharajah Sir Tashi Namgyal, His Highness annutana of Lacous 1914

Powers on the 5th April 1918 The title of powers on the 5th April 1918 a CIL was conferred upon the Maharaja on the 1st January 1918 and KCIE on 1st January 1923 The average revenue is Rs 5,20,422

Political Officer in Sikkim -F Williamson.

BHUTAN.

Bhutan extends for a distance of approximately 190 miles cast and west along the southern slopes of the central axis of the Himalayas, of 190 friendings and Assam Its area is 18,000 square miles and its population, consisting of Buddhists and Hindus, has been estimated at 300,000 The country formerly belonged to a tribe called Tek-pa, but was wrested from them by some Fibetan soldiers about the middle of the seven teenth century British relations with Bhutan commenced in 1772 when the Bhotias invaded the principality of Cooch Behar and British aid was invoked by that State After a number of raids by the Bhutanese into Assam, an envoy (the Hon A Eden) was sent to Bhutan, who was grossly insulted and compelled to sign a treaty surrendering the Duars to Bhutan On his return the treaty was disallowed and the Duars annexed This was followed by the treaty of 1865, by which the State's relations with the Government of India were satisfactorily regulated The State formerly received an allowance of half a lakh a year from the British Government in consideration of the cession in 1865 of some areas on the southern borders This allowance was doubled by a new treaty concluded in January 1010, by which the Bhutan ness Government bound itself to be guided by the advice of the British Government in regard to its external relations, while the British They

Government undertook to exercise no interference in the internal administration of Bhutan On the occasion of the Tibet Mission of 1904, the Bhotias gave strong proof of their friendly attitude Not only did they consent to the survey of a road through their country to the survey of a road through their country to Chumbi, but their ruler, the Tongsa Penlop, accompanied the British troops to Lhasa, and assisted in the negotiations with the Tibetan authorities. For these services he was made a K C I L, and he has since entertained the British Agent hospitably at his capital. The ruler is now known as H H the Maharaja of Bhutan, Sir Uggen Wangchuk, K O S I, K O I E At the head of the Bhutan Government, there are nominally two supreme authorities, the Dharma Raja, known as Shapting Renipoche, the spiritual head, and the Dob or Dopa Raja, the temporal ruler. The Dharma Raja is regarded as a very high incarnation of Buddha, far higher than the ordinary incarnations in Tibet, of which there are several hundreds. On the death of a Dharma Raja a year or two is allowed to clapse, and his reincarnation then takes place, always in the Choje, or royal family of

[The original of the word is the Marathi khankī]

? Canga (an ox-yoke) Mal, Jav, kang, bridle—[Anglo-Ind., cangue]—Pid-Engl cango, "a species of chair or litter suspended from a pole and carried by two men" Leland

Swettenham regards kang as a vernacular Javanese term, and not without reason, because of the difference in meaning between it and the Portuguese word and, secondly, because the Javanese word has no vowel ending, which normally words in Malay borrowed from the Portuguese retain See câmara.

Leland says that cango is a Japanese word, but the dictionaries which I have consulted do not give it the meaning which he says it has These are the meanings which they give "Chinese words, attending to the sick safe custody,

rigorous imprisonment "Hep-

Leland and Yule notice another vocable with the same meaning, viz, cangue, which Joaquim Crespo describes in Cousas da China as follows

"The canga is a weighty square board, 80 centimetres wide and 5 thick, having a hole in the centre wherein the neck of the delinquent is held fast and locked"

There is, according to Yule, a genuine Chinese word noted in a dictionary of the eleventh century under the form langgiai (in modern Mandarın speech hyang-hiai) From Langgiai is derived the Canton form k'ang-ka, 'to wear the canga', and probably the Annamite gang 1 He thinks it probable that the Portuguese took the word from one of these latter forms and associated it with their own canga, 'an ox-yoke', or 'porter's yoke for carrying burdens' Gonçalves Viana says that the Portuguese word canga implied "either from analogy of the

NORTH-WEST FRONTIER STATES.

The Indian States of the North-West Frontier Provinces are Amb, Phulera, Dir, Swat and Chitral The area of the latter three is 3,000, 1,800 and 4,0000 square miles and population 250,000, 216,000 and 99,000 respectively

Amb —Is only a village on the western bank of the Indus in Independent Tanawala

Chitral —Runs from I owaraiton to the south of the Hindu-Kush range in the north, and has an area of about 4,000 square miles The ruling area of about 4,000 square miles dynasty has maintained itself for more than three hundred years, during the greater part of which the State has constantly been at war with its neighbours It was visited in 1885 by the Lockhart Mission, and in 1889, on the establishment of a political agency in Gilgit, the ruler of Chitral received an annual subsidy from the British Government That subsidy was increased two years later on condition that the ruler, Amen-ul-Mulk, accepted the advice of the British Government in all matters connected with foreign policy and frontier defence His sudden death in 1892 was followed by a dispute as to the succession The eldest son Nizam-ul-Mulk was recognised by Government, but he was murdered in 1895. A war was declared by Umrakhan of Jandul and Dir against the infidels and the Agent at Gilgit, who had been sent to Chitral to report on the situation, was besieged with his escort and a force had to be despatched (April 1895) to their relief

The valleys of which the State consists are extremely fertile and continuously cultivated. The internal administration of the country is conducted by His Highness Sir Shujaul-mulk, KOIE, the Mehtar of Chitral and the foreign policy is regulated by the Political Agent at Malakand

Dir—The territories of this State, about 3,000 square miles in area, include the country drained by the Panjkora and its affluents down to the junction of the former river with the Bajaur Rud The Nawab of Diristhe overlord of the country, exacting allegiance from the petty chiefs of the clans Dir is mainly held by Yusufzai Pathans, the old non-Pathan inhabitants being now confined to the upper portion of the Panjkora Valley known as the Dir Koh stan

Swat — The Ruler of the State, Miangul Gulshahzada Sir Abdul Wadood, KBE, is a descendent of the famous Akhund Sahib of Swat He consolidated his rule in Swat from 1917 to 1922, and was recognized by the Government of India as Wali of Swat in 1920 The area of the State is 1,800 square miles and population 216,000 The Headquarters of the State is at Saidu Sharif about 40 miles from Malakand and connected with Malakand by motor road

Political Agent for Dir, Swat and Chitral— R J Gould, CMG, GIE, ICS

STATES IN THE MADRAS PRESIDENCY.

The Madras Presidency includes 5 Indian States covering an area of 10,643 square miles Of these, the States of Travancore and Cochin represent ancient Hindu dynasties Pudukottal is the inheritance of the chieftain called the Tondiman, Banganapalle and Sandur two petty States, of which the Erst is ruled by a Nawab, lie in the centre of two British districts

Name.	Area sq miles	Popula- tion	Estimated Gross Revenue in lakhs of rupees
Travancore	7,625	4,006,062	251 60
Cochin	1,417	979,019	93 67
Pudukottai	1,179	426,813	26 72
Banganapalle	255	36,692	2 89
Sandur	167	11,084	1 71

These States were brought into direct relation with the Government of India on October 1st, 1928

Travancore—This State, which has an area of 7,624 84 square miles and a population of 5,090,462 with a revenue of Rs 250 79 lakhs cocuples the south-west portion of the Indian Peninsula, forming an irregular triangle with its apex at Cape Comorin The early history of Travancore is in great part traditional, but there is little doubt that H H the Maharaja is the representative of the Chera dynasty, one of the three great Hindu dynasties which exercised sovereignty at one time in Southern India The petty chiefs, who had subsequently set up as independent rulers within the State, were all subdued, and the whole country, i within its present boundaries, was constand brought under one rule, by the M

^{1 &}quot;The very title of capitão-mor ('the chief-captain') which used to be

^{1 &}quot;The hidalgos of that time did not repose their vanity in capotes ('cloaks') and breeches" Couto, Dec VI, x, 8

Wilson, in his Glossary, thinks it probable that the word is of Portuguese origin. In which case, the change of the c, in the first syllable, to ch is to be expected

? Carta or cartaz (in the sense of 'paper') Siam kradart — Kamb credas Bier credas, game of cards — Mal, Sund, Jav kártas, kértas — Ach kértas — Day karátas, krátas — Mac karátasa — Bug karáttasā

"It is probable that it is one of these two words whose transformation gave rise to the Malay, Javanese, and Sundanese kartas or kertas, 'paper'. Although Arabic has the word kratas—otherwise qartas--(from the Greek chartés), kartas is not of Arabic origin, because in the Dutch Indies it is precisely the European and the Chinese paper that is called kartas" Heyligers Michell also attributes a Portuguese origin to the Siamese word

Notwithstanding these views, the Portuguese origin appears very improbable, especially, because of the divergence in the meaning of the word in Portuguese and the Eastern languages

There is no evidence to show that the word carta had ever been employed in Portuguese to mean 'paper' Cartaz was employed in India in the sense of 'a passport' or 'sailinglicence', and in this meaning, it appears to be of Arabic origin [The Ar qirtas, 'papei, document'] "Sailors from Coulão would send to Cochym for the certificate which they call cartaz." Gaspar Correia (I, p 298) "They had gone to Bassein to obtain a pass (which they call cartazes) from the captains ' Diogo do Couto (Dec IV, 1x, 2)1

^{1 &}quot;As regards the castas, the Lreatest impediment to the conversion

of the Hindus is the superstition which they maintain with regard to their castas, this prevents them from touching, communicating or mingling with others, in the same way as superiors will not mix with inferiors members of one observance with those of another" Diogo do Couto, Dec V vi 4

¹ In latela "the s is elided, and the

roughly speaking, with the importance of the State. In some cases he does little more than give advice and exercise a general surveillance. In other cases the Agents are invested with a direct share in the administration, while States the Rulers of which are minor are directly managed by Government Officers or under arrangements approved by Government Some of the States are subordinate to other States and not in direct relations with the British Government. In these cases the status of the feudatories is usually guaranteed by Government. The powers of the Chiefs are regulated by treaty or custom, and range downwards to a more right to collect revenue in a share of a village, without criminal or civil jurisdiction, as in the case of the petty Chiefs in the Mahil Kantha and Rewa Kantha Agencies.

The number of Indian States in the Bombay Presidency is 151, with an area of 28,039 square miles and population (1921) of 3,879,095. They are divided for administrative purposes into the following Agencies. Belgaum Agency, Savantvadi, Bijapur Agency, Jath Dharwar Agency, Savanur Kaira Agency, Cambay Kolaba Agency, Janjira Kolhapur Residency and Southern Maratha Country States Agency, 9 States (Kolhapur with 9 feudatories), Jamhandi, Kurundwad Senior, Kurundwad Junior, Miraj Senior, Miraj Junior, Mudhol, Ramdurg and Sangli). Mahi Kantha Agency 51 States (principal States Idar and Danta) Nasik Agency Surgana Poona Agency, Bhor Rewa Kantha Agency, 62 States (principal States Balasinor, Baria, Chhota Udelpur, Lunawada, Rajpipla and Sant). Satara Agency, Aundh and Phaltan Sholapur Agency, Akalkot. Sukkur Agency, Khairpur Surat Agency, 3 States (Bansda Dharampur and Sachin) and 14 Dang Chiefs Thana Agency, Jawhar The table below gives details of the area of the more important States.

[&]quot;Manuel Rodrigues took a catana which he had with him and with it suddenly dealt the captain a terrible catanada (' blow with a broad sword') " A Bocarro, Dec XIII, p 361 [Catanada is built up on the analogy of facada ('thrust with a knife') from Port faca, a knife Similarly from cris, the Port form of the Malayo-Jav keres or krīs, a Malay dagger, they formed crisada, 'a thrust or blow with the cris' 1

[&]quot;Catanas, bucklers, and other small arms without number" (in Tonquin) A F Cardim, Batalhas da Companhia de Jesus, p. 217

Mahi Kantha -This group of States has a l total area of 3 124 square miles and a population of 51 8938 including that of Idar which is 262 700. The Agency consists of the State of Idar and 51 smaller States. Idar covers more than half the territors - It has an area of 1,669 square miles and an average revenue of about 14 laklis. The present Ruler of Idar H. H. Maharaja Himatsinghiji is a Rajput of the Rathod clan. He was born in 1889 A.D. and ascended the gadi in 1931 on the demise of His late Highness Maharaja Sir Dowlatsinghji His Highness accompanied His late Highness It Col Sir Dowlatsinghji to I urope when the latter went to attend the Coronation of His Majesty the king Emperor in London and acted as Page to his Imperial Majesty at the Coronation Durbar held at Delhi in 1911. The subordinate Feudatory Ingirdars are divided into three classes Justices comprised in the class of Bhayats are codets of the Ruling House to whom grants have been made in maintenance or as a Jiwarak Those known as Sardar Pattawats are decendants of the military leaders who accompanied Anandsingh and Rai Singh, the founder of the present Marwir dynasty when they took possession of the State in the first quarter of the eighteenth century and to whom grants of land were made by Maharija Anandsingh in 1741 A D on condition of military service—In the case of the Bhoomins are included all subordinate leudatories who were in possession of their Pattas prior to the advent of the present Marwar dynasty. The pattas they hold were acquired dynasty. The patters they hold were acquired by their ancestors by grunt from the former Rao Rulers of the State. The Maharaja receives Rs 52,427 annually on account of Khichdi and other Raj Haks from his subordinate Sardars the tributary talukas of the Mahi Kantha Agency and others and pays Rs 30,340 as Ghasdana to Gaekwar of Baroda through the British Government. Of the smaller States Vilayangar and Danta are two States enjoying Vijavnagar and Danta are two States enjoying plenary jurisdictional powers. The names of their Chiefs are Rao Shree Hamirsinghii and Maharana Shri Bhawansinghji While 31 enjoy limited jurisdiction, the remainder are estates

POLITICAL AGENT --- Captain I W Galbraith, MCIA

Nasik Agency —This consists of one State, Surgana, lying in the north-west corner of the Nasik District Surgana has an area of 360 square miles and a population of 15,258. The ruler of the State (Mcherban Prataprao Shankarrao Deshmukh) died in June 1930 and the Government of India selected Meherban Yeshwantrao Prataprao Deshmukh, the eldest of his sons, as heir to the gadi on which he was installed in January 1931. The revenue of the State is Rs. 73,432.

Rewa Kantha Agency—This Agency, with an area of 4,956 square miles and a population of 665,099, comprises 61 States, of which Rajpipla is a first class State, 5 are second class, one is third class and the rest are either petty States or talukas Among those petty States are Sanjcli in the north, Bhadarva and Umeta in the west, Jambhughoda in the south-east, and two groups of Mehwas The 26 Sankheda

Mchwas petty estates lie on the right bank of the Narbada, while the 24 Pandu Mehwas petty estates including Dodka, Anghad and Itaika, which together form the Dodka Mehwas are situated on the border of the Mahi

The following are the statistics of area and population for the principal States —

State	Arca in square miles	Popu- lation (1931 Cenqus)
Balasinor Bariya Chhota Udalpur Lunavada Narukot (Jambhughoda) Rajpipla Sunt Other Jurisdictional States, Civil Stations and Thana Circles	180 813 890 388 143 1,517 394	52,525 159,429 144,074 95,013 11,402 203,035 83,538

Under the first Anhilvada dynasty (746-961) almost all the Rewa Kantha lands except Champaner were under the government of the Bariyas, that is, Koli and Bhil chiefs In the eleventh, twelfth and thirteenth centuries chiefs of Rajput or part Rajput blood, driven south and east by the pressure of Muhammadan invasions, took the place of the Koli and Bhil leaders The first of the present States to be established was the house of the Maharaja of Rajpipla, a Gohel Rajput

Lunawada is a State in the Rewa Kantha Political Agency with an area of 388 square miles and an annual revenue of about Rs 5,50,000. The Rulers of Lunawada belong to the historic Solanki clan of Rajputs claiming their descent from the famous Sidhraj Jaysinh of Anhilwad (Gujerat) Besides having fine patches of good agricultural land, the State contains a considerable forest area vielding rich timber. The State enjoys a hereditary salute of nine guns whereas His late Highness Maharana Shri Sir Wakhatsinhij, KCIE, used to enjoy a personal salute of 11 guns. The population of the State is 95,013 according to the census of 1931 Maharana Shri Virbhadrasinhij, Rajaji Saheb of Lunawada has been invested with full powers on the gadi of his ancestor on 2nd October 1930

Rajpipia —This State lies to the south of the Narbada It has an area of 1,517‡ square miles The lands are rich and very fertile and except a few forest-clad hills are suitable and available for cultivation in large quantities in the south-east talukas The family of the Maharaja of Rajpipla, Captain H H Maharana Shri Sir Vijaysinhji, K O S I, is said to derive its origin from a Rajput of the Gohel clan Cotton is the most important crop in the State In the hills there are valuable teak forests The capital is Rajpipla which is connected with Anklesvar by railway built by the State

Cate is from the Marathi-Konkani kat, Sansk kvātha or kvatha Káchu is a Dravidian form ¹

It is possible that in some of the languages the word may have felt the influence of, or been derived from, English

[Catre (a light bedstead, a folding bed) Anglo-Ind cot 3

The etymon of catre is the Malayal kattil, in the meaning of 'bed, sofa,' derived from the Sansk khatvā, which gave khāt in Konkani and Marathi, and also the diminutive khātlêm, 'a cheap roughhewn bed' It is interesting to note that, just as the Malayal. vettila assumed in Portuguese the forms bétele, bétel, betle, bétere, betre, so likewise kattil took the forms catele, cátel, cátere, catre

The Spanish Academy Dictionary mentions catre in the sense of 'a light bed-stead intended for one person only', and derives it from cuatro. 'four', with reference to its But the mere four legs mention of such a word in the Spanish dictionary is no proof that it is a genuine Spanish word, for coco, manga, palanguim, bazar are also to be met with in Spanish dictionaries, and these are unmistakably Indian words which

^{1 &}quot;Cate, which here (Ormuz) is called cacho" António Nunes, Livro dos Pessos, p 22 See Gonçalves Viana, Apostilas

^{2 &}quot;It is for the (religious) brother to remain to help in Christian doctrine, catecismo, and the conversion of the infidels" Lucena, Bk, VI, ch 3

khan Talpur established himself as Rais or Ruler of Sind, and subsequently his nephew, Mir Sohrab Khan Talpur, founded the Khalrpur branch of the Talpur family. In 1832 the individuality of the Khalrpur State, as separate from the other Talpur Mirs in Sind, was recognised by the British Government. In a treaty under which the use of the river Indus and the roads of Sind were secured to the British. The chief products of the State are oilseeds, ghee, hiddes tobacco, fuller searth, carbonate of soda, conton wool and grain. The manufactures comprise cotton fabrics and various kinds of silverware and metal work. There is an Industrial school at the capital where lacquer work, carputs, pottery, etc., are produced. The Railway from Hyderabad to Robri runs through

the whole length of the State The rule of the Mirs has all along been patriarchal until very recently when the present Ruler, Mir All Nawaz Khna Talpur, an educated and enlightened prince, in 1027 turned a new leaf in the administration of the State and replaced the old Wazarat system by a Council of three members, he being the President This Council was abolished in 1931, and a European member of the Indian Civil Service is now sole minister to His Highness The State supports a military force of 211 Infantry and 160 armed police. It also had an Imperial Service Camel and Baggage Corps 180 strong, which served at the 1 ront, but this was disbanded in 1931 on account of financial stringency.

above the Konkan plain It has an area of
310 square miles and a population of 57,288

according to the 1031 Census and a gross revenue of Rs 6,03,961 Up to 1294, the period of the first Mahomedan invasion of the Deccan, Jawhar was held by a Varli, not a Kolichief The first Koli chief obtained his footing in Jawhar by a device similar to that of Dido, when he asked for and received as much land as the hide of a bull would cover The Kolichief cut a hide into strips, and thus enclosed the territory of the State The present chief is Raja Patangsha alias Yeshwantrao Yikramsha, who is a minor and hence the State under British administration

UNDER THE GOVERNMENT OF BENGAL.

Cooch Behar —This State, which at one time comprised almost the whole of the Northern Bengal, Assam and a part of Bhutan now known as the Duars, is a low-lying plain in North Bengal It has an area of 1,318 square miles, a population of 5,90,866 and a revenue of over 43 lakhs By the demise of the late ruler His Highness Maharaja Sir Jitendra Narayan Bhup Bahadur in December 1922 in England, lils eldest son Yuvaraj Jagaddipendra Narayan (born on December 15, 1915) succeeded to the gadi at the age of 7, which necessitated a minority administration under the guidance of a Regent. His Highness the Maharaja belongs to the Kehatriya Varna of Kshatriya origin The present Maharaja has three sisters Maharajkumar is Ila Devi (actat 17), Avesha Devi (actat 12) and Menaka Devi (actat 11) and

one brother Maharajkumar Indrajit Narayan (actat 13) Her Highness the Maharani Sahiba of Cooch Behar was appointed Regent under the wishes of the late Maharaja and administers the State on behalf of her minor son with a Council of Regency, comprising three members at present, of which Her Highness is the President. Cooch Behar once formed part of the famcus kingdom of Kamrup British connection with it began in 1772 when owing to inroads of the Bhutias, the assistance of the East India Company was invoked The chief products of the State are rice, jute, mustard seed and tobacco The capital is Cooch Behar, which is reached by the Cooch Behar State Railway, a branch of the Fastern Bengal State Railway System

The origin of the word is uncertain. Yule says that he has not been able to trace the name to any Indian source. Burton, who is cited by Yule, derives it from the Arabic katīreh, 'a small craft'. Fr João de Santo António Moura derives it from the Persian

are the different names by which a cargo vessel was known on the southern coast of India Dalgado, in his Glossario, says that Malayalam dictionaries do not mention any word corresponding to it, and that it is not unlikely that it was already in use in the Malabar Coast at the time when the Portuguese arrived there in the form pagala, equivalent to the Marathi bagalā, which represents the Ar bagalā, and is the name commonly given on the Western Coast of India to Arab vessels of the old native form not impossible that the Arabic bagalā is itself a corruption of the Spanish bajel, barxel or barrel For the form pager employed by Gaspai Correia see barrel]

"And twelve thousand reis from the catur or fusta" (qv) Simão Botelho Tombo p 246

"He entered a catur with only one page intending thereby to disarm the covetuousness of the king which would have been roused if halberdeers had accompanied him" Lopo de Sousa Coutinho Hist do Cerco de Diu, p 70

'He dispatched a very swift catur with letters for Christovão de Sousa'' Diago do Couto, Dec IV, 1, 2 $k\bar{a}t\bar{u}i$, 'a small ship armed in time of wai' But it is not certain whether such terms exist in Arabic and Persian It appears to me that the true origin of the word must be the Malayal kattur on the Neo-Aryan kātar, from the Sanskrit kartarī, 'a seissors', literally 'a cutter', from the verb krt, 'to cut' The craft whose distinguishing feature was its narrow shape, especially at the prow, which enabled it to cut through the water with ease, a fact noticed by the Portuguese chroniclers, might well earn the denomination This term is employed in various metaphorical senses foi instance, in Konkani, kātar is used to denote 'a cross pieceof timber to hold fast larger beams, a pyramidical structure, an obelisk' The word was current in Malabar and when the Konkan the Portuguese arrived there, and if to-day it is not in use, it is because similar craft do not exist

[The O E D regards 'cutter' as an English word from 'to cut', though this view does not agree with the author's which

be the most ancient, the list of its chiefs the native governments, they were exempted covering a period of over 3,600 years. It is from the operation of the general regulation noteworthy that this family is of Khono system. This was on the ground of expediency covering a period of over 3,600 years. It is noteworthy that this family is of Khono origin, and furnishes the only known instance in which, amid many vicissitudes, the supre macy of the original settlers has remained in The States acknowledged the suzer ainty of the paramount power and were under an implied obligation to render assistance in resisting invaders, but in other respects neither the ancient kings of Orissa nor their successors, the Mughals and Marathas, ever interfered with their internal administration All the States have annals of the dynastics that have ruled over them, but they are made up of most part of legend and fiction and long gencological tables of doubtful accuracy, and con tain very few features of general interest. The British conquest of Orissa from the Marathas which took place in 1803, was immediately followed by the submission of ten of the Tribu tary States, the Chiefs of which were the first | to enter into treaty engagements

The States have formed the subject of frequent legislation of a special character. They were taken over from the Marathas in 1803 with the rest of Orissa, but, as they had always been tributary states rather than regular districts of

only and it was held that there was nothing in the nature of British relations with the proprietors, that would preclude their being brought under the ordinary jurisdiction of the British courts, if that should ever be found advisable. In 1882 it was held that the States dld not form part of British India and this was afterwards accepted by the Secretary of State

All the forests in them were at one time among the le up of best timber producing tracts in India, but until lately forest conservancy was practically until the least of frequent legislation of a great legislation of a great legislation of a great legislation of a great legislation. inknown The States have formed the sub-ject of frequent legislation of a special character. The relations with the British Government are governed by sanads which, in the case of Gangpur and Bonal, were last revised in 1919, and in the case of the others in 1915. They recite the rights, privileges, duties and obligations of the Chiefs. of the Chiefs, providing for the settlement of boundary disputes, and indicating the nature and extent of the control of the Political Agent and Commissioner

are included under this Government -

State	Area Sq Miles	Popu- lation	Revenue in lakhs of Rupees
Rampur	892	453,607	53
Tehri (Garhwal	4,500	318,482	18
Benares	875	362,735	24

Rampur State —The State of Rampur was founded by Nawab Sayed All Mohammad Khan Bahadur in the middle of the 18th century and his dominions included a considerable portion of what is now known as Robilkhand The founder belonged to the famous Sayeds of the Bareha clans in the Muzaffarnagar district and was a statesman of remarkable ability He rendered invaluable services to the Moghal Emperor who recognised him as Ruler of Robilkhand

1

Upon his death, his Kingdom underwent many vicissitudes and was considerably reduced in size during the reign of his son Nawab Sayed Faizulla Khan Bahadur The Province of Rohilkhand had now passed into the hands of the Fast India Company Nawah Saved Faizulla Khan made great st. Bahadur was most loval and true to the fact in every British Government to whom he always looked interest in Edu

Three States Rampur, Tehri and Benares up for help during those unsettled days and he eincluded under this Government — up for help during those unsettled days and he gave tangible proof of his loyalty when during the war against France he offered all his cavalry 2,000 strong to the British Government in 1878 and received the following message of thanks from the then Governor-General -

> "That in his own name as well as that of the Board, he returned him the warmest thanks for this instance of his faithful attachment to the Company and the "English Nation"

Another opportunity arose for the ruler of Rampur to evince his steadfast loyalty and devo Mutiny of 1857 His Highness Nawab Sir Sayed Yusuf Ali Khan Bahadur occupied the Musnad of Rampur in those days From the very start till peace was re established in the country, he was lavish in his expenditure of men and money on the side of the British Government he fought their battles, saved the lives of many Europeans whom he provided with money and other means of comfort and had so much established his reputation as a good administrator that he was placed in charge of the Moradabad district. These signal services were recognised by the Government by the grant of an Illaga besides other marks of distinction

The reign of His Late Highness Nawab Sir Sayed Mohammad Ali Khan Bahadur stood out unique waya Rampur made great st. amour ce and be took fact in every on

meaning has been retained by the side" of the other is, however, possible, and very probable, that the word which means 'a big ship' has come to signify metaphorically in a poetical language, like High Javanese, a 'high horse', and not vice versa W W Hunter mentions kapal as the vernacular name for the horse in Krama (High Javanese), and gives járan as its equivalent in Ngoho or Low Javanese 1 Bugui makes a distinction between kaválu and kappala

Again, there is no satisfactory explanation as to why the Malays adopted the Portuguese cavalo when they had their own word kúda The adoption of kovelú or torvélu, from Port coelho, 'rabbit', in Malay and Javanese, and of koélhu, in Teto and Galoli, must be attributed to the fact that the animal was unknown among those people, owing to which there was no vernacular term for it In the same way there is no especial name for the rabbit in India and it is.

therefore, called by the same name as the 'hare' "The Marathas make no distinction between the hare and the rabbit" Candy

Under administration

Bahawalpur - A Native State in direct political relationship with the Government of India through the Agent to the Governmentor India through the Agent to the Governor-Gene-ral, Punjab States Agency Bahawalpur is situa-ted between the Punjab and Rajputana, Latitude 27° 41′ to 30° 22′ 15″, Long 70° 47′ to 74° 1′ and bounded on the North-East by the District of Terozepur, on the East and South by the Rajputana States of Bikaner and Jaisalmere, on the South-West by Sind, on the North-West by the Indus and Sutlej rivers Area, 15,000 square miles

This State is about 300 miles in length and about 50 miles wide, is divided lengthwise into three great strips. Of these, the first is a part of the Great Indian Desert, the central track which is as barren as uplands of the Western Punjab, has however been partly rendered capable of cultivation by the net work of Sutlej Valley Canals constructed recently, and the third a fertile alluvial tract in the river valley is called the Sind The State is a partner in the great Sutlej Valley Project which is now nearing completion The scheme embodies four colossal weirs and a net work of canals that are gradually but surely converting the arid and bleak desert of Cholistan into a valley of smiling fields and rich gardens. It has been estimated that the perennial and non-perennial areas to be brought under cultivation by the Project would cover 14 64 and 25 82 lakh acres of land respectively The ruling family is descended from the Abbasside Khalifas of Baghdad The tribe originally came from Sind, and assumed inde-pendence during the dismemberment of the Durrani Empire in the Treaty of Lahore in 1809 Ranjit Singh was confined to the right bank of the Sutlej

The first treaty with Bahawalpur was negotiated in 1833, the year after the treaty with Ranjit Singh for regulating traffic on the Indus It † Personal salute raised to 1J guns

secured the independence of the Nawab within his own territories and opened up the traffic on the Indus and Sutlej During the first Afghan War the Nawab rendered assistance to the British and was rewarded by a grant of territory and life pension On his death his heir being minor for a time the administration of the State was in the hands of the British authorities The present ruler is Rukn-ud-Daula, Nusrat-Jang, Mukhlis ud-Daula, Hafiz ul-Mulkh, His Highness Captain Nawab Sir Sadiq Muhammad Khan Abbasi V, GCIE, KCVO, KCIE, who was born in 1904 and succeeded in 1907 During his minority the State was managed by a Council of Regency which ceased to exist in March 1924, when His Highness the Nawab was Invested with full power His Highness is now chief Minister, Izzat Nishan, Imad-ul-Mulk, Raisul-Wozra Khan Bahadur Mr Nabi Bulsh Muhammad Husain, MA, LLB, KOAO, BOOS, a Public Works and Revenue Minister, Mr J A Mackeown, 108, and a Home and Military Secretary, Major Maqbool Hasan Kurelshy, MA, LLB, OAO, OHO

The chief crops are wheat, rice and millet The Lahore-Karachi branch of the North Western State Railway passes through the State State supports an Imperial Service combined Infantry, in addition to other troops The capital is Bahawalpur, a walled town built in 1718

Income from all sources over 70 lakhs Languages spoken Multani or Western Punjabi (Jatki), and Marwari.

chapa "Homem chapado is a man who is armed in the chapa of his virtue or his honest toil, etc. The expression is borrowed metaphorically from the chapas or plates of metal on which the kings of India caused their letters patent to be engraved."

Beames, Thomson, Fallon, and many other writers on Indian languages have no doubt at all that chapa is a pure Hindi term

In the Tombo do Estado da India there is "a draft of the contract which the Governor Nuno da Cunha entered into with Nizamafe Zaman with respect to Cambay in the year 1537" In this are met with not only the substantive form chapa, but also the verb chapar and its participle chapado, all of them ployed in their genuine Indian meaning "Soon after in my presence he (Nızamafe Zaman) signed and swore on koran (moçafo) to keep and to maintain and to fulfil this agreement in its entirety.

and he sealed it (chapou) with his seal (chapa). " "And inasmuch as the coins were stamped (chapada) with the coining die (sicca), ie, struck with their mark "Diogo do Couto likewise says "He [D Manoel de Lima] granted to him [a servant] a firman inscribed in big and beautiful letters and chapado (sealed) with the chapa (seal) of his coat of arms Dec VI, vii, 7 1

It is worthy of note that in India the term chapa is met with only in the modern languages, with the exception, as far as I know, of Tamil and \mathbf{of} Sinhalese, wherein it is not to be found Chāpa in Sanskrit is the name of a bow The introduction of the press given the word new meanings greater denotation and \mathbf{a} Yule and Burnell are opposed to the view that chap, which is used in the Far East, is derived from the Chinese, and they maintain that it was carried there from India

¹ Gaspar Correia, referring to Pedro de Covilha, says "Displaying a brass chapa ('plate') on which were en graved letters forming the name of His Majesty D João and of Preste, in Chaldaic" Bk III, p 29

UNDER THE GOVERNMENT OF ASSAM.

Manipur—The only State of importance, conferred on him He is entitled to a salute under the Government of Assam, is Manipur of 11 guns which has an area of 8,620 square miles and a population of 4,45,606 (1931 Census), of which ducted by H H the Maharaja, assisted by a about 58 percent are Hindus and 35 percent animistic hill tribes Manipur consists of a greattract of mountainous country, and a valley about 50 miles long and 20 miles wide, which is shut in on every side The State adopted Hinduism in the early eighteenth century, in the reign of Pambeiba or Gharib Nawaz, who subsequently made several invasions into Burma On the Burmese retaliating, Manipur subsequently made several invasions into Burma On the Burmese retaliating, Manipur negotiated a treaty of alliance with the British in 1762. The Burmese again invaded Manipur during the first Burmese war, and on the conclusion of peace in 1826 Manipur was declared independent. The chief event in its subsequent history was the intervention of the British in 1891 to establish the claim of Kula Chandra the States have treatles or engagement with the British Government the smallest is Nonglival, which has a population of only 213 Most of them are ruled by murder of the Chief Commissioner, Mr Quinton, and the officers with him, and the withdrawal of the escort which accompanied him From 1891 to 1907 the State was administered by the Political Agent, during the minority of H H in recent years there has been a tendency to to 1907 the State was administered by the Political Agent, during the minority of H H Chura Chand Singh The Raja was invested with ruling powers in 1907 and formally installed on the gadi in 1908 For his services during catic character, a Siem exercising but little the War the hereditary title of Maharaja was

Durbar, which consists of a President, who is a member of the Indian Civil Service, his services being lent to the State by the Assam Government three ordinary and three additional members, who are all Manipuris The staple crop of the country is rice Forests of various kinds cover the great part of the mountain ranges

in recent years there has been a tendency to broaden the elective basis The constitution of

UNDER THE GOVERNMENT OF THE CENTRAL PROVINCES

The Central Provinces include fifteen States in political relation with the Government with an area of 31,080 square miles and a population of 2,477,832, according to the Census of 1931 One of the States Makrai, adjoins the Hoshangabad District, the remainder are scattered round the Chhattisgarh Division to the different districts of which the majority of them were formerly attached Their relations with the Government are controlled by a Political Agent The States vary greatly in size and importance, Sakti, the smallest, having an area of 138 square miles and Bastar, the largest, an area of 13,062 square miles. They are administered by here-ditary chiefs, who hold on conditions of loyalts and good government set forth in Sanads and acknowledgments of fealty, but are nominally free from direct interference save in the case of sentences of death in the case of all Chiefs and sentences of over 7 years imprisonment, in the case of all Chiefs but two, which require confirmation of His Lycellency the Governor and the Political Agent respectively. But as a fact, the Government has exercised a very large samount of control owing mainly to the frequency with which the States have been taken under direct management, because of either the minority or the maladministration of and good government set forth in Sanads and either the minority or the maladministration of the Chiefs

The States pay a tribute to Government which amounts in the aggregate to about 21 lakhs

Statistics relating to the chief States are contained in the following table -

State	Area.	Popula tion 1921	Revenue (approxi- mate) in lakh«
	5 n		Rs
	Miles

to be noted, however, that Duarte Barbosa (1516) employs chapeado in the sense in which it was used in Europe "In front iides the Preste Joam in another waggon chapeado (plated) with gold, very richly attired "P 215 [Ed Longworth Dames, Vol I, 41]

Chapéu (a hat) Konk,
Mar, chepém — Mal chapéu
chapíyu — Sund chapéo —
Mac, Bug chapíyo — Nic
śapéo 1

Molesworth says "Chepem n R (Rájápur) W (Warı) (chepnem) A low, flattish hat or cap Used esp of the military hat or cap of the Sepoys and their officers" Chepném, from which the author wrongly derives the word, signifies 'to flatten, to compress'

In Konkanı chepekár, one who uses a hat; a hatter

Chapinha (in the sense of a small metal-plate')
Malayal chappiñña — | Mal

chaping, "a metallic plate (used to cover the nudity of a very young female child)" Wilkinson | — ² Siam cha' ping, ta' ping

Charamela (a bag-pipe)
Konk chermél — Mac, Bug.
charaméle. — Jap. charumera,
charumeru, vern term rappa.¹

Charuto (cheroot) Tet, Gal sarútu

The primary source of this word, which has been adopted in so many Indian and Malayo-Polynesian languages, is the Tamil churuttu, 'roll, twist, cheroot, to wrap or roll round' (Percival). "It is, therefore, evident," says Gonçalves Viana with much reason, "that from India, and not from Portugal, this term was passed on to Malay, as it was to English, and from this latter to Portuguese" 2

Chave (a key) Konk,

haps made up of the Ar ka-('like') and n'ala ('a shoe')]

? Chiripos (in the sense of 'wooden shoes') Konk chirpám (neut pl), vern term khadhāvô—Tam cherippu—Malayal cherippu Muttu cherippu, boots Oru vaka cherippu, slippers—Mal cherpu

The Port dictionaries, Contemporaneo, and that of Cândido de Figueiredo, do not mention chiripos, perhaps, because the word is not now in use Bluteau, Morais, Vieyra, João de Deus, and Dr Adolfo Coelho say simply "∇ tamancos (wooden-shoes) " It appears to me that the word is of Dravidian origin carried by the Portuguese to Goa and It is in use in the Portuguese spoken in India Gabriel Rebelo says "Some bring (in the Moluccas) wooden chiripos" 1

[It is the Tam-Malayal

cherippu, according to the Glossario]

Chita (an Indo-Port. word, chintz, a printed cotton cloth)

Konk chit—Sinh chitta—
Indo-Fi chite—Mal, Mad chita—Sund chita, inchit—
Jav chitó.—Day chita, sita—
Mac, Bug chi—Tet, Gal sita

Bengali, Marathi, and Sindhi have chhit. The English 'chintz' is from the Hindustani chint, from which is also derived the Persian chit The source of the primary word is the Sanskrit chitra, 'speckled' 1

¹ Informação das Cousas de Maluco, ed Acad of Sc, Lisb, p 158

Cândido de Figueiredo said, in reply to my enquiry, that he had not listed chiripos in his dictionary, probably because he had not found sufficient justification for doing so

^{1 &}quot;All the Chites which are made within the Empire of the Great Mogul are printed and are of different degrees of beauty, according to the printing and the fineness of the cotten cloth" (1676) Tavernier, Voyages, III, p 359 [Ox Univ Press ed (1925), Vol II, p 4]

[&]quot;And I presented him with six stone bottles of gin, six bottles of wine, a whole piece of chita printed with tree branches, and a red coral necklace" A J de Castro (1845), in Jour Geo Soc Lisb, 2nd ser, p 57

The old Portuguese writers speak of the material as pano pintado ('painted or spotted cloth') and the term passed into Anglo-Indian speech ["Though the word (pintado) was applied, we believe, to all printed goods, some of

Indian States' Tribute.

Many of the State pay tribute varying in amount according to the chequistances of each case, to the British teovernment. This tribute is frequently due to exchanges of territory or settlement of claims between the Governments but is chiefly in lieu of former obligations to supply or maintain troops. The actual annual reclipts in the form of tribute and contributions from Indian States are summarised in the following table. The relations of the States to one another in respect of tributes are complicated, and it would serve no useful purpose to enter upon the question. It may, however, be mentioned that a large number of the States of Kathla and Gujarat pay tribute of some 1 ind to Baroda, and that Gwalior claims tribute from some of the smaller states of Central India.

soils are set apart for the cultivation of cereals | trial progress of the country If muniand several kinds of fruits and vegetables are | and national taxes be added together, cultivated to an important extent The condition of the agricultural classes in the Velhas Con-quistas has improved during recent years owing to the general rise in the prices of all classes of agricultural produce and partly to the current of emigration to British territory. There is a great shortage of agricultural labour in the Velhas Conquistas, and the cultivation of rice fields is now practically controlled by the Hindu population in the summer months bands of artisans and field labourers from the adjoining British territory make their way into Bardez where the demand for labour is always keen Stately forests are found in the Novas Conquistas They cover an area of 116 square miles and are under conservation and yield some profit to the administration Iron is found in parts of the territory, but has not been seriously worked Manganese also exists and some mines are being worked at present, the ore being exported to the Continent

Commerce

In the days of its glory, Goa was the chief entrepot of commerce between East and West and was specially famous for its trade in horses with the Persian Gulf It lost its commercial importance with the downfall of the Portuguese Empire and its trade is now insignificant

Empire and its trade is now insignificant.

The present trade of Goa is not very large. Its imports amount to about Rs 160 lakhs and exports to about Rs 40 lakhs. The discrepancy is met from the money sent to Goa by the many emigrants who are to be found all over the world. Few manufacturing industries of any moment exist and most manufactured articles in use are imported. Exports which consist of cocanuts, betel nuts, managers. chiefly consist of cocoanuts, betel nuts, mangoes and other fruits and raw produce

A line of railway connects Mormugao with the Madras and Southern Mahratta Railway Its length from Mormugao to Castle Rock above the Ghats where it joins the British system, is 51 miles, of which 49 are in Portuguese territory The railway is under the management of the Madras and Southern Mahratta Railway admi-nistration, and the bulk of the trade of Mormu gao port is what it brings down from and takes to the interior The telegraphs in Portuguese territories are worked as a separate system from the British The latter, however, had an office at Nova-Goa maintained jointly by the two Governments but since 1925 the Nova-Goa office has been handed over to the Portuguese Government which now maintains and works. Government which now maintains and works all the telegraphs in its territories

Taxes and Tariffs
The country was in a state of chronic financial equilibrium for nearly sixty years with occasional The last war enhanced the deficits exceptions to alarming proportions and these were met by fresh taxes and new loans. Most of the new taxes were the result of the initiative of the Governor-General Jaime de Morais, who is po-pularly known as the "Governor of Taxes' Only in 1927 the country experienced the joys of a balanced budget and the public servants whose salaries had always remained in arrears are now being paid regularly There is an esti-mated surplus of about a lakh and a half which has been ear marked for promoting the indus-

If municipal country presents a very high incidence of taxa tion, even higher than that of British India, the average coming to about Rs 88 per capita. There is no income-tax, except for government servants, but there is a special ten per cent tax on all incomes derived in the shape of interest on loans This tax is a powerful contributory cause to the flight of capital from Portuguese India The chief sources of revenue are the special tax on emigrants which yields to the State about Rs 00,000 The country being economically backward, the taxes give very little indication of its productive capacity or of its annual wealth The national wealth is a matter of pure conjecture for lack of statistics

The tariff schedule is based on the three-fold The tarin schedule is based on the three-1011 principle, fiscal, protective and preferential. There is a limited free list on which books and paper figure prominently. The fiscal tariff ranges from 10 to 30 per cent according to the nature of the commodities, but the duties in several cases are specific, not ad valorem. This causes considerable hardship to trade and several cases are specific, not at valorem. This causes considerable hardship to trade, and specially to the poorer classes of consumers. The preferential tariff applies to goods coming from Lisbon and the Portuguese Colonies Very recently the principle of protection has been extended to the export of canned fruits which are entitled to a bounty of 10 per cent on their basic price

The Capital.

Nova-Goa, the present capital of Portuguese India, comprehends Panjim and Ribandar, Old Goa is some six miles distant from the new city Panjim occupies a narrow strip of land leading up to the Cabo, the cape dividing the Aguada bay from that of Mormuzao, and mainly slopes down to the edge of the Aguada It was selected as the residence the Aguada It was selected as the residence of the Portuguese Viceroy in 1759, and in 1843 it was raised to its present rank as the capital of Portuguese India The appearance of the city, with its row of public buildings and elegant private residences, as seen from the water is very picturesque and this impression is not belied by a closer inspection of its neat and spacious roads, bordered by decent, tidy houses The most imposing public structures are the barracks, an immense quadrangular building the eastern wing of which accommodates the Primary School, the Public Library and the Go-Primary School, the Public Library and the Government Press Other noticeable buildings are the Cathedral and various churches, the vice-regal palace, the High Court and so on The square in the lower part of the town is adorned with a life-sized statue of Albuquerque standing under a capacity. ing under a canopy

History
Gon was captured for the Portuguese by
Alfonso de Albuquerque in 1510 Albuquer que promptly fortified the place and established Portuguese rule on a firm basis From this time Goa rapidly rose in importance and became the metropolis of Portuguese power in the East There was constant fighting with the armies of the Bijapur Lingdom, but the Portuguese held their own and gained the surrounding territory now known as the Velhas

Conquistas.

footed animals The Hindus regard the cobia as sacred, and keep some in their tem-An author in Rome, ples once happening to refer to the cobra de capello, heard a Portuguese who had returned from India describe it, and the Portuguese not being able to give another word for capello, the author was much puzzled as to whether it stood for 'hair' or 'hat', because the Italian capello denotes both these As a result of this he had a cobra represented in one of his Latin books with more hair on its body than a bear, though there is not a trace of a hair on it, and with a hat on head, with its tassels ıts spread out We laughed a great deal at the sight of this picture" Not less provocative of good humour is the derivation or mistranslation of the name of this snake cited by Crooke from Christopher Fryke (1700) "Another sort, which is called Chapel snakes, because they keep in Chapels or Churches, and sometimes in Houses " This description is obviously influenced by stories of the cobra being kept in temples, and also in private houses in India 7

Cobra manilla (the venomous snake Bungarus caeruleus or Dabora Russellii) Tel manila-páyu (páyu is 'snake')—Anglo-Ind cobra manilla or minelle (us in South India) [In Ceylon called polonga]

The source-word is the Marathi-Konkani manêr, from the Sansk mani, 'a jewel' The Telugu term appears to be an importation 1

[Molesworth in addition to maner also mentions the form manyār The snake perhaps takes this name from the common belief of the people that it 'wears a precious jewel in its head' A citation from

^{1 &}quot;There is yet another kind of snake even more venomous, which the Indians call Madalis Such is their renown that they kill in the very act of biting, so that the person bitten cannot utter a single word, nor turn him round to die" Duarte Barbosa, p 344 [Hak Soc, Vol II, p 83 "No doubt in the MS this word was written Mādali, i.e., Mandali, which is evidently the correct form" It is clearly the Mandali, varieties of which are regarded as very venomous in Southern India 1

There is one High Court in the State of Indias with five Judges and one Attorney-General, and Courts of Justice at Panjim, Margao, Mapue, Bicholim, Quep m e Dim o, and Municipal Courts of Justice at Mormugio (Vasco da Gama). Pond: Dlu and Nagar-Avell

PORT OF MORMUGAO

Mormug to Is situated towards the south of Agunda Bar on the left Bar, on the left bank of Zuary Piver in Lat 15° 25 N and Long 73° 47' I about 225 miles south of Bombay and C miles south of Panjim, the Capital of Portuguese India The Port of Morinigae is the natural outlet to the set for the whole area served by the M & S M Ry (metre gauge), and offers the shortest route both passenger and goods traffic. The distance from Aden to Mormugno is about the same as from Aden to Bombas The Port is provided with lighthouses, buoys and all necessary marks and it is easily accesible all the very round and at any hour of the day or night even without the assistance of a Pilot Pilotage is not computerv, but when usual pilot flag is holsted, a qualified officer will board the vessel and render euch assistance

Mormugio Harbour is the terminal station of the West of India Portuguese Railway which is controlled by the Madras and Southern Maharatta Railway Company, with headquarters at Madras Goods are shipped direct from Mormugio to any Continental Ports every facility being afforded for such direct shipments Cargo can be unloaded from or loaded direct into Reilway wagons, which run alongside steamers, thus reducing handling Warehouses are thus reducing handling warehouses are built on the quay and have railway sidings alongside Steamers of over 5,000 tons net register, from any Continental Ports can be discharged or loaded rapidly and in complete safety, in a working day of 10 hours 650 tons iron work or 800 tons bale or bag cargo can racilly the loaded or discharged. The port is The port is easily be loaded or discharged provided with steam cranes and all other appliances for quick loading and discharging of vessels, one of the cranes being of 30 tons capacity for discharging heavy lifts The tonnage, quay dues and all other charges are very low, special concessions being granted for steamers arriving from European or American Ports touching Lisbon Fresh water can be obtained at a low cost.

The Bombay Steam Navigation Company's (Shepherd) steamers between Bombay and Man-Falore call at Morning to twice a week The British India Steam Navigation Company's steamers be ween Bombay and Africa call at Mormugio it least once a month. The Lilerman Strick Line mulntains a regular service from Liverpool to Mormugio calling occasionally at Lisbon This service offers every facility for shipment from the United Kingdom to stations on the M & M Railway under the "Combined Sea and Rail Through Bills of Lading" There are several stevedoring firms, the maximum rate for discharging or loading coal and general cargo being fixed by Government at 6 annas per ton, deadweight Goods for British India pass through Goa without any charge being Customs duty payable at Castle-Rock can be paid by the Railway Company and collected at destination Goods from statis at destination Goods from stations on the M & S M Ry System to Mormugio or cree-cesa are railed without transhipment, rice-i ersa thus avoiding a second handling Steam tugs, barges, etc., for unloading in the stream can be had at a very low charge

With a view to promoting the economical, commercial and industrial development of Mormugāo, a special Department under the designation of the "Mormugão Improvement Trust" with its head office at Vasco da Gama, 2 miles from Mormugão Harbour, has been created and the Local Government have introduced various regulations granting every facility to those intending to raise buildings for residential and industrial purposes in the whole area, comprising about 300 acres, near the Harbour There are over 2,000 plots, each measuring between 1,000 and 2,000 square metres (each square yard—0 8361 square metre), available for residential quarters, granted on permanent lease on each payment of 2 annas to Rs 1-8 per square metre, according to their situation, in addition to an annual payment of 4 ples per square metre as lease-hold rent

India, in imitation of the Arabs who called it jauz-al-Hindī. At the present time, the word coco is employed by all European languages

With regard to the etymology of the word, a number of hypotheses have been suggested, not excepting that which assigns to it an Egyptian origin, kuku! But if we note what the old Portuguese writers, who are the most competent to speak on this matter, say, there can be no doubt about the origin of the word

The author of the Roterro (1498), referring to Mombasa, "The palms of this says country bear a fruit as large as melons of which the kernel within is eaten and tastes like nutty galingale" (p 28) And the same writer, when ın India, says "And the provisions consisted of coquos and four jars containing cakes of palm-sugar" (p 94). It is, therefore, in Malabar that the companions of Vasco da Gama gave the name to the fruit, and certainly did not borrow it from the vernacular of the country which calls it tengu, nor from the modern Aryan languages which call it nārel or nāral, Sansk narīkela, Pers nargīl That they did not learn this name in the locality, but transferred it by way of analogy from one object to another, as they did in the case of figo and pera (q v), we know from Bairos, da Orta and others

The source-word is, therefore, the Portuguese coco, which was formerly used, as it is even to-day in Castilian, in the sense of 'a bugbear, a grotesque face to frighten children with' Bluteau gives a derivation which is the very reverse of this, but it indicates the meaning which coco had in Portugal "Coco or Coca We make use of these words to frighten children because the inner shell of the Coco has on its outside surface three holes giving it the appearance of a skull" Dalgado, Glossario

The passages from Barros and da Orta referred to in the above quotation are as follows "Our people have given it the name of coco, a word applied by women to

TRENCH POSSESSIONS.

Settlements, with certain dependent lodges, or They aggregate 203 square miles, and had a total population in the first January 1031 of 256,410. The first I rench expedition into Indian waters, with a view to open up commercial relations, was attempted in 1603. It was undertal en by private merchants at Rouen, but which followed In 1642 Cardinal Richelicu foundered the first Campagnie d'Orient, but its efforts met with no success. Colbert reconstituted the Company on a larger basis in 1664, granting exemption from taxes and a monopoly of the Indian trade for fifty years. After having twice attempted, without success, to establish tisell in Madaga-ear, Colbert's Company again took up the idea of direct trade with India and its President, Caron, founded in 1668 the Comptoir, or agency at Surat But on finding that city unsuited for a head establishment he seized the harbour of Trincomalce in Ceylon from the Dutch The Dutch however, speedl is retool Trincomalee, and Caron, passing over to the Coromandel coast, in 1672, selzed St Thome a Portuguese town adjoining Mad as, which had for twelve years been in the pos-session of Holland He was, however, com-pelled to restore it to the Dutch in 1674

The ruin of the Company seemed impending when one of its agents, the celebrated Francols Martin, suddenly restored it Rallying under him a handful of sixty Frenchmen, saved out of the wreck of the settlements at Trinconnales and St. Thome, he took up his abode at Pondicherry, then a small village, which he purchased in 1683 from the Raja of Gingee. He built fortifications, and a trade began to spring up, but he was unable to hold the town against the Dutch, who wrested it from him in 1693, and held it until it was restored to the French by the Peace of Ryswick, in 1697 Pondicherry became in this year and has ever since remained the most important of the French Settlements in India 168 ant of the I rench Settlements in India foundation was contemporaneous with that of Calcutta Like Calcutta, its site was purchased by a Luropean Company from a native prince, and what Job Charnock was to Calcutta Francois Martin proved to Pondicherry its restitution to the French by the Peace of Ryswick in 1697, Martin was appointed Governor, and under his able management Pondicherry became an entrepot of trade.

Chandernagore, in Lower Bengal, had been acquired by the French Company in 1688, by grant from the Delhi Emperor, Mahé, on the Malabar Coast, was obtained in 1725-6, under the government of M Lenoir, Karikal, on the Coromandel Coast, under that of M Dumas, in 1739 Yanaon, on the coast of the Northern Circars, was taken possession of in 1750, and formally ceded to the French two years later

Administration.

The military command and administration-inchief of the French possessions in India are vested in a Governor, whose residence is at Pondi-cherry The office is at present held by Monsieur Yuvanou (Francois-Adrien). He is assisted by a

The French presentations in India comprise five | Chief Justice and by several "Chiefs do Service" in the different administrative departments 1879 local councils and a council general were established, the members being chosen by a sort of universal suffrage within the French terri-tories Seventeen Municipalities, or Communal Boards, were crected in 1907, namely, Pondicherry, Ariancoupam, Modeliarpeth, Oulgaret, Villenour, Tiroubouvane, Bahour and Nettapacam, for the establishment of Pondicherry, Karikal, Neravy, Nedouncadou, Tirunalar, Grande Aldée, Cotch'ry, for the establishment of Karikal, and also Chandernagore, Mahé and Yanaon On municipal boards natives are and ramon on minimicipal boards natives are entitled to a proportion of the seats. Civil and criminal courts, courts of first instance and a court of appeal compose the judicial machinery. The arm, and establishments connected with the Governor and his staff at Pondicherry, and those of administrators at Chandernagore, Yanaon, Maho and Karikal, together with other they deventers. together with other hendquarters together with other hendquarters charges necessarily engross a large proportion of the revenue All the state and dignity of an independent Government, with four dependent ones, have to be maintained. This is effected by rigid economy, and the prestige of the French Government is worthily maintained in the Last Pondicherry is also the scene of considerable religious pomp and the scene of considerable religious pomp and missionary activity. It forms the seat of an Archbishop, with a body of priests for all French India, and of the Missions Etrangeres, the successors of the Mission du Carnatic founded by the Jesuits in 1776. But the chief field of this mission lies outside the French Settlements, a large proportion of its Christians are British subjects and many of the churches are in British tarritory. The British purpose is the ordinary territory The British rupee is the ordinary tender within French territories A line of rail-way running via Villenour, from Pondicherry to way running ma Villonour, from Pondicherry to Villupuram on the South Indian Railway, maintains communication with Madras and the rest of British India, and Karikal is linked to the same railway by the branch from Peralam A Chamber of Commerce consisting of fifteen members, nine of them Europeans or persons of European descent, was reorganised by a decree of 7th March, 1914 The capital, Pondicherry, is a very handsome town, and presents, especially is a very handsome town, and presents, especially from the sea, a striking appearance of French civilisation.

People and Trade

The Settlements are represented in Par-liament at Paris by one senator and one deputy The Senator is Mons Lemoignic The Deputy is Mons Coponat There were in 1920 b0 primary schools and 3 colleges all maintained by the Government, with 308 teachers and 8,573 pupils Local revenue and expenditure (Budget of 1931) Rs 2,800,320 The principal crops are paddy, groundnut, and expenditure (Budget of 1981) hs 2,800,20 The principal crops are paddy, groundnut, and ragi There are at Pondicherry 3 cotton mills, and at Chandernagore 1 jute mill The cotton mills have, in all 1,691 looms and 71,744 spindles, employing 7,490 persons There are also at work one oil factory and a few oil presses for groundnuts, and one ice factory

the Tribal Militia I ft without the support of the regular trop who in the increence call to have been historied to their enere ir. Mr Arthur Moore, its special correspondent contributed to The Times He pointed out that the militia was meant to be a military police force. The lap e of time, and forgetfulners of its real surpo e, had converted the militia into an imitation of the regular arms. The Militia was meant to be a police. When the war broke out its units were treated as a covering force behind which the Regular Army mobilied This is a role which it was never intended they should serve, exposed to a strain which they should never have been called upon to bear, they crumpled under it. If on the outbreak of trouble troops had promptly hurrled to their support all might have been well. Left to support all might have been well. Left to look after themselves, with no sign of support, they found themselves too weak to hold their positions and militarily their only course was to retire from the midst of their own kinsmen as the seal of resolt surged towards them They would not take it

Russia and the Frontier -The Curron policy was up to the time of its collapse greatly

main him land and content of death his lett dent of Imperial affairs. Rusala was contented him mainly in a super laimed Amiris. Ironted in Central Aria with procleds the same the allocal in the end of Affairal ton conditions on the ending faced lugiand in the faced lugiant lug alone, Rue is had to advance. True, the adventurous spirits in her armies, and some of the ereat administrators in the Tearlet capital Replicated the score against Great Britain for the Crimean War, and for what the Russians thought was depriving them of the fruits of their costs victors over Turkey in 1877-78. The neult was a long and unsatisfactory guerilla enterprise between the hardlest spirits on both rides accompanied by periodic panies in the British Press each time the Russians moved formard, which induced the colning, after the Russian occupation of Mery, of the generic term 'Meryourness' This external force right in Africationan, but it is quite mether involved the Government of India in the humito ret up a real to governt at in its stead. The Hatlone of the Afghan War of 1838, with the fiere one toof it has need held their hand straple destruction of the retiring Indian force and the Mar method in the first person and the Mar method in the first person in the first per by the heroic defence of Jelalabad and the firmness of General Pollock in refusing to with-It an unto and effect of this wanton war draw the punitive army until he had set his was to set the Frenti r from the Gomal to the (mark on Kahul by the raying of the famous khaler at here. With one or two exceptions, Bala Hisar fortus, Rinvolved us in the second Michan War of 1878, which left the builling problem of no stable government in Afghanistan There was a gleam of light when Abdurcould not stand the strain of inhaman Khan, whom we set up at Kabul to an amend from their fellow tribesmen, and either relieve us of our perplexities, proved himself tielted away or joined the rising. This has often a strong and capable ruler, if one ruthless in his from described as the failure of the Curron methods. But in the early eightles the two from described as the familie of the voltage internoon of the carry eighted one policy, which was based on the tribal militin States were on the verge of war over a squabble. But there is mother aspect to this issue, a high for the possession of Penjdeh, and then men was retouting series of brilliant articles which began to think a little more clearly. There was retouting series of brilliant articles which began a series of boundary delimitations and agreements which clarified the situation, without however finally actilling it. The old controversy broke out in another form when intrigues with a Burlat mont, Dorlleff, during Lord Curron's vicerovalty, gave rise to the grave suspicion that the reene had only shifted to Tibet. An expedition to I has rent the vell which had so long concealed the mysterious city and dispersed the minsma of this Intrigue But it was not until the conclusion of the Anglo Russian agreement of 1907 that the two countries arrived at a stage long sought by those who looked beyond their noses. The actual authors of the Agreement were Lord Grey, the Foreign Secretary, and Lord Hardinge, formerly British Ambassador in Petrograd, but it had been desired by their predecessors, whose efforts were rendered nugatory by the intransigent attitude of the dominant forces in Petrograd It was not until Russia was chastened on the battlefields of Manchuria by Japan, and disappeared as a sea power in the decisive battle of Tsushima, that an atmosphere was created favourable to the conclusion of an Agreement This that an atmosphere was created favourable external force in moulding Indian frontier policy was the long struggle with Russia. For nearly three quarters of a century a veiled warfare for predominance in Asia was waged between greatering in the Agreement, for predominance in Asia was waged between land to pay a considerable price in the attitude

Three and The Middle I ast and the route select cluded a binding arrangement with the Sheikh of ed, often criticised was the best for the rand Kowelt, and the position of the Turks at Al-Katr worker at the first the first the right worker at the first the first the centre are commercial line the Lillians if completed, would have correct three cones. The western reas of Turkey in Asia at Haidar Pasha. The rich lands of Anatolia at Alexandretta. The under cood, attached immense importance to the subsequent engagements with Turkey which placed them in maritime command at Alexandretta. They began to inaugurate a commercial polition in the Persian Gulf through the establishment of a subsidized line of steamers run by the great Hamburg An erica corporation. They strove to obtain an actual footing in the Gulf through the German house of Wonkhaus The Germans were probably never serious in their allesed designs on Kowelt, which could never have borno a more definite relation o the commerce of the Gulf than Hushing to Antwerp or Cuxhaven to Hamburg that was one of the red herrings they drew across their trall to divert attention from their real position in Mesopotamia, with indefinite from-objective Baser which is destined by virtue tiers. This enabled the Turks, if they were of an unchallengeable geographical and natural position to be the great port of The Middle Last. These considerations have no more than an academic value now. Germany was defeated. The Turks, when they emerged from an isolated military Legotism based on it did not settle the main issue, the frontier Angora, vere confronted with the immens between Turkey and Irak Under the Treaty problem of re building their bankrupt State, it was provided that if the two parties could deprived of the most intelligent section of the not agree to a boundary line delimitation should old population—the Greeks and the Armenians be left to The League of Nations Negotia by massiere and expulsion-were a very different factor The completion of the through line was indefinitely postponed. But as the advantages of the route, for the purposes we have indicated ore many and creat, the ultimate construction of the through line is only a matter of time, so one has placed these authoritative characteristics on record for the guidance of opinion when the project of the through route is revived as it must be

Turkey and the Frontier -The position of Turkey on the Indian frontier was never of any considerable importance in itself, and never assumed any significance, save as the arant courser of Germany, when she passed under the tutelage of that Power, and for a limited period during the war Although so long established in Mesopotamia, Turkey was not very firmly seated in that country, the Arabs tolerated rather than accepted Furkish rule so long as they were substantially left alone, and the administration, it is understood, never paid its way. For a brief period Midhat Pasha raised the status of Mesopotamia, and after the Resolution that fine soldier Nazim Pasha became a power in the land But speaking broadly Turkey remained in Mesopotamia because it was no one's interest, even that of the Arab, to turn her out When however Germany developed her "B B B' policy, Turkev was used as a stalking horse She moved a small force to the Peninsula of Al-Katr in order to frighten the Sheikh of Bahrein, and tried to convert the nominal suzerainty exercised, or rather claimed, over the Sheikh of Koweit into a de facto suzerninty, exercised by military force. These efforts faded before the vigorous action of the British Government which con-

was alway very precarious. On the outbreak of the war however the situation profoundly changed. When the sound and carefully executed expedition to Bassa and its strategic hinterland was developed into the insane enterprise to capture Baghdad by coup de main, with very inadequate forces, and still more inadequate transport, we found ourselves involved in military operations of the most extensive and unprofitable character these were completely successful with General Mande's occupation of Baghdad After the Russian debacle we found ourselves involved in a new front which stretched from the Luphrates to the wildest part of Central rice and the windest part of Centur Asia, producing military exploits of an almost epic character, but exercising little influence on the war. They were brought to an end by pressure not on extensive wings, but at the heart of Turkish Power in Palestine, where Lord Allenby scuttered the Turks like chaff the aftermath of the war left us in an indefinite so disposed, to be troublesome through guerilla warfure in the Mosul lone, and by stirring up the Kurds, who are the Ishmulites of Asia Minor The conclusion of the Treaty of I ausanne in 1923 brought temporary relief, but tions were promptly opened at Constantinople but it was immediately found that there could be no mutual agreement, the Turks demanded the whole of the Mosul vilayet, and the British delegates declared that Mosul and its hinterland were necessary to the existence of Irak The issue therefore went to the League of Nations That body despatched a neutral commission to study the position on the spot, this commission reported that the best settlement would be for the Meaning Irak to be the commission of the Meaning Irak to the Commission of the Com the Mosul vilavet to be incorporated in Irak, if the British Government were prepared to prolong its mandate over that State for a period of twenty-five years When the report of this commission came before the League in 1925 Britain gave the necessary guarantee, and the Council of The League unanimously allotted the Mosul illayat to Irak The Turkish delegates, who at first recognised the decisive authority of who at first recognised the decisive authority of the Lague, then declared that they would not be bound by its decisions So the matter rested at the end of the year, with Irak in occupation of the disputed up to the temporary frontier, which was known as The Brussels Line After at first breathing nothing but armed resistance to acceptance of the award, the Turks afterward assumed a more conciliatory note, and alarmed, it may be, by the threat of Italian aggression, accepted the frontier line demarcated by the League

France and the Frontier—If we touch for a few sentences on the position of France on the frontiers of India, it is not because they have any present day significance, but in order to complete this brief survey of the waxing and waning of external influences on Indian frontier policy. It is difficult to find any sound policy behind the efforts of France to obtain a coaling munion) Konk Lomunhámv

water of the Gulf

Counter Measures

The first effective steps to counter these influences were taken during the vigorous vicerovalty of Lord Curzon, who visited the Gulf during his early travels and incorporated a masteris survey of its features in his monumental work on Persia. He appointed the ablest men he could find to the head of affairs, established several new consulates, and was instrumental in improving the sea communications with the Gulf ports. The British Government also tool alarm. They were fortified in their stand against forcign intrigue by the opinion of a writer of unchallenged authority. The American Naval writer, the late Admiral Mahan, placed on record his view that "Concession in the Persian Gulf, whether by formal arrangement (with other Powers) or by neglect of the the Anglo-Franch Entente Russia sent one local commercial interests which now underlied of her finest emisers to "show the flag" in political and military control, will imperiate Guif, and established consular posts where there were no interests of preserve. She was credited with the intention of occupying a mercial interests in both, and the Imperial towarm water port, and in particular with easting between herself and Australasia." The Imperial covitous eyes on the most dreadful spot in the State, was set out by Lord Lansdowne in

words of great import-"We (t.e., His Majesty's | punitive measures have been pressure Government) should regard the establishment of a naval base or of a fortified port in the Persian Gulf by any other Power as a very grave menace to British interests, which we should certainly resist with all the means at our disposal." The negative measures following the-e declarations were followed by a constructive policy when the oil fields in the Bakhtiari country, with a great refinery, were developed by the Anglo Persian Oll Company, in which the British Government has a large financial stake. But with the dis appearance of these external forces on Gull policy, as set out in the introduction to this section, the politics of the Persian Gulf receded in importance, until they are now more than they were before these external influences developed, a local question, mainly a question of police They are therefore set out more briefly and those who desire a complete narrative are referred to the Indian Year Book for 1023 pp 178-183 An interesting new feature in 1931 was the decision of the Persian Government to instal a Navy of their own in the Gulf At the time of writing the fleet consisting of two sloops and tour hunches all suitable armed, is being built in Italy It is at the out-The immediate set to be officered by Italians reason for the new flot is that an increase in the Persian tustoms tariff for revenue purposes led to extensive smuggling. The fleet is required to theck it

Maskat.

Mashat, which is reached in about fortyeight hours from Karachi, is outside the Persian, Gulf proper It lies three hundred miles south or Cape Musandim, which is the real entrance to the Gulf, but its natural strength and his torical prestige combine to make it inseparable from the politics of the Gulf, with which it has always been intimately associated

Formerly Maskat was part of a domain which embraced Zanzibar, and the Islands of Kishm and Larak, with Bunder Abbas on the Persian shore Zinzibar vas separated from it by agreement, and the Persians succeeded in establishing their authority over the possessions on the eastern shore

The relations between Britain and Maskati have been intimate for a century and more It was under British auspices that the separa tion between Zanzibar and Maskat was effected. the Sheikh accepted a British subsidy in return the suppression of the slave trade and in 1892 sealed his dependence upon us by concluding a treaty pledging himself not to code any part of his territory without our consent

The Pirate Coast.

Turning Cape Musandim and entering the Gulf Proper, we pass the Pirate Coast, controlled by the six Trucial Chiefs The ill name of this by the six Trucial Chiefs territory has now ceased to have any meaning, but in the early days it had a very real relation to the actual conditions The pirates were the boldest of their kind, and they did not hesitate to attack on occasion, and not always without success, the Company's ships of war Large expeditions were fitted out to break their power, with such success that since 1820 no considerable (CIL

frucial Chiefs are bound to Great Britain by a series of engagements, beginning with 1806 and ending with the perpetual treaty of 1853 by which they bound themselves to avoid all hostilities at sea, and the subsequent treaty of 1873 by which they undertook to prohibit altogether the traffic in slaves. The relations of the Trucial Chiefs are controlled by the British Resident at Bushire, who visits the British Coset are were reactions of the transfer Pirate Coast every year on a tour of inspection

The commercial importance of the Pirate Coast is increasing through the rise of Debai Formerly Lingah was the entrepot for this trade, but the exactions of the Belgian Customs officials in the employ of Persia drove this traffic from Lingah to Debai The Trucial Chlefs are—Debai, Abu Thabee, Shargah The Trucial Thabee, Shargah liman, Um-al-Gawain and Ras-el-Kheyma

Bahrein.

North of the Pirate Coast lies the little Archipelago which forms the chiefship of the Shorkh of Bahrein Of this group of islands only those of Bahrein and Maharak are of any size, but their importance is out of all proportion to their extent. This is the great centre of the Gulf pearl fishery, which, in a good year, may be worth half a million pounds sterling anchorage is wretched, and at certain states of the tide ships have to lie four miles from the shore, which is not even approachable by boats, and passengers, mails and cargo have to be handed on the donkeys for which Bahrein is But this notwithstanding the trade famous of the port is valued at over a million and a quarter sterling, and the customs revenue, which amounts to some eighty thousand pounds makes the Sheikh the richest ruler in the Gulf

In the neighbourhood of Bahrein is the vast burying ground which has hitherto baffled archæologists The generally accepted theory 's that it is a relic of the Phænicians, who are known to have traded in these waters Political Agent Captain (G Prior

Koweit

In the north-west corner of the Guif lies the of the north-west corner of the Guil lies the port which has made more stir than any place of similar size in the world. The importance of Koweit lies solely in the fact that it is a possible Gulf terminus of the Baghdad Railway. This is no new discovery, for when the Euphrates Valley Railway was under discussion, General Chesney selected it under the alternative name of the Grane—so called from the resemblance of the formstip of the Ray to the resemblance of the formation of the Bay to a pair of horns—as the sea terminus of the line Nowhere else would Kowelt be called a good or a promising port. The Bay is 20 miles deep and 5 miles broad, but so shallow that heavy expense would have to be incurred to render it suitable for modern ocean-going steamers. It is sheltered from all but the westerly winds, and the clean thriving town is peopled by some 20,000 inhabitants, chiefly dependent on the sea, for the mariners of Kowcit are noted for their boldness and hardihood

Port form. The Neo-Aryan languages have kodī, admitted also in Tamil, to designate the number twenty, it is very much in vogue among the people who reckon in kodis or 'scores' But the difficulty to show the process of phonetic evolution which could give corga from kodi or horī, in view of the fact that the normal representation of this word, in Portuguese, would be cons or core as areca is from adeka Longworth Dames who has taken special pains to collect expert opinions on the origin of this word comes to the conclusion that, if the Dravidian origin is admitted as possible, the Malayal form suggested by Dalgado seems more probable than the Kanarese korji put forward by Crooke in Hobson-Jobson, especially, as trade words are most likely to have come into use on the Malabar coast He notes that Dr G P Badger (The Travels of Ludovico di Vaithema, Hak Soc) says that Loraja is in use in the same sense among the Arabs of the Red Sea and Persian Gulf, but he did not

consider it of Arabic origin It is no doubt purely Indian, and must have been introduced into the Red Sea and Persian Gulf by the Portuguese and by Indian traders See Longworth Dames, The Book of Duarte Barbosa, Vols I and II, pp 162 and 234 respectively, Dalgado's Glossario, and Hobson-Jobson, sv]

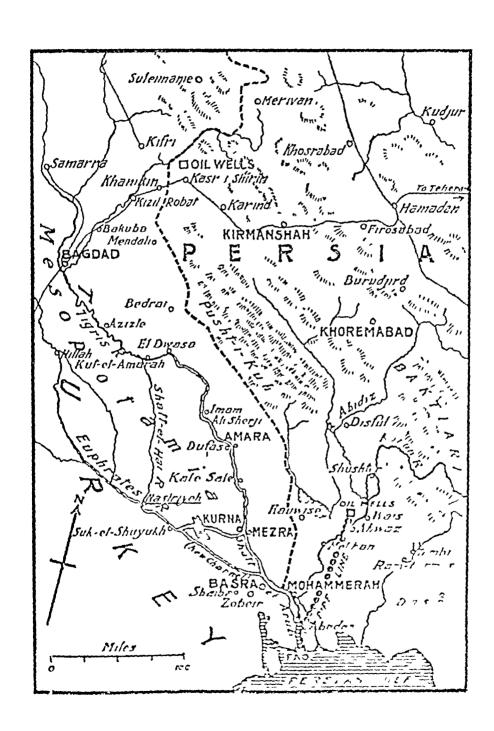

Cornaca (an elephant-driver) Anglo-Ind cornac

Probably from the Sinh kúrava-náyaka, 'chief of the elephant-stud',

[The author, in his Glossario, says that the immediate source-word of the Portuguese coinaca is not the Sanskrit karnakin, but the Sinhalese kuruneka, from which were also evolved the

IV. -- THE PRESENT FRONTIER PROBLEM

There yet terrains a small part of British tary of State for India, which prescribed for India where the King's writ does not run the Government the "limitation of your inter-under what is called the Durand Agreement ference with the tribes, so as to avoid the ex-Trider what is called the Durand Agreement ference with the tribes, so as to avoid the excited the Amir of Afghanistan, the boundary tension of administrative control over tribal between Irdia and Afghanistan was settled, and it was delimited in 1933 except for a small effect to this policy. The main foundations are the main foundations of his action were to exercise over the tribes. The administrated territors and the Durand line there lies a belt of territors of varying width extending from the Gomal Pass in the south, extending from the Gomal Pass in the south, as far as possible, free to govern themselves according to their own traditions and to follow arown as the Tribal Territory. Its future is the Levrore of the interminable discussions of frontier policy for nearly half a century.

New Province

This is a country of deep valleys and recluded risk to county of unity they and reduced less, which nature has fenced in with almost inaccessible mountains. It is peopled with will tribes of mysterious origin, in whom Afahan, Tartar, Turkoman, Persian Indian trab and Jewish intermingle. They had lived their own lives for centuries, with little intercourse even amount themselved, and as trab and Jewish intermingle They had lived their own lives for centuries, with little intercourse even amongst themselves, and as Sir Valentine Chirol truly said 'the only bond that ever could unite them in common action was the bond of Islam'. It is impossible to understand the Frontier problem unless two independence much more than their lives. The other factor is that the country does not indeed these formulations. They walled their lives are steadily borne in mind. They walled their lives the desire to be left alone. They value their lives that the country does not indeed these formulations are lived in charge of the Punjab, a province whose including the first lived Curzon created in 1901 the North-West Frontier Province, and placed it in charge of the Course with many other concerns the charge of the Curzon created in 1901 the North-West Frontier Province, and placed it in charge of the Curzon created in 1901 the North-West Frontier Province, and placed it in charge of a Chief Commissioner, with an intimate frontier effective subordinate to the Government of India. This was a revival of a scheme prepared by Lord Lytton in 1877, and often considered afterwards, but which the desire to be left alone. They value their lives the desire to be left alone. They value their lives the desire to be left alone. They value their lives the course of the Curzon withdrew the regular troops are independent of the Course with an intimate frontier effective province whose there is busined with many other concerns the course of a Chief Commissioner, with an intimate frontier effective province whose there is busined with many other concerns the course of the Curzon created in 1901 the North-West frontier province and placed it in charge of a Chief Commissioner, with an intimate frontier effective province, and placed it in charge of a Chief Commissioner, with an intimate frontier effective province, and placed it in charge of a Chief Commissioner, with an intimate frontier effective province the charge of the course in char The other factor is that the country does not suffice even in good years to maintain the population. They must find the means of subthe Indian Army or in the Khassadars, or else in the outlet which hillimen all the world or else in the outlet which hill-men all the world troops were cantoned in places whence they over have utilized from time immemorial, the could quickly move to any danger point, and raiding of the wealthler and more peaceful these bases were connected with the Indian copulation of the Plains

Frontier Policy

The policy of the Government of India toward the Independent Territory has ebbed and flowed in a remarkable degree. It has ductuated between the Forward School, which ductoated between the Forward School, which would occupy the frontier up to the confines of Afghanistan, and the school of Masterly Inactivity, which would leave the tribesmen entirely to their own resources, punishing them only when they raided British territory Behind both the policies lay the menace of a Russian invasion, and that coloured our frontier policy until the Angic-Russian Agreement. This induced what was called Hit and Betire tier policy until the Angle-Russian Agreement ceiving a great development through the rom-this induced what was called Hit and Retire pletion of the Upper Swat Canal (q v Irri-tactics. In the half century which ended in gation) Now it is completed there are other 1897 there were nearly a score of punitive expeditions, each one of which left behind a legacy of distrust, and which brought to permanent improvement in its train. The fruit

A New Policy manent improvement in its train. The fruit of the suspicion thus engendered was seen in 1897. Then the whole Frontier, from the nearly twenty years, although the position Malahand to the Gomal, was ablaze. The excould never be said to be entirely satistent of this rising and the magnitude of the factory, particularly in Waziristan, peopled military measures which were taken to meet by the most reckless raiders on the whole it compelled a consideration of the whole position. The broad outlines of the new policy when pressed from the Britishside. It endured were laid down in a despatch from the Secretary and did not break

New Province

As a first step Lord Curzon took the control of the tribes under the direct supervision of the Government of India Up to this point they had been in charge of the Government of the Punjab, a province whose placed these fortallees in charge of tribal levies, officered by a handful of British officers most successful of these was the Khyber Rifles, which steadhastly kept the peace of that historic Pass until 1910 At the same time the regular rallway system In pursuance of this policy frontier railways were run out to Dargal, and narrow-gauge line, since converted to the a narrow-gauge line, since converted to the broad-gauge, was constructed from Kushal girh to Kohat, at the entrance of the Kohat Pass, and to Thal in the midst of the Kurram Valley These rallways were completed by lines to Tonk and Bannu By this means the striking power of the regular forces was greatly increased Nor was the policy of economic development neglected. The rallways gave a powerful stimulus to trade The rallways gave a powerful stimulus to trade and the Lower Swat Canal converted frac-tious tribesmen into successful agriculturists This policy of economic development is re-

Camoens, "clove-trees were \mathbf{with} Portuguese bought blood " This is a way of saving that many Portuguese lost their lives in attempting to discover the islands in the Moluccas which grew clove-Conde de Ficalho frees (Colloguies de Garcia da Orta, Vol I, p 368) thinks that the Gk garyophyllon or, as da Orta writes it, gariofilo does not represent an original Greek word but the Hellenisation of some oriental name, he also believes that the Ar garanfal or Larumptel are likewise derived from the same oriental name the opinion of Dymock (Mat Med) all these names derived from the Tam knambu, and the Malay karámpu, because it was through the medium of these people that this spice penetrated into India, and afterwards came to be known to the Arabs and the Greeks]

Curral (a cattle pen, a paddock) Anglo-Ind corral (us in Ceylon), 'an enclosure for the capture of wild elephants'—? Kamb crol, this may be a vern term

The word curral does not appear in the dictionaries of the Sinhalese or Tamil languages, nor is it in use at present, according to my information, nor do I know whether it is current in the Indo-Portuguese dialects in this sense It must have become current in Ceylon during the sway of that island by the Dutch, who carried the word to Africa, in the form kral, 'a native village or settlement' See Webster s v kraal

Conde de Ficalho (Colloquy xxi) says "It appears that this method of hunting elephants was introduced or brought into general use in Ceylon by the Portuguese, the enclosure, which in India is called *Leddah*, receives there the name of *Lorahl* or *corral*,

a forward railway policy will help to solve the problem. A line has been surveyed from Tank to Deahard and thence up the valley to I out San Ieman, so connecting with the Tholand perhaps later to Wana. The Gumal Tangi from Murica to Khajuri Kach is the apparently obvious route, but would be prohibitively expensive in construction and require much tunnelling. Payen 1 Khajuri Kach rin Tanah and Rosi a Kot to Wana some 23 miles, offers no difficulty. The old polley of the raiders working wee wards and our retributive expeditions sectching their very temporary tentacles munications. The broad gauge at Kohat might without undured the extended to Thal and thence to Idak ria Spinwam. From here till further extension proved desirable a motor road through Razmal, Makin and Dwatol to link up with that now surveyed to Ladha sounds possible to the looker on Lyentually such communications road, rail or both, could continue to Wana, Fort Sandeman and Quette na Hindu Bach a strategic line offering great defensive possibilities substituting Razmak, which resembles Octacamund, and healthy unlands for the deadly fever spots now occupied The vers fact of employing the tribesmen on these works with good pay and good en incer-tends to pacify the country as well as providing healthy accessible hill stations in place of the proscribially comfortless cantonments which now exist in this part of the Frontier "

A Compromise —A full statement of the policy finally adopted by Government in view of the situation left upon their hands after the Maheud rebellon was made by the Foreign Secretary, Sir (then Mr.) Denys Bray, in the course of a Budget discussion in the Legislative Assembly on 5th March 1923. He outlined neither a Forward policy nor a Close Border policy. Both these terms had, in fact, ceased to be appropriate. Circumstances had so changed that neither the one plan nor the other remained within the bounds of reasonable argument.

The Foreign Secretary explained that the ingredients of the Frontier problem at the present day are essentially three, namely, the Frontier districts, the neighbouring friendly state of Afghanistan, and the so called Independent Territory, this last being the belt of unsettled mountain country which lies between the borders of British India and India He proceeded specially to show that this belt is, in fact, within India. It is boundary pillars that mark off Waziristan from Afghanistan, it is boundary pillars that include Waziristan in India. We are apt to call Waziristan independent territory, and it is only from the point of view of our British districts that these tribes are trans frontier tribes. From the point of view of India, from the international point of view that is, they are cis-frontier tribes are India's seourge, they are also India's responsibility—and India's alone. That is an international fact that we must never forget."

Sir Denys next referred to the triumph of the Sandeman policy in Baluchistan He policy that some people long ago believed that the same policy would prove effective in that the same policy would prove effective in proposition 20 or 30 years ago is not necessarily fluence of their women, the tribesmen have

HOU DA The task is infinitely more difficult to-day, chieffy because the tribesmen are infinitely better armed, their arms having increased at least tenfold during the last 20 years." Dealing with the Close Border prescription he showed that if one erected a Chinese wall of barbed wire fence along the plain some distance below the hills, "all the time the problem in front of us would be going from bad to worse, with the inevitable increase of arms In the trans border and with that inevitable increase in the economic stringency in this mountainous tract, which would make the tribesthrown back on barbarism A rigid Close Border policy is really a policy of negation, we might gain raids for our districts a momentary respite from raids but we would be leaving behind a legacy of infinitely worse trouble for their descendants

The settled policy of Government in Waziristan, Sir Denys showed, was the control of that country through a road system, of which about 140 miles would lie in Waziristan Itself and one hundred miles along the border of Derajat and the maintenance of some 4,600 have alors and of some 5,000 irregulars, while at Itarmak, 7,000 feet high and overlooking northern Waziristan, there would be an advanced base occupied by a strong garrison of regular troops. Itazmak he showed to be further from the Durand Line than the old-established posts in the Tochi. In the geographical sense, therefore, the policy was, in one signal respect, a backward policy. None the less, it was a forward policy in a very real sense, for it was a policy of constructive progress and was a big step forward on the long and laborious road towards the pacification, through civilization, of the most backward and inaccessible, and therefore the most truculent and aggressive tribes on the border. Come what may, civilization must be made to penetrate these inaccessible mountains or we must admit that there is no solution to the Waziristan problem, and we must fold our lands while it grows inevitably worse."

The policy thus initiated has proceeded with results according with the highest reasonable expectations and exceeding the most ranguine hopes of most people concerned in its formulation

The roads are policed by the Khassadars, who have, in the main, proved faithful to their trust. The open hostility of the Waziri tribesmen to the presence of troops and other agents of Government in their midst, which at the outset they showed by shooting up individuals and small bedies of troops on every opportunity, has faded away, and the people have shown an understanding of the rule of law, and, under the control exercised, a readiness to conform to it. In various small but significant ways, methods of civilization have caught the imagination of the people and won their approval. Thus, the safety of the roads has encouraged, and is buttressed by, a considerable development of motor-bus traffic. The rods, as the King's Highway, are officially held to be sacresanct, that is no shooting up or other pursuit of personal or tribal feuds is permitted upon them

VI - ACGHANISTAN

Empire were for long dominated by one main consist ration—the relation of Afghanistan to a Russian invasion of India. All other considerations were of secondary importance. For nearly three-quarters of a century the attitude of Great British toward successive Amirs has been dictated by this one factor. It was in order to prevent Afghanistan from coming under the influence of Russia that the first Afghan War of 1838 was fought—the most melancholy episode in Indian frontier history. It was been cause a Russian envoy was received at Kabul whilst the British representative was turned back at All Masjid that the Afghan War of 1878 was waged. After that the whole end of British policy toward Afghanistan was to build up a strong independent State, friendly to build up a strong independent State, friendly to Britain, which would act as a buffer against Russia and so to order our frontier policy that we should be in a position to move large forces up. If necessary, to support the Afghans in resisting aggression

Gates to India

A knowledge of the trans frontier geography of India brought home to her administrators the conviction that there were only two main gates to India -through Afghanistan, the historic route to India, along which successive the we invasions have poured, and by way of Seistan Kandai It was the purpose of British policy to Seistan

The relations of Afghani tan with the Indian close them, and of Russia to endeavour to keep most pleturesque and daring in the world From Quetta the line has been carried by the Khojak tunnel through the Khwaja Amran Range, until it leads out to the Afghan Border at New Chaman, where it opens on the route to Kandahar The material is stocked at New Chaman which would enable the line to be carried to Kandahar in sixty days In view of the same menace the whole of Baluchistan has been brought under British control Quetta is now one of the great strategical positions of the world, and nothing has been left undene which modern military science can achieve to add to its natural strength. In the opinion of many military authorities it firmly closes the western gate to India, either by way o Kandahar, or by the direct route thro

faith, they in their turn, adopted the name 'Deus''

1 Dinar (Achinese), dinārā or jingara (Macassar), dinara, jinara, jinaara (Bugi), 'gold coin', are from the Arabic -Pers dinar, which is affiliated to the Lat denarius Amarakośa, a Sanskrit the fifth century. dictionary of mentions dinara as a synonym of ni la, 'a gold coin But there are dinares of smaller value "Two fules are worth one dynare, and twelve dunares one tanga' (Tanga is here used for the larım, a com in use in the Persian Gulf) Lembranças das Cousas da India "The dinar in modern Persia is a very small imaginary coin, of which 10,000 make a tomaum ' Hcbson-Jobson

[Fulc is evidently the same as the Ar jalas, the name of a copper coin of very small value "The names of the Arabic pieces of money are all taken from the coins of the Lower Roman Empire Thus the copper piece was called fals from follis, the silver dirham from drachma, and the gold dinar from denarius, which, though properly a silver coin, was generally to denote coins of other metals, as the denarius acris ('copper or bronze denarius'), and the denarius auri or aurcus ('gold denarius') James Prinsep, in Essays, etc. cit in Hobson-Jobson, sa dinar See also Dalgado Glossario, et faluz]

¹ Tr word let or deta, used in lacot art ar to her Indian languages is desired for othe from the Sanstrit

revolted at the idea of the brother selzing power over the corpse of the murdered man His sons, Hayat and Amanullah, were not disposed to waive their heritage Amanullah was at Kabui, controlling the treasury and the arsenal and supported by the Army Nasrullah found it impossible to make head against him and with-drew The new Amir, Amanullah, at once communicated his accession to the Government of India and proclaimed his desire to adhere to the traditional policy of friendship But his difficulties at once commenced, he had to deal with the war party in Afghanistan, he was confronted with the dissatisfaction arising from the manner in which the murderers of Habib ullah had been dealt with, the fanatical element was exasperated by the imprisonment of Nasruliah, and the Army was so incensed that it had to be removed from Kabul and given occupato be removed from About and given occupa-tion to divert its thoughts A further element of complexity was introduced by the political situation in India The agitation against the Bowlatt Act was at its height The distur Rowlatt Act was at its height The disturbances in the Punjab and Gujarat had taken place Afghan agents in India, of whom the most prominent was Ghuiam Hyder Khan, the Afghan postmaster at Peshawar, flooded Afghanistan with exaggerated accounts of the Indian unrest The result of all this was to convince the Amir that the real solution of his difficulties was to unite all the disturbing elements in a war with India On the 25th April his troops were set in motion and simultaneously a stream of anti-British propaganda commenced to flow from Kabul and open in trigue was started with the Frontier tribes on whom the Afghans placed their chief reliance

Speedy Defeat—The war caught the Army in India in the throes of demobilisation and with a large proportion of the seasoned troops on service abroad Nevertheless the regular Afghan Army was rapidly dealt with Strong British forces moved up the Khyber and selzed Dacca Jelalabad was repeatedly bombed from the air and also Kabul Nothing but a shortage of mechanical transport prevented the British forces from seizing Jelalabad In ten days the Afghans were severely defeated On the 14th May they asked for an Armistice With the usual Afghan spirit of haggling, they tried to water down the conditions of the armistice, but as they were met with an uncompromising emphasis of the situation they despatched representatives to a conference at Rawaipindi on the 26th July On the 8th August a Treaty of Peace was signed which is set out in the Indian Year Book, 1923, pp 196-197

Post-War Relations—It will be seen that under this Trenty the way was paved for a fresh engagement six months afterwards. During the hot weather of 1920 there were prolonged discussions at Mussoorie between Afghan Representatives and British officials under Sir Henry Dobbs These were private, but it is believed that a complete agreement was reached Certainly after an interchauge of Notes which revealed no major point of difference it was agreed that a British Mission should proceed to Kabul to arrange a definite treaty of peace This Mission crossed the Border in January 1921 and entered Kabul where a peace treaty was signed.

The main points of the Treaty are set out in the Indian Year Book, 1923, pp 197, 198-199

Afghanistan after the War—Since the War the relations between Afghanistan and Great Britain have been good and improving There were painful episodes in 1923 when a mur-der gang from the tribal territory on the der gang from the tribal territory on the British side of the Frontier committed raids in British India, murdering English people and kidnapping English women and then took refuge in Afganistan In course of time this gang was broken up His Majesty the King of Afghanistan had troubles within his own borders which have made him glad of British help. The main object of his government was to strengthen the recourses of the country and to then the resources of the country and to bring it into closer relation with modern methods of administration But Afghanistan is an inten ely conservative country and no changes are popular, especially violent was the opposition to a secular form of administration and education The direct result was a formidable rebellion of Mangals and Zadrans in the Southern Provinces, and serious reverses to the regular troops sent against the rebels At one time the position was serious, but the rebels were not sufficiently united to develop their successes, and with the aid of aeroplanes and other assistance afforded by the Government of India the insurrection was broken Whilst this assistance was appreciated, the whole business gave a serious set-back to the reforms initiated by His Majesty, he had to withdraw almost the whole of his administrative code and to revert to the Mahomedan Law which was previously in force

Bolshevik Penetration—Taking a long view, a much more serious development of the policies of Afghanistan, at the period to which the foregoing notes apply was the penetration of the Bolsheviks These astute propagandists have converted the former Trans-Caspian states of Tsarist Russia into Soviet Republics, where the rule of the Bolsheviks is much more drastic and disruptive than was that of what was called the despotism of the Romanoffs The object of this policy is gradually to sweep into the Soviet system the outlying provinces of Persin, of China and of Afghanistan In Persia this policy was folled by the vigour of the Sipar Salah, Reza Khan, since declared Shah In Chinese Turkestan it is pursued with qualified success In Afghanistan it also made certain progress The first step of the Bolsheviks was to extend the Soviet Republics of Tajikistan, Uzbekia and Turkmanistan so as to absorb all Northern Afghanistan This was later; apparently, abandoned for the moment for a more gentle penetration large subsidies, mostly delivered in kind, were given to Afghanistan Telegraph lines were erected all over the country, roads were constructed, large quantities of arms and ammunition were supplied, whilst an air force with Russian pilots and mechanics was created and was largely developed. In return the Bolsheviks received important trading facilities The whole purpose of this policy was ultimately to make it possible to attack Great Britain in India through an absorbed Afghanistan

It is very doubtful if the Amir and his advisers were deceived by these practices, and whether they did not pursue the simple plan of taking

Dom —Sinh Don —Tet, Gal Dom ¹

Favre distinguishes between $n \delta \tilde{n} a$ and $n \delta n a$, in respect of orthography and etymology, and gives as the meaning of $n \delta n a$, without making mention of its derivation, "an unmarried woman, a damsel, daughter of a person of quality," and indicates the Portuguese dona or the Spanish $due \tilde{n} a$ as the probable original of $no \tilde{n} a$

Dr Heiligers likewise suggests ducña

^{1 &}quot;The chiefs of the south and west perpetuate with pride the honorific title of Don, accorded to them by their first European conquerors" Tennent, Ceylon [ed 1859, Vol II, p 70]

[&]quot;At the present time many of the in digenous people have the title of **Dom**, though it is certain that in the beginning when government was first established this title was given only to the Chois for services rendered and as an honorific title, for which they even used to pay a tax." Jose dog Santos Viguinhas Timor, in Jour Geo Soc Tick, 5th ser, p. 63

⁻ The first syllable is dropped, in order that it may become a dissyllable word—this is in keeping with the keriu of the Malayan language family

With every appreciation of the spirit and direction of these changes, friends of His Majesty advised the King to moderate the pace They reminded him that in 1924 far less drastic changes had brought serious trouble in their train in May of that year the "Lame Mullah" raised the standard of rebellion amongst the Gilzai and Mangal clansmen of Khost The Mullahs were openly active against the King and His Majesty was equally frank in his hostility to them Possibly also well-wishers suggested that what was possible in Turkey, after centuries of close contact with the West, and where the ground had been prepared by misclopary effort and a long struggle for by missionary effort and a long struggle for the emancipation of women, might be less easy in Afghanistan, where there had been no contact with the western world

A change of Kmgs.—Events moved rapidly in 1929 A notorious north Afghan budmash, Bacha-i-Saqqao, raised the standard of revolt and inflicted severe losses on the Afghan Regular troops, discontented as they were by arrears of pay. Day by day the Afghan representatives in various parts of the world issued messages asserting that the rebels had been destroyed, and a rapid series of pronouncements declared the withdrawal of all the reforms and the establishment of a Council of Provincial Representatives Communications with outer world were broken King Amanulla and his family fied from Kabul to Kandahar, and then from Kandahar wa Quetta to Bombay where they took ship to Europe King Amanulla on his arrival at Rome entered into possession of the Afghan Legation, where he remained Bacha-i-Saqqao declared himself King of Afghanistan, and for a few months held his position in Kabul Without money, administrative experience or a disciplined following his throng was a thorony one and he following, his throne was a thorny one and he was harassed by constant attacks The Boyal Air Force in India meanwhile went to the rescue of the British Nationals beleaguered in and around Kabul and in a series of brilliant

flights evacuated all without the slightest hitch The most formidable of the new king's adversaries were led by General Nadir Khan, a ecion of the old ruling house, with a wide knowledge of the world Heavy fighting took place Fortunes varied Nadir Khan almost gave up his chances as finally lost But a band of Wazirs from the British side of the border attracted by prospects of loot, joined Nadir and finally seized Kabul in his name and interest Nadir Khan thus became victor and shortly afterwards, at the wish of the Afghans, Bacha-i-Saqqao Was executed other rebels, and when the year closed Nadir Khan was to all seeming in firm possession of the Kingdom He despatched members or his family to the principal Afghan Legations in Europe A Shinwarl rising near the exit from the Khyber Pass took place in February 1930, and was repressed with unexpected success and vigour There followed a serious rebellion in Kohldaman, Bacha-i-Saqqao's country This also was promptly quelled. And thereafter This also was promptly quelled And thereafter Nadir Shah has ruled without challenge He has devoted himself to the reorganisation of his Army England was strictly neutral during the successive stages of the revolution, but promised support to Afghanistan to help her maintain internal peace when she had restored it and this promise was fulfilled by the provision of an interest free loan of £200,000 to King Nadir and by the supply of rifles and ammunition to him He has given evidence of his friendliness towards Britain and India co-operated effectively to prevent tribes on his side of the Frontier joining those on the British side against the Government of India in response to the Congress agitation in the summer of 1930 The trade routes have been re-opened and the new King has again taken up Amanullah's power of reform but in a statesmanlike manner which carries the Mullah's along with him

phase in the long-drawn-out duel between Great Britain and Russia in Central Asia. The earliest efforts to establish communication with that country were not, of course, inspired by this apprehension. When in 1774 Warren Hastings despatched Bogie on a mission to the rashi-Lama of Shigatse,—the spiritual equal if not superior, of the Dalai Lama of Lhasa—his desire was to establish facilities for trade, to open up friendly relations with a Power which was giving us trouble on the frontier, and gradually to pave the way to a good understanding between the two countries. and gradually to pave the way to a good understanding between the two countries. After Warren Hastings' departure from India the subject slept, and the last Englishman to visit Lhasa, until the Younghusband Expedition of 1904, was the unofficial Manning. In 1885, of free access, and where there should have the right of 1904, was the unofficial Manning. In 1885, of free access, and where there should have the right of free

Recent British policy in Tibet is really another. Tibet was recognised, and to whose view hase in the long-drawn-out duel between Great until the war with Japan, British statesmen ritain and Russia in Central Asia. The were inclined to pay excessive deference But rilest efforts to establish communication the position on the Tibetan frontier continued. to be most unsatisfactory. The Tibetans were aggressive and obstructive, and with a view to putting an end to an intolerable situation, a Convention was negotiated between Great Britain and China in 1890 This Inid Great Britain and China in 1890 This laid down the boundary between Sikkim and Tibet, it admitted a British protectorate over Sikkim, and paved the way for arrangements for the conduct of trade across the Sikkim-Tibet frontiers. These supplementary arrangements provided for the opening of a trade mart at Yatung, on the Tibetan side of the frontier, to which British subjects should have the right of free access, and where there should be no

the influence of another word having the same sound, $nona = anona \ (q\ v)$, not only with respect to phonetics, but equally so with regard to the diminutive sense that the word has acquired, is not impossible

It is pertinent to note that the Malay variants are not in fact successive but synchronous, with difference in meaning, and that dona was employed formerly to signify 'a lady, a woman of quality,' and was used by itself without being prefixed to a name 1 In this the word is still sense vogue in East Africa where it is used of ladies of Portuguese descent 2

The palatalized forms nonha and nhonha do not necessarily imply their derivation from, or the influence of, senhora, they could have been the result of the evolution of nona, as can be seen in the Portuguese vizinha from Latin vicina, ponha from poniat, nenhum from nem hum, ninho from nidum, with the previous assimilation of d

Cf pipinhu (from pepino, a cucumber) in the Portuguese dialect of Malacca Moreover, nonha (l us) in the Portuguese dialect of Ceylon, and nhonha in that of Macau have a diminutive meaning, and are probably diminutive forms

On this account, I do not regard as improbable the derivation from dona and the contact of dona and senhora and their

Szechuen, and one of the first victims was political condition of Tibet was much less a Chao Erh-feng Cut off from all support from local than an external question, and was influenced by a hostile and infuriated fluenced by our relations with Russia and fluenced by a hostile and infuriated fluenced by our relations with Russia and fluenced by a hostile and infuriated fluenced by our relations with Russia and fluenced by a hostile and infuriated fluenced by our relations with Russia and fluenced by a hostile and infuriated fluenced by our relations with Russia and fluenced by a hostile and infuriated fluenced by our relations with Russia and fluenced by a hostile and infuriated fluenced by our relations with Russia and fluenced by a hostile and infuriated fluenced by our relations with Russia and fluenced by a hostile and infuriated fluenced by a host China, surrounded by a nostne and interact populace, the Chinese troops in Tibet were in a hopeless case, they surrendered, and sought escape not through China, but through India, by way of Darjeeling and Calcutta The Dalai Lama returned to Lhasa, and in 1913, in the House of Lords on July 28, Lord Morley stated the policy of the British Government in relation to these changes He said the declaration of the President of the Chinese Republic saying that Tibet came within the sphere of Chinese Internal administration, and that Tibet was to be regarded as on an equal footing with other provinces of China, was met by a very vigorous protest from the British Government The Chinese Government as the provinces of China, and Mr Bell, C M G, I C S, Political China is to have no right of active intervention in the internal administration of Tibet, and agreed to the constitution of a conference to discuss the relation of the three countries.

British Trade Agent, Gyantee and Yaturn populace, the Chinese troops in Tibet were This Convention met at Simla when Sir Henry British Trade Agent, Gyantze and Yaturn—McMahon, Foreign Secretary to the Govern-Captain A A Russell

Chinese troops overran Tibet

Later Stages

The British Government, acting on the representations of the Government of India. The pointed out that Great Britain, and strong protests to China against this action. They pointed out that Great Britain, while disclaiming any desire to interfere with the internal administration of Tibet, could not be indifferent to disturbances in the peace of a convention, it is understood, has not been terms with other neighbouring States on our trontier, especially with Nepal, and pressed trained. The attituce of the Chinese Government was that no more troops had been sent to Tibet, and in 1918. Tibet took the offensive and threw off the last vestiges of Chinese more than were necessary for the preservation of order, that China had no intention of converting. Tibet into a province, but that being responsible for the good conduct of Tibet, the frontier forces or to withstand the Tibetan responsible for the good conduct of Tibet, the frontier forces or to withstand the Tibetan responsible for the good conduct of Tibet, the frontier forces or to withstand the Tibetan responsible for the good conduct of Tibet, the frontier forces or to withstand the Tibetan responsible for the good conduct of Tibet, the frontier forces or to withstand the Tibetan responsible for the good conduct of Tibet, and in 1918. The Chinese province of Sechuan went over to the South, the Central Government at Pekin was unable to finance were respected by the Tibetans Finally, the Conditions of the Szechuan marshes, hostilities were suspended and an armistice was concluded to in China. That revolution broke out in the language of the last vestiges of the condition of the Szechuan marshes, hostilities were suspended and an armistice was concluded to the subject of the seen that the language of the condition of the last vestiges of the condition of the last vestiges of the successful the condition of the successful the c

VIII—THE NORTH-EASTERN FRONTIER.

The position on the northern frontier has (qv), it is almost the only important Pative on considered as if the British line were con-State in India with frontier responsibilities and been considered as if the British line were contiguous with that of Tibet This is not so The real frontier States are Kashmir, Nepal, Sikkim and Bhutan From Chitral to Gligit, now the northernmost posts of the Indian Government, to Assam, with the exception of the small wedge between Kashmir and Nepal, where the British district of Kumaon is thrust right up to the confines of Tibet for a distance of nearly fifteen hundred miles there is a narrow This Gurkha State stands in special relation strip of native territory between British Irdia and the true frontier The first of these fron practical purposes independent, and the British ier States is Kashmir The characteristics of resident at Khatmandu exercises no influence and the latest of the lat bis State are considered under Indian States the internal administration

it worthly discharges them through the agency of its efficient Indian State troops—four regiments of infantry and two Mountain Batteries, composed mainly of the Raiput Dogras, who make excellent fighting material One of the most important trade routes with Tibet passes through Kashmir—that through Ladak Then we come to the long narrow strip of Nepal It is quite possible that the original of the Nicobarese word is, as Man suggests, the English 'elephant'

[In Anglo-Indian speech and writings one meets with the term 'Elephanta' in connection withshowers of rain elephantas or elephanta showers phanta is, according to Yule, a name given originally by the Portuguese to violent storms occurring at the termination, though some travellers describe them as at the setting-in of the Monsoon 1 Crooke is of the opinion that "the Portuguese took the name from the Hindi hattıyā, Sansk hastā, the 13th lunar Asterism, connected with hastin, an elephant, and hence sometimes called 'the sign of the elephant'" But the Sansk hasta means 'a hand,' and this is the name of the Nakshatra because of its supposed resemblance to a hand In Marathi, too, hasta means

'a hand,' and the plural form of the word, hastin, is used to signify "the thirteenth lunar asterism, designated by a hand" (Molesworth) The thirteenth asterism has nothing to do with an elephant, and yet in popular speech and proverbial sayings, whether in the Deccan or Gujarat, this asterism is associated with the elephant Padel hathi tai padel bhinti (Mar), lit 'if the elephant falls, then walls will begin to tumble', which is a way of saying that, if the 'Elephant Nakshatra 'should send rain, there will be heavy downpours and houses will collapse, Hāthyiānım sundh farı kharı (Gu]), the trunk of the elephant has verily turned 'by which it is intended to convey that torients of iain have descended from the constellation Hasta Etymologically it is not possible to connect the Sansk hasta, directly, with hāthiyó (Guj) or hatti (Mai) These two forms could have come from hastin, an animal that uses one of its limbs as a hand, ie, the elephant But the difficulty is to show how the 'Hand Nakshatra came to be trans-

Railways to India.

The prospect of linking I prope and Asia by 1 off in the neighbourhood of Rifri in the direction a rilling running car, wards through Asia Minor has fascinated me as ruinds for generations. The plans suggeted have, owing to the British connection with India, always lain in the direction of lines approaching India More than 40 years ago a Select Committee of the House of Commons sat for two years to consider the question of a Luphrates Valley railway. The Shah of Persia applied to the British Foreign Office for the investment of British capital in Persian railway construction many years before the end of the nineteenth century. A proposal was put forward in 1605 for a line of 1,000 miles from Cairo and Port Said to Kowell, at the head of the Persian Gulf while these projects were in the air, German enterprise respect in and made a small beginning by constructing the Anatolian rallway evitem. Its lines start from Scutari, on the touthern shore of the Borphorus, opposite Constantinople, and serve the extreme western and of Asia Miner And upon this foundation was hared the Turlish concession to Germans to build the Bachdad Railway

Meanwhile, Pussia was pushing her railways from various directions into the Central Asian territory running along the northern frontiers of Persia and Afghanistan to the borders of Chinese Turkestan The construction of a Trans-Persian rallway, connecting India, across Persia with the Russian lines between the Black Sea and the Casplan Sea came to the forefront after the conclusion of the historic Anglo-Russian agreement regarding Persia

The Germans pushed forward their Baghdad The Germans pushed forward their Baghdad railway project with a calculating shrewdness arising from their estimate of the value it would possess in their grand aim to over-throw the British Empire The outbreak of the great war and the success of the Germans in inveigling Turkey into it saw the final stages of the construction of the railway pressed forward with passionate energy. Thus, before the overthrow of the Turks and Germans in Asia Minor and of the Germans in France the railway was completed and in use from Scutari railway was completed and in use from Scutari ranway was completed and in use from Scutari across Anatolia, over the Taurus Mountains to Aleppo and thence castward across the Euphrates to a point between Nisibin and Mosul. The Germans had also by that time constructed a line to Baghdad at the castern end of the route, northwards from Baghdad to a point a considerable distance beyond Samara

The war compelled the British to undertake considerable railway development northward from Basra, the port at the mouth of the Shatel-Arab, the broad stream in which the Tigris and Euphrates, after then junction, flow into the head of the Persian Gulf fhe system consists of a metre-gauge line from Basra vic Natarich, on the Euphrates, thence north wards to Baghdad, the line passing a considerable distance westward to Kut-l-Amara, of historic fame From Baghdad the line runs eastward approximately to the foot of the pass through which the Persian road crosses the frontier of that country. A line branches

of Mosul A line also runs westward from Barhdad to Feluja, on the Luphrates With the Turkish Nationalists in control of Anatolla any question of the completion of the through Baghdad I inc is indefinitely delayed

The Trans-Persian line to join the Russian Caucusian system and the Indian railways first assumed proportions of practical import ance in the winter of 1911 Both the Russian and the Indian rallway systems were by then well developed up to the point likely to be the termini of a Trans Persian line. The Russian system reached Julia, on the Russo-Persian frontier in the Caucasus During the war this line has been carried thence southward into the region cast and south east of Lake Russian. Urumia The Indian rallway system, on the borderland of India and Persia, was similarly much extended and improved during the war A new agreement which was negotiated between England and Persia specially provided for British assistance in the development of Persian natural resources and particularly for the extension and improvement of Persian roads suitable for motor traffic but the agreement came to naught

There remains the possibility of linking the Russian and Indian railway system by way of Afghanistan The suggestion has often been made in recent years that the Russian line from Merr to Herat, on the northern frontier of Afghanistan, should be linked to the Indiau line which proceeds from Quetta to the Afghan border on Chaman The distance between the border on Onnman The absence
rallway heads is about 250 miles But there
have always for strategic reasons been strong
military objections to the railway across Afghanistan and after the death of the late Amir Habibullah the Aighan Government fatly opposed any suggestion for carrying the Indian or Russian rallway system within their borders. What the present Afghan Government think about the matter was not shown up to the time this article was written, but the strange situation in Central Asia and beyond the Indian North-West Frontier does not suggest Indian North-West Frontier does not suggest the early removal of the strategic difficulties completion of a broad-gauge line extending the Indian railway system through the Khyber Pass to Landi Khana, at its western extremity, opens a prospect of further possible rall connections with Afghanistan

Britain's special interests in regard to Persian communications have hitherto primarily been associated with lines running inland from the Persian Gulf, to supersede the old mule the Persian Gulf, to supersede the old mule routes Special importance has for many years been attached to schemes for a rallway from Mohammerah, at the opening of the Karun Valley, where the Karun River runs into the Shat-ei-Arah, just below Basra, northwards into the rich highland country of Western Persia where the valuable West Persian oil wells also lie Britain has long established special relations with the Karun Valley and has a large trade there has a large trade there

attempt to explain the term 'elephanta' by connecting it with the Elephanta Island is new A Ilha do Elephante 1 (The Island of the Elephant'), and not 'Elephanta' (an Anglo-Indian transformation, feminine in form) was the name given by the Portuguese, in the early part of the sixteenth century, to the island which was then known, as it is even to this day, to its inhabitants and those of the surrounding country, as Ghārāpurī or, shortly, Puri This name was given because of the life-size figure of an elephant, hewn from one single mass of traprock, which formerly stood in the south of the island, not far from the usual landingplace, and which, to save it from destruction, was removed in 1864-5 to the Victoria Gardens, Bombay, where it can still be seen Dr. Banerjee's

Plephanta" Life in Bombay (1852), p. 194, in O. E. D.]

explanation appears to us untenable, first of all, because it is not to be presumed that the indigenous people, who to this day cling tenaciously to their own name for the island, viz, Ghārāpurī, and will not make use of the foreign name 'Elephanta,' could have introduced the latter term into their folklore and proverbial sayings Again, the term 'elephanta' was used of the storms that were usual about the termination of the Monsoon in places far away from Bombay the Island of Elephanta SirThomas Roe when at Moghul Emperor's Court at Almere experienced on the 20th August, 1616, "a storme of rayne called the Oliphant, vsuall at going out of the raynes" (The Embassy of Sir Thomas Roe, Hak Soc p 247) And Fryer when sail ing near Ceylon (1673) refers to these thunderstorms and definitely connects them with the 'Elephant Constellation '1

If "This is called Ilha do Alifante because in a forest there is found a large alifante of stone, very similar to living specimens, in colour, size, and appearance". D. João de Castro, who visited the island in 1538, in Progrado de Gas at Dio 1

^{1 [&}quot;Not to deviate any longer, we are now winding about the South II cet part of Ceilon, where we have the Tail of the Elephant full in our

the term "St. Francisco," alluding, I suppose, Saint's Day, either of Francis of Assisi, the founder of the Franciscans, 4th October, or of St Francis Borgia, the third General of the Jesuits, 10th October " I am inclined to think that the odds are in favour of 'St Francisco' being the Assisian, rather than the Jesuit General, for the earliest religious to come out to India were the Franciscans who were spread all over the East, they were very influential, and then convent in Goa was described by Pyrard (Hak Soc , Vol II p 53) as "the handsomest and richest in the world." they were indefatigable in promoting everywhere the cult of their great founder must have helped to create the general belief in the minds of the Portuguese and the Indian Christians that after the feast-day of St Francis of Assisi there were no more 'elephantaa' to be feared and the fair season might safely be assumed to have begun Even up to the present day there survives an analogous belief in Goa Tt

is, that the sand-bar, which blocks the mouth of the harbour of Goa from the beginning of the rains, disappears on the feast-day of St Lawrence, the 10th of August, from which date it becomes possible for vessels to enter the port Compare with this Hindu belief associated with the festival of the Naveli Punimā, which takes place on the 15th day of Shravan, usually sometime early in August, viz, that after this date it is safe for ships and boats to put out to sea This popular belief is connected with the appearance in the sky at this time of the star Agastya ('Canopus'), named after the great Rishi of this name, one of whose feats was to drink up the ocean because it had offended him I feel perfectly convinced that the Christian legends associating St Francis and St Lawrence with certain weather conditions in Western India are instances of the way in which the Roman Catholic Church has in all ages been ever ready to accept habits, customs, dress, and legends of the people to whom she preached

Escritório (a writing-desk)
Guj iskotarô, [iscotii, iscutri
—Anglo-Ind screetore, scritoire, screutoie]¹

["The word (iscotri oi iscutri), though of rare occurrence in good literary Marâthî, may occasionally be heard of used by old-world men and women of the middle classes as a colloquialism" Balcrushna V Wassoodew, in Indian Antiquary, Vol XXIX, p 307 Sir Richard Temple (op cit p 116) connects the Anglo-Indian names for the desk "with the English auctioneers' word escritoir for a fancy

writing table (bureau), which is perhaps old French écritoire, a horn or other receptacle for ink ' The OED mentions several instances of the use of 'scrutoire' in the 17th and 18th centuries, and these not necessarily connected with India Iskotarô. iscotri, etc., in Guj and Mar, however, are undoubtedly of Portuguese origin, and the entry of the words in these languages can be accounted for by the Portuguese influence in Bombay, Bassein, and Damaun, it being scarcely credible that they could have derived them from English in which 'escritoire' has never been in ordinary use the Port escritório, in the archaic sense of 'writing-desk' (its present-day acceptation being 'an office-room'), in any way been responsible for the Anglo-Indian terms? Very old writing-desks believed to be of Chinese workmanship are still to be seen in many families in Goa preserved as heir-The Portuguese must have had many of these pieces of furniture turned out in their settlements in India and

^{1 [1669—&}quot;(Goods imported into Achin) ffrom Siam Tinne, Coppar, China Wares, Rice and Screetores both plaine and lackared, etc."—MS Account of India, by TB, p 158, cit by R C Temple, in Indian Antiquary, Vol XXIX, p 116]

^{[&}quot;The Seomen, handing a small Scritoire into ve boat, in which were Gold Mohurs and Rupees to ve value of R 2036 11 for account of the said Scritoire dropt into the Sea, striking on ve Shipp's Side, brolle ve Scritoire, and the money dropt out into ve Sea." Hedges, Diary, Hal Soc, Vol. I, p. 182]

The Army Department before trained to a fact of isomethics with commanders of transpoorties states of isomethious subordinated Army Health arters in the continuous and infinitely actions with Army Healthouters in all a implicitation matters and is responsible for the administration of Cantenments the entained decrease of the Indian Army List. The Army administration is open cited in the Legislature by the Army Member In the Legislative Area with Army Secretary in the Legislative Area with Army Secretary in the Legislative Area with

The Affiliary Council—Is composed of the Commanier in-Chef as Ire that, and the fellowing members namely. The Chief of fellowing members namely the General staff on Vice President, the Adju tant-General the Quartermaster General, the Plaster General of Orinance the Air Officer Commandian Lord Wir Force the Secretary to the Government of Infly In the Arms Department and the Ein inclal Adalms Militars Einano tepresenting the Linauce Department of the Government of India. It is mainly an advisory hade emeils fel for the purpose of nestering the Commander in-Chief in the performance of his administrative duties. It has no collective responsibility. It meets when convened by the Commander in-Chief for the consideration of cases of sufficient importance and difficulty to require examination in conference. The heads of the minor independent branches of Arms Herdquarters and the directors of technical erries attend when required

Military Territorial Areas

Indian Territory is divided in four commands each under a General Officer Commanding in-Culef and the Independent District of Burma under a Commander The details of the organization are given in the table on the next page and it will be seen that Commands comprise 14 districts 4 Independent Brigade Areas and 31 Brigades and Brigade Areas The Northern Command, with its headquarters at Murree, coincides roughly with the Punjab and North-West I rontier Province, the Southern Command with headquarters at Poona, coincides roughly with the Bombay and Madras Presidencies and part of the Central Provinces and Rajputana, the Fastern Command, with headquarters at Naini Tal, coincides roughly with the Bengal Presidency and the United Provinces, the Western Command, whose headquarters are at Quetta, covers Sind and Baluchistan

The General Officer Commanding-in-Chief of each command is responsible for the command, administration, training and general efficiency of the troops stationed within his area, and also for all internal security arrangements

Apart from the four commands, the only formation directly controlled by Army Head-quarters is the Burma district which, mainly because of its geographical situation, cannot conveniently be included in any of the four command areas. The Aden Independent Brigade which was under the administrative control of the Government of India was transferred to the administrative control of His

Majert're Government from the let April 1927. The distribution of the troops allotted to the commands and districts has been determined by the principle that the striking force must be ready to function in war, commanded and constituted as it is in peace. With this end in view, the Army in India is now regarded as

comprising three estegories of troops

(1) Covering Troops,
(2) The Field Army,
(3) Internal Security Troops

The role of the Covering Force is to deal with minor frontier outbreaks and, in the event of major operations, to form a serien behind which mol illustion can proceed undisturbed. The force condition of approximately 12 infantry brighted with a due proportion of other arms.

The Hield Army consists of 4 Divisions and 4 Cavalry Brigades. The Hield Army is India's s'rilling force in a major war.

Army Headquarters

The organization of the Army Headquarters with the Communder in Chief as the head, is founded upon four Principal Staff Officers charged with the administration of—

(a) The General Staff Branch,
(b) The Adjutant General's Branch,
(c) The Quartermaster-General's Branch
(d) The Master-General of Ordnance Branch

The General Staff Branch deals with military policy, with plans of operations for the defence of India, with the organization and distribution of the army for internal security and external way, the administration of the General Staff in India the supervision of the training of the military forces for war, their use in war, the organization and administration of the general staff in India, the education of officers, the supervision of the education of warrant and non-commissioned officers and men of the Army in India, and inter-communication services

The Adjutant-General's Branch deals with all matters appertaining to the raising, organising and maintenance of the military forces in officers and men, the peace distribution of the army, discipline, pay and pensions, martial, military and international law, medical and sanitary matters affecting the Army in India, personal and ceremonial questions, prisoners of war, recruiting, mobilization and demobilization. The Judge Advocate Generalforms part of the Branch. The Director of Medical Services in India, who was independent before the war, is now included in the Adjutant-General Branch.

The Quartermaster-General's Branch is concerned with the specification, provision, inspection, maintenance and issue of supplies, i.e., foodstuffs, forage, fuel, etc., and is responsible for the following Services —Transportation, Movements, Quartering, Supply and Transport, Military I arms, Remounts, Veterinary, Garrison and Regimental Institutes Also for the purchase of grains and of minor supplies not provided in bulk by the authority responsible for production and provision

and provision

The Master General of Ordnance Branch controls the ordnance and clothing factories is concerned with the provision, inspection, maintenance and issue of equipment and ordnance stores, clothing, and necessaries and conducts all matter relating to contracts in respect of food-stuffs, &c., and supply in bulk of general stores and materials The Master General is also responsible for the designs

used in Europe, and which is | the Malay Archipelago have only employed by tailors and washermen, was not formerly known in India I am of the opinion that the true originals of istrika and istri are the Portuguese words esticar and estirar, which would have been used in the sense of 'running or passing the iron over' 1

Estivador (one employed in loading and unloading ships) Anglo-Ind stevedore

Estopa (oakum) L-Hindust istap, istúb -[Anglo-Ind istoop oakum " A marine term from Port estopa (Roebuck)]—A1 usthubba

Exemplo (example) Konk ezempl, vern term dekh-Tet, Gal ezémplu

Explicar (to explain) Konk esplikár-kaiunk, vein terms samzāvunk, durālunk, arthunk —Tet esplika, vern terms haklaken, kátak - Gal splika

F

Fadiga (used in the sense of 'gonorrhoea') Mal fadıga (Schuchardt) [The usual meaning of the Port word is 'toil, anguish of mind ']

Falca (side-boards of a ship which are removed to take in the cargo) L-Hindust jālká - Mal fālka (Marre)

Minia (The Sinhalese Hand Loot) admits the Fortuguese origin but d a not mention the source word

^{1 [&}quot;He then turned to me and said that he had nothing to say in reply to me, as those were all truths in our sacred Anzir (for so they name our blessed Gospel)" Travels of Fray Sebartien Manrique (1629-1643), Hak Soc, Vol II, 112 See also idem, Vol I, pp 37 and 101]

inspection and supply of suns, carriages table smallarms, machine guns, annunition chemical warfare appliances, etc. He also deals with questions regarding patents, royalties and inventions

There are other branches of Army Headquarters administered by officers who are not classified as Principal Staff Officers, but are not directly subordinate to any of the four Principal Staff Officers

These are

(1) The Military Secretary, usually a Major-General, who deals with the appointment promotion and retirement of officers holding the King's Commission, the selection of officers for staff appointments, and the appointment of officers to the Army in India Reserve of Officers. He is also the Secretary of the Selection Board

(2) The Engineer in-Chief, also a Major-General and head of the Corps of Royal Engineers He is responsible for Lugineer operain India in India He is responsible for Engineer opera-tions and Engineer Services during war and peace, the preparedness for war of the En-gineering services The supply of Engineer stores during war and peace. The construction and maintenance of all military works and the constructional efficiency, accuracy and economy of all projects and designs

In addition to the above, the Army Head-quarters staff includes certain technical advisors, viz, the Major-General, Cavalry, the Major-General, Royal Artillery, the Brigadler, Royal Engineers, the Signal Officer in Chief, the Adviser and Secretary Board of Examiners and the Inspector of Physical Training

Regular British Forces in India

The British cavairy and British infantry units of the army in India are units of the British service No individual British service unit is located permanently in India Units of the British Army are detailed for a tour of foreign service, of which the major part is as a rule spent in India In the case of British infantry battalions the system is that one battalion of a regiment is normally on home service while the other is overseas In the case of British cavalry the same arrangement cannot be applied,

as one unit only comprises the regiment

In Great Britain, in peace time, units
are maintained at an establishment smaller than that required for war In India, the peace establishments exceed the war establishments in view of the fact that reserves of British personnel do not exist, and reinforcements must be obtained from Great Britain

British Cavalry —There are 5 British cavalry regiments in India The establishment of a British cavalry regiment is 27 officers and 571 other ranks

British Infantry —The present number of British Infantry battalions in India is 45, each with an establishment of 28 officers and 882 other ranks

In 1921, an important change was made in the composition of a British infantry battalion in India by the inclusion of a proportion of Indian combatant ranks Battalions had always maintained a quota of Indian followers, but up to 1921 the combatant personnel was entirely British In 1921, on the abolition of the Machine Gun Corps, eight machine guns were meluded in the equipment of a British infantry This number was increased to twelve battalion in 1927 The peace establishment of Indian combatant personnel is fixed at one Indian officer and 230 Indian other ranks The Indian platoon, as it is called, is transferred en bloc to another British battalion when the battalion to which it was originally attached proceeds on relief out of India

Roval Artillery -Indians are employed as drivers and artificers in the Royal Horse Artillery and in field and medium batteries, as drivers, gunners and artificers in mountain batterics, and as gunners in heavy batterics

The peace organisation of the artillery at the present day is as follows

Royal Horse Artillery -- Comprises four independent batteries Each battery is armed with six 13-pounder guns

Field (Higher and Lower Establishment) Brigades -Six brigades on the higher establishment, each consisting of headquarters and four batteries Three brigades on the lower establishment, each consisting of headquarters and four batteries All brigades excepting the mechanised one consist of two batteries, each armed with six 18 pounder guns, and two batteries each with six 45" howitzers or three batteries, each armed with six 18 pounder guns, and one battery with six 45" howitzers. The mechanised brigade consists of two batteries armed with six 18-pounder guns, and two batteries armed with six 45" howitzers

Field (Reinforcement) Brigade -The reinforce ment brigade consists of two double batteries, each armed with six 18-pounder guns, and two 4 5" howitzers

The 1st Field Brigade and 2nd Divisional Ammunition Column, Royal Artillery are mechanised Other Royal Artillery units will be mechanised mechanised in due course

Ammunition Columns —Two Divisional ammunition columns are maintained for the artillery of the first and second divisions, and one field ammunition column for the covering force brigade on the frontier These are all mechanised

Indian Mountain Brigades -Six brigades, cach consisting of headquarters, one British light and three Indian mountain batteries, also one unbrigaded mountain battery and one mounone unprigated mountain pattery and one mountain Artillery Section for Chitral All batteries are armed, with four 3 7" howitzers The armaments of the Frontier posts at Kohat Fort Lockhart, Idak, Wana Thal, Chaman, Hindubagh, Malakand Landi Kotal, Shagai Chakdara and Fort Sandeman are also manned by personnel of Indian Mountain Brigades P. A. by personnel of Indian Mountain Brigades R A

Medium Brigades -Two brigades, each consisting of one horsedrawn and three tractor drawn batteries Three batteries in each brigade, are armed with 6' howitzers, and one battery with 60-pounder guns

Heavy Brigade —Headquarters and one battery at Bombay, and one battery at Karachi
Anti-Aircraft—One battery, located at
Bombay This is armed with eight 3 inch, 20 cwt guns

is a superior landholder under the Portuguese government. He paid a small quit-rent, and levied from the cultivators a fixed proportion of the produce"]

Fé (faith) Konk phébhāi áith (us among the Christians) Bhāváith is the vernacular synonym for 'faith'— Gal fé

Fechar (in the sense of 'to solder') Mal pijar —Batt pijar —Mac pijarā, pijā —Bug pija

Fecho (the bolt of a rifle)
Mal pichu —Batt péchu

Feira (a fair) Konk phêi, vern terms sánt, penth —Tet, Gal feiia, vern term bázar

[&]quot;Discharging some shots and many foguetes" Gaspar Correia, I, p 165

[&]quot;He ordered the governor to make a signal to the armada by discharging three foguetes" Diogo do Couto, Dec VI, 11, 1

very briefly [Whitworth describes Foras as the name of the tenure on which the lands reclaimed from the sea. or inter-insular channels about the island of Bombay, used to be held before the settlement made by Act No VI of 1851 These lands were reclaimed chiefly by the erection vellaids (see valado). being originally very salt, they were let out at very low ients to induce people to cultivate In process of time they improved and became valuable, and it was a question much discussed in 1844 whether the foras quit-rent could be raised For the way this decided, see question WAS. Hobson-Jobson Forass 27 Lands

That philology and the correct derivation of words are not without their influence on legislation is seen in the man-

ner in which this Port term toro was derived and interpreted by an emment junist like Sir Michael Westropp, a Chief Justice of Bombay, - an interpretation vitiated by the learned judge's ignorance of Portuguese language: the "Foras is derived from the Portuguese word fora, (Latin foras, from foris, a door) signifying outside It here indicates the rent or revenue derived from outlying lands The whole island of Bombayfell under that denomination when under Portuguese rule, being then a mere outlying dependency of Bassein Subsequently the term foras was, for the most part, though perhaps not quite exclusively, limited to the new salt batty ground claimed from the sea, or other waste ground lying outside the fort, native town, and other the more ancient settled and cultivated grounds ın ısland, oı to the quit-rent arising from that new salt batty ground and outlying ground The quit-rent in Governor Aungier's convention called foras also bore the still older name of pensio (pensão, pen-

charge may not light on the Comp^a only, it seems reasonable that a Gen^{li} tax or assessment be enordered on the respective Inhabitants over and above the present fore, with is only a lind of quit rent and very inconsiderable. Forcest Selections, Home Series Vol. I, p. 51.]

Terms of service in the Indian army are

Cavairy, 7 years' service in army and 8 years

in the reserve

ŧ

E

になる

Artillery, 7 years' service in army and 8 in the reserve for gunners and drivers (horse), drivers (mechanical transport) 6 years in army and 9 years in the reserve, and 4 years' service in army for Heavy Artillery personnel

8. & M Corps, 7 years' service in army and

8 in the reserve

Indian Signal Corps, 7 years' service in army

and 8 in the reserve

Infantry and Pioneers (except Gurkhas, the 4th Hazara Pioneers and trans-frontier personnel of the Infantry other than Orakzale), 7 Pears in army service and 8 years in the reserve

Gurkhas, Hazara Pioncers and trans-frontier personnel of infantry, & years' service in army In line combitant per ontel of British infan-

Indian Military establishments of the Indian Army Ordinance Corps, 43 cars's rvice in the army.

Animal transport per onnel of the Indian Arms Service Corp., drivers of mechanical framejori and all combatants of the Arms Veterinary Corp. to years' service in army and a in the receive

All combitants in the Works Corps, 2 years, service in arms

Bandsmen, musicians trumpeters, drummers, bugler, fifere and pipers, 10 years' service in army

I xcept in the case of those enrolled in the Works and of those who are non-combatants, all school masters, clerks, artificers, armourers engine drivers fartiers, curpenters, tailors and bootmalers, 10 years service in army

The period laid down for service in the army is the minimum and may be extended tombatauts may be enrolled direct into the Reserve, in which case there is no minimum period of service, but no one is allowed to serve in the reserve or in any class of the reserve for a longer period than is permitted by the regulations in force

Frontier Militin and Levy Corps—These forces are Civil' troops, i.e., they are administered and pidd by the Civil authorities and not by the Army They are, however, officered by Officers of the Regular Indian Army These forces were raised for duty on the North West Frontier and at present consist of the following—Kurram Militia, Tochi Scouts, South Wariristan Scouts, Chitral Scouts, Glight Scouts, Thob militia and the Melran Levy Corp

The Auxiliary Force

After the war, the question of universal training for Luropean British subjects came up for consideration, and it was decided that in India, as elsewhere in the Lupire, the adoption of compulsory military service would be undesirable. It was recognised, however, that India needed some adequate auxiliary force, if only on a voluntary basis, that could be trained to a fairly definite standard of efficiency, and in the result, an Act to constitute an Auxiliary Force for service in India was passed in 1920. Under this Act membership is limited to Luropean British subjects, and the liability of members for training and service is clearly defined. Military training is graduated according to age, the more extended training being carried out by the younger members, the older members being obliged to fire a musketry course only. It was laid down that military service should be purely local. As the form of service that would be most suitable varies largely according to localities, the local military authorities, acting in consultation with the advisory committee of the Auxiliary Force area, were given the power of adjusting the form of training to suit local conditions.

The Auxiliary Force comprises all branches of the service, cavalry, artillery, engineers, infantry—in which are included railway bat-

Bombay, as a mere outlying dependency of Bassein the fact generally known that tóro was imposed both on the inlying as well as on the outlying ground, and that it was not limited to Bombay but was indifferently applied to Bassein, to Sálsette and to all other parts of that province, ought to have convinced him of the feebleness of his hypothesis " A male tenant who paid the quit-rent was spoken of as the foreiro, a female tenant as the foreira of the estate, thus, in 1727, D Senhorinha de Souza e Tavora was the foreira of the village of Mazagon, and, in 1731 upon her demise, her grandson Martinho da Silveira de Menezes was entered in the records as the foreiro of the said village

Another term intimately connected with foro and frequently met with in a study of the old land tenures of Bombay is aforamento, which originally denoted the contract by which the grantor made a grant of a holding or estate to be held in possession and enjoyed by the grantee, either in perpetuity or for a specified

period upon his paving a certain annual foro or quit-rent In course of time the term came to denote the holding itself rather than the contract of the lease

Forrar (to line, to cover)
Konk phoriar-Larunk —LHindust phaial (larná), to
cover the cable —Tet fóra

Fôrro (subst, lining)
Konk phorr—Guj phór—
Sinh pôru Pôru redda, cloth
used for lining

Forte (adj, strong) Konk. phoit, vern terms bali, shatt, nibar—Tet, Gal forts, vern. term rosal

Fortuna (fortune) Konk phurtún, vern terms nasib, laktó—Tet, Gal furtuna

Fraco (adj, weak) Konk
phrák, pharák, vern terms
asakt or askat—Tet fráku,
vern term mámal—Gal fraku

In Konkani, from phrák are derived pharkatáy or pharkajáy, 'weakness Fraquez (from Poit fraqueza, 'weakness') is also used in the same sense

Frade (a friar) Konk phrád, pharád —Tet frád:

In Konkanı, pharád, as a substantive feminine, denotes

The authorized and actual strength of the 1931 Indian State Forces on the 1st July amounted to-

	Authorized strength	Actual strength

Grand total	43,084	37,681

Officers.

There are two main categories of officers in the Indian Army, those holding the King's Commission and those holding the Viceroy's Commission The latter are all Indians, apart from the Gurkha officers of Gurkha battalions, and have a limited status and power of com-mand, both of which are regulated by the Indian Army Act and the rules made thereunder Until recent years Indians were not eligible for King's Commissions, but a limited number can now obtain such commissions, on entry into the Indian Army through the Royal Military College, Sandhurst and the Royal Military

Academy, Woolwich
King's Commissioned officers for the Indian
Army are obtained from two main sources from among the cadets who pass through the Royal Military College, Sandhurst, and by the transfer to the Indian Army of officers belonging to British units The former is the principal channel of recruitment, the latter being only resorted to when, owing to abnormal wastage or for some other special reason, requirements cannot be completed by means of cadets from Sandhurt A third source is the principal. Sandhurst A third source is from among University candidates When a cadet has qualified at Sandhurst and has received his commission, he becomes, in the first instance, an officer of the Unattached List, and is posted for a period of one year to a British battalion or regiment in India, where he receives a preliminary training in his military duties At the end of the year, he is posted as a squadron or company officer to a regiment or battallon of the Indian Army Administrative services and departments of the army draw their officers from combatant units, as it has hitherto been regarded as essential that every officer should, in the first instance, receive a thorough grounding in combatant duties, and acquire at first hand an intimate knowledge of the regular marks of the combatant knowledge of the requirements of the combatant arms

The promotion in rank of King's commissioned officers of the Indian Army is regulated by a time-scale up to the rank of Lieutenant-Colonel but is subject also to certain professional raminations and tests being successfully passed The rank of Lieutenant-Colonel is in normal course attained at 26 years' service, promotion beyond this rank is determined by

selection

Officers -One of the momentous decisions of the Great War, so far as the Indian Army is concerned, was that which rendered Indians eligible to hold the King's commission in the army King's commissions are obtainable by Indian gentlemen in three ways (1) By qualifying as a cadet through the Royal Military College, Sandhurst or the Royal Military Academy, Woolwich Examinations are held twice a year in India for the selection of suitable candidates for admission (2) By selection of specially capable and deserving Indian officers or non-commissioned officers of Indian regiments promoted from the ranks or those appointed direct as jemadar These receive their commissions after training at the Royal Military College or Academy as Cadets and qualifying in the usual way (3) By the bestowal of honorary King's commissions on Indian officers who have rendered distinguished service, but whose age and lack of education preclude their being granted the full King s com-mission The first two avenues of selection mentioned afford full opportunity to the Indian of satisfying a military ambition and of enjoying a military career on terms of absolute equality with the British officer, who, as a general rule, also enters the army by qualifying at Sandhurst or Woolwich Ten vacancies at Sandhurst and three at Woolwich are reserved annually for Indian cadets

A further measure adopted by the Government was the establishment of the Prince of Wales' Royal Indian Military College at Dehra Dun, a Government institution for the preli minary education of Indians who desire to qualify for the King's commission in the army through the Royal Military College, Sandhurst or the Royal Military Academy, Woolwich The arrangements so far made enable a maximum of 70 boys to be in residence at the college at any one time, and the normal course of education is planned to occupy six years In February 1923, it was decided that eight units of the Indian Army should be completely Indianized The units selected for Indianization were 7th Light Cavalry, 16th Light Cavalry 2nd Bn. Madras Pioneers, 4/19th Hyderabad Regiment, 5th Royal Battallon, 5th Mahratta Light Infantry, 1/7th Rajput Regiment (Q V O L I), 1/14th Punjab Regiment, 2/1st Puniab Regiment

Training Institutions.

The following institutions exist in India for the higher training of military personnel and for the education of instructors for units —

Staff College, Quetta Senior Officers School, Belgaum School of Artillery, Kakul

Equitation School, Saugor Small Arms Schools: (India), at Pachmarki and Ahmednagar

Army School of Physical Training, Ambala Army Signal School, Poona Royal Tank Corps School, Ahmednagar

Royal Tank Corps School, Antiednagar Army School of Education, Belgaum Army School of Cookery, Poona Army Veterinary Schools, Ambala and Poona Indian Army Service Corps Training Establishment, Rawalpindi Indian Army Ordnauce Corps School of

Instruction, Kirlee

Funil (a funnel) Konk phunel, vern term turbāní (l us) —L-Hindust phannel, fannel —Beng. phunnel — Sinh punílaya, vern term læniya —Kan phannále, vern term lálike —Tet, Gal funíl, vern term lalún mátan

Fusta (a foist, a pinnace) Mal fusta ¹

[The English 'foist' is not derived, as one might have supposed, from the Port word which one meets with so frequently in the Portuguese chroniclers, but, according to the OED, from OFr fuste adapted from the It fusta, fem, originally a log, piece of timber, from Lat fustis, 'a cudgel' The earliest mention of the word is by Carton in Paris and Venus (1485)]

? Fuzil (a steel with which to strike fire) Mal, Ach, Batt, Sund, Low-Jav, Mad, Bal bedíl—Day badil—Mac bádili—Bug bálili

Dr Heyligers says that the interchange of e and u is frequent, and that f changing into p, the latter would easily be transformed into b, resulting in the form bezil or besil, the corruption of which would be bedil

THE EAST INDIES SQUADRON.

known as the Last Indies Squadron, has been maintained in Indian waters. It has naturally varied in strength from time to time, and of late years in particular there have been several changes in its composition, the most recent being in the direction of strengthening it, owing to the disappearance of strength in the other squedroms of the Fastern Fleet. In 1903, the causalon consisted of one second 1903 the squadron consisted of one second class and three smaller cruisers and four sloops or cumbonts in 1906, when the policy of withdrawal from Eastern waters was inaugurated, it consisted of two second class and two third class cruisers, and remained at this strength until 1910 when one second class "Hastings," "Fower," "Shore Ram and trength until 1910 when one second class "Bideford," Special Service vessel "Triad" (Senior Naval Officer, Persian Gulf) Survey substituted and three cruisers were lent from Ship "Ormonde"

Since 1903 a squadron of the Royal Navy, the Mediterranean to assist in the suppression of the arms traffic in the Gulf By 1913 the position of the East Indies squadron had considerably improved. The battleship Swift sure had talen the place of the second class. cruiser which had been flagship, and a modern second class cruiser replaced the Perseus

> The Squadron in 1931 -- The composition of the Squadron (Fourth Cruiser Squadron) is as follows -

"Effingham" (Flag), Cruiser 9,770 tons, "Lmerald," Cruiser, 7,550 tons, "Enterprise," Cruiser 7,550 Sloops "Folkestone," "Hastings," "Fower," "Shore Ram and "Bideford," Special Service vessel "Triad"

The proportion of contributions from the overseas Dominions towards naval expenditure is shown in the following table issued with the last Navy Estimates that gave details -

Received from	Nature of Service	Total
	Maintenance of His Majesty's Ships in Indian Waters	£ 100,000
India {	Indian Troop Service (on account of work performed by the Admiralty) Repayment on account of services rendered by His Ma-	3,400
Į	festy's Ships engaged in the suppression of the Arms Traffic in the Persian Gulf	64,000
Australian Common- wealth Dominion of Cunada	Contributions on account of liability for Retired Pay of Officers and Pensions of Men lent from the Royal Navy	10,800
	Survey of the N W Coast of Australia Maintenance of an Australasian Squadron and of a branch	7,500
	of the Royal Navy Reserve Mointenance of an Australasian Squadron and of the Im	41,600
	penai Navy generally, also of a branch of the Royal Naval Reserve	100,000
Union of South Africa Newfoundland	Geze al maintenance of the Navy Maintenance of a branch of the Royal Naval Reserve	85,000 3,000
	Total .	415,800

India's Marine Expenditure

Since 1869 India has paid a contribution of varying amounts to the Imperial Government in consideration of services performed by the Royal Navy Under existing arrangements which date from 1396-7, the subsidy of £100,000 a year is paid for the upkeep of certain ships of the East India Squadron, which may not be employed beyond prescribed limits, except with the consent of the Government of India The expenditure amounts to nearly £400,000 annually

The question of a new distribution of the burden of the cost of Imperial Naval defence was discussed at the Imperial Conference in London in October—November 1926 The matter appeared to be one on which the delegates could form no new decision without further consultations in their respective capitals and no resolution was passed

The Royal Indian Marine has been reorganised so as to form the nucleus of an Indian Navy The R I M Ship "Dalhousie" has been reconditioned for use as a Depot Ship Three of the R I M Ships have been reconditioned for use as sloops of war in the P I M A fourth sloop for the re organised service is under construction in England

—Tet jentiu —Gal. jentiu, sentiu

The word 'gentoo' is used at the present time only in Madras of the Telugu-speaking Hindus, and of their language But formerly it had a very wide meaning, the first digest of Indian legislation, which was compiled under the orders of Warren Hastings and published in 1773, has the title A Code of Gentoo Law

[According to Yule, the reason why the term became thus specifically applied to the Telugu people is probably because, when the Portuguese arrived, the Telugu monarchy of Vijayanagara was dominant over a great part of the Peninsula The officials were chiefly of Telugu race, and thus the people of this race, as the most important section of the Hindus, were par excellence the 'Gentiles' and their language the 'Gentile language' appears to be a very plausible view, because of the intimate political and commercial relations that existed between the Portuguese in Goa and the Vijayanagar sovereigns

Yule is led to believe that

the English form 'Gentoo' did not come into general use till late in the 17th century, whilst Longworth Dames (Intro Duarte Barbosa, p Ixii) is of the opinion that in the 18th century 'Gentoo' was limited in its meaning to some of the lower castes in South India

From gentio, the Portuguese formed gentilico¹ (subst masc) with the meaning 'language of the Hindus' The word is used in the phrase em gentilico ('in the Hindu or vernaculai language')]

Geração (generation) Konk jerasámv, vern terms pīndhá, pilgí—Tet, Gal jerasã.

Gergelim (the seed of Sesamum indicum) Mar, Hindust jinjali (trade name, according to Hobson-Jobson), vern terms til, til—Anglo-Ind gingeli, gingelly 2

The word is of Arabic origin

^{1 [&}quot;I had some notices published in Gentilico" Apud Julio Biker, Collecção de Tratados, viii, p 174, in Glossario]

² "They make much use of gergelin oil" Duarte Barbosa [Hak Soc, ed L Dames, Vol 1 p 13]

[&]quot;Full of rice, oil, and jerzilim"
Bocarro, Dec XIII, p 478

they introduced it into India, and just as subsequently the word banana made its way into India, so likewise did goraba or gorang But have banana and goraba, as a matter of fact, been introduced from Portuguese into Anglo-India and appears Indo-French? It that the Tamil goyá and the Telugu qovā are for 'Goa' [An exact parallel of the Tam and Tel names is found in one of the Bengali names of the fruit góaāchiphal, which obviously means 'fruit from Goa'] See pera and banana 1

[The guava tree is a native of South America now naturalised and largely cultivated throughout India It was, in all probability, introduced into

this country by the Portuguese 1

Gola (collar of a coat). Konk $g \acute{o} l$, vern term $g a l \acute{o}$ — Tam g o l l a

Goma (gum) Konk góm, vern terms bôl, chík—Tet goma—Jap gomu (perhaps from English) Arabíya gomu, gum Arabic

Gorgoleta ("an earthen and narrow-mouthed vessel, out of which the water runs and gurgles") Konk gurgulét, vern term kuzó—Sinh guruléttuva—Anglo-Ind goglet, guglet—Mal gargalét bargalét—Mac Bug guléta—Tet gorgoleta, gargó, vern term dardón—Gal gorgoleta 1

[The Portuguese word is itself derived from goija, an archaic term, meaning 'throat' and the pitcher perhaps gets its name from the gurgling sound made in the throat when the water poured out of it into the mouth is drunk, as Indians do, without touching the spout with their lips Linschoten (Hak Soc, Vol I, p. 207) and

¹ Some of the Indian languages give the guava the name 'jambo'

[[]The Port form goiaba is derived from quayaba by which name the fruit was known in Brazil and from where it was introduced into India. The name pera ('pear'), which the Portuguese first gave it because of its resemblance to that fruit, has its counterpart in the Hindustani name for the guava āmrūd (Pers), which means a pear' In Gujarat the fruit is also called jam, and jāmrūd, the latter, perhaps, a combination of jam and amrūl]

^{1 &}quot;Because we threw among them many pots and gorgoletas containing powder" João Ribeiro Fatalidade historica, Bk II, ch 25

Agriculture.

As crops depend on the existence of plant ; food and moreture in the soil, so the character of the agriculture of a country depends largely on its soil and climate. It is true that geographical situation, the character of the people and other considerations have their influence which is not inconsiderable, but the limitations imposed by the nature of the soil and above all by the climate tend to the production of a certain class of agriculture under a certain given set of conditions

The climate of India, while varying to some extent in degree, in most respects is remarkably similar in character throughout the coun-The main factors in common are the monsoon, the dry winter and early summer months, and the intense heat from March till October. There have the effect of dividing the vear into two agricultural sensons, the Kharif or Monsoon and the Rabi or Winter Season each bearing its own distinctive crops Between early June and October abundant rains fall over the greater part of the continent while the winter months are generally dry, although North-West-ern India benefits from showers in December and Tanuary The south of the Peninsula, and especially the Madras Presidency, however, is more truly tropical especially in the south, and depends mainly on the N E monsoon, here the two crop seasons can hardly be said to exist The distribution of the rainfall throughout the year, which is of considerable importance to agriculture, is none too favourable, but is not quite so bad as is often represented. The rainfall is greatest at what would otherwise be the hottest time of the year, viz, mid-summer, and when it is most needed It should be remembered that in a hot country intermittent showers are practically valueless as evaporation is very rapid Heavy rainfall concentrated in a limited period, though it has its drawbacks and demands a special system of agriculture, has many advantages in hot countries

Soils —Four main soil types can be recognised in India, 112, (1) the Red soils derived from rocks of the Archean system which characterise Madras, Mysore and the South-East of Bombry and extend through the Last of Hyderabad and the Central Provinces to Orissa, Chota Nagpur and the South of Bengal (2) The black cotton or regur soils over lie the Decean trap and cover the greater part of Bombay, Berar and the Western parts of the Central Provinces and Hyderabad with extensions into Central India and Bundel-The Madras regur solls though typical are also important (3) The great alluvial plains, agriculturally the most important tract in India as well as the most extensive, mainly the Indo Gangetic Plain embracing Sind, northern Rajputana, most of the Punjab, the plains of the United Provinces, most of Bihar and Bengal and half of Assam (4) The The laterite soils which form a belt round the Peninsula and extend through East into Assam and Burmah Bengal

The great alluvial plains are characterised by

are few soils in the world more suited to intensive agriculture so long as the water supply is assured The other soils are less tractable and call for greater skill in management and are less adapted to small holdings, of these the regur soils are the most valuable

Agricu tural Capital and Equipment — India is accountry of small holdings and the commonest type is that which can be cultivated with one pair of bullocks under local conditions Large holdings are practically unknown, and are mainly confined to the planting industries Farming is carried on with a minimum of capital, there being practically no outlay on fencing buildings, or implements. Many causes militate against the accumulation of capital and agricultural indebtedness is heavy and the interest on loans high Great progress has been made by the co-operative credit movement during the last twenty years. There are now 73,000 Agricultural Control of the control of the co-operative credit movement during the last twenty years. tural Credit Societies in British India with some 2,400,000 members and a working capital these societies brought cheaper credit to the cultivator but they have striven to inculcate the lesson that cheap credit is only valuable if applied to productive purposes and have encouraged thrift

Equipment —Practically all cultivation is done by bullocks and the capacity of these as draught animals varies from district to district as well is depending on the cultivator's individual circumstances The best types in common use are capable of handling what would be considered as light single horse implements in Europe In those tracts where irrigation is from wells, bullocks are also used for drawing water, they also drive the sugarcane crusher and tread out His implements being the grain at harvest few, a cultivator's bullocks form by far the most important item of his movable property

implements are made of wood although ploughs are usually tipped with iron points, and there is a great similarity in their shape and general design The introduction of Iron ploughs has made much progress in the last few years and many hundred thousands are now in use levelling beam is used throughout the greater part of the country in preference to the harrow and roller, and throughout No-thern India the plough and the levelling beam are the only im-

plements possessed by the ordinary cultivator On black cotton soils the commonest im plement is the bakhar, a simple form of broad shape plough Seed drills and drill hoes are in use in parts of Bombay and Madras but throughout the greater part of the country the seed is either broadcasted or ploughed in Hand implements consist of various sizes of hoes, the best known of which are the *lodal* or spade with a blade set at an angle towards the labourer who does not use his feet in digging, and the *khurpi* or small hand hoe of harvesting machinery there is none, grain is separated either by treading out with ore is separated either by treading out with oxen or beating out by hand, and winnowing by the agency of the wind Simple reapers and winnowers are slowly coming into use in the wheat tracts. The larger iron ploughs are now a familiar sight in certain black soil areas and the ease of cultivation and rapid response to irrigation and manuring, broadly speaking there use of other improved implements is growing

Granada ('grenade, bomb') garnál, garnêl - Mar, gar nál — Tul aar-Hindust nalu 1

? Granadeiro (grenadier) garandil — Tel gar-Hindust andilu 2

? Grande (big) Pid-Engl galantı, ka-lan-tı

It appears more probable that the source is Portuguese nather than English (from 'grand') The change from rto l and from d to t is normal

Grão (grain) Konk grámy (weight) -Anglo-Ind the chick-pea, Cicer arietinum, Linn

"This word (gram) properly the Portuguese grão, ie 'giain', but it has been specially appropriated to that kind of vetch (Cicer arietinum, L) which is the most general grain- (rather pulse-) food of horses all over India, called ın Hındustanı chanā " son-Jobson The Portuguese formerly called the above vetch grão de cavalo ('vetch for horses') and not merely grão, it is smaller than the kınd grown in the Iberic Peninsula At the time when the Portuguese took Goa they found that mungo, the Hindust mung (Phaseolus mungo), was used there as horse-feed 1

Graxa (blacking for boots) Konk gras —Tet gracha

Grosso (big, thick) Mal grosso, dense, thick (Haex)

Grude (glue) Konk gurûd, terms pánk, chikatvan. vern Lhal —Tet grúdi, vern terms reten, dámer

Konk Guarda (guard) guvárd - Mar gārdí, gāddí Gārdāi, "insuriectionary tufoot-soldiers, multamongst and hence tumult. fusion, uproar, more generally " (Molesworth) —Gu] gārdi, gaddi — Hindust qārad —Khas garod, karod —

^{1 &}quot;For only in this (company of grenadiers) consists our defence, and in the awe they inspire in them, the dread these barbarians have of the granadas being something evtraordinary" (1728) O Chronistade Tissuary, I, p 52

^{2 &}quot;But, more than in any other part, in this province (of Bassein and Damaun) there is the need of a company of granadeiros, which ought never to withdraw from here except in case of necessity " Ibid

^{&#}x27; ["These serais are generally noble monuments of individual bounty, and mi erim ancient times liberally endowed and furnished supplies of grim, mill the traveller" to Heber, Narratue, (1828), p. 303]

Whent—Whent is grown widely throughous fortiers India as a winter crop, the United Northern India as a winter crop, the United Proviners and the Punish supplying about two thirds of the total area, and probably two thirds of the total outturn in India. The majority of the varieties grown belong to the species Triffcoun tilgare indian wheats the species white, red and amber coloured are generally white, red and are fort from a comerce of the species white, red and fort from a commercial point of view As reen in local markets and are mostly classed as following markets and are mostly classed as following markets. Indian wheats frequently contain appreciable quantities of other grains and even of extraneous matter due to the method of threshing emitter due to export is well cleaned and played. Wheat for export is well cleaned and there has been great improvement in this result of recent years stock of the Indian pert of recent years wheats but, there are some wheats are soft seent wheats but, there are there has been great improvement in this respect of the Indian foot of the Indian foot of recent years wheats but there are some wheats are rost weak wheats amongst them

indicus), gram (Ciert arietinum), various species indicus), gram (Ciert arietinum), various species indicus), gram (Ciert arietinum), various species indicus), gram (Ciert arietinum), various species indicus), gram (Ciert arietinum), various species indicus), gram (Ciert arietinum), various species indicus in of Phaseous and Pistm Reference of modern made to Groundants which though of modern tetroduction non forms on important learning. inned to Groundnuts which though of modern forms an important leguminous introduction now forms an important leguminous and seed crop in Madras and Bombay, and to oll seed crop in other provinces and an important article of export

Wilkinson, | disseminated by Portuguese Yule and the Burnell, however, say that the word appears to have come primarily from the South of India, where in Telugu gidangi, in Tamil lidangu, signify 'a place where goods lie,' from hidu, 'to lie' It appears in Sinhalese also as qudāma is a fact that many common Malay and Javanese words are Tamil, or only to be explained by Tamil Free intercourse between the Coromandel Coast and the Archipelago is very ancient. and when the Portuguese first appeared at they found Malacca numerous settlers from S India

Guisado (subst, ragout, stew) Konk gizád, vein teims pakvan —Tet gizádu

Guitarra (guitar) Konk quár, vein term vīnó—Sinh kuttárama—Mal getéra Also found in the same form in the Port dialect of Malacca—Ar quán

The original of the Arabic word is by some referred to Greek

Guloso (gourmand) Mal

H

Hábita. See ábita

Hábito (in the meaning of 'habit of a monk, soutane')
Beng ābdú (us among the Christians) —Jap abito (obs)

Harpa (harp) Konk árp—Bug arapa, which Matthes derives from the Dutch harp

Harmónio (harmonium) Konk, Tet *ārmónyu*

Herdar (to inherit) Konk ei dár-kai unk — Tet éi da, vern term hétan

Hissope (hyssop) Konk 1869 --Beng 1809a -- Sinh hisop (perhaps from English) --Tam 1809e1

The immediate source-word is the Malavalam chakkarā (cf jaca=chakka), which is connected with the Sanskrit saikarā through the intervention of the Neo-Arvan forms sākai, sākai, sākai Refined sugai goes by the name of panchasáia in Malayalam

[The quotations above from Fitch and Terry will show what confused notions they had about 'jagri' and the way it was prepared]

Jalapa (Jalap 100t) Konk zulab — Kan Tul juláby — Jap yarapa Perhaps imported directly from English in the last mentioned language

The word jalap comes from Xalapa a Mexican city

In the sense of evacuation of the bowels in general and of a purgative Mar, Guj, Beng julab—Hindust, Ar julab or jullab (Port julepo, julep)—Khas julap This is derived from the Pers gul'10se' and ab, 'water'

In Konkani, Kanarese, and Tulu there has probably been a shifting of meaning in consequence of the phonetic similarities of the two words Janela (window) Konk zanél, vern teim khidkí (l us Goa) —? Hindust mil - Beng jānālá, janālá yalangani —? jhirmiri - Sinh janélaya janéle, vern terms lavaluva, sīmedura Janēlatīraya, a windowcurtain, a window-blind Tain jānalá, jannal Jannal-pinnal, window-blind, (fig) confused, intricate —Malayal chenel, chenárel, janavätil, vern terms chálakam — Tel janalu - ? Anglo-Ind jillmill, Venetian shutters -Mal 7612 k janalá, jinelá, jandlith, jendéla, jindéla, vern tingkap -Sund jandéla - Sav jendélő, jindélő - Mad jindélô - Bal zendéla, gendéla -Bug jandéla -Tet Mac. janela, jinela -Gal janela

[With regard to the Anglo-Ind jill-mill, Yule also makes an alternative suggestion that it might be the Hindi jhilmilā which seems to mean 'sparking', and to have been applied to some kind of gauze Possibly this may have been used for blinds, and thence transferred to shutters This is also, according to Crooke, the view of Platts (A Dict of Urdū, Classical Hindī, and English)]

[·] Included under private canals

There is another word janjada [in Anglo-Ind jancada], of Malabar origin, which denotes a guide in the Nair country who escorted and guarded travellers from one place to another ¹ See under Naire

[This word too is from shangādam and its application to the Nair guides is derived from the ideal of the moral bond, close and indissoluble, between the guide and his employer]

Jantar (archaic form gentar, to dine) Mal sentar (Haex) — Tet jantar

Jaqueta (jacket) Konk

jālêt —L-Hindust jālet —

Jap jaletsu Hepburn mentions cholli as derived from
the English 'jacket' 2

Jarra (a jar) Konk jár,

vern terms barní, kundí — Tet jara, vern term tóos — Gal jara

Jaspe (jasper) Mal jaspe, jasbe

Dutch has jaspis

Jejuar (to fast) Konk jinvár (subst m), a fast Cf jogar, casar, pintar, pagar The vern terms are upás (starvation), ekbhakt (ecclesiastical fast) Jinvár dhaiunk, to fast

The nasal of $jinv\acute{a}r$ is due to the Goa-Portuguese word jenjuai The eafter j becomes sometimes softened into i Cf gentio The second j was absorbed by the nasal and was the cause of the u being changed into the consonant v

Jejum (a fast) Tet jinjum, dindum —Gal jinjum, jijum, to fast —Jap jejun (arch)

Jibão (doublet, a kind of waistcoat) Konk zubámv, vern terms jhubó, dagló—
² Bug júmba—Jap jiban, | juban, 'shirt' | 1

^{1 &}quot;A stranger requiring help in going from one part to another against robbers or highway men, when he comes across a Nair asks him to be his jangada, and for this service he gives him some money and, taking him as his jangada, goes perfectly secure without anybody trout hing him" Diogo do Couto, Dec IV, vii, 14

[&]quot;Men with gilt halberds wearing jaquetas of black velvet" Gaspar Correin, I, p. 533

^{1 &}quot;They wear a gibão of coloured satin" Castanheda, I, 91

[&]quot;A jubão of rose coloured satin, very short, and lined with blue taffeta" Gaspar Correia, II, p. 371

[•] Iron under sugar-yielding plants other th † Revied to 238,000 Acres by the Director

Nala, one of the oldest and most beautiful in the Mahābhārata The Yazurveda ironically calls confirmed gamblers 'pillars of the gaming-house', sabhāsthanu Sir Arthur Macdonell observes that the principal social recreation of men in Vedic times, when they came together, was the game of dice which were made from the nuts of [the Vibhidaka tree] Terminalia bellerica moralists of that age held dice, wine, and wrath as the principal causes of sin Manu prohibits gaming, even as a pastime, and desires that the king should mete out to the gambler corporal punishment

Tt. probable that the Portuguese introduced new games, and that either they or their descendants popularised the game of dice which had fallen into disuse, thanks to civil and religious legislation The word dado (dice') has been adopted in Konkani, Sinhalese Malay, Javanese, and Sundanese 1

The Sansk dyuta could also

have been corrupted into júda or júdi Cf Konk uzó fire', from Prakrit vijju. Sansk vidyut, which also gave viz, 'lightning-bolt', in Marathi and Konkani. And Bisnágar or Bisnaga, of the old Portuguese chroniclers, is a corruption of Vijayanagara ('City of Victory') or of Vidyānagara ('City of Wisdom'), both names being applied to the capital of Narsinga

It appears that the Sinhalese súdu is in place of júdu in the other languages and is derived the Portuguese word The Malayal chúdu does not present great difficulty Cf chenel chenarel from Port janela ('a window'), side by side with janel Cf also the Port jaca from the Malayal chakkajagra, from Malayal chakkara, Sansk śar kar ā

| Joia (Jewel) Anglo-Ind

yoy "This seems from the
quotation to have been used
on the west coast for 'jewel'"

Hobson-Jobson |

The Port lacre and its other variants laca, and alacie is the lāksā or jāksā which Sansk became in Prakiit lakkha and in Hindi lākh from which the Anglo-Ind 'lac' is apparently No form with the 1, derived as there is in Portuguese, can be traced in any Indian language, and we must therefore conclude that the Portuguese form is directly responsible for the above English and Anglo-Indian words

Garcia da Orta (Col XXIX) was perhaps the first European who critically examined and described lac in India, and Watt (The Comm Prod of India, p 1054) says that he gives the properties and uses of both the dye and the resin in such detail that the passage may be quoted as from the pen of a 20th instead of 16th century writer]

Ladainha (litany) Konk ladin — Tet, Gal ladainha

Lagarto (alligator) Anglo Ind alligator — Mal lagárti 1 [The Port word, which is the same as the Spanish, is itself a corruption of the Lat lacerta, 'a lizard' The prefix al or, el bespeaks Spanish influence The early European writers, both Portuguese and English, used the terms 'alligator' and 'crocodile' promiscuously often, when they describe the alligator, they refer to it as being very much like the crocodile of the Nile]

(of Cananor) in some of the big rivers, very large lagartos which devour men" Duarte Barbosa, p 344 [Hak. Soc, Vol II, p 83 Longworth Dames translates lagartos as lizards (which is etymologically correct) but notes that the word refers to crocodiles For the various forms which this word took in the writings of the old chroniclers, see Hobson Jobson]

"All along this River there were a great many lagartos, which might more properly be called Serpents" Fernão Pinto, Peregrinação, ch xiv [in Cogan's tr 17]

"Very big largartos which in form and nature are just the crocodiles of the Nile" João de Barros, Dec I, III, S

"In which there are so many ingartos that, at times, they overturn little boats and get hold of the passengers" Gaspar Correia, II

["In this place I have seen very great aligartos (which we call n English crocodiles), seven yards long "Master Antonie Knivet, in Purchas, w 1228, cit in Hobson Jobson]

div to a Moorman that cuts all sorts of Stones, except Diamonds, with a certain Whiel made of Lacre" Ir er \(\Gamma^a\)' India, Hak Soc, Vol I p =84]

Persian lashkarí from lashkar, 'an army

[Yule remarks ' The word lascái or láscár (both these pronunciations are in vogue) appears to have been corrupted, through the Portuguese use of lashkarī in the forms lasquarin, either by the lascan, etc Portuguese themselves, or by the Dutch and English who took up the word from them and from these $lask\bar{a}r$ has passed back again into native use in this corrupt shape' The early Portuguese writers distinguished between lascar lascarimThe former they used in the sense of 'an Indian seaman marine' or perhaps, because the m Indian languages laskar used as a collective noun to denote 'the entire crew '1

The later they used in the sense of 'a land soldier', now designated by the term 'sepov' There is one other meaning given by them to lascar when the term is used with reference to Bengal, viz, that of 'a governor of a city' In this meaning there appears to be a latent suggestion that lascar or lascari is employed to denote 'the commander of an army', much in the same war as the Sansk senapati, which literally means 'lord of the army,' is used See Glossario

Lascar, and the soldiers Lascarits"

^{1 [&}quot;Within the gates he (the King of Bengal) employs eunuchs who in course of time come to occupy important positions and become gover nors of cities who in the language of the country are called lascares" Castanheda, IV, 37, cit in Glossario]

Nearly one eighth of the whole area irrigated in India from Government works is effected by minor works for which no capital account is kept

Growth of Irrigation—There has, during the last fifty years, been a steady growth in the area irrigated by Government irrigation works. From 103 million acres in 1878-79 the area annually irrigated to a to 104 million acres at the beginning of the century and to 28 million acres in 1910-20, the record year up to that date. This record was however again surpassed in the year 1929-30 when the total area irrigated by all classes of works in India excluding the Indian States amounted to 314 million acres.

The main increase has been in the class of productive works which irrigated 4½ million acres in 1878 79 and rose to 20 756,209 acres in 1926 27 During the year 1929 30 the areas irrigated by productive and unproductive works amounted to 23:05,675 acres and 4,491,677 acres respectively

The area irrigated in 1929 30 was largest in the Punjab, in which province 11,687,622 acres were irrigated during the year 1n addition about 1,212,000 acres were irrigated from channels which although drawing their supplies from British canals, lie wholly in the Indian States The Madras Presidency came next with an area of 7 million acres, followed by the United Provinces with nearly 4} million and Sind with 37 million acres

Capital and Revenue—The total capital invested in the works has risen from Rs 42,36, lakhs in 1900-01 to Rs 130 crores in 1929 30, As regards revenue, the Government irrigation works of India, taken as a whole, yield a return of nearly 51 per cent on the capital invested in them, this is a satisfactory result as Rs 44 crores of the total have been spent on unproductive works, most of which return less than 1 per cent. The capital outlay also includes expenditure on a number of large works under construction, which have not yet begun to earn revenue.

Charges for Water—The charges for water are levied in different ways in the various provinces In some, notably in Sind, the ordinary land revenue assessment includes also the charge for water, 9/10ths of this assessment being regarded as due to the canals. In others, as in parts of Madras and Bombay, different rates of land revenue are assessed according to whether the land is irrigated or not, and the assessment upon irrigated land includes also the charge for water. These methods may

however be regarded as exceptional Over the greater part of India water is paid for separately, the area actually irrigated is measured, and a rate is charged per acre according to the crop grown Lower rates are often levied in cases where irrigation is by "lift", that is to say where the land is too high for the water to flow on to it by gravity and consequently the cultivator has to lift it on to his field

Various other methods of assessment have been tried such as by renting outlets for an annual sum, or by charging according to the volume of the water used, but these have never been successful. The cultivator fully under stands the principle of "No crops, no charge" which is now followed as far as possible in canal administration, but has no confidence in a system under which his liability for water rate is independent of the area and quality of his crop

The rates charged vary considerably with the crop grown, and are different in each province and often upon the several canals in a single province. Thus in the Punjab, they vary from Rs 7-8-0 to Rs 12 per acre for sugarcane, from Rs 4 to Rs 7-8-0 per acre for rice, from Rs 3-4-0 to Rs 5-4-0 per acre for wheat, from Rs 2 to Rs 3-4-0 per acre for cotton and from Rs 2 to Rs 3-4-0 per acre for millets and pulses Chargo is made for additional waterings Practically speaking, Government guarantees sufficient water for the crop and gives it as available. If the crop fails to mature, or if its yield is much below normal, either the whole or part of the irrigation assessment is remitted

A somewhat different system, the long lease system, is in force in parts of Bengal and the Central Provinces under which the cultivators pay a small rate for a term of years whether they take water or not. In these provinces where the normal rainfall is fairly high, it is always a question whether irrigation will be necessary at all, and if the cultivators have to pay the full rate, they are apt to hold off until water becomes absolutely essential, and the sudden and universal demand then usually exceeds the supply By paying a reduced rate every year for a term of years they become entitled to water when required, consequently there is no temptation to wait till the last possible moment, and the demand is much more evenly distributed throughout the season

Taken as a whole, irrigation is offered on extremely easy terms, and the water rates represent only a very small proportion of the extra profit which the cultivator secures owing to the water he receives

Triennial Comparisons—The average area irrigated in British India by Government works of all classes during the triennium 1924 27 was nearly 28 million acres and this figure increased to very nearly 30 million acres during the triennium 1927 30

nīlam-vālá (Hindi, Hindust), nīlangar (Hindi), nīlám-karivālá (Beng), yālamgára, yálam-hākurara (Kan), an auctioneer Vālá (Hindi-Hindust) means 'agent, man of', and is equivalent to the Portuguese suffix-dor and —erro

Cândido de Figueiredo says that the origin of leilão is uncertain Brown gives as its probable derivation the

Arabic al-i'lam, "proclamation, advertisement, notice, placard", which, according to Belot, signifies "to stamp, to distinguish with a sign"

Auction-sales took place very largely among the Portuguese, when one of them died or was transferred from one place to another. The Dutch traveller Linschoten (1598) is a witness to the fact that even the effects of a Viceroy were disposed of by auction. There were in the city of Goa signboards with the following inscription "The auction-sale which is held every morning in the Rua Directa (The Straight Street) of Goa."

¹ This was also the case in the iollowing lembrar < nembrar, < Latin memorare

[[]Iembrar in Port, and memorare in Latin='to remember']

^{1 &}quot;Gil Fernandes de Carvalho received them and soon had them set up in the market place (of Cochin) where they hold leilões" ('auctions') Diogo do Couto, Dec VI, x, 9

[[]The following is the passage in Linschoten (Hak Soc, I, 184) referred to above, "In Goa there is holden a daylie assemblie, as well of the Citizens and Inhabitants, as of all nations throughout India, and of the countries bordering on the same, which is like the meeting upon the burse in Andwarpe, yet differeth much from that, for that hether in Goa there come as well Gentlemen, as marchants, and there are all kindes of Indian commodities to sell, so that in a

Unproductive Works —Turning now to the unproductive works, the areas irrigated in the various provinces during the triennium were as below —

Province	Average area irrigated in previous triennium 1921-27	Average area irrigated in triennium 1927-30
Madras	271,455	266,849
Bombay-Deccan	277,709	239,278
Sind	527,737	831,722
Bengal	7°,381	67,802
United Provinces	207,312	252,643
Punjab	213,613	424,756
Burma	268,110	539,253
Bihar and Orisea	889,733	004,303
Central Provinces	230,280	323,482
North-West Frontier Province	156,911	195,314
Rajputana	23,272	31,984
Baluchistan .	22,070	22,407
Total	3,191,588	4,109,793

Non-capital Works -The results obtained from the non-capital works are given below -

-	Provinces	Average area irrigated in pre- vious triennium 1924 27	Average area irri- gated in triennium 1927-30
Madras		3,174,731	3,189,303
Bombay-Deccan		157,025	164,833
Sind		87,279	86,351
Bengal		22,135	22,252
United Provinces		8,006	14,717
Punjab		349,768	Ntl
Burma		72,870	76,676
Blhar and Orissa		2,246	2,764
Central Provinces		45,689	45,067
	Total	3,919,749	3,601,963

Capital Outlay—The total capital outlay, direct and indirect, on irrigation and navigation works, including works under construction, amounted at the end of 1929 30 to Rs 130 crores The gross revenue for the year was Rs 12,94 lakis, and the working expenses Rs 5,86 lakis, the net return on capital was therefore 5 44 per cent Of the several provinces, the return on the capital outlay invested in productive works was highest in the Punjab, where the canals yielded 13 61 per cent

In Madras the percentage of return was 7 70 while in the United Provinces a return of 5 90 per cent was realised In considering these figures it must be remembered that the capital invested includes considerable expenditure upon three projects of the first magnitude viz, the Sarda Oudh canals, the Llovd Barrage project and the Cauvery (Mettur) project which were under construction and contributed little or nothing in the way of revenue

lisánv, vern terms páth, dhadá — Tet, Gal lisã; vern term hanánun

Licença (permission) Konk lisems, vern term rajá — Mal licensa (Haex) — Tet, Gal lisensa

Lima (bot, the fruit of the small Citrus medica) Anglo-Ind lime

[The Portuguese word is itself derived from the Ar lima Yule believes that 'lime' probably came into English from the Portuguese in India, but the OED says that the English word is an adaptation of Fr lime=modern Port limo. This is evidently a mistake, for limo in Port is a plant of the algae family which has no connection with that of the citius.]

Limão (bot, Citrus medica, Limonum,Hooker, lemon) Konk limbó, nimbó, nımbû - Mar limbû, nımbû límbu —Hındı lımbu. ทริbน์ —-Hındust līmú, lemú, nīmbú —Or lemu, nemu, nımu -Beng lebu —Ass nemú -Sindh līmô -Līmāí, limão (ad), that which has the colour of lemon -Punj nımbû —Tel nımma —Kan

Meteorological minuted duties the India Department was from time to time made responsible for various other important duties, Flich ne-

(1) Determination of time in India and the issue of time signals, also the determination of errors of chronometers for the Royal Indian Marine and the Royal Navy

(m) Observations and researches on terres trial magneti m at Rombay

(a) Regular study (mainly by spectroscopic examination) of the sun at the Solar Physics Ob exators at Kodail anal

(o) Maintenance of seismological instru

ments at various o ntres

Organisation prior to the demands of avia tion—It is necessary to note that practical inchorology implies a meteorological organisa tion, not merely individual meteorologists relying upon their own personal and purely local observations. The making of a single forecast in any of the larger meteorological offices of the world requires the organized cooperation of some bundreds of perions. In India some 250 observers comperate daily to take simultaneous ob cryations at about 200 separate places and hand in their reports to telegraphists, who transmit them to centres, where for rapid assimilation clerks decode them and chart them on maps, independent experts then draw therefrom the conclusions on which their forcests are based. There are other observatorics which take observations for elimatological purpo es, but do not telegraph them

As aviation has been and still is making rapidly increasing demands on meteorologists in India, it is easier to understand the constitution and needs of the department if we first consider the organisation prior to the demands of aviation In order to carry out the functions imposed upon it, the department had a central office, five principal sub-offices and 26 pilot balloon observatories and supervised 270° weather observatorics, principally of the third class distributed over a region stretching from Persia, Aden and Lanziber on the west to Burma on the cast A brice summary is given below of the work at each of the principal observatories

and offices -

Headquarters Office. Poona -The general administration of the department is carried on by the headquarters office in Poona It receives the telegraphic reports of morning observations collected at practically all pilot balloon and 1st, 2nd, 3rd and 5th class observatories and issues daily a telegraphic summary of general weather conditions with forecasts of probable changes in weather during the next twenty four hours It serves as the main forecasting centre for

(1) Special investigations at the Airship Karachi In addition to these meteo. heavy rain warnings for practically the whole country excepting north east India, and the Issue of warnings for storms in the Arabian Sea It is responsible for practically all climatological, work in India and for the design, specification, to t and supply of special meteorological instru ments On its transfer from Simla to Poona the headquarters office was equipped as an upper air observators and a first class weather observatory and has also been designed to provide facilities for research in theoretical and practical meteorology

Meteorological Office and Observatory, Alipore, Calcutta—The Allpore office serves as a regional forceast centre and is responsible for the publication of the Calcutta Daily Weather Report for north-east India, for storm warning in the Bay of Bengal and heavy rainfall warning In north east India. It has complete charge of all 2nd 3rd, 4th and 5th class observatories in north cist India (from Assam to Orlssa), while its other duties consist in supplying all weather observatories with ordinary instruments and stores, keeping a stock of such instruments, and supplying time signals by time ball to the Port of Calcutta and by wireless to shipping at sec. It is also a first class weather observatory, pilot balloon observatory and seismological station

Upper Air Observatory, Agra —Agra Observatory is the headquarters of upper air work in India It is responsible for maintaining all the pilot balloon observatories in India and neighbouring countries and supplying them with necessary equipment for carrying on daily pilot billoon observations and supervising their work. All data from pilot balloon observa tories are collected, checked and statistically summarised at Agra This observatory is also the principal centre of upper air research work in India There is a seismological station attached to this observatory

Colaba and Alibag Observatories—These observatories specialise in the study of geophysics, particularly terrestrial magnetism and scismology, and in addition carry on the duties of a first class weather observatory. They take star or sun observations for the determination of time and are responsible for the time-ball service at the Bombay Harbour and the rating of chronometers belonging to the Royal Indian Marine and Royal Navy

Kodarkanal -The Observatory at Kodaikanal specialises in the study of the physics of the sun, and is specially equipped for spectroscopic observations and research This observatory also undertakes the duties of a first class weather observatory and a seismological station

*The actual numbers were 10 first class, 2 second class, 200 third class, 29 each fourth fifth class. A first class weather observatory is furnished with autographic instruments for invously recording pressure, temperature, humidity, wind direction and velocity and rature, wind rerords

and fifth class continuously recording pressure, temperature, rainfall, in addition to instruments read by eye At a second class weather observatory observa-tions are taken two or three times daily and are telegraphed to one or more forecasting centres. A third class observatory takes readings (a) daily at 8 hours and sends the data by telegraph to one or more forecasting. by telegram to one or more for casting centres or (b) twice daily at 10 hours and 10 hours, but does not telegraph. A fourth class observatory records observations (a)and rainfall or (b) of temperature and rainfall only, while a fifth and telegraphs only rainfall amounts

of the Portuguese chroniclers, the phenomenon and its name were unknown in Portugal

"Gonçalves ∇ ıana (ın Filológicas) has Palestraspointed out most clearly that, phonetically or morphologically. neither maciée mascaret could be converted into macaréu, and he came to the conclusion that "the three vocables, mascaret, macrée, and macaréu are independent of each other, and that their formal and phonic coincidences are merely fortuitous '

"I am almost convinced, however, that the French changed the Port macaréu, first, into the form macrée, and, afterwards, into the more cultured mascaret, in the same way as they changed the Portuguese pateca (q v) into pastèque, morderim (q v) into mort-de-chien, bicho do mar (q v) into biche-de-mer, pau de águila (see aguila) into bois d'aigle Jancigny would

not have used in 1854 maquerie, if the other forms had been well-known in his time

"The explanation that I would offer with regard to this term is that the people of Cambay might have told the Portuguese, eager to know the cause of this strange happening, that it was due to the makaró (the vulgar form in Gujarat) who came to devour ships and men, for in popular tales similar performances are ascribed to the monster"

Though the name, in the vernacular form magar, given to the ciocodile, the Makara,the fabulous serpent, the vehicle of Varuna, the god of the ocean, represented in sculpture with the head and forelegs of an antelope, and the body and If the forelegs tail of a fish of the antelope are intended to connote speed, and the tail of the fish the marine character of the monster, might not the bore, the special feature of which is the rapidity of its approach, have appropriately

^{1 [&}quot;The mouth (of the Setang, in Burma) is obstructed by banks of sand and the maquerie (bore) is so terrible that the navigation of this river is wholly impossible for large ships and difficult for smaller ones."

Janeigny, Indo Chine, p 295, in Glossario

cantonment and will be transferred to Dright ecases to full with height but remains constant Road civil aerodrome, when buildings are provided there Meanwhile a first class weather observatory and pilot balloon station have been started at Drigh Road The weather observatories in Persia and Arabia and along the Mekran coast are under the charge of the Meteorologist at Karachi

On the newly-opened Karachi Delhi air route. the Karachi forecast centre is responsible for weather reports and forecasts between Karachi and Jodhpur

Delhi —A forecast centre has recently been opened at Delhi and will be specially responsible for the supply of weather reports and forecasts to aviators between Jodhpur and Allahabad or Gaya. A pilot balloon and first class weather observators is attached to this office

connection with the Delhi Calcutta.—In connection with the Delhi Calcutta and Calcutta-Rangoon air routes, proposals have oven made to extend the existing duties of this centre It will become responsible for weather reports and forecasts to aviators between Allahabad or Gaya and Akyab

Poona —The Poona office is at present responsible for weather reports and forecasts to aviators on routes outside northern India

Investigational work -Besides the contine duties such as issue of weather reports, foremets and warnings of storms and heavy rain the Meteorological Department has under taken during fee at years a number of investigations in theoretical and practical meteorology and property in north each in the second and practical meteorology and other alled subjects the most important detailed weather observations in the recommendation of the free atmosphere over the country by means of various types of were worked out at Calcutta and the recognition of the country by means of various types of taken during tee at yests a number of investige billoons. The Agra observators and its subspread that the legit ring of last a billoons. stations the number of which has grown rapidly In the last two or three years and is over 30 at present observe and record wind relactive in the upper layers of the atmosphere. The e-data is not only of great as I land in course tion with weather forces fing and storm arning to cornection sight at the but have also proved useful for forces to of important profit in second rainfall. A method of for caseing the winter rainfall in northern I the from the relative for the first first for the late at the first force of the first force and the relative force of the first force of t tentative use in the department

Masurements of prome temperature a latery set re-humility up to highest of about 1 refer to a real great memorison the later have a later term of the tank. attable to the life materate to the masser of life of a file of a distance of the life of the life of the material to the life of the material to the life of the material to the life of retifiere (1) of this or their forth of the contract of the co

or increase with height. The bare of the stratosphere is about 12 miles above sea level in the India latitudes. It appears that although the lowest temperature over the surface of the earth occurs near the poles, the lowest free air temperatures occur at heights of about 12 miles above the equatorial regions, thus giving rise to the apparently paradoxical trulem that the coldest air lies over the equator

At the Poona Weather Office modern I urapean theories of meteorology have been applied to the study of Indian weather charts. The physical aspects of weather were studied and attempts were made to recognize masses of air having different histories and physical properties Diagnosis of weather charts by such means has been frequently successful and the new ideas have been found helpful in forecasting under Indian condition-

Other scientific activities of the Department consist in the sel-mographic records at arious centres magnetic work at Alibar and Bomba and Solar Physics observations at the Kodalkan d observators. A careful study has been made at Bombay of micro Lms which are believed to Rangoon—The establishment of a new lat Bombay of micro i ms which are believed to forecast centre and first class observatory at be due to sea ways and appear to furnh hearth Rangoon under a trained Meteorologist has been indications of the existence of disturbed with the contract of the extraction extraction extraction extraction. indications of the existence of disturb discorber proposed If sanctioned, it will become out at sea Other interesting experiments on responsible for weather reports and forecasts geophysical subjects have been unfertaken or to avlators between Akyab and Victoria Point completed at Bombas in regulators. The original of the Port word is the Tam-Malayal

number of manchoues of lords On board of these is excellent music of cornets a-bouquin, hautbois, and other instruments, all the great lords have the same "Pyrard de Laval, Hak Soc, Vol II, p 90]

["Manchooas or small vessells of recreation, used by the Portugalls here (Macao), as allsoe att Goa, pretty handsome things resembling little Frigatts, Many curiously carved, guilded and painted, with little beake heads" Mundy, Travels, Hak Soc, Vol III, pt 1, p 205 There is an illustration of the 'manchoa' on Pl XII in the book]

[1686—"We sent out ye Rt Honourable Companys Munchua to cruise after those shipps" Forrest, Selections, Home Series, Vol I, p 154]

["Entring with us into one of those boats which they called Maneive, going with twenty, or four and twenty, Oars, onely, differing from the Almadies in that the Maneive have a large cover'd room in the poop, sever'd from the banks of rowers, and are greater than the Almadies, which have no such room, we pass'd out of the Port" Pietro della Valle, Travels, Hak Soc, Vol II, p 211 Maneire appears to be a misprint for manceive On p 217, the same vessel is called mancina and both forms are used for 'manchua']

['I commanded the Shibbars and Manchuas to keepe a little a head of me' Hedges, Diary, Hak Soc, Vol II, elxxxiv in Hobson-Jobson]

["Boat (machwds) hire per day, from 10s to 16*" (in Bombay),

manji The Portuguese carried the word with them to different parts of Asia, and also used it of vessels other than those used in the Malabar trade At Goa, for instance, it was used to designate a gondola, rowed however, and not pushed

Sir Richard Temple in a note on the passage from Mundy quoted below says "The term manchua has apparently been transferred to the Far East by the Portuguese to represent the Cantonese term, man-shun, a seagoing trading vessel"

Yule also lists muchwa in Hobson-Jobson, and assigns it to Marathi machwā, Hindust machwā, machwā, and gives it the meaning of 'a kind of boat or barge in use about Bombay' There can scarcely be any doubt that etymologically manchua and muchua are the same words and have a common origin]

Mandador (one who commands) Mal, Jav, Mad mandôr, mandûr, head of a body of artizans, overseer,

Hunter, The Imperial Gazetteer, VIII, p 268]

two years and in the second year extended to India, Hyderabad and Kathiawar It was parts of the Central and United Provinces and marked by several distinctive features. The to a small tract in the Punjab. The total area, rainfall over the whole of India was in extreme affected was 257,000 square miles and the popudefect, being eleven inches below the mean lation 58,500,000. Warned by the excessive in several localities there was practically no expenditure in Beharand actuated by the desire rain. There was in consequence a great fodder to secure economy the Government relief pro gramme was not entirely successful The excess mortality in this famine is said to have been 5,250,000 in British territory alone Throughout British India 700,000,000 units were relieved

The experiences of this famine showed the necessity of placing relief on an organised basis The first great Famine Commission which sat und r the presidency of Sir Richard Strachey claborated the Famine Codes, which amended to meet later experience, form the basis of the famine relief eyetem to-day. They recommended (1) that employment should be given on the relief works to the able-bodied, at a wage suffi cient for support, on the condition of perform ing a sultable task, and (2) that gratuitous relief should be given in their villages or in poor houses to those who are unable to work. They houses to those who are unable to work. They recommended that the food supply should be left to private agency, except where that was unequal to the demands upon it. They advised that the land owning classes should be assisted; and by general suspensions of revenue by lose in pr on to the crop failure amount sufficient to maincircumstances Whilet to save life not

houring

The famine, with a terrible mortality amongst the cattle The water supply was deficient, and brought a crop of difficulties in its train Then districts like Gujarat, where famine had out British India 700,000,000 units were all the contributions from Great British and the Colonice affected, the people here being softened by prosperity, clung to their villages, in the hope of saving their cattle, and came within the been unknown for so many years that the locascope of the relief works when it was too late to save life A very large area in the Indian States was affected, and the Marwaris swept from their impoverished land right through Central India like a horde of locusts, leaving desolation in their train. For these reasons relief had to be given on an unprecedented scale At the end of July 4,500,000 persons were supported by the State, Bs. 10 crores were spent on relief, and the total cost was estimated at Rs 15 crores The famine was estimated at Rs 15 crores. The famine was also marked by a widespread acceptance by Indian States of the duty hitherto shouldered by the Government of India alone—the supreme responsibility of saving human life Aided by ions to the extent of Rs 31 crores, the Indian States did a great deal to bring their administration into line with that in British India Although actual deaths from starvato the crop failure In sending a to the provincial povernments, of cholera and the devastating epidemic of malaria which followed the advent of the rains induced a famine mortality of approximately amount sufficient to mainwere collated by the Commission presided over by Sir Antony MacDonnell This Commis-This Commision reported that taking the famine period a whole the relief given was excessive, and d down certain modified lines The cardinal ture of their polley was moral strategy ting out that if the people were assisted start they would help themselves, whilst condition were allowed to deteriorate led on a declining scale, they placed refront of their programme the neces-putting heart into the people" The suggested for this purpose was the liberal distribution of taccavi loans, spension of revenue, and a policy oldness, starting from the preparge and expansive plan of relief y liberal preparations, constant a full enlistment of non-official o scale was revised the mi a abolished in the case of ablepayments by results were proposals were made

dern system

t of India are now in possere machinery to combat the In ordinary times Governinformed of the meteorological, the state of the crops, pro-suitable relief works are kept up be country is mapped into relief ives of tools and plant are stocked

by the Portuguese, and like the Indian caste, erroneously supposed to be a native term From Portuguese, mandar, to hold authority, command, govern, etc "Wedgwood is right in saying that the word was first made known by the Portuguese, but wrong in his etymology which he corrected in later editions The Portuguese chroniclers do not employ the word with reference to ministers of state in India. but to official dignitaries in China, Malasia, and Annam]

Mandil (coarse cloth, apron). Mal mandil (l us).1

Perhaps received directly from Arabic

[Mandil in Arabic is the Arab's head-dress, from this it came to acquire the meaning of 'a cap']

Manga (Mangifera indica)
Auglo-Ind mango —Indo-Fr
mangue, manguer —Malag
manga — | Chin máng-koo² |

The etymon of the word is the Tamil mānkáy, which is, properly speaking, the name of the fruit when green, which when ripe is called mampalam. Both the words have been introduced into Malay manga in Malacca, Singapore, and Sunda, and memplam in Penang, Achem, and Batta

In Konkani, māngád is 'a conserve made from mangoes'

[Crooke in Hobson-Jobson quotes W W Skeat's opi-"The modern standnion ard Malay word is mangga, from which the Port form was probably taken" But Malayal has manga, and it is more probable that the Portuguese who borrowed so many words from the Malabar country, with which they first came into contact, carried the word to Malacca and gave it to Malay Yule very properly says "The word has sometimes been supposed to

^{1 &}quot;A mandil very finely woven, a quilted coat of silk with breeches to match" Castanheda, II, ch 13

^{2 &}quot;Some are called jacas (jack-fruit), others mangas, and others n_ain figs" Castanheda, I, ch 16

[&]quot;The clove trees always take a year's rest just as the olive trees do in our Europe, and the mangueiras ('mango trees') do in India" Diogo do Couto, Dec IV, vii, 9

two veres and in the second year extended to India, Hyderabad and Kathiawar Is parts of the Central and United Provinces and, marked by several distinctive features to a small tract in the Punjab. The total area, rainfall over the whole of India was in extreme affected was 257,000 square miles and the population of the population 58,500,000. Warned by the excessive in several localities there was practically no expenditure in Behar and actuated by the desire rain. There was in consequence a great fodder lation 58,500,000 Warned by the excessive expenditure in Behar and actuated by the desire to secure economy the Government relief programme was not entirely successful. The excess mortality in this famine is said to have been Through-5,250,000 in British territory alone out British India 700,000,000 units were relieved nt a cost of Rs 84 crores Charitable contributions from Great Britain and the Colonies aggregated Re 8t lakhs

The Famine Codes

The experiences of this famine showed the neces-ity of pincing relief on an organised basis The first great Camine Commission which sat und r the presidency of Sir Richard Strachey, claborated the Famine Codes, which amended to meet later experience, form the basis of the famine relief system to day They recommendcd (1) that employment should be given on the relief works to the able-bodied, at a wage sufficient for support, on the condition of performing a suitable task, and (2) that gratuitous relief should be given in their yillages or in poor houses to those who are unable to work They recommended that the food supply should be left to private agency, except where that was unequal to the demands upon it They advised that the land owning classes should be assisted. by loans, and by general suspensions of revenue; in proportion to the crop failure In sending a In proportion to the crop latture in senting a familie and the devastating epidemic of Famine Code to the provincial governments, of cholera and the devastating epidemic of the Government of India laid down as the cardinal feature of their policy that the famine induced a famine mortality of approximately wage "Is the lowest amount sufficient to maintain health under given circumstances Whilst were collated by the Commission presided over the duty of Government is to save life, it is not by Sir Antony MacDonnell This Commission reported that taking the famine period bound to maintain the labouring population at its normal level of comfort" Provincial. codes were drawn up, and were tested by the famine of 1896-97 In that 307,000 square miles were affected, with a population of 69,500,000 The numbers relieved exceeded 4,000,000 at the time of greatest distress The cost of famine relief was Rs 7½ crores, revenue was remitted to the extent of Rs 1½ crore, was remitted to the extent of Rs 1½ crore, in the forefront of their programme the necessand loans given aggregating Rs 1½ crore The haritable relief fund amounted to about Rs 1½ machinery suggested for this purpose was the crore, of which Rs 1½ crore was subscribed prompt and liberal distribution of taccavi loans, crore, of which Rs 1½ crore was subscribed in the United Kingdom The actual famine mortality in British India was estimated at 750,000 The experiences of this famine were examined by a Commission under Sir James Lyall, which reported that the success attained in saving life and the relief of distress was greater than had ever been recorded in famines, comparable with it in severity, and that the expense was moderate But before the Local recommended, Governments had been given time to digest for saving cattle the proposals of this Commission or the people to recover from the stock, the great famine of 1899-1900 supervened

The Famine of 1899-1900

famine, with a terrible mortality amongst the cattle. The water supply was deficient, and brought a crop of difficulties in its train Then districts like Gujarat, where famine had been unknown for so many years that the locality was thought to be famine immune, were affected, the people here being softened by prosperity, clung to their villages, in the hope of saving their cattle, and came within the scope of the relief works when it was too late to save life A very large area in the Indian States was affected, and the Marwaris swept from their impoverished land right through Central India like a horde of locusts, leaving Central India like a norge of locusts, leaving desolation in their train. For these reasons relief had to be given on an unprecedented scale. At the end of July 4,500,000 persons were supported by the State, Rs. 10 crores were spent on relief, and the total cost was estimated at Rs. 15 crores. The famine was estimated at Rs 15 crores The famine was also marked by a widespread acceptance by Indian States of the duty hitherto shouldered by the Government of India alone—the supreme responsibility of saving human life. Aided by loans to the extent of Rs 3½ crores, the Indian States did a great deal to bring their administration into line with that in British India Although actual deaths from starvation were insignificant the extensive outbreaks tion were insignificant, the extensive outbreaks of cholera and the devastating epidemic of malaria which followed the advent of the rains were collated by the Commission presided over by Sir Antony MacDonnell This Commis-sion reported that taking the famine period as a whole the relief given was excessive, and laid down certain modified lines feature of their policy was moral strategy Pointing out that if the people were assisted at the start they would help themselves, whilst if their condition were allowed to deteriorate it proceeded on a declining scale, they placed the early suspension of revenue, and a policy of prudent boldness, starting from the preparation of a large and expansive plan of relief and secured by liberal preparations, constant vigilance, and a full enlistment of non-official The wage scale was revised, the minimum wage was abolished in the case of ablebodled workers, payments by results were recommended, and proposals were made

The modern system

The Government of India are now in possersion of complete machinery to combat the The Famine of 1899-1900

This famine affected 475,000 square miles with a population of 59,500,000 In the Central condition and the state of the meteorological conditions. And the state of the crops, proprinces, Berar, Bombay, Ajmer, and the grammes of suitable relief works are kept up Hissar district of the Punjab famine was acute to date, the country is mapped into relief it was intense in Rajputana, Baroda, Central circles, reserves of tools and plant are stocked were the most celebrated, that those of Gujarat were also very good, especially some called 'Gujaratas', which, though not large, had very fine fragrance and taste and a very small stone, that those of Balaghat were both large and toothsome, the author having seen two that weighed four pounds and a half (Markham, p 286 incorrectly says 'two pounds and a half'), and that those of Bengal, Pegu, and Malacca were also good From this it would follow that the mango have Goa must been brought to a state of perfection during the hundred years which followed the publication of the Colloquies Da Orta hımself had celebrated 8. mango-tree in his island of Bombay which used to yield

best Achars to provoke an Appetite, when Ripe, the Apples of Hisperides are but Fables to them, for Taste, the Nectarine, Peach, and Apricotiall short" Fryer, East India, Hak Soc, Vol II, p 84]

["The Goa mango is reckoned the largest and most delicious to the Taste of any in the world, and, I may add, the wholesomest and best tasted of any Fruit in the World" A Hamilton, A New Account etc., (1727), Vol. I, p. 255]

two crops, one in December, and the other at the end of May He admits that though the second crop surpassed the earlier in fragrance and taste, the later was just as remarkable for coming out of season (Coll XXXIV) Sir George Birdwood, writing to Bombay Saturday 28th July, 1886, refers to a similar phenomenon in the case of a mango-tree which belonged to one Mr Hough, ın Colaba, Bombay 1

Manguço, mangusto (Herpestes mungos, Blanford, '1chneumon') Anglo-Ind mungoose —Indo-Fr mangouste 1

From the Marathi-Konkani mungús or mungas, Sansk angūsha [Yule derives it from Telugu, mangīsu, or mungīsa, Crooke says that Platts very doubtfully derives it from Sansk. makshu, 'moving quickly' In Ar it is bint' 'arūs, 'daughter of the bridegroom,' in Egypt kitt or katt Farāūn, 'Pharaoh's cat' (Burton, Ar Nights, II, 369)]

[Da Orta (Col XLII, ed Markham, p 336) describes unmistakably the Indian mungoose, but does not give it that name, but calls it quil or quirpele From this it must be concluded either that manguso or mongus had not

then acquired much currency in the Konkan, or that the had creature heen first described or pointed out to the naturalist by one who had known it in the Tamil country, and who, therefore, gave it the names it has in that "Kīrı, kīrıpılleı, language Tamıl name of mongoose," says Prof Η Kern (Linschoten, Hak Soc, Vol II, p 104, n) Da Orta refers to the mungoose in connection with his interesting dissertation on Pao de Cobra, or 'Snakewood' This is what he says "In the island of Ceylon, where there are many good fruits, forests, and beasts for the chase, there are yet many those serpents vulgarly called cobras de capello.... Against these God has given this Pao de Cobra It is found to be good against snake bites because in that island there are small beasts like ferrets which they call quil Others call them quirpele They often fight with these serpents When one of them knows that it must fight with them, or fears that it may have to, it bites off a piece of this root

^{1 &}quot;There is a kind of vermin which they call mongús, creatures some what different from the ferrets" João Ribeiro, Fatalidade hist, Bk I, ch

[&]quot;Its Telugu name is mangisu, from which is derived mongus (as João Ribeiro writes it), and the mungoose of Anglo India, the mangouste of the French, and other forms" Conde de Ficalho, Col xlii. [p 188]

Hydro-Electric Development.

India promises to be one of the leading counties of the world in regard to the development of hydro-electric power and great strides in this direction have already been made. India not direction have already been made India not only specially lends itself to projects of the kind, but peremptorily demands them Cheap motive power is one of the secrets of successful industrial development and the favourable initial conditions caused by the war, the enthusiasm for industrial development which has selzed nearly all classes of educated Indians, and the special attention which the circumstances of the war have compelled Government to direct towards the scientific utilisation of Indian natural resources all point to a rapid growth of industrial enterprise in all parts of India within the next few years Indeed, the process, for which sound foundations had been laid before the war, is now rapidly under way India is severely handicapped compared with other lands as regards the generation of power by the consumption of fuel, coal or oil These commodities are all difficult to obtain, and costly in India except in a few favoured areas Costy in india except in a few lavoured areas Coal supplies, for example, are chiefly centred in Bengal and Chota Nagpur and the cost of transport is heavy Water power and its transmission by electricity offer, on the other hand, immense possibilities, both as regards the quantity available and the cheapness at which the power can be rendered, in all parts of India

Water power schemes, pure and simple, are generally difficult in India, because the power needs to be continuous, while the rainfall is only during a small portion of the year Perennial rivers with sufficient water throughout the year are practically non-existent in India Water, therefore, must be stored for use during the dry season Favourable sites for this exist in many parts in the mountainous and hilly regions where the heaviest rainfalls occur and the progress already made in utilising such op-portunities by the electrical transmission of power affords high encouragement for the future Futher, hydro-electric schemes can frequently be associated with important in gation projects the water being first used to drive the trusines at the generating stations' and then distributed over the fields

The Industrial Commission emphasized the necessity for a Hydrographic Survey of India the Government recommendation Un this recommendation the Government of India in 1918 appointed the late Mr G T Barlow, C.I E, then Chief Engineer, Irrigation Branch, United Provinces, to undertake the work, associating with him Mr J W Meares, M.I.C. E, Electrical Adviser to the Government of India Mr Barlow died, but Mr Meares issued a preliminary report in September, 1919, summarising the present state of knowledge of summarising the present state of knowledge of in India now absorb over a million horse side of the undertaking

power, of which only some 285,000 h p is sup plied by electricity from steam, oil the water power so far actually in sight amounts to 11 million horse-power, but this excludes practically all the great rivers, which are at present uninvestigated Thus the minimum flow of the seven great rivers castward from the Indus is stated to be capable of giving not less than three million horse-power for every thousand feet of fall from the Himalayas, similar considerations apply to rivers in other parts. Some doubt is expressed as to the estimate of seven million horse-power in the Irrawaddy and Chindwin rivers, given in the report of the London Conjoint Board of Scientific Studies

The Report points out that the Bombav Presidency holds a unique position owing to its great existing and projected schemes at Lonavia, the Andhra Valley, the Nila Mula and the Koyna Valley and has the still greater advantage of possessing a firm ready to develop its resources

Bombay Hydro-Electric Works

The greatest water-power undertakings in India-and in some respects the greatest in the world-are the Tata hydro-electric schemes recently brought to fruition, and constantly undergoing expansion, for the supply of power in the city of Bombay Bombay is after London the most populous city in the British Empire and it is the largest manufacturing town in Asia Its cotton mills and other factories use over 100,000 horse power of mechanical energy and until a year or two ago this was almost entirely provided by steam, generated by coal coming from a distance—mostly Bengal The Tata Hydro-Electric Power Scheme, now an accomplished fact, marked one of the blg steps forward made by India in the history of its Industrial development It was the product of the fertile brain of Mr David Gostling, one of the well characters of Bombay a ago The exceptional Bombay, nearly a generation ago position of the Western Ghats, which rise 2,000 feet from sea-level which a very short distance of the Arabian Sea, and force the monsoon as it sweeps to land, to break into torrential rain at the mountain passes was taken full advantage of and the table lands behind the Ghats form a magnificent catchment area to conserve this heavy rainfall in Mr Gostling pressed the scheme on the attention of Mr Jamsetji Tata for years, and with perseverance collected data which he laid before that ploneer of the larger industries in India He summoned the aid of experts from England to investigate the plan The scheme was fully considered for six long years Meanwhile both Mr J N Tata and Mr David Gostling passed away, but the sons of the the problem in India and outlining a programme former continued the work of their father and of investigation to be undertaken in the course on Mr Gostling's death, Mr R B Joyner's of the inquiry Mr Meares showed that industries and was sought to work out the Hydraulic

are equally unfounded. Their secret of success, even when they handle cobras whose fangs have not been removed, appears to consist in their energetic decisiveness manner and in the rapidity their movements which completely dominate reptile That their pretences to immunity are hollow is proved by numerous reported instances of snake charmers succumbing very quickly to the bite of a cobra, especially when, trusting to their own devices, they will not avail themselves of scientific remedies

What are the 'snakewoods' to which da Orta refers? of these, which he says is called in Ceylon rannetul, has been definitely identified with the Rauwolfia serpentina, Benth, and Ficalho believes that it is the châtrâkī mentioned in Amarakoka as one of the herbs used as an antidote by the nalula or the mungoose The others are supposed to be the Strychnos colubrina, Linn, and the Hemidesmus indicus. R Brown, or Asclepias pseudosarsa, Roxb]

Manha (bad habit, distemper) Konk mánz, vern terms khôd, avgun—Tet. manha, vern term kaba-kaba

Manilha (a term used in a game of cards, seven points of a suit) Konk mānilh—Mac, Bug manila.

Manilha (bracelet) Anglo-Ind. [moneloes, bracelets,] manilla-man, 'an itinerant dealer in gems'

Yule and Burnell say that manilla-man, in this sense, is a hybrid from Telugu manelā vādu and the English 'man' with a mixture of the Portuguese manilha 1 But Brown derives manéla-vāndlu from the geographical name

^{1 &}quot;And Diogo d' Azambuja sent the grain which had been seized to the factor that he might fetch lambers ('coarse stripped woollen cloths'), manilhas, basins and other things" João de Barros, Dec I 111, 2

^{[&}quot;The Women (in Goa), both White and Black, are kept recluse, vailed abroad, within doors, the Richer of any Quality are hung with Jewels, and Rosaries of Gold and Silver many times double, Moneloes of Gold about their Arms "Fryer, East India, Hak. Soc, Vol. II, p 27]

[[]Monelloes is used by Ovington (OUP, p 294) and Monela by Bowrey (Hak Soc, p 5) for the city of Manila]

nary investigations for this scheme are still pro The catchment area for the lake will be 346 square miles and there will be a total storage after the rains of 112,600 million cubic feet which will be sufficient to supply a normal load of 350,000 horse power for 8 000 hours per year The preliminary estimates provided for a capital of Rs 810 lakes to carry out the scheme

Mysore Installation

The first hydro electric scheme undertaken in India or, indeed, in the East, was that on the River Cauvery, in Mysore State, which was inaugurated, with generating works at Sivasa-mudram, in 1902 The Cauvery rises in the British district of Coorg, and flows right across The first object with which the installation was undertaken was the supply of power to the goldfields at Kolar These are 92 miles distant from Sivasamudram and for a long time this was the longest electrical power transmis- and two floating derricks, for dredging the river sion line in the world Current is also sent to and draining the swampy countryside and Bangalore, 50 miles away, where it is used for rendering it available for cultivation, but these both industrial and lighting purposes

The initial undertaking has constantly been expanded since its inauguration, so that its total capacity, which was at first 6,000 horse power, is now approximately 25,000 h p This is the maximum obtainable with the water which the Cauvery affords and, therefore with the number of consumers, large water and small, rapidly increasing, the necessity of a completely new installation elsewhere, to be operated in parallel with or separately from that at Sivasamudram, has been recognised Two projects offer themselves The first would involve the use of the Biver Shimsha, a tributary of the Cauvery which has natural falls, and the second, known as the Mckadatu project, would have its power house on the Cauvery, 25 miles down-river from Sivasamudram and just within the borders of Mysore State, adjacent to the Madras Presidency head of water available at Sivasamudram is 400 feet, that on the Shimsha 618 feet net, which would generate 39,500 c h p At Mekadatu the Cauvery runs in rapids and a dam and a channel 20,000 feet long with a 22½ feet bed would be necessary There would be three generating units, each giving an output of 4,000 e h p Future extensions yielding an additional 8,000 h p could be made The progressive spirit which has marked the management of the works since their inception now characterises the manner in which the problem of further extensions are being considered.

Works in Kashmir

A scheme of much importance from its interesting because size, more of the developments that may be expected which from it than for the part which its current supply already plays in the life of the countryside, is one installed a few years ago by the Kashmir Durbar, utilising the River Jhelum, near Baramulla, which lies thirty-four miles north-west of Srinagar The head works of the Jhelum power installation are operation at Naini Tal during 1923, and the situated six and a half miles from the power erection of another small plant was commenced

house and the main connection between the two is a great timber flume These works and the forebay at the delivery end of the flume have a capacity for carrying water sufficient for the generation of 20,000 electrical horse power Four pipes 600 feet longlead from the forebay to the power house, and from forebay to water-wheel there is an effective head of 395 feet. There are four vertical waterwheels, each coupled on the same shaft to a 1,000 kw, 3-phase, 2,300 volt, 25-period generator running at 500 r p m, and each unit is capable of taking a 25 per cent overload, which the generator end is guaranteed to maintain with safety for two hours The power house is of sufficient capacity to allow of 15,000 k.w generating plant being installed within it Two transmission lines run side by side as far as Baramulla. 21 miles distant, at which point one terminates. The other continues to Srinagar, a further 34 The installation at Baramulla was originally utilised for three floating dredgers operations have temporarily been curtalled, so that only one dredger is now in operation The lighting of Baramulia has been taken in hand with satisfactory results and it is expected that the lighting demand will rapidly increase and that a small demand for power will soon spring up At Srinagar, the line terminates at the State slik factory, where current is supplied not only for driving machinery and for lighting, but for heating The greater part of Srinagar city is now electrically lighted and during the past year a motor load of over 100 k w has been connected with the mains, motors being hired out to consumers by the Electrical Department This step was taken with a view to educating the people in the use of electric power and it has been entirely successful

Recent Progress

Apart from the development of the three projects in the Bombay Presidency the past comparatively few years have witnessed little progress in hydro-electric works truction is proceeding, however, on the Mandi Project in the Punjab, which will utilize the water of the Uhl river for the generation of power with which a large number of towns in that province will be electrified The scheme has been formulated in three stages The first will develop 48,000 horse power from the ordithe formation of a storage reservoir by the construction of a dam and would double the electrical output, whilst the third would utilize the same water several miles down-stream and provide an additional 64,000 horse-power Only the first stage is at present being constructed Another interesting project is the hydro electric grid scheme in the United Provinces which will carry electric power to a large number of towns and villages and will, it is anticipated, assist greatly in the development of rural areas

A small plant was completed and put into

of Comparative Philology) and Haupt (Die Sumerischalkadische Sprache) attribute to the word mana an Accadian origin. Yule and Burnell observe that in any case it was the Babylonian name for the eightieth part of a talent, whence it passed, with other weights Babylonian measures, almost all over the ancient world Egyptian men or mna, Coptic emna or amna, Hebrew māneh, Greek mna, Roman mina, and through medium of the Arabs, the Spanish-Portuguese almena, old French almène,1 [for a weight of about 20 lbs (Marcel Devic)]

The authors of Hobson-Jobson also say "The introduction of the word into India may have occurred during the extensive commerce of the Arabs with that country during the 8th and 9th centuries, possibly at an earlier date"

In the Rigveda (VIII, 67, 2) there appears the word manā,

which has given rise to heated discussion among orientalists. Is it a genuine Aryan word or of Semitic origin? What is its true meaning?

François Lenormant and some other writers regard the terms as identical, and adduce this fact, among other arguments, in proof of the very ancient relations that must have existed between India and Babylon, and also to point out traces of Babylonian influence on the Vedic poems.²

Max Muller (India, What can it teach us?) and other Sanskritists deny the Babylonian origin and the influence of the Semitic civilization upon ancient India, but there is no unanimity in their interpretation of the word

[The recent excavations at Harappa in the Punjab and Mohenjo-Daro in Sindh have revealed the existence of an Indus Valley civilisation and culture which shows close

¹ Candido de Figueiredo defines almena as "Indian weight equivalent approximately to one kilogramme," and gives as its source word the trabic al mena

¹ Manā is neither to be confounded with māna quoted above, nor with its homonym in the Rigueda, which signifies 'zeal, ardour, anger, envy'

² See Cristóvão Pinto, India Prehistorica

Local Self-Government.

subjects transferred to Indian ministers, and under their leadership considerable developments have been essayed On the whole, the progress of local government in India for the past quarter of a century has been disappointing. The greatest successes have been won in the Presidency towns. and particularly by the Municipality of Bombay The difficulties in the way of progress were manifest Local government had to be a creation -the devolution of authority from the Govern ment to the local body, and that to a people who for centuries had been accustomed to autocratic administration Again, the powers entrusted to local bodies were insignificant and the financial support was small There are however many indications that the dry bones of the mofussil arestirring

Throughout the greater part of India, the village constitutes the primary territorial unit of Government organisation, and from the villages are built up the larger administrative

"The typical Indian village has its central residential site, with an open space for a pond and a cattle stand Stretching around this nucleus lie the village lands, consisting of a cultivated area and (very often) grounds for The inhabitants of grazing and wood cutting such a village pass their life in the midst of these simple surroundings, welded together in a little community with its own organisation and govern ment, which differ in character in the various types of villages, its body of detailed customary rules and its little staff of functionaries, artisms and traders. It should be noted, however, that in certain portions of India, e.g., in the greater part of Assam, in I astern Bengal, and on the west coast of the Madras Presidency, the village as here described does not exist, the people living in small collections of houses or in separate homestends."—(Gazelteer of India)

The villages above described fill under two main classes, viz -

Types of Villages —"(1) The 'severalty' or ralyatwari village which is the prevalent form outside Northern India. Here the revinue is assessed on individual cultivators There is no joint responsibility among the villagers, though some of the non-cultivated lands may be set apart for a common purpose, such as graz ing, and waste land may be brought under the plough only with the permission of the Revenue authorities, and on payment of assessment village government vests in a headitary headman, known by an old vernacular name, such as patel or reddi, who is responsible for law and

A field of the administration of India its incidence being distributed by the body of profoundly affected by the Reforms of 1919 is superior proprietors, and a certain amount of that of local government. This is one of the collective responsibility still, as a rule, remains superior proprietors, and a certain amount of collective responsibility still, as a rule, remains The village site is owned by the proprietar, body, who allow residences to the tenantry, artisans, traders and others The waste land is allotted to the village, and, If wanted for cultivation, is partitioned among the shareholders The village government was originally by the punchaget or group of heads of superior families. In later times one or more headmen have been added to the organisation to represent the village in its dealings with the local authorities, but the artificial character of this appointment, as compared with that which obtains in a raisatwarf village is evidenced by the title of its holder, which is generally lambardar, a vernacular derivative from the English word 'number' Itls this type of village to which the well-known description in Sir H Maine's Village Communities is alone applicable, and here the co-proprietors are in general a local oligarchy with the bull of the village population as tenants of labourers under them

Village Autonomy -The Indian villages formerly possessed a large degree of local autonomy, since the native dynasties and their local representatives did not, as a rule, concern themselves with the individual cultivators, but regarded the village as a whole, or some large landholder as responsible for the payment of the Government revenues, and the maintenance of local order. This autonomy has now disappeared owing to the establishment of local, civil and criminal courts, the present revenue and police organisation, the increase of communications, the growth of individualism, and the operation of the individual rangaturari as stem, which is extending even in the north of India Nevertheless, the village remains the first unit of administration, the principal village func tionaries-the headman, the accountant and the village watchman-are larg ly utilised and paid by Government, and there is still a certain amount of common village feeling and interest-

Punchayets -- For some years there was an active propaganda in favour of r viving the village council tribunal, or Punctured and the Decentralisation Commission of 1908 node the following special recommendations -

"While, therefore, we desire the dev log wert of a punchaset system, and consider that the objections urged then to are far from it a mountable we recognise that such a system can only be gradually and to statis I app" i and that It le Impositi to stand and defilte method of provider W the that a commenceme it should be mall be certain limited power to Pereto deletter village in which circut store sate recest and as palel or reddi, who is responsion to the strength order, and for the collection of the Government villag sin which circuit interest is revenue. He represents the primitive headship able by r as on of homog a liver rate abit. I of the tribe or clan by which the village was ginee, and for done from its male. I recommend to the settled? "(2) The foint or landlord village, the type warrant, and with a constitution of prevalent in the United Provinces, the Punjab easier to equivalent to the second of the second of the second of the structure of the second of the sillage as a whole, year, will replace to the second of the sillage as a whole, year, will replace to the sillage as a whole, year, will replace the sillage as a whole, year, which will not the sillage as a whole, year, which will not the sillage as a whole, year, which will not the sillage as a whole, year, which will not the sillage as a whole, year, which will not the sillage as a whole, year, which will not the sillage as a whole, year, which will not the sillage as a whole, year, which will not the sillage as a whole, year, which will not the sillage as a whole, year, which will not the sillage as a whole, year, which will not the sillage as a whole, year, which will not the sillage as a whole, year, which will not the sillage as a whole, year, which will not the sillage as a whole, year, which will

English made maune, and so] probably by the influence of the old English word maund, "a kind of great Basket or Hamper, containing eight Bales, or two Fats," the modern word was derived Mão in Portuguese means 'hand' and some of the older travellers like Linschoten. misled by this meaning of $m\tilde{a}o$, rendered it as equivalent to 'hand' The values of the 'maund' as weight vary greatly in different parts of the country The standard maund in British India is 40 sers, each ser being equal to 80 tolas or rupee-weights See Hobson-Jobson]

marmar Marmari (in the
Aryan languages), marbly —
Pers marmar —Ar. marmar,
marmer

The Portuguese origin can be contested The original word is the Greek maimoros From Persian sangmarmai (sang=stone) are derived directly Konk, Mar sangmarmai Hindi, Punj sangmarmar, Sindh sangimarmaru, Kan sangamaravari, sangamára

Marquesota (a sort of

rates, which represent a proportion of the total income varying from 25 per cent in Bombay and in the N W F Province to 62 per cent in Bihar and Orissa The principal objects of expenditure are education which has come remarkably to the front within the last three years and civil works such as roads and bridges Medical relief is also sharing with education though in a less degree the lion's share of the available revenue

Improvement Trusts —A notable feature in the recent sanitary history of India is the activity played by the great cities in the direction of social improvements. In Bombay and Calcutta the Improvement Trusts are continuing their activities which are described in a separate chapter (q v). In Bombay the work of the Improvement Trust is being developed by the Bombay Development Directorate. Other cities are beginning to follow the examples of these great cities and Improvement Trusts have been constituted in Cawnpore, Lucknow and Allahabad in the United Provinces and in several of the larger cities of the Provinces of India Their activities have, however, been severely curtailed by the financial stress.

Provincial Progress—There was passed in Bengal in 1919 a Village Self-Government Act embodying the policy of constituting Union Boards at the earliest possible date for groups of villages throughout the province The number of these boards continues to increase, rising from 1,500 to more than 2,000 Though they are in their infancy as yet, many of them show a remarkable aptitude for managing their

own affairs

In Bombay the development of village selfgovernment is also proceeding, as the result of an Act for constituting, or increasing the power of village committees, which was passed in 1920 by the Legislative Council In this presidency, some 75 out of 157 municipalities had a two thirds elected majority of councillors in the vear 1920, and a distinct step forward has been projected by the administration in the direction of liberalizing the constitution of all municipal bodies The policy of appointing a non official president has been extended both to district and sub-district boards, and a large number of non-officials have also been appointed presidents of sub-districts (taluka) boards Madras also the institutions of local self-government continued to progress in an encourag ing manner. The number of district boards in the Presidency was 24, with 882 members number of sub-district boards rose from 119 to The total number of Municipal Council. rose from 73 to 80 and the proportion of Indian to European and Anglo-Indian members further increased. In 1920 21 there were 54 municipal councils, consisting entirely of Indian members as against 41 in the previous year. The average imposition of tavation per head of population is still yery low being only about Nonetheless, 28 towns in the Iresi dency posses a protected water supply and ! water works schemes are either under executio or in contemplation in a number of other. The number of educational institutions main thined by municipal council- ro c of 016 which 35 99 more than in the previou year while the net edicational charamour od Re 12 01 lakns In the Crited Promines the now D select

Boards, which consist of non official members only, with elected non official Chairmen, were plunged straight-way into financial In some cases the necessity for retrenchculties ment was immediate resulting in the curtailment of medical relief and of allotments for the ordinary repairs of roads Additional taxation has so far not been generally imposed and the Boards are still suffering from inexperience in husbanding public money and obtaining the full value for their copenditure. In the case of Municipal Finances, there has been some change for the better. The new Municipalities have shown a great interest in all forms of civic activity but they are still hampered in their work by political and communal obsessions. They are reluctant to impose rew taxation but a considerable programme of expenditure lies before them restoration of municipal roads, the abatement of the dust nuisance and the renewal of water vorks plant are problems calling almost everywhere for immediate solution On the whole, the position is more hopeful since the rapid progress which was being made towards Municipal

insolvency has been arrested. In the Punjab municipal administration continued to show improvement, the general attitude of the members in regard to their responsibilities being promising for progress in the future. Generally speaking the finances are in a more satisfactory position than was the ease in previous years. Expenditure on water supply schemes.

is steadily increasing

Three Acts of considerable importance, providing for the creation of improvement trusts for the more effective administration of smaller towns and for the establishment of village panchayats have been passed. Further, Municipalities and District Brands have been reconstituted in a more democratic form

In the Central Provinces, the year 1920 winnered the pissing of a I ocal. Self General actintended to guide into proper channel the undoubtedly growing intensit in public matters. The continued reduction of official members and chairman and the wider powers of control given to local bodies have been an incentive to the development of local self so erriment leading to an increase edsense of public duttor large sibility. Another very important measure regulating municipalities was passed into large 1922. Its chief reduces are the extension of the Municipal franchies, the reduction of official and nominated members, the reduction of official control.

In the North Hert Irenter Process, the institution of local all 20 are rest to the season of the following of the following to the following t

Matador (a term used in a game of cards) Bug matadóro

? Matar (to kill) Mal, Jav máti, to die — maténi, to kill — Batt, Mac, Bug. máte, death — Day matei — Malag mati

Dr Hevligers thinks that the derivation from Portuguese is probable. On the contrary, it is very probable, if not quite certain, that the word is a vernacular one, perhaps derived, as Crawfurd believes.

from the Sanskrit mrti. 'death' Favre suggests that it may be of Semitic origin, mant, 'death,' in Arabic Malagassy must have received the word directly from the Malayan languages, much before Portuguese, or perhaps even Arabic, influence was felt in Malaysia The term was current in the time of Fernão Pinto who writes (ch 177 "Cahro morto, sem dizer mais que somente Quita mate, ay que me matou" ("He fell dead, without saying anything but this Ouita mate, 16, who is it that has killed me")

to do, to assist the sacristans Outside Goa, meirinho is synonymous with sacristan. In the Archipelago, however, it retains its original meaning, more or less modified. In Madagascar, for example, according to Matthes, the term is used of the European Civil Magistrate—' Europesche schout'.

Melão (melon) Tel meláma

Mercê (favour, benefit) Konk mersél, land held as a grant for service rendered— Tet mersê, vern term díak

Merecer (to merit) Mal merecer (Haex) — Tet meréca (also used in the sense of 'merit')

Mês (month) Hindust māykabár, " (corruption of the Port mês [month] and acabar [to end]) the last day of the month" Shakespear Wilson mentions kābār, in Bengali, as the name of the last day of the month and

lābārī (ad), "relating to the
last day of the month, due
or payable on this day (salary,
rent, etc)"

In Konkani, kabár is very much used as equivalent to the Portuguese acabar ('to end')

(Brown suggests, as etymon of markabar, the Hindust mās-ke-ba'ad, 'after a month' Crooke, on the other hand, observes that, according to Platts, it is more probably a corruption Hindust māsik-wai or mās-kāwar But Prof. S H Hodivala (Notes on Hobson-Jobson) suggests that, "if 'Mascabar' is an Indo-Portuguese word for the last day of the month, it must be a corruption, not of mås-kå-bår... but of amâs-ka-bâr 'Amâs,' from Sans amāvasya, is commonly used for the last day of the month If 'Mascabar' means 'monthly statement or account', it must stand for mâsik-vâr, as Platts says"]

Mesa (table) Konk. méz — Mar, Guj, Nep., Or, Beng, Ass mej — Hindi mez, menz, mench. Dhalvān-mez, writingdesk — Hindust mej, mez —

of police under the Portuguese government of Bassem in the six teenth and seventeenth centuries."

The most important work which the Trust has in hand at precent is the construction of the main east and west thoroughfare, 84 feet wide across the centre of the city between Manifela and Strand Road The portion letween Upper Circular Road and Chittaranjan Avenue has been completed as also the section of this thoroughfare Ichween Central Avenue and Upper Chitpore adequate Road

The engineering works in the portion between Upper Chitpur Road and Strand Road have made good progress and calcutta will shortly have a wide thoroughfare extending from Strand Post to Maniktala Bridge and intersecting Chitpur Road, Chittarunjun Avenue, Cornwallis Street and Circular Posts At the Instance of the Corporation of Calcutta, a large storm water relief sener, which will drain an area of about 163 acres, has been taid in this road from Chittaranjan Asenue we twards to Strand Road. I rom there it will be carried to the river by the Corporation

Of the other schemes in progress in the centre of the town the most important is the construction of thew (0 fort road connecting Darpon are vin Tagore street with Pathuriaghat Street its importance lies in the fact that it is portion of a new thoroughfare which will run through the middle of Burral azar and connect Harrison Pend with Nintalla Ghat Street. The widening of Kalakar Street in Burrabazar, which forms the southern section of this road will be taken up at once if a Bill which was introduced in the Bengal Legislative Council in February 1931 is passed into law

The Suburlan Areas to the South and South East of Calcutta required greater attention and extensive development schemes were undertaken. Several open spaces and squares have been made in various parts. Insanitary tanks requiring approximately 2 erores 6 it of earth have been filled up Russa Road which forms the southern approach to the town has been widened to 150 it for a length of one mile and 100 ft for a length of another mile. It now gives a most pleasant drive from Chowringlice to Tollygunge To improve the drainage of this area a 100 ft wide Last to West road, from Ballygunge Rallway Station to Chetla Bridge, and for recreation an artificial lake of 167 highas with adequate grounds has been completed

Another small lake has also been completed and a road is being constructed round it to link up with the road surrounding the main lake The road round the main lake has been surfaced with asphalt and lighted with electricity and is much frequented in the evenings Sites for Club houses adjoining the main lake have been to be attractively laid out with an island to storied tenement buildings containing 252 which the public will have access by means of lettable rooms were built in Wards Institution a footbridge The Calcutta Tramways Co Street for persons of the poorer charges The Calcutta Tramways Co Street for persons of the poorer charges The Calcutta Tramways Co Street for persons of the poorer charges The Calcutta Tramways Co Street for persons of the poorer charges The Calcutta Tramways Co Street for persons of the poorer charges The Calcutta Tramways Co Street for persons of the poorer charges The Calcutta Tramways Co Street for persons of the poorer charges The Calcutta Tramways Co Street for persons of the poorer charges The Calcutta Tramways Co Street for persons of the poorer charges The Calcutta Tramways Co Street for persons of the poorer charges The Calcutta Tramways Co Street for persons of the public will be public the public will have access by means of lettable rooms were built in Wards Institution at the public will be publi Ltd, have now extended tram tracks from Russa Road along New Sewer Road to Ballygunge Station

The Board of Trustees have framed a scheme for the extension southwards of Lansdowne Road which has received Government sanction and acquisition of land is in progress, the Board in pursuance of its policy of carrying out schemes in the centre of the town and in the suburbes simultaneosulv, so as to have an adequate supply of suburban sites for residential buildings to meet the needs of those displaced from overcrowded areas in the centre the town has also framed a scheme known as Scheme to AXXIII for the improvement of another section of the undeveloped area between Russa Road and the Lake District This too has received sanction of Government and land acquisition is in progress

To the east of the city, several new roads have been constructed in Scheme No VIIIC (New Ballygunge Road Park Circus to Old Ballygunge Road) They are now open to traffic, and the majority of them are surfaced with asphult Arrangements have been made for lighting the roads with electricity. The development of Calcutta east of Lower Circular Road, between Park Circus and Middle Road Lutally, is a pressing need, but the work can only proceed slowly in small sections. The Trust in the execution of this scheme cannot ignore the bustee dwellers, who are pushed further east, as the development from bustce conditions to blocks of masonry buildings proceeds utilisation of highly-improved lands for bustce purposes is not in economic proposition, but at the same time, it is necessary to provide the essentials of similation for the working claser B

The linking up of Amherst Street with London Street by a broad thoroughfare has commenced The Trust is constructing a large park near Park Circus, Scheme No VIII, known as Lastern Parl, measuring 65 bighas It will have a large playing field for football and tennis

The public squares sested in the Calcutta Corporation in 1911 had a total area of about 96 acres In 1912, Mr Bompas, the Chairman of the Irust, pointed out that in the ratio, riz, about 9 per cent of its public open spaces which measured about 1,250 acres (including the Maldan, the Horticultural and the Maldan) to the transfer of the spaces. Zoological Gardens) to its total acreage, Calcutta was almost on a par at that time with London possessing 6,675 acres of public parks or gardene, while its percentage exceeded that of New York, Berlin and Birmingham But about 1,000 acres of Calcutta's 1,250 was accounted for in the Maidan and new open spaces in other parts of Calcutta were an urgent need. Up to date the Trust had added (including the new lake at Dhakurla)-another 250 acres

Lastly for the housing of the displaced population the Trust has undertaken on a large scale the following schemes -

found, however, that the persons displaced preferred to take their compensation and migrate to some place where they could erect bashe of Jav, Mad misigit, mesigit, masigit - Mac, Bug masigi 1

Schuchardt derives misigit from Portuguese, although the word in its origin is the Arabic masnid

[Yule believes that the probable course which masjid took in getting evolved into the Anglo-Indian mosque is as follows (1) in Span mezquita, mesquita, (2) Port meschita, moschea. French (old) mosquete, mosquée, (3) Eng mosque This is more or less also the view of the O E D

Sir George Oxinden, in a letter from Surat, dated 28th January, 1663, addressed to the Directors of the East India Company, says ' Hearthey ('Sevagy's men') had taken their randayous in Muskeett or Moore Church " (Foriest, Selections, Home Series, Vol The influence of the 25) Portuguese word on muskeett appears to be unmistakable

MESTICO

Duarte Barbosa uses mes quita of a Hindu shrine 1, and owing to a similar confusion Faria-y-Sousa speaks of a 'Pagoda of Mecca ']

Mestico (a half-caste) It is also used Konk mistís as an adjective mistis bonchurdi, the bulbul, or the eastern song-thrush, Iros jocosus -Hindust mastisa —Anglo-Ind mestiz. mastisa. mustees.[mustechees]—Indo-Fr métis?

1 [The Bramenes and also the Baneanes marry one wife only their weddings they have great festi vities which continue for many days

On the day appointed for their re ception the bride and bridegroom are seated on a dais, they are covered with gold and gems and jewels and in front of them they have a mesquita with an idol covered with flowers with many oil-lamps burning around it" Hak Soc, ed Dames Vol I, p 116]

2 "After this victory (at Diu) the Governor gave orders that all the mestiços who were there should be inscribed in the Book, and that par and subsistence should be assigned to Gaspar Correia, IV, p 574

"The least esteemed are the off spring of a Portuguese father and an Indian mother or vice versa, and these are called Metices, that is, Metifs, or mixed ' Pyrard, Vicuem, Vol II, p 32 [Hak Soc, Vol II p 38 1

["It's alsoe of very ill consequence that your Covenant Servants should

VIZAGAPATAM HARBOUR PROJECT

The question of creating a harbour at Vizaga- that dredging and reclamation work will take It patam to supply an outlet for a large area of is anticipated, however, that it will be possible fertile country adjacent to the east coast of to berth ships in the new harbour sometime in India, hitherto undeveloped, with considerable 1933 mineral resources and without suitable access to the outside world, was first formulated by the Bengal-Nagpur Railway Company That the creation of such a port would have bene ficial influence on this area was unquestioned, for it is pointed out that Vizagapatam, lying as it does in front of the only practicable gap in the barrier of the Eastern Ghats, is formed by nature to be the outlet of the Central Pro vinces, from which a considerable amount of trade has taken this route in the past, even with the imperfect communications, hitherto available. A necessary complement of the scheme is the construction of the proposed railway from Parvatipuram to Raipur which, with the existing coastline of the Bengal Nagpur Rallway would make a large and rich area tributary to the proposed port, and obviate the long and expensive circuit by Calcutta. A link would also be supplied in the most direct route to Rangoon from Europe by way of Bombay, while, from an imperial point of view, the possible provision of a fortified port on the long and almost unprotected stretch of coast between and almost unprotected stretch of coast between Colombo and Calcutta is held to be a consideration of great importance The lofty projecting headland of the Dolphin's Nose would offer facilities for this purpose

The Government of India with the approval of the Secretary of State and the Legislative Assembly, have sanctioned the construction of the new railway line from Raipur to Parvatipuram and the work is in progress. They have also decided to develop the port of Vizaga-patam under their direct control and the port has accordingly been declared to be a Major

The scheme for the construction and development of the harbour will be carried out by progressive stages according to the demands of trade The first stage, which is now in process of construction, consists of a wharf containing three deep water steamer berths, each of 550 feet in length and dredged to a depth of 30 feet, one of which is being equipped for mechanical loading of manganese ore and the other two with transit sheds, and a passenger waiting room will be provided in the vicinity for the convenience of Rangoon passengers In conti-nuation of this wharf a lightering berth and deep water moorings for three additional steamers will be provided

The estimated cost of the first section including equipment is about 309 laklis and the time required to complete it will depend on the period they have been in the past

The work is being carried out by a staff of engineers under direct charge of an Engineerin Chief who comes under the administrative clurge of an Administrative Officer for the development scheme, a post which is held ex office by the Agent of the B N Railway An advisory committee consisting of the above mentioned officers and representatives of the Local Government, the Vizagapatam port administration and the commercial interests concerned, has also been constituted to advise in the development of the harbour

Execulent progress has been made with the scheme and a considerable area of the inner harbour has already been dredged to a depth of 30 feet A large area of land has already been reclaimed and development roads have been constructed. The quay wall for the manganese berth and the produce berth is completed. The Rallway facilities in consultation with the Harbour are in course of being provided Arrangements have also been made with the Municipality for the supply of water to the harbour area during construction

In addition to the Suction Dredger, a Rock Breaker and Dipper Dredger is at work in the Entrance Channel removing the rock and hard overlay, and a Dragline Dredger for dredging such areas as can be reached from the shore

Although it is anticipated that the completion of the inner harbour and its approaches to the point where ocean going vessels can be admitted will not be until 1933, a sufficient depth of water has been available over the bar and right up to the quassince the end of 1930 thus permitting trade being transferrd to the new quays of the inner harbour Cargo is const new quays of the inner harbour Cargo is consiquently being carried between the quays and steamers lying in the roads by means of lighters and tugs. The effect of this change is that proper quays, adequate storage and proper railway facilities are available in place of the meagre facilities previously in force on the old wharf while the carriage of cargo between stramer and shore is effected by means of lighters of approximately 50 tons capacity instead of by surf boats with a capacity of only 24 tons per surf boats with a capacity of only 24 tons per boat. It is therefore, apparent that the facilities available for trade during this intermediate stage are substantially greater than

"In token of disparagement they call the Christians of these parts Franques, just as we incorrectly call them Mouros" João de Barros, Dec IV 11, 16

"I regard this word mouro in the acceptation in which the Portuguese of old regarded it, viz, as a synonym of Mohammedan, as denoting belief but not ruce" Conde de Ficalho Garcia da Orta e o cu tempo p 112

² The change of r into l in Pidgin I in his normal

[All Mohammedans without exception were called by the Portuguese Mouros or Moors this name of their nearest Moslem neighbours and one time conquerors was extended by them to all the followers of Islam, and from the Portuguese the use of this term, as synonymous with Mohammedan, passed to the Dutch and the English The use of the term in its comprehensive sense is well brought out by Barbosa (ed Dames, Vol I, p 119) "The Mouros of this kıngdom (Cambaya) are fan in complexion, and the more part of them are foreigners from many lands, scilicet Turks, Mamalukes, Arabs, Persians, Coraçones, and Targimões (Turcomans), others come from the great kingdom of Dely, and others of the land itself "

Yule says that the use of the word Moor for Mohammedan died out pretty well among educated Europeans in the Bengal Presidency in the beginning of the last century, or even earlier, but probably held its ground longer among the British

GROWTH AND ORGANISATION OF ENGLISH EDUCATION

An epoch in Indian educational history is marked by Sir Charles Wood's despatch in 16th Pechans list most notable feature was the emphasis which it laid on the importance of primary education. The old idea that the education imparted to the higher classes of soci is would fill or down to the lower classes was discorded. The new policy was boldly it to combat the ignorance of the people which country the instructions were created on lines to Public Instructions were created on lines which do not differ very materially from the Departments of the present day. The despatch since 1800 wherehe most of the available publie fun 's had been expended upon a few Govern ren' schools and colleges, and instituted a policy of grand in aid to private institutions. Such a system as this placid in all its degrees under efficient inspection beginning from the humblest elementary institution and ending with the university test of a liberal education would impart life and enemy to education in India, and lead to a gradual but steady extension of its benefits to all classes of people." Another feature of the despatch was an outline Another scatter of the despatch was an outline of a university system which resulted in the foundation of the Universities of Calcutta, Madria and Rombas three years later. The affiliating type of university then became the pivot of the Indian education system. It has undoubtedly been of value in several ways. It enabled Government to select recruits for its through the agency of its Colleges to develop backward places, it accelerated the conversion of Indians to a zeal for western education, and it cost little at a time when money was scarce. On the other hand, the new universities were not corporations of scho-lars, but corporations of administrators—they did not deal directly with the training of men, but with the examination of candidates, they were not concerned with learning, except in so far as learning can be tested by examination.
The colleges were fettered by examination requirements and by uniform courses, their teachers were denied that freedom which teachers should enjoy : and their students were encouraged not to value training for its own take but as a means for obtaining marketable qualifications. In certain important respects the recommendations in the despatch were not followed The Directors did not intend that university tests, as such, should become the sole tests qualifying for public posts, they also recommended the institution of civil service examinations. They did not desire the universities to be deprived of all teaching functions, they recommended the establishment of university chairs for advanced study. They were aware of the dangers of a too literary course of instruction, they hoped that the system of education would rouse the people of India to develop the rast resources of their country and gradually, but certainly, confer upon them all the advantages which accompany the healthy increase of wealth and commerce. The tions, they recommended the establishment of

encouragement of the grant-in-ald system was

advocated to an even greater extent by the I ducation Commission of 1882, which favoured the policy of withdrawing higher education from the control of Government within certain limits and of stimulating private effort. In theory the decision was correct, but in practice it was irretrievably wrong. In its fatal desire to save money, Government deliberately accepted the mistaken belief that schools and colleges could be mistaken belief that schools and colleges could be maintained on the low fees which the Indian parent could be expected to pay the course of time, an unworkable system of dual control grew up, whereby the Universities with no funds at their disposal were entrusted with the duty of granting recognition to schools and the Departments of Public Instruction were encouraged to cast a blind eve on the private institutions and to be content with the development of a few favoured Government institutions. There can be little wonder that, under such a system of neglect and short-sighteduces, evils crept in which are now being removed gradually by the establishment of independent Boards of Intermediate Education charged with the administration of the high school and intermediate stages of education

The Reforms of 1902-4

In 1902, the Universities Commission was appointed by Lord Curzon's Government, and its investigation was followed by the Universities Act of 1904. The main object of the Act was to tighten up control, on the part of Government over the universities, and on the part of the universities over the schools and colleges. The Chancellors of the Universities were empowered to nominate 80 per cent of the ordinary members of the Senates and to approve the election of the remainder, the Government retained the power of cancelling any approve the election of the remainder. the Government retained the power of cancelling any appointment, and all university resolutions and proposals for the affiliation or disaffiliation of colleges were to be subject to Government sanction. The universities were given the responsibility of granting recognition to schools and of inspecting all schools and colleges, the inspection of schools being ordinarily conducted. inspection of schools being ordinarily conducted by the officers of the Department of Public Instruction Permission was also given to the Instruction Permission was also given to the universities to undertake direct teaching functions and to make appointments, subject to Government sanction, for these objects but their scope was in practice limited to post-graduate work and research. The territorial limits of each university were defined, so that universities were precluded from any connexion with institutions lying outside those boun daries. Neither the Commission nor the Government discussed the fundamental problems of university organisation, but dealt only with of university organisation, but dealt only with the immediate difficulties of the Indian system They did not inquire whether the affiliating system could be replaced by any other mode of organisation, nor whether all schools might be oryanisation, nor whether all schools might be placed under some public authority which would be representative of the universities and of the departments. They assumed the per-manent validity of the existing system, in its main features, and set themselves only to improve and to strengthen it

ford testies I ducational Services -Until recently, the educational or and after in India consisted mainly of three erroles -(i) the Indian I duca tional Strike, (a) the Provincial I due ational Strike and (a) the Subordinal Discussional The Indian Districtional Service Se Isler came into existence as a result of the recommen dations made by the Public Services Commission of 1856, and in 1866 the Superior Educational Service in India was constituted with two divisions—the Indian Educational Service staffed by persons recruited in Ingland and the Provincial I ducational Service staffed by persons recruited in India. These two divisions were originally considered to be collateral and equal in status, though the pay of the Luropean recruit was ligher by approximately 50 per cent than the pay of the Indian recruit Gradually, however, status came to be considered identical with pay and the Provincial I ducational Service

In'l us of the Islinaton Com of 1912 to the Indian Educational year freel into a superior educational in Lall a typic throughout to Indian 11 - Proximilal I Incational Ser-** 1 and no little reported and a and refult controls with their Indian the trusferred to the superforms.

The responsible resulted in a control to high the superforms. fuer" hale rife in India It was then latel d wathat the proportion of Indians in this service chi II ca an ascrabe dipercent of the t fal etr with excluding the posts in Burma

In 1921 all r crultment to the Indian Liduca the sum are trumment of the maria assume the sum are transported as a result of the transport of the superior craft in India. The Commission is the control of that for the purposes of of the imment no further recruitment should le to be to the all India services which operate in trace fred fields. The per onnel required for the colorade of administration should in futur be recruit d by local flovernments' the tomaid in further recommended in regard to the question of the future recruitment of four prime that the will rest entirely with the first Government to determine the number of further who may in future be recruited In this matter the discretion of local Govern tions that be unfettered but we express the I use that Mini t re on the one hand will still * I to olt in the co-operation of Europeans in the t child if departments and that qualifed I drop ans on the other hand may be no le a willing to take vervice under local Governments than they were in the past to take service under the Secretary of State. As a result of the acceptance of these recommendations, the Indian I ducational Service is dying out and with the gridual retirement of its existing members the listory of the service which has had a brief but the record will be brought to an and The present organisation of education in the provinces is largely the work of members of this service, while in the sphere of higher education, it has trained many men of more than ordinary attainments

The n w Provincial Lalucational Services, which function under proxincial control as the sup rior chicationals rates, have been consti-tuted in most province. These schemes vary from province to province, but it may be gene-rally remarked that, while the rates of pay are not uniform they consist of two main classes-class I into which the existing Indian I ducational Services have been merged for the time being, and class II which may be said to represent the old Provincial Lducational Service

The existing Provincial and Subordinate Iducational Services in the provinces have been affected, more in some provinces than others, by the changes which have taken place since 1919 Communal interests have influenced recruitment, and in some places they have influenced promotions also, in a direction which has not always tended towards service contentment. But these results are the natural consequences of the devolution of control of education and power of recruitment to provincial and local authorities and will for some time continue to affect the efficiency of the Education Departcame to be regarded of inferior status to the to affect the efficiency of Indian I ducational Service Later as a result ments in the provinces,

Primary Education -The primary schools are mainly under the direction of the local boards and municipalities. In 1911, the late Mr G K Gokhale pleaded in the Imperial Legislative Council for a modified system of compulsors primary education, but Government was unable to accept the proposal mainly for financial reasons. In recent years, eight pro-vincial legislatures have passed Primary Fducasion is made for prolonging the period. Pro-tion Acts authorising the introduction of com-vision is also made in all the Acts for the exemppulsory education by local option Bombay led the way in this matter by a private Bill which was passed into law in February 1918. The other private Bills which followed were those of Bihar and Orless passed in February 1919, of Bengal passed in May 1919 and of the last of Procinces, passed in June 1919. Of United Provinces, passed in June 1919 Of the Government measures, the Punjab Act was passed in April 1919, the Central Provinces Act in May 1920, the Madras Actin December 1920 and the Assam Act in 1925 The City ! of Bombay Primary Education Act of 1920 extends generally the provisions of the 1918 Act to the Bombay Corporation also enabling it to introduce free compulsory education ward by ward Not content with this, the Bombay legislature passed a new Act in 1923 to provide for compulsory elementary education and to make better provision for the in the Bombay Presidency The Bombay and the United Provinces Acts apply only to municipalities, the Bengal Primary Education Act applies, in the first instance, to municipalities. applies, in the first instance, to municipalities, but is capable of extension to rural areas Bova only are included within the scope of the Punjab, Bihar and Orissa and Bengal Acts, while the Central Provinces Act is capable of extension to girls, and the remaining Acta are applicable to both sexes The United Provinces legislature passed a second Primary Education Act in 1926, viz, the United Provinces District Boards Primary Education Act It allows the District Boards to introduce compulsion within their areas All the Acts are drafted on very similar lines If a local body at a special meeting convened for the purpose decides by a two-thirds majority in favour of Government of India passed their orders in 1931

the introduction of compulsion in any part of the area under its control, it may then submit to Government, for approval, a scheme to give effect to its decision. The scheme must be within the means of the local body to carry out with reasonable financial assistance from Government Ordinarily the age limits of comtion of particular classes and communities and for special exemption from attendance in cases of bodily infirmity. Walking distance to a school is generally defined as one mile from the child's home The employment of children, who should be at school, is strictly forbidden and a small fine is imposed for non-compliance with an attendance order The Acts generally provide that, subject to the sanction of the local Government, education where compulsory shall be free The Madras Elementary Education Act of 1920 contained such provision, but it has recently been amended so as to allow fees to be charged in schools under private management situated in areas where education is compulsory, reserving however a number of free places for power pupils in such schools in areas where there are no free schools Such in brief are the ordinary provisions of the various

The Cr. I nive ally in India, that of ligiste. This are istal of, it is of colleges, stin tels netime several hindred mile apart and learned it better has a decally constituted central orn al tion, which determined the course of child conditions the examinations and exercise I a critid form of control over the ar lited elleres. There was nothing under the exitery to limit the number of in titutions afflited to a University, and for thirty years, facility in 1857 to 1917, the growing demand for urliers live for it is now me, not by the error of the or rew univer the but his enforcing the sire of the constituent colleges and by increasing their number. By 1917 this inflation had teen entried on so for that the composition of the original five universitie stood as follows -

University	College*	Scholars
Calcult	55	28,618
Domiters	17	8,001
Madras	53	10,210
Punjab	24	0,538
Allahahad	37	7,007

It had become obvious that further expansion on the same lines was no longer possible without regions loss of efficiency and the Government of and a very small number of additional numbers India had recognised in their resolution of 1913 appointed by the Senate A Committee was the necessity of creating new local teaching appointed by the Senate of the Calcutta University and residential universities in addition to the sity to consider a draft Bill for the reconstitution existing amiliating universities. The develop and reorganisation of the University but it had ment of this policy was accelerated by the strength of communal feeling and the growth of local and provincial patriotism, leading to the ertablishment of a number of teaching univers of the post-graduate department and connected sities The new type of universities has since innancial problems submitted its report in 1930 been strongly advocated by the Calcutta University Commission which has offered constructive proposal as to the lines to be followed in univer alty reform

Punjab -These 1370 Universities alone their old form still rcinin On the ! 27th March 1921 an amending passed by which the ceased to be the Chancellor of the Calcutta University and now the head of the provincial government is the Chancellor of each of the older universities The Vice Chancellor is nominated large elective element has been introduced in by the Government concerned. The executive body is the Syndicate which is now organised so the details of administration has been decentraas to include a larger educational element Over lised The affairs of the University are managed this body the Vice Chancellor presides, other members being elected by the Faculties, except the Director of Public Instruction who is a member ex-office The secretarial work is under the direction of the Registrar The legislative body is the Senate which consists of from 75 to 100 members, 80 per cent of whom are nominated by the Chancellor, the rest being elected by the Senate, or by its Faculties, or by the body of registered graduates The Senate University as its Visitor with certain emergency

is divided into I reulties, which are in most cases Cale tim, was forest in 1847. Petween 1847 those of arts, science, law, medicine, and engiend 1847 to be rew. University, at Isanday, noether. There is an oriental faculty in the PunMadric Teliam and All halad were added, Jab University alone. There are also Boxels of
These five it discribite were all of the affiliat. Studies, who endules are to recommend textbooks or books which a present the standard of knowledge required in the various examinations The newer universities differ considerably from the older univer ities in constitution

> Post graduate work—Apart from the neral tightening up of university control or its colleges, the chief feature of general OSIT university development since the passing of the Act of 1994 has been participation the universities in post-graduate teaching research. In Madras a small number and research of university profe sors have been appointed, In the Punjab the services of a certain number of temporary professors from overseas have been engaged. In Bombay a certain number of college professors and others have delivered lectures to post graduate students under the auspices of the University. But the most notable advance has been made in Calcutta, owing to the energy of the late. Sir Asutosh Mookerjee and to the liberality of Sir Tarak Nath Palit and of Sir Rash Behari Ghosh In 1916, a committee was appointed to investigate the matter In accordance with its report, new regulations have been passed by the Senate, whereby all post-graduate teaching and research in arts and science in Calcutta is now conducted directly by the University, though many of the college teachers have been invited to take part in the work Post-graduate councils in arts and science have also been constituted, which comprise all the teachers engaged in the work not submitted its final report at the close of the year 1929 30 Another Committee which was appointed to consider the question of the future

The University of Madras —This is one of the older universities—It has recently been reconstituted The reconstituted University while functioning as teaching and residential The Universities of Colcutto and the University in so far as the city of Madras is concerned, continues to exercise its jurisdiction over its mofussil colleges which remain affiding Act was linted tolt Theadministration of the University Governor General is in the hands of a Senate which has been so constituted as to include both those who are educationists and those who are connected with the actual business and commercial life composition Government control over all by the Senate through a body called Syndicate, while the Academic Council, another new body, has charge of the academic matters The affiliated colleges have till recently been entrusted to the care of a new organisation called the Council of Affiliated Colleges which has been abolished by the Madras University Amendment Act of 1929 The Governor-General of India has been associated with the

The University of D cen—With the mellication of the Partition of Penant in 1911 Daces cented to be the capital of the sparite province of Latern Pengal and Shortly afterwards the Government of India decided to etablish a university of Dicco and the Government of Bon, il appointed a committee to frame a scheme for the new University. The committee was instructed that the University should be of the teaching and re idential and not of the federal type, and that it should be a self-contained organi m unconnected with any colleges outside the limitof the city of Dacca. The committee which was presided over by the late Mr. R. (after wards Sir Pobert) Nathan presented its report later in the year. The report is of great, value and in it certain new principles are enunciated Great emphasis was attached to physical train ing and education and also to the tutorial suid nnce of the students. The University was to be very largely a State Institution, and prictically all its trachers and the e of its colleges were to be Government servants. Though the col leges were to be separate units, each with its scharate staff and buildings, they were to be linked together and with the University by a close form of co operation. The executive Body, to be called the Council, was to have very considerable powers, sulject to the sanction of Government. The Council, which was to be a large and representative body was to be the legislative authority, subject to the control of Government, and in other respects an advisory authority The total cost of the full scheme was estimated at 53 lakhs, but deducting certain sums which were available from other sources the net cost was put down to nearly 40 lakhs, exclusive of recurring charges. These were expected to involve a net total of about 61 lakhs annually Before the scheme thus ela | Rahimtoola Enquiry Committee

to I (which had received the Secretary of State's expetion) could be taken in hand, the war broke out. The Act constituting the Uni the sers to was passed in April 1920 and Mr. L. now Sir) P. J. Harton, O. I. was appointed the first Vice Chancellor. The Act has since teen amen led in order to make the Executive Com if the child authority of the University

Allgarh The Aligarh Muslim University — It was the aim of Sir Sved Ahmed Khan vian and to place the benefits of a liberal education within the reach of the Muhammadan community and in 1875 a school was opened which three years later was converted into the Muhammulan Anglo Orlental College, Aligarh The movement in favour of transforming this college into a teaching and residential university started, as early as the end of the last century. In 1911, during the visit of His Majesty the ning Imperor to India, Hi Highness the Aga hhan made an appeal which resulted in the collection of large subscriptions A draft constitution was drawn up and a consultative committee was formed. But the draft constitution was not approved by the scritary of State and on the question of the right of affiliating colleges outside All garli in particular, there was a sharp difference of opinion Government Inid down, as in the tits should not have the power of affiliating Moslem institutions in other parts of India

On October 15th, 1915, a meeting of the Moglem University Association was held at Alicarh, under the presidence of the Paja (now Midnarda) of Mahmudahad, when it was proposed that the meeting recommends to the Moslem University Loundation Committee the acceptance of the Moslem University on the lines of the Hindu University It was evident at the meeting that a large number of Indian Moslems were not prepared to accent a consti-tution for their university similar to that of the Hindu University

In April 1917, at a meeting of the Founda tion Committee the following resolution was paged -

"I hat this meeting of the Moslem University Foundation Committee hereby resolves with reference to the letter of the Government of India, I ducation Department, dated Delhi, 17th February 1917, D O No 68, that the Committee is prepared to accept the best University on the lines of the Hindu University It further authorises the Regulation Committee appointed at its Lucknow meeting, with the President and Honorary Secretary of the Moslem University Association as its ex-officio members, to take necessary steps in consultation with the Hon the Tducation Member for the introduction of the Moslem University Bill in the Imperial Legislative Council "

The bill referred to above was ultimately Introduced into the Council and was passed in September 1920 The Act came into force on December 1st, 1920

The University has lately been overhauled in accordance with the recommendations of the Half a dozen etymologies are suggested for this word,

The Annamalai University, Chidambaram Madras Presidency -This is a teaching and residential Universit incorporated by an Act of the Legislative Council of the Madras Presi denes (Madras Act No I of 1929) It owes its foundation largely to the generosity of Sir Annamalal Chettivar who has handed over to the University certain institutions established and maintained by him at and near Chidambaram with all the properties attached thereto and has also given a sum of Rs 20 lable towards the creation of an endowment fund. The aim of the University is to encourage higher education, an I research in the Tamil districts of the Madras Presidency The Administration of the Universits I- in the hands of a Syndicate, a Senate, a Finance Committee and an Academic Council The Act provides for a continuous connection with the University of Sir Annamalal Chettiyar and his successor, as the Founder of the Univer Governor General is the Visitor of the University The Governor of Fort St George is the Chancellor of the University and the Vice Chancellor is appointed by the Chancellor from a panel of three persons recommended by the Founder

Inter-University Board —The idea put forward by the Indian Universities Conference in May 1924 for the constitution of a central agency in India took practical shape and an Inter Uni versity Board came into being during 1925 Twelve out of fifteen universities joined the Board Its functions are —

and a bureau of information,

- (b) to facilitate the exchange of professors.
- (c) to serve as an authorised channel of comuniversity work,

- (d) to assist Indian universities in obtaining recognition for their degrees, diplomas and examinations in other countries.
- (e) to appoint or recommend, where neces are, a common representative or representatives of India at Imperial or International conferences on higher education,
- (f) to act as an appointments bureau for Indian universities.
- (a) to fulfil such other duties as may be as Igned to it from time to time by the Indian Universities

I ach member University has to make a fixed annual contribution towards the expenses of the Porrd

The meetings of the Board are held vearly The Board consists of one representative of each of the member Universities and one representative of the Government of India

The Board has not yet had much influence on University policy in India but it has done a con iderable amount of useful work in collecting information and in stimulating thought regarding current University problems al o put certain universities into touch with di tinguished teachers from abroad who were available for lecturing at University centres and arranged for two sectional conferencesthe one of representatives of the five universi-ties in the United Provinces and the other of representatives of the two universities in Bengal In addition to the Hand book of Indian Universities, the Board has issued a pamphlet entitled "Facilities for Oriental Studies and Research at Indian Universities"

Education of Indian Women and Girls-There is still a leeway to be made good the influences which operate against the spread of education amongst the boys are reinforced in the case of women by the purdah system and the custom of early marriage

Arts colleges, medical colleges, and the like admit students of both seves, and a few girls attend them The Lady Hardinge Medical College for Women at Delhi gives a full medical course for medical students. The Shreematl Nathibal Damodher Thackersey Indian Women's University was started some ten years ago by Professor Karve It is a private institution and is doing good ploneer work

The All India Women's Conference on Educational Reform, which holds its meetings annually and has constituent conferences established all over the country, is also doing much useful work. Recently, an All India Women's Education I und Association has been established in connection with this Conference. This association appointed in 1930 aspecial committee. to enquire into the feasibility of establishing a central Teachers' Training College of a specialised Home Science character This committee reported at the end of the year recommending (a) to act as an inter university organisation the establishment of such a college ab-olutely new lines which would synthesise the work of existing provincial colleges by psychological research" and the Governing Body of the Association supported the proposal munication and facilitate the co-ordination of at the Annual General Meeting of the Association which has adopted it

called by Portuguese and other European travellers 'varela' Malay barhāla, 'an (from idol'). and Faria-y-Sousa (1674) speaks of a 'Pagoda of (Hobson-Jobson)Mecca? There is a similar confusion in Barbosa in one passage in which he calls a Hindu shrine a mesquita, 1e, a mosque' (See under mesquita)

The pagode or pagode de ouro ('gold pagode') as it was sometimes called, was current in S India, and was originally equal to about 360 to 400 reis, but later on was worth as much as 12 reiafins (q v) or 1,200 reis. The quotations above from Bowrey and Hedges will show how the rate of exchange of this coin kept on constantly shifting

Before concluding, it would be useful to review the different etymologies of 'pagoda' that have been offered and to give reasons for their rejection

1. The Chinese words paotah, 'precious pile', and pohkuh-t'ah, 'white-bones-pile' This does not find favour at present with scholars of Chinese language and culture Yule very properly says that anything can be made out of Chinese monosyllables in the way of etymology

- The Portuguese pagão ('pagan'), which Yule thinks may have helped to facilitate the Portuguese adoption of $pag\tilde{a}o$ But pagodapagode would be a very singular mutilation of the Portuguese word in order to describe very different objects so Again, the term pagão occurs but rarely among the early Portuguese writers, who use the word gentio(q v) in this sense
- The Sinhalese dágoba, 'Buddhist sanctuary' believed that the transposition of the syllables of this word gives pagode, this is not so, it gives bágoda But dágoba was not in use in Ceylon in the time of Duarte Barbosa (1516), nor had the Portuguese then any intimate contact with that The Portuguese first ısland came to be acquainted with Buddhist temples and monasteries in Indo-China which they then called bralas (from the Målay barhāla), which afterwards became corrupted into rarelas
- 4 The Persian but-kadah, 'idol-temple', proposed by

vernacularity of the Malay word is open to doubt, nor is there evidence to show that it was current in those parts before the Portuguese arrival, again there are indigenous synonyms for palanquin, viz, kremun, tondu, usongon, joli which is Indian

The form usually employed ın Malayalam ıs pallakku, as in Tamil, or pallakki, as in But Gundert Kanarese pallankī, registers which appears to have the savour of Portuguese influence But Tulu has pallenhi, side by side with pallali, which squares neither with the Malayalan pallanki, nor the Port palanquim, but with the English 'palanquin' Moreover, the influence of Tulu on Portuguese is nil It is extraordinary that none of the Indian languages should have preserved the original nasal which is found in palang, 'bed', of which pālkī or pallaki have all the appearances of being diminutives, in the sense of couch or little hed? Normally, the diminutive should have been palangi or pallanli And in fact, Hindustani, Marathi and Gujarati have palangdī, as a diminutive used depreciatively, in the sense of 'a small and ordinary bed'

But Shakespear does not derive the Hindust pālkī, as he does palang, immediately from the Sansk palyanka, but from the Hindi pālakī Now, Hindi has also side by side with it the form nālakī, which appears to be due to the transposition of the medial nasal From which it may be conjectured that the denasalization took place in Hindi and from it was the other transmitted to Indian languages

The elimination of the nasal may also be explained by the law of least resistance, in view of the fact that the a which follows the l is surd in some of the Aryan languages and silent in others. The Sansk mainsa, 'flesh', becomes in Konk and colloquial Mar mās For the same reason, the Sansk ānanda is pronounced in Konk anad, 'glory'

Even if it were taken for granted that the n of the Portuguese word was not etymological, it is not neces-

Cândido de Figueiredo mentions pâmpano ('fish') as a term hithertoinedited and gives it as the synonym of pampo Vieyra says that "it is a fish shaped like a boar-spear" I do not know whether the word is in vogue in Portugal The Indian fish resembles a vine-leaf, from which it derives its name

The words $p\bar{a}mplit$ and $p\bar{a}plist$ appear to have as their direct source the Anglo-Ind 'pamplet'

[Pampano in Portuguese means primarily 'a vine-leaf' The OED derives 'pomfret' from the Port pampo (see above), French pample, and surmises that a diminutive pamplet may have become pamphlet, pomphlet, and finally pomfret]

Pangaio (a two-masted barge with lateen sails common in East Africa and in India) Konk pangáy — Malayal pangáyai — Kan, Tul pangayu

| Mal penganu |

The word is of African origin Almost all the old Portuguese writers suggest the same source 1 P Vitor Cortois mentions pangaya in his Portuguese-Cafre-Teto Dictionary

[Yule and Burnell register the word under the forms 'pangara, pangara', and give citations in support of these and other forms, including the Port pangaro]

? Pantalona (pantaloons, trousers) Mal, Sund telana, tyalana, tyrlona — Jav, Mad tyelônô — Bal chelana — Bug chalána

Dr Heyligeis explains that the first syllable dropped out because it was regarded as an indifferent prefix, as happens with vernacular words. Gonçalves Viana has doubts as regards the word pantalona

fish From Letter of Allen Catchpole, in Hedges Diary, Hak Soc, Vol II, p ccexxiv]

^{1 &}quot;Francisco Barreto left for the coast with the largest number of people in his fusta (qv) and pangaios and came to the city of Quiloa" P Mon claio (1569), in Jour Geo Soc Lisb, 4th ser, p 497

[&]quot;The pangayos of Moçambique should halt at Calimane, as Sena was very unhealthy" M Godinho Cardoso (1585), in Hist tragico marit, IV, p

[&]quot;It was a rough sea, and lifted the vessel (which on this coast is called pangalo) Fr João dos Santos (1609), Ethiop Or, II, p 191

In arts colleges In high schools Middle Schools but cast into Lingots in the form of a small Boat, which at Macao are called Paes [Port Pães] or Loaves of Gold or Silver" This is a meaning of pão which I do not find mentioned in the Portuguese dictionaries I have consulted]

¹Papa (in the meaning of 'the Pope') Konk páp-sāheb Sāheb is 'Lord' -Mar páp Pāpāchá adhikár, papacy — Beng pāpá—Sinh pap-unnánse Unnanse is a term of respect 'reverend, venerable' - Tam páppa, páppu, páppanavar (moie respectful) -Malayal páppà -Tel pápa -Kan pápu -Kamb santa pap -Mal sánto pápa -Tet. Gal pápa — Malag papa — Ar bābá Bābāví, papal other languages of India employ the English form 'pope'

²Papa (poultice) Konk páp —Sinh páppa —Jap pappu

Papá (papa, daddy) Konk pāpá (lus and only among the Christians of Goa) —Mar pāpá --Mal papa (Schuchardt) —Bug pápang —Mol papá (Castro) —? Malag papa — | Chin pá-pá |

Mole-worth thinks that the

Marathi $p\bar{a}p\acute{a}$ is a variant of the vernacular $b\acute{a}p$ formed by children

Papaia (bot, Canca papaya, Linn, the papaw tree and its fruit) Konk papáy (the tree and fruit) — Mar popáy, popayá, phopai — [Gu] papaiya, bapaiyo] — Hindi, Hindust, Beng papayá — Tam pappai — Malayal pappáyam — Tul pappáya, papaw — Indo-Fr papaye — Mal papáya, peppáya, pápua — Nic popai — Malag papai.

It is an American term, used in Cuba, probably introduced by the Portuguese together with the plant, as the Kanarese name parangi-hannu (Frank or Portuguese fruit) seems to indicate Linschoten (1597) thinks that it came from the Philippines to Malacca and from thence to India In Siamese

^{1 &}quot;There is another fruit papayas (in San Domingo) which in Brazil we call mamões, and they could well be called melons from their appearance" (1596) Gaspar Afonso, in Hist tra gico marit, VI, p 49

^{&#}x27;There is another tree called papaeira which produces fruit which goes by the name of mamões in America, and of papaias here" Fr Clemente da Ressurreição, II, p 391

'pawpaw', but how to account for the other forms? Herbert (1630) speaks of 'pappaes',1 and Peter Mundy (in 1636) of 'papaes', 2 but Fryer (1673) uses the word 'papaw',8 which, it might safely be concluded, must have come into after Peter Mundy's vogue time]

In Brazil the plant has another name-mamoeiro, from mama, 'pap', because of the fruit's resemblance to woman's breasts

Papuses ('a sort of sandals') Sinh pápus Also used in the Portuguese dialect of Ceylon, papús, boot, shoes pāpásum —Kan ---Tel pósu — Tul pápasu, pāpásu

contend to indulge the Taste " Hak Sec, Vol I p 64]

It is derived from the Persian pā-push, 'footwear' See Goncalves Viana, Apostilas

The Arabs who have no p converted pāpush into bābūsh, which went over to France and became babouches, 'slippers', to return to Portugal in the new form babuche, which is etymologically not as correct as the older papus, pl papuses]

Par (pair) Konk par, vern terms zôd, zodó, zodí, zunvlí -Mal paris (from the Port plural form pares) Caus-sa paris, a pair of shoes (Haex), vern terms 10do, klamin

Para (piep, for) Mal para (Haex) —Tet vern para, term ató

Parabêm (congratulation) Gal parbém —Tet, Konk parabem

Jap Paraiso (Paradise) paraizo (arch)

[Parau, paró (a small vessel used in war or trade, compared by European writers to the Anglo-Ind galley or foist) prow, parao, praw, etc 1

^{1 [&}quot;Pappaes, Cocoes, and Plantains, all sweet and delicious Ed1665, p 350, in Hobson-Jobson]

² ["For to my Knowledg it (Cocotree) affoardes Meat, Drink good Cordage Made of the outtward rinde of the Nutte, which in Clusters grow outt att the toppe on a sprigge, as Doe allsoe the Papaes in a Manner, the tree Differing in leaves and height " Hak Soc, Vol III, pt 1, p 58]

^{3 [&}quot;Here (in Johanna Town) the flourishing Papaw (in Taste like our Melons, and as big, but growing on a Tree leafed like our Fig-tree), Citrons

^{1 [&}quot;1504 —He was bringing with him many men and lxx or lxxx paraaos each with it mortars " Letters of A de Albuquerque, III, p 250, in Glossario]

largely into the early currency of Goa and the name of which afterwards attached to a silver coin of their own coinage) Anglo-Ind pardao, pardaw, perdao, etc 1

1 ["All this merchandize (in the city of Vijayanagar) is bought and sold by pardaos gold coin made in certain towns of this kingdom. The coin is round in form and is made with a die. Some of them have on one side. Indian letters and on the other two figures, of a man and a woman, and others have only letters on one side." Barbosa, Hak. Soc., ed. Dames, Vol. I, p. 203 sqq. See editor's note.]

["And if there is any one who does not know what a pardao is, let him know that it is a round gold coin, which is not struck all over India, but only in this kingdom (of Vijavanagar), it has on one side two figures, and on the other the name of the king who had ordered the coins to be struck

it is a coin which circulates all over India, and each pardao, as I have said, is worth 300 reis " Chronica de Bienaga, p. 116]

["The principall and commonest money is called Pardaus Xeraphins, and is silver, but very base, and is coyned in Goa. There is also a kinde of reckoning of money which is called Tangas, not that there is any such coined, but are so named onely in telling, five Tangas is one Pardaw or Neraphin badde money Linschoten, Vol I. Hal- Soc, p 241 In the passage that follows the above citation, Lins-

were two kinds of the pardau de ouro vardaus ('gold pardao') of the value of 6 tangas or 360 reis, and the pardau de prata ('silver pardao') worth 5 tangas or 300 reis The former issued by Indian Rajas were already in circulation in Western India in the time of Albuquerque, and were known in the vernaculars as varāha or varā, the Sansk name for 'the boar', one of the incarnations of Vishnu. whose effigy they carried The Sansk pratāpa, 'majesty, splendour,' was the legend on some of these coins, and referred to the sovereign who had ordered the coins to be struck, this pratāpa would be corrupted by the people into partap, or pardap, and would become transformed in the mouth of the Portuguese very naturally

choten gives a very complete account of the Goa currency in his time]

Patacho (a pinnace, a two masted sailing vessel) Malayal pattáchu (Gundert)

Patamar ('a courier', Orta, a letter-carrier, a kind of lateen rigged ship) Anglo-Ind pattamar, patimar 1—Indo-Fr patemar, patmar

["Even if no ship were to go from this coast this year, but only a Patamar (i.e. a small vessel) I would confidently sail in it, placing all my trust in God." St Francis Xavier, in Missões de Jesuitas no Oriente by Câmara Manuel, cit in Glossario]

["Presentlye after this, there came a pattamar with letters from Agra, certifyinge us of the death of Mr Caninge" Nicholas Withington (1612-16), in Foster, Early Travels in India, p. 202]

["You will tell us there is great Difference between East India and Lugland, which is true, but peradventure upon due Consideration they may find a way to make something of this and carry the Company's Letters cheaper, safer, and speedyer then now

According to Yule and Burnell, the word in both acceptations is the Konkani path-már, 'a courier', at present not used in the first sense, and in the second, which is more modern, usually employed in the form of pātmārí [The Konk pathmár is lit equivalent to 'killroad or road-killei' In this sense it is not used at present,

they are sent by your Pattamars, except the Company pay all the charges of their own and other people's Letters, which is most unconscionable" From Court's Letter to Fort St George, 6th march, 1694 5, in Hedges, Diary, Vol II, p. exix

["Running on Foot, which belongs to the Pattamars, the only Foot posts of this Country, who run so many Courses (los, a measure of distance) every Morning, or else Dance so many hours to a Tune called the Patamars Tune" Fryer, East India, Hak Soc, Vol I, p 278 sqq]

["Just as the time was approaching for my departure to Cochim (from Goa), a Courier (called Patamar in these parts) was received from Bengala" Manrique, Travels, Hak Soc, Vol II, p 6]

["And not being satisfied with our evading his (Sir Gervase Lucas's) discourse about their building fortifications hee sent the Pattamarr that brought his letters wth his Broker home to our howse to justifie it" Forrest, Selections (Home Series), Vol I, p 216]

^{1 &}quot;The news of which disaster soon became known through patamares, who are men that make big journeys by land" João de Barros, Dec I, viii, 9

[&]quot;He soon despatched Patamares (who are couriers) by land to San Thomé" Diogo do Couto, Dec V, v 6

[&]quot;He wrote that he would get into a small vessel, one of those which are called patamares, and cross the bay" Lucena, Bk III, ch 7

takka gediya—Tam pattaká, vattakei—Malayal vattakka—

"The melon of India, which we (the Portuguese) here call pateca" Garcia da Orta [Col xxxvi] "Melons of India or patecas which must be what to day we call melancias [water melon or Cucurbita Citrullus, Linn " Conde de Ficalho, Coloquios, Vol II, p 144 [Ficalho, who is surprised that Orta should speak of the pateca as though it were unknown in Portugal, identifies it with the melancia, which he says was cultivated from immemorial times in the Mediterranean basin, and must, therefore, have been also cultivated in Spain and Portugal To this Dalgado, in his Gonçalves Viana e a Lexicologia Portuguesa, savs

"Inspite of Ficalho's opinion to the contrary, it can be seen from António Tenreiro, from Garcia da Orta, and others that the water melon was then little cultivated in the Iberic peninsula The name which the Portuguese gave to the fruit in India is pateca, from the Ar baffikh, which they probably heard used by the Arab traders in Malabar As pateca, the fruit is even to day known in the Portuguese speech current in Asia Frei João dos Santos, however, speaks of the melancia ('water melon') as a fruit, very common, in his time [1608], and it is, therefore, not improbable that the Portuguese who had sampled the fruit in India, had either introduced it into Portugal or extended its cultivation there, and that the popular form balancia was a corruption of the cultivated term melancia Notwithstanding the fact that the Spaniards had sandia, a term received, according to Dozy, Tel batéka — | Indo-Fr pastèque — | ² Siam tēng — Mol. pateka, bateka — Tet, Gal pateka, vern term babuar

The Port word is from the Arabic battikh or bittikh

Pato (gander, drake) Konk pát, drake, vern terms háms, rājháms—Or, Beng pátihams—Ass pātihámh.—Sinh. pāttayá Pātti, goose—Tam vattu—Malayal páttu, drake—Tel bátų Pedda bátų (litbig drake'), gander—Kanbátu—Tul battų—Siam pet. Pet pã, wild duck—Tet, Gal pátu

from the Ar sindiya, and derived from Sindh in India, it cannot be said that they had given the fruit to the Portuguese, because, had they done so, its name would have accompanied it, and in Portuguese there is no word for it corresponding to sandia According to the testimony of Pyrard de Laval, Bernier, and Tavernier, the fruit was also unknown to the French, their word for it pastèque being a corruption of pateca and imported from India"]

"Melons, pumpkins from Portugal and from Guinea, patecas, comba lengas and biringelas" Gabriel Rebelo, Informação, p 172 [Combalenga is a species of Indian pumpkin Biringela is the same as beringela, q v]

"They are nothing but the bran of the millet and the rind of patecas, which are like our water-melons" João dos Santos, Ethiop, Or, II, p 182

Pāvlist (l us at present).—
Anglo-Ind Paulist (obs) 1

Many legends of a mythic character are current in Goa in respect of the old Paulists ²

[The Jesuits were so called in Goa from the famous College of St Paul (consecrated on the 25th January, 1542, the day of the conversion of St Paul) which they had there, and the name spread all over India with the extension of the missionary work of the order

The Church of St Paul, completed in 1602, was the seat of the Jesuit College at Macao, this church, according to the testimony of Père Alexandre de Rhodes (Voyages et Mis-

sions, ed 1884, p 56, in Peter Mundy, Travels, Hak Soc, Vol III, pt I, p 163, n 2), was the most magnificent that he had seen, with the exception of St Peter's at Rome, and from this Church and College the Jesuits in China derived the appellation 'Paulists', of which they appear to have been quite proud 1

Yule says that the Jesuits "are still called Paolotti in Italy, especially by those who don't like them"]

Pavão (peacock) Mal pavam

of the 'guava' in Hindustani, and amrud is the name of the 'pear' in Persian In Hindustani and Bengali it is also spoken of as the saphari am (lit the 'journey mango' or, rather, 'foreign mango', see Hobson-Jobson, sv ananas), corrupted into supārí ám, 'areca-mango'

In Burma, the guava is called ma-la-kah-thi, 'the Malacca-fruit', and the guava-tree ma-la-kah-bin Siamese has lùk fárāng, 'fruit European', and ton fárāng, 'tree-foreign' (fárāng=Frank)

The plant is indigenous to America and was introduced into India by the Portuguese, who, owing to its similarity, called the fruit pera, ('pear'), just in the same way as they called the fruit of the bananatiee figo ('fig')

In Africa also the term pera is used to denote the 'guava'

In Konkani, perad (from perada in the Portuguese dialect of Goa) is a conserve prepared from guavas See quaba

[A Siddiqi (in *JRAS*, July, 1927, p 560) says "It is

only in Urdú and also in certain other Indian languages that the name amout is applied The reason is quite to quava clear guava became perfectly naturalised in India, where thrived The nevei pear ın shape and resemblance colour of guava to pear obviously led to the adoption of amuth for "guava"-most probably by the Persians or Moghuls naturalised in Northern India In the South-Indian Prob- جام Urdú a "guava" is ably on account of its resemblance to a pear-shaped bowl".

Marathi and Gujarati use jamb and jam for the 'guava', perhaps because the shape of the latter is similar to that of the Eugenia jambos (Hindigulab-jāman, 'rose-jāman'), which in its turn is in form like an apple or a pear]

the bird is not a native of India, and its name peru is an exotic. The word does not exist in Marathi and Gujarati. Hindustani has, side by side with peru, sutra-murgh (lit 'camel-cock, ostrich') and filmurgh (lit 'elephant-cock') from Persian. The Dravidian languages describe the bird by means of various compounds, some of which assign to it a foreign origin.

[The view generally accepted that the domestic fowl all over the world had been derived from a bird met with it in its wild state in India had very likely a great deal to do with assigning the turkey also to India That the turkey was an exotic and introduced into India by the Portuguese is borne out by the description of the bird from the pen of the Emperor Jahāngīr given below 1 The turkey, domesti-

cated by the people of Mexico and Peru, was introduced into Europe by the Spaniards, soon after the discovery of Mexico?

[? Pinaca (the residue that remains after oil has been expressed from seeds or coconuts, the word is current in Asio-Portuguese)

Anglo-Ind poonac 1

The Port form shows the influence of Konk $pin\bar{a}k$ (Sansk $piny\bar{a}ka$) the Anglo-Indian form appears to be

directly taken from the Tamil punnakku (Whitworth gives it as pinnakku) or the Sinh punakku and not influenced by Portuguese dialects, though pinaca occurs much earlier than poonac in the writings of European travellers. The word is not mentioned in Hobson-Jobson, but is found in the OED]

Pinchar (to push, to thrust)
Mal picha, to fling or throw
down

Used in the same sense in the Portuguese dialects in Asia

[Pinda (Arachis hypogaea, ground-nut) Anglo-Ind pindar 1 Not in Hobson-Jobson

The Portuguese word is an adaptation of mpinda used in Congo The OED says that

^{1 [1786 —&}quot;What is left after the oil is expressed from coco nut is Pinàca, which is useful for fattening pigs, ducks, and hens" Fra Paolino, Viaggio, p 116, in Glossario]

^{[&}quot;The following are only a few of the countless uses of this invaluable tree (the palm) The oil, for rheumatism, for anointing the hair, for soap, for candles, for light, and the poonak, or refuse of the nut after expressing the oil, for cattle and poultry" Tennent, Ceylon (1859), Vol I, p 109, n]

^{1 [&}quot;Sometimes they (the common people of Surat) Feast with a little Fish, and that with a few Pindars is esteemed a splendid Banquet. These Pindars are sown under ground and grow there without sprouting above the surface, the Cod in which they are Inclosed is an Inch long, like that of our Pease and Beans Some of these I brought for England, which were sown in the Bishop of London's Garden, but whether they will thrive in this Climate is yet uncertain "Ovington, Voyage to Surat, OUP, p 50]

BOY SCOUTS.

The Boy Scouts movement, initiated in Fugland by I ord Raden Powell (the Chief Scout), has sprend widely in India both among Europeans and Indians The Vicerov is Chief Scout of India and the heads of Provinces are Chief Scouts in their own areas. The aim of the Association is to develop good citizenship among hove by forming their character—training them in habits of observation, obedience and self rehance—inculcating lovalty and thoughtfuiness for others—and teaching them services useful to the public and handlerafts useful to themselves.

It is confidently anticipated that in the Boy Scout Movement will be found a natural means of bridging the gulf between the different races existing in India The movement is non-official, non-military, non political and non sectarian its attitude towards religion is to encourage every boy to follow the faith he professes. Every boy admitted as a Scout makes a three-fold promise to do his best (1) to be loyal to God, King and country, (2) to help others at all times and (3) to obey the Scout law The law referred to lays down—

- 1. That a Scout's honour is to be trusted .
- 2 That he is loval to God, King and country, his parents, teachers, employers, his comrades, his country and those under him,
 - 3 That he is to be useful and to help others
- 4 That he is a friend to all and a brother to every other scout, no matter to what social class the other belongs.
 - 5 That he is courteous.
 - 6 That he is a friend to animals,
 - 7 That he obeys orders,
- 8 That he smiles and whistles under all difficulties.
 - 9 That he is thrifty,
- 10 That he is clean in thought, word, and deed

The Portuguese dialect of Malacca has pinin, and Cape Dutch pierentje²

Kacha-piring, picha piring (lit 'broken-plate'), in Sundanese, is the name of Gardenia florida

Rigg says ' Piring, plate, big plate such as is used by Europeans The small Chinese plates which are used by the natives are called pinggan" But Swettenham on the con trary in his English-Malay dictionary gives Saucer, pung, Plate, pinggan Favre gives to both words the meaning of "soucoupe ('saucer'), assiette ('plate')'' Bikkers mentions piring, 'plate', and piring teh (lit 'plate for tea'), 'saucer' | Wilkinson gives it meanings of 'plate, the saucer'

The word pines appears to be originally a Malay word, adopted by the Portuguese and taken to India together with the word chá But the termination es or is offers some difficulty, because piring ought normally to give pirim Per-

^{1 &}quot;For a Portuguese not to wish to pay for the transport of a pipa of wine!" Damião de Góis, Chron de D Manuel, IV, ch 18

[&]quot;He handed over the cooper's workshop to Francisco de Mello Pereira, so that he might get him to turn out bar rels, large wooden bowls, pipas" Diogo do Couto, Dec VI, viii, 5

^{2 &}quot;A dozen pyres from India, of ordinary quality, each valued at 80 rcis" (1613) A Tomás Pires, Materiaes, in Jour Geo Soc Lisb, 16th ser, p 745

^{&#}x27;A pires of silver, gilded over"

Ibid, p. 754

[&]quot;He (the King of Annam) sent three big trays, japanned and gilt, round, two spans high, full of many dishes, each of these trays contained many pires, forming a sort of a mound, in which there were all sorts of eatables A F Cardim (1649), Batalhas, p 80

'Porgo' in this sense is not found in the O E D Yule says that 'porgo' most probably represents Port peragua Port dictionaries mention no such word, but it is evident that Yule is referring to Port pinoga piragua, Fr pirogue) (Span Skeat lists it among Carib-bean words (Notes on Eng Etym (1901), p 349), but Marcel Devic (Supplement to Littré) connects the Fr pirogue with Malay piāhū which, according to Yule, is responsible for Anglo-Ind prow, parao, etc, (See parao) Sir Richard Temple (Ind Antiq, Vol XXX, p 161) is of the opinion that

A Purgoo These Use for the most part between Hugly and Pyplo and Ballasore With these boats they carry goods into the Roads On board English and Dutch &c, Ships" Bowrey, Hak Soc, p 228 See also editor's note for other references in which the word is spelt 'Porgo', 'Porgoo', 'Porkoe', and 'Porka']

["January 30 (1683)—The Thomas arrived with ye 28 Bales of Silk taken out of the Purga, and was dispatched for Hugly ye same night" Hedges, Diary, Vol I, p 65]

["Will send aboard with all expedition both goods and provisions—"some by the pynnace, others by porks'" Foster, The English Factories 1634— 1636, p. 51] 'purgoo or porgo' is probably an obsolete Anglo-Indian corruption of an Indian corruption of the Portuguese term barco, barca, terms which were used for any kind of sailing boat by the early Portuguese visitors to the East ¹

"The purgoo then was a barge (barca) confused with the bark (barco), just as the sail-less barge and the sailing bark have been confused in the West" (op cit, p 162)

There is a description of a 'purgoo' in Bowrey (p 228)

[1504—"All the paragos and catures left and many other small barks (barcos) which are called tones" Letters of A Albuquerque, Lisbon, III, p 261]

[1560—" All the people went in small boats (baters), and the King in his barks (barcos) which are of fine workmanship and which are called tones" Gaspar Correia, Lendas, I, p 378, in Glossario]

^{1 [&}quot;Into the Island or Çuaquem they imported many spices from India, and there they embarked in geluas (which are a kind of barques (barcos), like caravelas, which ply in the Straits), and were carried to Coçaer and there (Canà) they took passage in barges (barcas), and in a few days' time reached Cairo" Comm of A Albuquerque, Hak Soc, Vol II, p 230]

poltrone, in the sense of 'a lazy fellow' Poltrona in It is also 'a large chair, with arms, and almost always cushioned'—the very seat for an idler Cf the English 'easy-chair']

Polvorinho (powder-flask) Konk polvorinh, vern term tošdán — Tet polvorinhu

Pomba (dove) Mal. pomba, pombaq, pambaq, pambaq, vernacular term parapāti — Tet, Gal pomba

Pompa (pomp) Mal, Sund pompa —Jav, | Mad | pómpô

Dr Heyligers, who mentions the word and assigns to it a Portuguese origin, gives it the French meaning pompe, which may stand as much for 'pomp' as for 'pump' In the former meaning, it may be derived from Portuguese, but in the second, undoubtably, from the Dutch pomp or the English 'pump' Malay has bomba and pomba in this sense | Wilkinson derives the word from Dutch and gives it the meaning of 'pump' | See bomba

Ponta (peak, tip) Konk. pont—? Mar pot, vern terms tad, tembí, agr, damas, sing, sunk, ponkh, pālamr, padar (ac-

cording to different senses)—
L-Hindust pont, pontá, puntá, promontory, pontá, the end of a rope Ponte ká phutín, or putín, thick knot of the ropes of the sails Puntá chhor dená, to double a cape at sea—Ach ponton

Molesworth derives pot from the Persian póta or móta

Ponto (point, stitch, dot) Konk pónt —Bug póntu (in a game of cards) —Tet, Gal póntu.

Por (prep, for) Mal por, to.

Porcelana (porcelain, chinaware) Konk phuslán a porringer, vern term kāmsó— Sinh pusalana, kuslána, cup, beaker

Persulana has the same meaning as tigella, 'a porringer', in the Portuguese of Goa Gonçalves Viana says (Palestras Filológicas) that "the old Portuguese chroniclers regarded the term porcelana as synonymous with chávena ('tea-cup')" 1

¹ Fernão Pinto invariably uses per colana for porcelana

[&]quot;They were ready to give me in Balagate a porcelana for 200 par daos" Garcia da Orta Col vliv

efficient system of supervision audit and control, of co-operative institutions arranged for the training of the federation staff, attempted to secure uniformity of practice among co-operative institutions and to promote interests and foster the spread of cooperation by active propaganda A Committee of Inquiry appointed by the Local Government in 1922 proposed that this body should be dissolved, and replaced by separate educational institutes for the Central Provinces and Berar Though the Federation has not been dissolved institutes for education and propaganda have already been started in Berar and the Chlintesgarh Jubbulpore and Nerbudda Divisions A Provincial Union is also in existence in Madras, whose objects are mainly educational and propagan-Its activities comprise the issuing of dist co-operative journals the organization of training classes and the holding of conferences Its constitution and its line of work have now been revised so as to make it the central selfgoverning organization in the movement but its working has been considerably hampered by lack of funds and want of financial support from societies and from Government A Central Institute to focus the efforts of cooperative workers and to carry on propagandist work was established in Bom carry bay in 1918 The objects of this institution are to develop the co operative movement in the Presidency by promoting the study of co-operation and by co-ordinating the activities of several existing propagandist and organization The Institute has no powers of control, though it is expected to ascertain and re present the views of co-operators on questions affecting the movement. The activities of the Institute in the mofussil are carried on through its divisional branches formed on a linguistic basis and local branches in all the revenue districts of the Presidency

In Bengal, a similar propagandist organition has been started with identical ms. The Society has taken over some zation of the educational and propagandist work hitherto performed by the Co operative Department, and has assisted in the organization of various non credit activities, among which prominent mention may be made of the starting of co-operative societies for the sale of jute and paddy and the supply of agricultural It has also devised arrangements for the training of members of village societies and their secretaries as also for the grant of certificates for work in non-credit organizations
A federation with a constitution more
or less similar to that of the Central Provinces
Federation but having divisional boards to decentralize control is also in existence in Bihar and Orissa, and has appointed a special officer for propaganda and development. In the Punjah, a provincial union, with the Registrar as President, has been organized to conduct the audit and inspection of primary societies and to undertake general propagandist and educational work The United Provinces have a standing committhe provincial co-operative for the superiment and this committee has recent- well as similar organizations in c her large labeled of India join in the crelation of the sum on In Burna, the audit of primary international Co-operators Day or the societies is conducted by a Provincial Saturday in July 18 th more of July Co-operators conducted by a provincial Saturday in July 18 th more of July 18 the more

This also assists the organization of the provincial conference and acts as an advisory body to the Registrar Organization, supervision and propaganda are furthered by district federations of unions of primary societies Educational and propagandist bodies like the Institute in Bombard and propagandist bodies the first true in Bombard and propagandist bodies are supervisional and propaganda are furthered by district federations of unions of primary societies. bay have been started in the States of Hyderabad, Mysore, Baroda and Travancore These are all recent developments and it is still too early to forecast on what lines the transfer of work to representative co-operative agencies will be carried out. The Central Banking Inquiry hold that the present arrangements of audit supervision and inspection are ordinated and they hold that the present arrangements in respect unsystematic and coordinated and they recommend that all the three duties should be performed by one agency. They propose the creation of district audit unions of conducting the threefold work Such unions should be compared of societies as members and their management should be autonomous though the auditing stuff should have heenes issued to them by the Provincial Registrars of Cooperative Societies Arrangements are suggested for federating district audit unions in the separate apex provincial unions as their affiliation to the existing provincial institutes This is suggested with a view to securing co-ordination and the audit of the higher types of co-operative institutions The All-India Co-operative Institutes Association has endorsed these recommendations, but it is only in the Punjab and Libar Orissa that all the audit staff works at pre-ent under provincial federations elsewhere, and it is largely conducted and controlled by the Co operative Department

All-India Associations -In the beginning of the very 1926, an informal Conference of all these institutes and federations was held in Bombay at which it was decided to convene an All-India Conference periodically and to establish closer contact among these bods by the starting, if necessary, of an All-India Confederation of these bods. At another conference held in September 1025, this idea was given a more definite shapered a scheme was given a more definite. and a scheme was drawn up thereafter for " cen tral association which has secured the support of almost all the provincial organisations. The scheme was formally accepted by various provincial institute unions or federations and provincial institute unions or registribus and the All India Institutes Association was established in 1920. The first task the As oblation has undertaken is publication of an Indian Co-operative Year Book. The Association also contemplated opining a co-operative college for the superior staff of co-operative institutions and this project has registed the institutions and this project his not led the support of the India Central Lanking Inquiry Committee which also recommends the establit ment of co-operative educational in trust in each province all the local in-i utions to le run by the provincial co-operative or anization though they might be as leted by from rement by means of grants

The Provincial Co-openine In the ac union in Burma, the audit of primary international Co-operators Day or the societies is conducted by a Provincial Saturday in July 1884 regular Co-operative Council consisting of representatives suitable for agrand union at a large of the second consisting
in the Middle Ages in lining ornamental pottery and especially cups. From this the word came to signify in Portugal the cup itself, and finally to denote the material out of which cups are made, and this is the meaning which it generally has today 1

Agricultural Co operation -Co operative societies have, until recently, been organized only to supply chesp credit to their members, but there are various other fields of work to The which they may extend their activities total number of agricultural non-credit societics nt the end of the 3 car 1029-30 was 3602 of are reasonable chances of their successful working which 416 were so but a for purchase and and suggest the grant of long term loan at coneale, 1140, for production, 1,271 for product cessional rates of interest to these constitutions

there there there is a cleane and a forother forms of cooperate party and the first term broken have, in some province of the first started with advantage, receiving the last a first deposit in kind and allowing these to the last the first and allowing these to must distitute to the members in times of sectinto Such banks have been started in labor and Ori a Rongel Master and Coors *torted water on a similar task for the storing of foller leave been storted in birotic Apoly r direction in which the competitive purel, to is being applied in the starting of ic lette for the purchase and distribution among the alote of jute and selected seed ti italies of small societies for supply of seed and ter I tri by a organized in the Bombay Tre Pienes and in the Ontral Provinces and That had the for the comparative purchase and sale of martire will also prove a great boon, and a few such ato in have been a tablished in Malia, I hard Bibar and Ori sa and Bombas. In the Punjah and In Madras, the supply of a ricultural regulation has been undertaken ed for its the ordit recieffs on the commis-sion indent as tom or special supply unions are or and d for bulking orders, contract, distributing goods, and collecting payments

Jet the of produce gets popular as confirmed credit thrives and agriculturists because less dependent on local traders. Wille Burna led the way by starting Wille Birna led the way by starting so it's for the foint sale of paddy, the rin t intere ting developments in the direction have tak'n piece in Bombay and Bengal are and permulate that I for the and of ny ricultural commo-er - 13 tip dities, chiefly cotten and jaggery, have been ringly of the chiefly forces ald hydrestall over the Bombay Pre Series Cooperative marketing of cotton has seently made much pro, ress in the Dharwar From hand Surat districts where these have led to the starting of a few co operative ginning facto for controlled by cotton growers. reject of co-operation has lately attracted contierable attention and attempts similar to tho emale in Bombay have been made in Madras and with Cutral Provinces and Berar in the Punjab in the last named province with considerable success at I valipur and Montgomery. In Pengal, there was a move three years ngo to or, unive the cale of integral paddy on co operative lines. A ricerous propaganda was undertaken for the purpo e and a central depat was opened for the sale of jute principally in Calcutta. The Central Wholesale society co-ordinates the work of the local Society, supplies a trained stuff, gives necessary directions about working arranges for finance and kept the cultivation in touch with the Central market | Unfortunately owing to the heavy slump in the juto market the attempt received such a severe set back that the scheme had to be abandoned and the societies are now being wound up Several of the Provincial Banking Inquiry Committee visualized bright future for the organization of marketing of afficultural produce on co operative lines, and the Central Committee appear to share They recommend the establishment this bdicf of cooperative sale societies wherever there

to these emigrants from Goa one of which was called the 'Gremio Português' and the other 'União Goana', whereas in Calcutta they have a review called 'The Indo-Portuguese Review' and in Karachi their principal centre of social life is known as 'The Goa-Portuguese Association'

In their early connection with Goa the Portuguese referred to its inhabitants as Canarins, but as this term, like 'Goanese' in British India, came to be regarded as conveying an offensive connotation, they at the present time speak of the people of Goa as Goeses and not Goanos

The Portuguese policy of intermarriages had been fruitful in a fairly large Luso-Indian population which was to be found in the principal centres of Portuguese trade in India Calcutta, Madras, Cochin etc These mixed descendants were at one time proud of their Portuguese extraction and names spoke a dialect of Portuguese, and described themselves as Portuguese', but during the closing decades of the last century with the recognition of

the Eurasian or Anglo-Indian community as deserving of especial consideration at the hands of the British Indian Government, the Luso-Indians were not slow to identify themselves with the Anglo-Indians with the hope of bettering their prospects They gave up Portuguese speech, altered their Portuguese surnames intermarried with Anglo-Indians, and, in fact, did everything that they thought necessary to draw a veil over their past history When English factors or travellers speak of the 'Black Portuguese' or Kala Firingis, they are probably referring to these Portuguese half-breeds were found in most of the important cities in the East and, perhaps in some cases, to Indian converts to Christianity who

propagnidist work, hold demonstrations, and assist in the work of general economic improvement of the agriculturists The subject of agri cultural co-operation and of agricultural came under enquiry by the Roynl Commission of Agriculture in India whose Report published in 1928 The Commission describe the co-operative movement as the greatest hope for the salvation of the rural masses from their crushing burden of debt and look upon it as the natural basis for social, educational and economic development in India where the predominant industry is agriculture They admit that there are defects in the present organization for rural credit, but are confident that under the influence of patient, persistent and systematic education of the members in the principles and meaning of co operation these defects are bound to disappear in course of time The provision of this education in co-operation should. the Commission hold, be the principal care of provincial Co-operative Departments, and though the strengthening of the official staff is suggested i the Commission also recommend the organization of supervising unions, federations and insti tutes and the grant to these bodies of financial support. Recommendations are also made for developing the joint marketing of agricultural produce on co-operative lines and for utilizing the agency of co operative organizations in the work of agricultural demonstration and propaganda, the supply of approved varieties of seeds, implements and manures, the consolidation of holdings and for social and educational betterment

Committee on Co operation in India-In July 1914, the Government of India issued a lengthy Resolution on Co-operation in India, surveying its progress in the country during the previous ten years. In October of the same year, Government appointed a Committee under Sir Edward Machgan to examine whether the movement, especially in its higher stages, and in its financial aspect was progressing on sound lines and to suggest any measures of improvement which seemed to be required The enquiry was to be directed primarily to an examination of such matters as the con stitution and working of central and provin cial banks, the financial connection between the various parts of the co operative organication, the audit, inspection, and management of all classes of societies, and the utilization of the reserve funds. In its and managethe its Report, which was issued in September 1915, the Committee stated that it had not the Committee stated that it had not confined its enquiries to the subjects referred to it, for it had to recognise that the financial welfare of the higher stages of the co-operative system was largely based on the soundness of the foundation The Government of India passed orders in 1918 on the recommendations in the light of the opinions of the Local Governments It is more or less in accordance with the principles enunciated by this Committee that the movements being carried on in most of the Provinces of India

Provincial Legislation — Under the Reforms, co operation has been made a provincial subject and also a transferred subject. The control of Co-operative Departments has been entrusted to Ministers and In some provinces should be relieved of the work of supervision and

Bills were atsometime or other drawn up for enactment by the local Legislative Councils to take the place of the Co operative Societies Act. The Bombay Co operative Societies Bill was introduced in the Bombay Legislative Council in Tuly 1924, and was finally passed into law in 1925. It reproduces, in the main, the framework of the Act of 1912 but introduces the following important modifications —

(i) The adoption of a scientific system of classifying societies

(ii) The improvement of the procedure for liquidation of cancelled societies

(iii) The extension of summary powers of recovery to the awards of arbitrators

(iv) The provision of penalties against specified offences

No other provincial Council except Burma where a Provincial Act was placed on the statute book in 1927 has yet enacted legislation on similar lines. A Bill for the enactment of a provincial law to replace the Indian Co-operative Societies Act of 1912, was introduced in the Madras Legislative Council during the year 1931 and is still under consideration. Its special feature with proposal to yest much wider powers in the Registration are employed by him at present

Provincial Inquiries —In Provinces, owing to the drying up of recoveries and the issue of large advances to agriculturists to tide over the bad season of 1920-21 the fluid resources of the movement were seriously depleted and the Apex Bank was able to meet its with the financial assistance The fluid resources of the liabilities only of Government replenished Provincial Bank 3197 the Local Government, with the concurrence of the Government of India, placed credits at the disposal of the Provincial Bank and made advances direct to primary societies in the form of Tagavi loans A Committee of Inwas appointed which made sweeping recommendations, the most important of which was a proposal to liquidate the Provincial Bank and to place central banks in direct touch with This recommendation was, commercial banks however, subsequently turned down by the Local Government, although some other recommendations such as the division of agri cultural finance into short-term crop loans and long-term non-crop loans met with a considerable measure of public support In Bengal and the Punjab, the return of favourable seasons about fifteen years ago averted any breakdown of the system, which threatened to overtake the local co operative organizations when cultural scarcity on a wide scale caused serious difficulties some years ago The same may now uniculties some years ago The same may now be asserted of the United Provinces, where there appeared to be some danger of the strain not being quite successfully withstood A Committee was appointed in that province in 1025 to hold a comprehensive inquiry and to appear the lines of future development. The suggest the lines of future development The Report of the Committee contains numerous recommendations on matters of detailed administration and proposals for strengthening the official staff of the Co operative Department The Committee recommended that central banks

such loans as may be necessary to meet the requirements of central banks and primary societies

Effect of Crises on Co operation—It is hardly possible without any close and scientific inquiry, such as has not yet been carried out, to appreciate accurately the effects of the co-operative movement in enabling agriculturists to resist the rigours of a famine as also to judge the naction of the latter of the cooperative organisation as there is an interplay of various economic forces affecting the life and industry of agriculturists the proportionate value of which cannot be estimated easily. The agricultural crisis of last year caused by an unprecedented drop in the prices of agricultural produce, however, put the co-operative organisation in most provinces to a very severe strain and reports indicate that in most parts of the country represents by members of societies were affected very scriously. It will take some time for agriculturists to adjust their economic life to the new level of prices and in the meantime the affairs of co-operative institutions will require cautious and sympathetic handling Proposals were made for assistance in organizing arrangements for the orderly marketing of agricultural produce on co operative lines but no special action was taken in this direction in any province

Social Reform —Co operation has in some places stimulated the desire for education and members of rural societies have been known, even at advanced ages, to receive the elements of education to enable them to put their signature on their societies' papers, and to take a lively interest in the internal work of their institutions In Bombry, night schools for rdults were started with the aid of a splendid donation made by the late Sir Vithaldas D Thackersey, while in the Punjab, Bilarr, Bengal and elsewhere such expeditions of advertises. and elsewhere such expenditure on education is incurred by co-operative institutions themselves In the Punjab separate rural societies have been registered to conduct night schools and also to insist on compulsory education for the children of members The Punjub also possess a number of societies for the promotion of better living the members of which societies lay down a social code for themselves, breach of this code involves Junishment by fines Similar societies are being started in the United Provinces, and some other parts of the country The Madras Presidency has taken the lead in undertaking the work of rural reconstruction on a comprehensive basis in several districts, through the agency of local

tation by starting anti-malaria co-operative societies. The societies are federated into a central union in Calcutta which supplements the local funds, co ordinates the working of the societies, issues literature on hygiene and sanitation, and arranges with local doctors for the provision of free medical relief to members There are not a few cases where a society has set its face against drunkenness, expelled members notorious for their intemperate habits and has insisted on good moral conduct and attempted to improve the standard of life Societies have occasionally condemned excessive expenditure on marriages, and have thus indirectly trained members to habits of The liquidation of old debts again has been rendered possible to a great extent and many an agriculturist who was formerly in a state of chronic indebtedness has been relieved of all his debts and as a result of the practice of thrift freed from the necessity of incurring new ones Credit has been much cheapened and it is now possible for the agriculturist to borrow at 9 to 18 per cent what he could not borrow at less than 20 to 75 per cent for It has been calculated that in interest merly alone the agriculturists of India, by taking I wans from co-operative credit societies instead of from the village money-lenders, are even now saving themselves from an unnecessary burden of over three crors of rupees The village rates of interest have naturally gone down considerably And the Sowkar is, in most places, not the terror and the force that he was Business habits have been inculcated with the peneficial result that the agriculturist has learnt to conduct his own work more effect. Thrift has been encouraged and the value of savings better appreciated Special societies are started in the Punjab to promote thrift, are started in the Punjab to promote thrift, while in Bombay, Bengal and Bihar & Orissa, the savings of members are attracted to the village credit societies and either special facilities are provided or special propaganda is conducted to induce members to save and deposit voluntarily Association in a public institution for common good has brought home to the people the blessings of unity and litigation has often decreased in villages with co operative societies Punjab, a number of societies have been started in rural areas whose members agree to refer all disputes to arbitration by their elected committees and to abide by the awards of arbitrators Participation in the management of societies has institled among members the important lessons of self-help and self-reliance, but the most important achievement operative organizations, financing the sense of communal life—a feeling of 'all for programme with the help of the central and each and each for all "—among members provincial banks and co-ordinating it under the regis of the provincial co operative union. In Bengal, attempts have been made to fight the corporate instincts which made. Indian rural organization famous in the world secourage of malaria and to promote village saniof co operation has been the development of a

afterwards a sort of four-cornered tent was erected, called by these people ramade"

Irvine is evidently on the wrong track when he tries to explain the word thus "The word used might be aramanar, 'royal palace', or aramanar, 'single-room house' Or can it have any connexion with Rām-kelā, a name for the plantaintree? (see 'Madras Manual of Administration,' iii 687) Plantain trees are used in erecting the pandal"]

Ramo (branch, bough) Sinh rámuva, moulding, picture — Mal ramo (Haex)

In the Portuguese dialect of Ceylon, namo also signifies 'a framed picture'

It may be that in this sense ramo is a corruption of lâmina, used in Konkani as lâmin. In Konkani ram is the name of 'the palm-leaf blessed on Palm-Sunday' Cândido de Figueiredo says that lâmina, in the sense of 'frame, picture', is used in Miranda, Trás-os-Montes' Dutch has raam in the sense of 'a frame'

Rancho (a group of men assembled for a journey or for marching, also the food that is served out to a company of soldiers or sailors) Konk ránch—Sinh ránchuva, class of people (Eng 'rank'), vern terms pela, peliya

Raso (even, level) Mal

Dr Heyligers attributes the change of s into t to the law of repulsion, that is, to the pre-existing vocable rasa or rôsô from the Sansk rasa, 'taste, sentiment'

From 16t6 is formed in High Javanese 1adin, whence 1adin man, 'level plain, a street' See passear

Raxa (arch, 'a species of thick cloth') Jap rasha 1

Razão (reason) Konk nazámv But senezámv=semnazão, without reason, vern terms kārán, prastáv, pramán—Tet, Gal rezã

Recado (message, compliments) Konk rekád —[Anglo-Ind recado, recarders (obs)] —

^{1 &}quot;A lumina of the birth of Our Lord" Cardim, p. 44

^{1 &}quot;A cloak of raixa and a sheep skin coat valued at two thousand reis" (1548) A Thomás Pires, Materiaes, etc., in Jour Geo Soc Lisb., 16th ser, p 706

(more in use is the vern $j\bar{a}li$) — Mal rede (Haex), vern term $j\acute{a}la$ (Sansk) — Tet $r\acute{e}di$, vern terms $kh\acute{a}hoti$, $l\acute{a}hoti$

Reformado (subst, a person superannuated or pensioned off) Konk rephormád—Tet reformádu

Regalo (rejoicing, entertainment) Mal regalas, "a sumptuous banquet" (Haex)

Registo (a register) Konk rejist (also us of a small religious picture), the vern terms are patti, sivdi—Tet rejistu

Regra (rule, example) Konk regr, vern terms ol, regh, nem —Tet, Gal regra

Rei (king) Konk rey (king in cards) Mac, Bug, réi (king in cards) —Nic dem Dem-en-Lána (lit 'wife of the king'), queen

Man derives dem (= $d\tilde{e}$) from the Port iei and, I believe, with leason, notwithstanding the phonetic divergency R initial and medial can be changed into d, of dai = rai, 'leaf', $kad\hat{u} = kar\hat{u}$, 'wide, large,' $lai\hat{a} < Malay l\hat{a}da$, 'pepper' The Nicobarese have not got the diphthong ei, and the nasalisation is explained by the tendency of their language

[Reinol (one born in the kingdom (reino), i.e., Portugal, a term used by the Portuguese in India to distinguish the European Portuguese from the country-born (see castiço) Konk reināl—Anglo-Ind reinol, reynolds, reynol (obs.) 1

The Anglo-Indian forms are not mentioned in the $O \to D$

Yule says that at a later date the word appears to have been applied to Portuguese deserters

["He (the Topass chaplain) is only there for the better catching of the poor 'renols', who departing this life, leave the chaplain as their testamen tary executor" Manucci, ed Irvine, Vol III, p 283]

[There are many Gentous dwell m tho City (of Goa) , they are tolerated because they are generally more industrious than the Christians , but the mercantil Part of them are very subject to the Insults of the Reynolds or European Fidalgoes, who will often but their Goods, and never pay for them " A Hamilton, East Indies (1727) Vol I, p 248]

^{1 [&}quot;When they are newly arrived in the Indies, they are called Raignolles, that is to say, "men of the Kingdom", and the older hands mock them until they have made one or two voyages with them, and have learned the man ners and customs of the Indies" Pyrard, Voyages, Hak Soc, Vol II, p 123 Reinol in the above sense has the same meaning as the Anglo-Indian 'griffin,' or 'Johnny Newcome']

BOYBAY BRANCH OF THE ROYAL ASIATIC SOCIETY—Founded 1804, to investigate and encourage Oriental Arts. Sciences and Literature Annual subscription Rs 60 Secretary J S Tiller, Town Hall, Bombay

BOUBAY NATURAL HISTORY SOCIETY (Registered under Act XXI of 1800)—Founded 1883 to promote the study of Autural History in all its branches. The Society has a membership of about 1,400 all over the world and a museum nith a representative collection of the different vertebrates and invertebrates found in the refrebrates and invertebrates found in the Indian Finder and (evion In 1921 the Society was intrusted with the management of the Nitural History Section of the Prince of Wales Museum and a great part of the of Wales Museum and a great part of the Societ's collections have been transferred to that Museum during the very which at varying times on natural lustory and contains articles on natural history and sport as well as descriptions of new species sport as well as descriptions of new species and local lists of different orders. The Society's library is open to members and books. Society's library is open to members and books may be borrowed under special arrangement by members residing in the mofusall The Society s Taxidermist Department undertakes the cur ing and mounting of trophles for members ing and mounting of tropines for memoers.

POONA SEVA SADAN SOCIETY—This Institution was started in 1909 by the late Mrs. Ramabai Ranade, Mr. G. K. Devadhar and a few other ladies and gentlemen in Poona and registered in 1917. It is now working independently though for a few years in the beginning it was conducted as a branch of the Bombay Seva Sadan. Its main object is to make women self-reliant and to train them for missionary work undertaking educational and medical activities for their sisters and brettren, especially the former in backward areas and working on a non-secturian basis. Nominal fees are now being charged for instruction, except for the Music Classes, for Special Classes in English, and for High school classes, etc. There are eight different departments subdivided into 60 classes. Arrangements are made for training Nurses and Midwises and women Sub-Assistant Surgeons at the Sassoon Hore pital, Poona and a hostel is maintained for the former and two for those attending the Sub-Assistant Surgeons of the Lady Che'msford League for Maternity and their Welf re, Delhi The number in the three hostels is now about \$55. Lee Ia, the rest a full-listic for in the V. I. Classes for beautiful education in the V

maintained by a non-official non Christian body teaching the full course missionary The results of the Certificate Examinations held in the veri 1927-28 under the authority of the local Government Training College for Women were as follows: I year senior 12 The total number of certificates granted so far is 347 now The Practising School for little guisattached to the Training College has now cleven classes with 265 students reading up to the Marathi VI Standard, Fuglish being taught in the V standard class Primars Classes for grown up women teaching up to the Marathi V Standard are attended by about 105 women It is here that poor women are recruited for training as a teacher, nurse, midwife, or doctor Special classes for teaching English, First Ald, Home Nursing were attended by about 93 students, the Music Classes by 112 students, and the Work room Classes for teaching Sewing, Embroidery, Hostery and Weaving by 153 women Thus, the total number of pupil- is 934 to-day. There are two franches of the Society started at Satara and Baramati which are named after Lady Withaldas Thakersev, the wife of the greatest helper of the Society so far the late Sir Vithal das D Thakersev Besides there are branches started at Bombay (Dadar and Girgaum), Sholapur Ahmednagar Alibag, Nasik Nagpur, Gwallor and Madras for either educational or medical work or for both. Thus the total medical work or for both. Thus the total number of women and girls including about 150 duplications on the rolls at these various Centres of the Society is over 1500. There are in Poona six hostels, three of which are located at the headquarters and the other three in the Raste's Peth and the Sommar Peth for Nurses, etc., under training at the Sassoon Hospital The number of resident students is above 260 in these six hostels. One of the three hostels at the headquarter is interded The number for women of degreesed class a of these women at present is 7. In connection with the medical branch a Committee has been formed in England, which will enable the Society to send fully qualified Nurses there to undergo furth a training. Two fully qualified Nurses have so far been sent by the Society Aures have so are been sent by the Society for their post graduate cours. Sábado (Saturday) Mal Ach, Jav sábtu, sáptu —Sund sáptu —Mad sáptô —Day sábtu —Mac, Bug sáttu —Tet, Gal sábadu

Dr Schuchardt and Dr Matthes attribute to sábtu or sáptu an Arabic origin, but Dr Heyligers is inclined to favour the Portuguese derivation of the word and supports his view by citing mingo from the Port domingo, 'Lord's day or Sunday'

Sabão (soap) Konk sāb- $\acute{a}mv$, $s\ddot{a}b\acute{u}$ (m us) — Mar $s\acute{a}b\acute{u}$, sābún —Gu₁ sabu, $s\bar{a}b\hat{u}$ — Hındı, Nep sābún —Hındust sābún, sábun, saban —Or sábun, śābini —Beng sāban Sābānbat, soapy —Ass saban, chaban -Sindh sābuni -Puni sābún, Sābūní, sabūní (ad), sabún from soap Sābūní, sabūní, sābūnīá, sabūnīá, soap-kettle, soap-boiler — Kash sában, sábun —Sınlı sabañ, saban —Tel sabbu -- Malayal saban, sabún --Kan sabbu, sābúnu —Tul sábu, sábunu, sabúnu -Gar, saban —Burm ksap-Khas pyah —Kamb sabu, sabeang 1 Dŏ sabu, to wash with soap—
Siam sa-bǔ, sabǔ—Ann śabong—Mal sabon (Haex), sábun, sabún—Ach, Batt, Sund,
Jav, Bal sábun—Mad, Day
sabon—Mac, Bug sábung—
Nic śaváng—Tet, Gal sabã
—Jap sabon, shabon—Pers
sābún—Ar sabón, sabún—
| Turk sábun¹ |

Dr Heyligers observes that the Arabs raiely make use of soap, and, on this account, it is not likely that they could have introduced the term into Malasia ²

[From the way the Portuguese word for soap has been introduced into almost every language or dialect of the East one might reasonably infer that soap was unknown in India before the arrival of the Portuguese, but Watt says "The art of soap-making has been known and practised (in India)

¹ The foreign a is sometimes represented in Kambojan by ea, as for

instance, *réacsa* ('to guard) from Sansk *raksha*, *rote*ă ('chariot) from Sansk *ratha*

į

SAGUATE

It is not known for certain whether sagu was known in India before the sixteenth century, it may, therefore, be presumed that the Portuguese helped to spread the use of the word.

Saguate ('a present, an offering') Konk sāquvát —[Angloseguaty (obs)]—Tet. saukáti, sauáti -Gal saguáti, sanátr

The word is current in the Indo-Portuguese dialects and on the eastern coast of Africa, and was much employed by old The orı-Portuguese writers ginal word is the Hindustani-Persian saughát, 'rarity, curiosity, present', and not the Sanskrit svāgata, as I at first thought it to be 1

Sagu (farmaceous pith taken out of the stem of certain palms') Konk sāgú, sābú — Mar, Guj, Hindi, Hindust, Or, Beng, Punj sāgú — Sinh * sāgú, savgal — Tam savvu — Malayal sagu, sāgó —Tel sagqu ---Kan sāgo, sergo — Tul seigo (through the influence of English) —Anglo-Ind sago — Indo-Fr sagou --- Gar sagu ---Khas sako ---Kamb sakn(Kambojan has no g) —Siam sákhu - Mal, Batt, Sund, Jav, Mac, Bug $s\acute{a}g\bar{u}$ —Ach ságu, ságe —Bal ságu, ságo — Day sago — Tet, Gal sáku shá-ku-mí | —Jap Chin sagobei —Pers sābú 1

Cândido de Figueiredo derives the Portuguese word from the language of New Guinea Clough traces the Sinh sagú to Portuguese, but such a word is not met with in modern Sinhalese dictionaries Rigg de-

^{1 &}quot;In return for which present, the Father Provincial went to visit him

^{1 &}quot;All the people of the Isles of Maluco eat a certain food which they call Sagum, which is the pith of a tree resembling a palm tree ' João de Barros, Dec III, 1, 5

[&]quot;There arrived a junk laden with Çagu, and on it he returned to the fortress ' Gaspar Correia, III, p 740

[&]quot;Five hundred bags of Sagu, which is a meal made from some tree and which is there eaten Diogo do Couto, Dec VI, 1x, 12

work along these lines has been done by the Association as this is the only woman suffrage organization in India The Association pub lishes a monthly magazine, Stri-Dharma edited by Shrimati Malati Patwardhan, Ba, in En glish with Hindi, Tamil and Telugu articles (Rs 4 to non-members, Rs 2 to members) It is an all-India Association Its largest branch is in Bombay, its greatest number of branches in South India, but yearly additional branches are being started in other provinces, and there are flourishing branches as far north as Kashmir and Lashkar The prospects of rapid growth for the Association are very bright as it has been found that women everywhere welcome the self development which the establishment of these branches brings The Association is affiliated with the International Woman the International Suffrage Alliance and Women's League for Peace and Freedom Objects -

To present to women their responsibility as daughters of India,

To band women into groups for the purpose of self-development, education, and the definite service of others

To gain compulsors primary education evers boy and girl in India

To secure the abolition of child-marriage and

child-parenthood To help women to realise that the future of India lies largely in their hands, for as wives and mothers, they have the task of training and guiding and forming the character of the future rulers of India,

To secure for women the vote for Municipal and Legislative Councils as it is or may be granted to men . To secure for women the right to be elected as

members on all Municipal and Legislative Headquarters Adyar, Madras President-Dr Annie Besant Fice Presidents—Dr Mu-thulakshmi, N L C Mrs Jinarajadasa Hon General Secretary—Mrs M E Cousins Hon Treasurer—Shrimati Ammu Swaminadhan

ASSOCIATION . CHRISTIAN Young MEN'S This Association, which was founded by the late Sir George Williams in 1844, is now a world-wide movement, well established in almost every country in both the hemispheres. The aim of the Association is, through its religious coolel admentional and should be admentionable and should be a religious, social, educational, and physical work to answer the fourfold—spiritual, social, mental and physical—needs of young men and boys

The Young Men's Christian Association, though relatively new to India, is spreading rapidly The local Associations are autonomous and governed by local Boards of These Associations in Convention elect a National Council which is responsible for the supervision and expansion of all forms of the Association work in India, Burma and Cevlon

There are now over 60 Associations affiliated to the National Luion and many other village Associations with many thousands of members of all races and creeds The following Associations own one or more buildings which serve as ! the local headquarters -Allahabad, Allepper,

Rangalore, Rangalore, Bombay, Calcutta, Calicut, Coimbatore, Colombo, Delhi, Galle, Hvderabad, Jubbulpore, Kandv, Karachi, Kunnamkulam, Kottayam Lahore, Madras, Madura, Murra, Nagara, N Murree, Nagpur, Naini Tal, Ootacamund, Poona, Rangoon, Risalpur, Secunderabad. Poona, Rangoon, Risalpur, Se Simla, Trivandrum, Wellington The others use rented or rent-free buildings

The work of the National Council and of the local Association is carried on by numerous voluntary workers and Committees, assisted by P5 specially trained full-time Secretaries A feature of the Y M C A in India is the international character of its Secretariat It is made up of 12 Americans, 2 Canadians 13 Enclishmen, 2 Scotchmen, 1 Irish, 1 Swiss, 1 Swedish, 3 Anglos-Indians, I Dane, 4 Austra lians and 55 Indians and Cevlonese

The classes of people reached by the Indian Y M C A and the lines of service it attempts to do for them may be stated as follows -Generally -1 Literature —Publication

original works and reprints Four series
'Heritage of India,' 'Religious Quest
of India,' 'Religious Life of India'
'Makers of Modern India' 'Education of India "

- Lecture Bureau -Many thousands of slides on a wide variety of educational and recreational topics serving a clientele In over 700 centres in India
- Directors Physical—Training Physical for schools and colliges, fostering playground movement, Olympics

Poys -Scouting, Boys' Clubs, Camps, etc Students -Hostels and Institutes in most University Centres

Indian students in Britain -Specially London, Edinburgh and Glasgow

Critizens" —(1 e, English-educated Indians' Ceylonese and Burmese) Reading Rooms, Libraries, Lectures, Group Conferences, Study-Circles, handling many subjects of vital interest—social, intellectual and religious

Soldiers —Institutes and Holiday Homes for British Soldiers in a number of centrer including the X W Frontiers

Em-Anglo-Indian -- Hostels, Institutes, ployment Bureaux

Furopeans —Hostels, Institutes, Employment Bureaux

Laborrers in Mills —"Welfare' Work
Rural Communities — Rural Reconstruction" work embracing Co-operative Banking, Distribution, Cattle Insurance and
Arbitration, Cottage Industries, and Adult Education in four Selected Centres

A monthly magazine, the Young Mey or INDIA, is issued at Rs 5 per annum, including postage

The work of the National Council (excluding that of the 50 local YMCAs) called for a Budget of Ps 1,70,048 2 0 in 1020. Of this sum. Rs 57,005 had to be raised from the public in India

which have also no salt "Pieces of the tunny fish which they dry in the sun, because in the (Maldive) Islands they have no salt " Gaspar Correia, 1, p 341 rard says the same "They (the fish called by the Maldivians Cobolly masse or 'black fish') are cooked in sea-water, and then dried in the sun upon trays, and so when dry they keep a long while "(Hak Soc, Vol I, p 191) "The fish of which I speak is cooked in sea-water and dried, for other mode of salting they have none salt is made at the Maldives what they use comes from the coast of Malabar" Idem, p 1947

Sala (hall, sitting-room) Konk sal, vern term vasió—? Sinh šala, sále, sálaya (also 'a verandah'), sāláva Nadu-sála court of justice—Tet, Gal sala 1

It seems that in the Sinhalese word there is the influence of, if it is not directly derived from, the Sanskrit $c\bar{a}l\bar{a}$, to which is related the German saal, the sources word of the Portuguese sala

Salada (salad) Konk sālád, vern term karam (l us in this sense) —Hindust saláta, salútih, salitih —Beng saláta — Sinh saláda (also 'lettuce, endive') — Tam salládu — Tel salladam ---Kan saládu, lettuce -Mal saláda, seláda selada —Sund saláda Ach Saláda-chai, water-cress —Jav selôdô -- Mac, Bug, Tet, Gal saláda — A1 salátha — Turk salata

[Salpicado (speckled, spotted) Anglo-Ind salpicado, spotted cloth ¹

The term is neither in Hobson Jobson not in the OED]

Salva (salute, volley) Konk sálv —Tet , Gal salva

Salvação (salvation) Konk salvāsámv, vern terms mukti, tāran — Tet, Gal salvasã

Samatra (sudden squalls)
Anglo-Ind sumatra, sudden squalls which are common in the

^{1 [&}quot;Wee would have you provide some salpicadoes flowr'd and plane, and send us hither as soon as possible" In a Letter from Fort St George in Ind Antiq, Vol L, Sc 11]

United Kinglom, or hold Oxford or Cambridge Honours Certificates, but Associate Membership is open to women who have studied at a Britch University for two years and each Branch may admit as Honorary Members women who have advanced the higher education and interests of women

The Association of British University Women has four branches The addresses of the Hono rary Secretaries are as follows—

Hon General Secretary —Mrs E F Hingeley, c/o P O B 535, Bombay

Hony Local Secretaries

Bombay

Mrs. Blair, Arthur House,
Cooperage, Bombay

Hon Secretary c/o Miss Cornelia Sorabji, 28, Chowringhee Calcutta

Delhi Mrs Blomfield, Aurinzet Rd,
Rajsina, Delhi

Punjab Mrs Irving, 16, Davis Road,
Lahore

The Delhi and Punjab Branches came into existence in 1918 The Calcutta and Bombay Branches are influential and have repeatedly intervened with good effect to educate public opinion with regard to subjects affecting women All Branches have, for iustance, made investigations on behalf of the Education Department, Government of India, the Calcutta University Commission, etc., and have supplied, through the International Federation of University Women, information on Secondary Education in India to the League of Nations They have been the means of introducing women on to University Senates and Municipalities The Calcutta Branch carried through an important exhibition of Food Products

The Bombay Branch has done good work in connection with the formation of the Social Purity Committee and has, through a special sub-committee, organized public meeting for women on subjects affecting their interests about which legislation was being or had been recently enacted

A valuable part of the work of the Association was the establishment of Women's Employment Bureau in Calcutta and Bombay. They were remarkably successful The Bombay Bureau was eventually merged into the employment Bureau established by the Calcutta Bureau has ceased to exist

As a means of promoting friendships between women from various parts of the United King dom, with widely differing tastes and interests and spheres of life in India, and as an instrument for affording opportunities for usefulness to educated women, the Association of University Women has a useful function to perform

Federation of University Women in India

This is an organization conceived to unite for service and fellowship all University Women of whatever race or University who may be resident in India Units representing British Universities, Indian Universities and American Universities severally have existed since 1913 (Britain) and 1920 (India and America) respectively

These links are now fused together into one body and are as such affiliated to the International Federation of University Women which embraces 31 countries of the world and has its headquarters at Crosby Hall, Cheyne Walk, London

This International Federation is then a kind of League of Nations in which the University is the Unit and the opportunities it affords for better understanding for world-friendship, and world service, will easily be imagned

As forming one Family, its Members help the common cause of women they help one another by inspiration and interchange of service they help the country for which as individual Units they stand, inasmuch as that country is swept forthwith by reason of its place within the International Federation alone into world statistics and the dignity of recognition by the League of Nations at Geneva

The benefit to Members individually also is great. The Club Houses of the Federation all over the world are open to them. Equally so are all Scholarships and Fellowships offered by the Federation.

During 1929 these last have included Scholar ships from Great Britain and America which gave free tuition, board and residence at certain Colleges to students for a degree residential scholarships at Crosby Hall, valuable Fellowships and Prizes offered chiefly for Medical or Scientific research by Australia and America

A special scholar hip was offered in 1929 by Barnard College, Columbia University to under graduates from India

Membership is open to Women Graduates of any University through the University Colonul Graduates are at present attached to the British Unit

Subscriptions —British Unit Rs 3 a year Indian Unit Rs 3 a year American Unit Rs 2 a year

The Federation has Branches in Bombay, Calcutta, Lahore, Madras, Kodalkanal Each Branch has its local Committee But as a whole the Federation is under a Central Committee with Headquarters at Calcutta for the years 1928 and 1929 Headquarters are at Bombay for 1930-31

OFFICE BEAPEPS, CENTRAL COMMITTEE President—Miss McDougall

LOCAL REPRESENTATIVES

Bombay Miss Pipper
Miss Kanga
Calcutta Miss Corneha Sorubji
Punjab Mrs Skemp
Miss Zutsi
Madras Mrs P Seetha

Honorary General Secretary, Mrs Doctor, Hirl Mansions, Bombay

Applications for membership should be made to the Honorary General Secretary who will forward the same to the Local Secretary to whose Unit it may appertain saints—Kamb santa (prefixed to Papa ('Pope'))—Mal santo ('Pope')—Tet sántu—¹ Jap seito, this is probably from the English 'saint'

San-Tomé (Saint Thomas, this being the name given to a coinstruck in Goa) Konk satmém, a gold coin with the effigy of St Thomas A difference is made between navém satmém ('new St Thomas coins') and pai ném satmém ('old St Thomas coins') [Anglo-Ind St Thomas, St Thomae] 1—Jap san-

tome, santomejina, species of striped cloth which came from San-Tomé of Mylapore near Madras Hepburn gives as a meaning of the word the term taffecillas, I do not know to what language this word belongs but it occurs frequently in old writers.

Saraça (a kind of printed ; cotton fabric) Konk sarás — ;
Jap sarasa ²

The word is of Malay origin, sarásah See Gonçalves Viana, Apostilas, I, p. 347

[In the Glossario and also in Gonçalies Viana e a Lex Port, etc., Dalgado makes the sugges-

tion that the Malay saiásah may itself have come from the Sansk sārasa, the zone or girdle of a woman Saraça in the sense in which it is used by old Portuguese writers with reference to India or the Far East is identical with the article called in Anglo-Ind sarong, in Port sarão, from Malay sárang which is the Sansk sāranga meaning 'variegated' and also 'a gar-See Linschoten's interment esting description of 'clothes of Sarasso' (Hak Soc Vol I, Burnell's attempt to p 91) explain 'sarasso' as the Hind $saias\tilde{a} = 'superior$ is very unsatisfactory]

Sargento (sergeant) Konk sārjent — Tet sarjéntu — Gal sarjéntu, saréntu

Sarja (serge) Konk sár) — Mal serja

The Portuguese Dictionary, Contemporaneo, derives sarja from the Latin sericus, and that of Cândido de Figueiredo from the Arabic sardje

Satán, satanás (Satan) Konk satānáz — Sindh Dav setan — Sinh sátan — Gar satan — Gal satanaz — Jap satan

Saután, used in some of the Indian languages, is from the

[&]quot;In the Azores Islands there is in use even to day a woman s under petticoat called caraça, says Senhor Brito da Fonseca But I am inclined to think that this word saraça came from the East Dr Alberto de Castro, Flores d Coral, p 172

The Church.

courch Act and measure in 1927, and from the date of severance appointed under the Act, the Church of India, Burma and Callon has been free to manage its own affairs, although, as it states in the Presemble to its Constitution been tree to manage its own airurs, attnough, as it states in the Preamble to its Constitution, it has no intention or desire "to renounce its obligations to the rost of the Holy Cotholic children to the rost of the Holy Cotholic it has no intention or desire "to renounce its obligations to the rest of the Holy Catholic Church and its fundamental principles, but on the contrary acknowledges that if it should appeal those fundamental principles it would appeal those fundamental principles it. the contrary acknowledges that it it should abandon those fundamental principles it would break spiritual continuity with its past and destroy its spiritual identity."

Like all the other branches of the Anglican communion the Church of India Burma and Cerlon is Episcopal It is composed of fourteen sees, Calcutta, Madras, Bombay, Cochin, Rangoon Lucknow, Chota Nagpur, Dornakal, Assam and Nasik Chota Nagpur, Dornakal, Assam and Nasik Of these the first to be erected was Calcutta in 1814 and the last was Nasik in 1930 by election on the Episcopal Bench are filled by election on the Episcopal Bench are filled by election each diocese electing its own bishop The Bishops rule the Church and to them is reserved the final word in all matters of faith and order, Like all the other pranches of the Anglican bisnops rule the Church and to mean is reserved, the final word in all matters of faith and order, the final word in conjunction with a greatern the nru word in an inacters of rum and order, but they rule in conjunction with a system of Councils which has been framed so as so give the greatest possible amount of representation to the whole body of the futhful The and confirmed member of the Unurch residing of the parochlal area who contributes, in some recognised way, to the fluencial support of the Church, is a member of the Parochlal Council of the ecclesiastical area in which he resides and is called a Qualified Elector and is called a Qualified Elector TOTAL

Above the Parochial Councils come the Diocesan Councils included in the number of their parishioners of the Parochial Priests holding the Bishop's license are members of the Diocesan Councils cone of every council and to it are sent Lay Representatives Proposed to the Qualified Diocesan Councils elected by the Qualified Diocesan Councils manage all purely domestic matters and have elected by the right of petitioning the General Councils manage all purely domestic matters and have the right of petitioning the General Councils manage all purely domestic matters and have the right of petitioning the General Councils manage all purely domestic matters and have the right of the Church
The Church of England in India became on Narch 1, 1930, a sell governing branch of the Anglican Communion been an integral part of the Church of England and its bishops were considered to be This and its bishops were considered by the passing of the Archdiocese of Canterbury of the Archdiocese of Canterbury of the Indian of the Archdiocese of Canterbury of the Indian of the Act and Measure in 1927, and from the bond was severed by the passing of the Indian Church Act and Measure in 1927, and from the Church is most carefully safeguarded and to f severance appointed under the Act, and the Bishops alone, without the concurrence the Church of India, Burma and Covion has of the Church is most carefully safeguarded and the Bishops alone, without the concurrence of the other Houses, can issue Determinations about both subjects But no Determination of the Bishops can be the subject of disciplinary action until it has become a Canon

Every priest before being licensed to work in the Church of India, Burma and Cevlon takes an oath of obedience to the Canons

The Ecclesiastical Establishment—At the time of the passing of the Indian Church Act and Measure the Government of India acknowledged that it was responsible for produing for the spiritual needs of the Soldiers and Civilians whom it brought out to India These Civillans whom it brought out to India Theso Civilians whom it brought out to India These responsibilities it discharges by maintaining an establishment of chaplains and churches for the four principal denominations of Carlolic Roman Presbyterian, The Chaplains of the Anglican, recently and the Free Churches are appointed by the and the recommendation of a Selection Committee the recommendation of a Selection is the Archbishop of Canterbury is the of which the Archbishop of Canterbury is the of which the Archvishop of Canterpury 18 the Chairman They are paid by Government and pensioned after a covenanted period of service Although they form a definite Department of Government they are not subject to the orders of anyone save their own ecclesiastical of Councils which mass be amount of representation to the whole body of the fauthful The fauthous to the whole body of the Parochial foundation of the System Priest is the foundation of which the Parish Priest is the Council of which the Parish Priest is the convenor and chairman Every baptised, sometimes appointed to stations and sometimes appointed to stations and lave the sometimes appointed to stations and have the fauthful the parochial are who contributes, in some in the parochial are who faundal support of in the parochial are who faundal support of the Parochial Council who do not deliberately withdraw themselves are member of the Parochial Council who do not deliberately but when troops are prestoral care of all the inhabitants of the station who do not deliberately withdraw themselves from their ministrations, of their parishioners included in the number of their parishioners Government orders that they shall have the first claim on their services. The chaplins and their congregations are members of the and their congregations are members of the church of India Burma and Cevion during their residence in India and have full rights of representations.

statesman and the publicist are chiefly interested in the excellent moral effect produced by these institutions amongst the educated or these institutions amongst the educational ideals greater extent than is always recognized to maintained by their staffs The principal political causes, and in the political conflicts University colleges under Protestant auspices of the sixteenth and sevent-enth centuries, are the Madras Christian College, the Duff when they became crystallised, India had no College, Calcutta, the Wilson College, Bombay, part Even those differences amongst Christian Colleges—the Women's Christian College at Christian College at the United States of the United States of the College at the United States of the U Madras, the Isabella Thoburn College at Luck-now, and the Women's Christian Medical College The Roman Catholics have a large at Ludhiana at Ludniana The Roman Catholics have a large or shive and vising Standing before a backfrom small village schools to great colleges from small village schools to great colleges fundamental unity in Christ Compared with the proportion of Christian students in from non Christian, the differences of "contain those of the Protestant bodies The protion of literates amongst native Roman ficial and negligible In consequence the catholics is probably lower than amongst the Protestant converts but, compared with Protestant converts, but compared with Hindus and Mahomedans it is conspicuously The Roman Catholics have some higher 3,000 elementary schools in which \$8,000 boys and 41,000 girls are receiving instruction In middle and high schools they have 143,000 boys and 73,000 girls and in University colleges about 5,000 students of both sexes. These figures, however, include a large proportion of Europeans and Eurasians, who are an almost negligible quantity in Protestant mission echools and colleges

More recent, but producing even more wider spread results, is the philanthropic work of Christian missions Before the great famine of 1878, missionaries confined themselves almost exclusively to evangelistic and edu cational activity. The famine threw crowds of destitute people and orphan children upon bands Orphanages and industrial became an urgent necessity But bands schools the philanthropic spirit is never satisfied with Episcopate, it will be linked up with the Catholic one kind of organisation or method. A great tradition of the Anglican Church stimulus was also given to medical mission. Hospitals and dispensaries have sprung up ir all parts of the mission field, and leper asylums are almost a monopoly of Christian missionary In 1911 the total number of medical missionaries working under Protestant socie-ties in India was 118 men and 217 women, the majority of the former being also ordained institutions in which 50 different arts and crafts are taught, ranging from agriculture to type-writing. In this department the Salartion Army hold a prominent place, and the confidence of Government in their methods has been shown by their being officially entrusted with the difficult work of winning over certain criminal tribes to a life of industry The indirect effect of all this philanthropic activity under missionary suspices has been must be a supplementation of the social state of the soc nost marked. It has awakened the social conscience of the non Christian public, and such movements as The Servants of India" and the mission to the Depressed Classes are merely the outward and visible sign of a great stirring of the philanthropic spirit far beyond the sphere of Christian missionary operation«

more acutely than Europeans the scandal and disadvantage of the divisions of Christendom These divisions are due to a very much tians which have a purely religious origin and foundation seem to be of very little account to Indian converts For them the great dividing line is that between Christ and Mahommed or Shiva and Vishnu Standing before a backover the world, is nowhere so strong as in India In South India it has already resulted in the formation of the South India United Church, which is a group union of five of the principal Protestant communions, and as these bodies are in communion individually with all, or almost all, the other Protestant bodies at work in India the Union may be recarded as a Pan-Protestant Union The SIUC is at present negotiating with the Anglican Church If as seems probable the negotiations are successful the result will amount to a union of all the Christian bodies in South India, exc pt the Roman Catholies, on the balls of the last Lambeth encyclical. This will mean that a real National Indian Church will come into being Although it will be tolerant of almost every expression of Evangelical opinion and will retain the freedom of development characteristic of Protestantism, by its acceptance of the Catholic creeds and the Historic of the Catholic creeds

Anglican Missionary Societies

The Church Missionary So lety carries on work in India in seven different missions—the United Provinces, South India, Itavancore and Cochir Bengal, Western India, Punjab and Sind at d the Central Provinces and Rapputana He names are in order of schoolity. Work had names are in order of schoolth. Wor, and begun in what are now called the United Provinces in 1813, in Bombay in 1820, little Published in 1851, and in the Central Provi cos in 1504 In 1852, and in the Central Provinces in 1864. is, therefore, not surprising that foreigner's should represent it by o surd or by u The change of s into z was perhaps influenced by the Portuguese verb zumbar which also means 'to bow in sign of courtesy'

With regard to the meanings of the word, Dalgado says that, though it is true, that sembahyang signifies literally 'divine worship', it is not to be wondered at that it should also be used to denote 'reverential homage in general', in view of the fact that in Sanskrit and the Prakrits pūjā and namaskār are also used in a similar twofold meaning Even assuming that the Malays had reserved the term sembahyang to connote 'reverence to a divine being', it is not unnatural to expect that the Portuguese should have confounded it with sëmbah, seeing that the manner in which the homage or greeting implied by the latter term was offered appeared to them little short of adoration

Gubernatis derives sumbara from the Sansk sandhyā, in doing so he follows his usual bent of referring every conceivable Indian or Malay word to

Sanskrit Sandhyā could never become sumbara or sambara, but it would become sany or sanz, and these forms are met with in some of the Prakrits

Judging from the citations in the Glossanio, the earliest of which goes back to 1540, it is evident the term sumbaia had acquired a great vogue among the Portuguese chroniclers, and there can be no doubt that such of the English writers as use the word either as substantive or verb adopted it from the Portuguese

Sumbaia in its meaning of 'obeisance' was very similar to the Chinese k'o-t'ou, lit 'knock-head'. which 'kow-tow' to Anglo-India and English

Sumbaia is not in Hobson-Jobson which, however, gives "Somba, Sombay, s A present Malay sambah-an" May not this Malay word be the same as sembah, and might it not be that the 'presents' which the word implies are just those that are generally offered to a person in the East when he is treated with reverence and homage?]

to Girolamo Benzoni (1550) The use of tobacco spread in India during the reign of the Emperor \mathbf{Akbar} (16th-17th cent) It was introduced into India, in all probability, by the Portuguese But the following is taken from Tit-Bits of the 22nd July, 1911 "The idea that tobacco was known Europe only after the discovery of America is erroneous philologist has suggested that the Greeks and the Romans used to smoke tobacco, at least in their colonies It is said that in the Malay Archipelago the use of cheerots and cigars dates from a period before the discovery of America "1

They enjoy it greatly and value tobacco very highly, they usually sell It is curious that Konkani, like the Diavidian languages, has not adopted the foreign word, in this language tobacco is referred to generically as pán, 'leaf', or odhchém pán, 'the leaf for smoking', and is thus distinguished from the betel-leaf, which is also called pan or, more specifically, khāvunchém pán, 'the leaf for eating' From pán is derived pānkár, 'tobacconist'

There can be no doubt about the home of Nicotiana Tabacum being America (De Candolle, Origine, III)Spaniards were the first to become acquainted with this plant when, at the close of the 5th century, they visited the Antilles, and Oviedo (Hystoria de las Indias, 1535) was the first to give a clear account of it According to him tabaco was the name in the Carib of Hayti of the Y shaped tube or pipe through which the Indians inhaled the smoke But according

^{1 &}quot;Among them there is one which they call the smoker's weed, and which I would call 'erva sancta' (tobacco), which they say they call (in Brazil) Betum This plant was first brought to Portugal by Luiz de Goes" Damião de Gois, Chron de D Manuel, I, ch 57

[[]Prof Alfred Haddon, FRS, in his Head Hunters says "Although smoking was practised in these Islands (Papua and New Guinea) before the Whitemen came, and they grew their own tobacco, they never smoked much at a time. The native pipe is made of a piece of bamboo from about a foot to between two and three feet in length

almost anything they possess for the same" In Ind Antiq Vol XL, p 40]

^{1 &}quot;In Arabic cadego ando which means leaf of India" Garcia da Orta, Col van [ed Markham, p. 203]

and in Lu-Chicongo tabaco and fumu, the last named being the Port fumo, 'smoke'

There are no references to the tobacco plant in Baber's Memoirs (1519-1525) nor in Garcia da Orta's Colloquies (1563), nor in Christoval Acosta (1578), not even in Linschoten "The first direct refer-(1589)ence to it, in connection with India, centres around certain Portuguese missioniaries at the court of the Great Mughal Doubtless to the Portuguese 18 due the credit of having conveyed both the plant and the knowledge of its properties to India and China It is said in the Dara-shikohi that they had conveyed it to the Deccan as early as 1508 Asad Beg, of date 1605 (Elhot, Hist Ind. 1875, VI, 165-7), says of Bijapur that he found some tobacco and, "never having seen the like in India I brought some with me and prepared a handsome pipe of jewel work" These he presented to the Emperor Akbar, who attempted to smoke, until he was forbidden by his physician would thus seem to have been known in the Deccan for nearly

a century before it was carried to the rest of India By 1617 smoking had, in fact, become so general in India that the Emperor Jehangir forbade the practice, as also had Shah Abbas of Persia (Elliot, lc v, 851)" (Watt, The Comm Prod of Ind, p 796)

The cultivation of the plant must have been taken up vigorously and spread with surprising rapidity, for there are references in letters and invoices received by the East India Company from its servants in the East of as early a date as 1619 to shipments of tobacco from India These references also enable us to know the prevailing price of tobacco in India in these early years of its cultivation ¹

It is not enough to say, as Mr Ray does, that because tāmiakūta is mentioned along with opium, gānjā, and other intoxicants, it must "therefore mean 'tobacco'" Why should not be some other narcotic like opium or gānjā? Tt requires no great philological acumen to perceive that tabaco could give in Bengali tāmāku, as it did in Marathi, in which tamākhú exists side by side with Moreover, botanical $tambar{a}khar{u}$ evidence is completely opposed to Mr Ray's contention (See Ind Antiq, Vols I, p 210 and XXXVII, p 210)

Taberna (tavern, pothouse) Sinh teberuma, teberema, vern terms surāsela, surāšaláva

Tabernáculo (tabernacle) Konk tābernákl — Tam tabernákulu

Tacho (stew-pan) Sinh táchuva — Mal táchu — Tet , Gal táchu, tásu

Tajélo, from the Malay spoken in Amboyna, is, according to Dr Schuchardt, composed of tacho and tijela 'bowl'

[Taça (a cup) ²Anglo-Ind toss ¹

'Toss' is used by Fryer and Ovington in the sense of 'a cup', and their editors derive it from Pers tas, 'a cup' the Persian word was so much in use in the 17th century as to have been easily picked up by English travellers it should, without a doubt, have been adopted in colloquial Urdu or Hindi, in which, however, we The Hindi word do not find it for 'cup', in common use, 18 Taca was used pyālā or jām by the Portuguese for 'a cup', especially 'drinking cup', and as their testas accompanied by drinking had acquired a notoriety in India, it is not improbable that their name for 'cup' enjoyed considerable currency The O E D regards 'toss' used by Fryer as a variant or misprint for 'tass' which derived from Arabic or Persian and

^{1 [&}quot;And then most of them (Persions) will freely take off their Bowls

of Wine, most of Silver, some of Gold, which we call a Toss, and is made like a Wooden Dish" Fryer, East India and Persia, Hak Soc, Vol III, p 137]

^{[&}quot;All the Dishes and Plates brought to the Table are of pure Silver, massv and Substantial, and such are also the Tosses or Cups out of which we drink." Ovington, A Voyage to Surat, O U P, p 231]

Ho-pital was opened in 1900 and has now 200 beds In 1913 non Christian Students were also admitted for training, and the name was modified to its present title given above

In 37 years, 212 Medical Students have qualified as doctors, besides 122 as Compounders, 147 as Nurses and 306 as Dais and Midwives

At present 252 are in training—118 as Medical Students, 16 as Compounders, 50 as Nurses, and 80 as Nurse Dals

New laboratories have been built for Clinical Pathology, for Physiology, and for Chemistry and Physics New quarters for Sisters, Nurses, Assistant staff and also a new Babies' Ward The new Dispensary for out patients has now become very popular

THE MISSIONARY SETTLEMENT FOR UNIVERSITY WOMEN was founded in Bombay in 1896 Its work is religious, social and educational The Settlement supplies a hostel for University students of all nationalities and a few Indian professional women Classes for educated girls are provided and teaching is also given in pupils' homes. The Settlement staff take part in many of the organised activities for women staff. work in the city The Social Training Centre is located at the Settlement The course, lasting a year, includes both theoretical and practical work

The South Indian Territory -–The South Indian Territory embraces the native states or Trayancore, tochin and the Tinnevelly District of British India Work is being carried on at more than 1 200 centres, among six castes

During the past year considerable advances have been made in all parts of the Territory but there are still great opportunities for extension, there being many unoccupied localities, particularly in Central and Northern Travancore and Tinnevelly District of British India from which repeated appeals have been received for the opening up of Army work

number of Village Halls and Officers' Quarters have been creeted during the past year The Divisional Headquarters and the Central Hall at Vallisoor form one of the finest properties in the Southern Territory

In this Command there are upwards of 300 well conducted Day schools wherein nearly 8,500 boys and girls receive religious and secular instruction

There are three Boarding Schools two at Nagercoil and one at Trivandrum mothering a total number of 140 children Besides there is a Hostel at Nagercoll wherein 20 bright and

new Division has been formed this year with the Divisional Headquarters at Adoor This makes a total of 11 Divisions in the Territory

The Juil Meetings are conducted in the Central Prison every Sunday afternoon, which prove a great blessing to the convicts

In important event this verr was the decision of the Cochin Government to entrust the management of the new Leper Asylum at Adoor to the Salvation Army It-Colonel Pritchard, the Agent to the Governor-General, Madras, performed the opening ceremony. The settlement covers 100 acres of land on which are erected afteen blocks. There are also five wells a septic tank and two small halls for religious worship

An epidemic of small-pox, which prevailed in the Territory, caused considerable havoc Our Officers did vallant service in administering the needy during this time

The Medical Department in this Territory is very proud to have its first qualified Indian Medical Officer Three more have been sent out this very for training

Territorial Headquarters -The Salvation Army, Kurayanconam, Trivandrum

Territorial Commander —Lieut-Commissioner Priva (Mrs A Trounce)

Chief Secretary -Colonel Yesudasan Sanjivi Assistant Chief Secretary - Brigadier Anand | Singh (Bowver)

hypothesis ${
m that}$ Crooke's 'trankey' may be connected with the Port trincador is inadmissible, it is no doubt the same word as the Port terran-But what is the derivation of terranguim? Dalgado's view is that terranguim is either an augmentative diminutive of terrada (Ar tar $r\bar{a}d$), the name of a short boat and also of small boats for service in war used in the same parts, which is frequently referred to by Portuguese chroniclers It is not impossible that the Portuguese spoke of the small terrada as terradim.

Commentaries, Hak Soc, Vol I, p 105]

["Even the water comes (to Ormuz) from outside, from the main and from the neighbouring isles for their drinking in certain small boats which they call teradas, as I have said before" Duarte Barbosa, ed Dames, Vol I, p 97]

["As soon as the Contract was made, the Arabs went couragiously to Work, and gave the English their Choice, and then got Trankies, (or Barks without Decks) and shipt what belonged to the English for Muslat" Hamilton, East Indics (1827), Vol 1, p 57]

[(The King of that Province) "had provided a sufficient Number of small Vessels, called Trankles, for their Transports' Idem, p. 59]

just as they formed the diminutive varandim from varanda, and that terradim became subsequently transformed into terraquim perhaps through the influence of terráqueo ('terraqueous') See Glossar 10 Both terrada and terrangum are mentioned in Vieyra's Dictionary The derivation of 'trankey' given in the OED makes all the above hypotheses valueless and shows how necessary it is to seek for the explanation of a word in the language of the people by whom, and of the region where, it is used The O E D says 'trankey or tranky' is adopted from Pers trankeh, name in Persian Gulf for a pearl diver's net, or perhaps its adjectival derivation trānki, applied elliptically to a pearling boat, and gives as its meaning 'a small undecked vessel, used in the pearl fishery in the Persian Gulf'

There is no reason to suppose that 'trankey' owes anything to terranquim which is the Portuguese transcription of the Persian word For the insertion of e after t, and for the nalised termination, of mordenim]

provision however is subject to the condition | the subordinate courts. Returns are regularthat every Lucepean British subject brought it, sent to them at short intervals and the High for trial before the district magistrate or sessions judge has the right, however trivial be the charge, to claim to be tried by a jury of which not less than half the number shall be Europrans or Americ ne was made in the powers of district magistrates, the law in regard to other magistrates remained their duties, unaltered." Since 1836 no distinctions of race have been recognised in the civil courts through nit India

After a disension on this subject in the Legislative Assembly in September 1921, the following motion was adopted — That in order to remove all racial distinctions between Indians and I properns in the matter of their and American and Turopeans who are not but sentences of death are subject to confirma British subjects in criminal trials and proceed tion by the highest court of criminal appeal in Act XII of 102; in place of the old Chapter XXXIII (75443 463) the new Chapter XXXIII (55443 449) with certain supplementary provisions were sub-tituted. This has in some measure reduced the differences between the trials of Luropeans and of Indians under the Code

High Courts

The highest legal tribunals in India are the High Courts of Judicature These were consti tuted by the Indian High Courts Act of 1861 for Bengal, Rombay and Madras, and later for the United Provinces and the Punjab superseding the old supreme and Sudder Courts More Patna and Rangeon as well The Judges are appointed by the Crown, they hold office during the pleasure of the Sovereign, at least one-third of their number are barristers, one-third are recruited from the judicial branch of the Indian Civil Service, the remaining places being available for the appointment of Indian lawyers. Trial by jury is the rule in original criminal cases before the High Courts, but juries are never employed in civil suits in

For other parts of India High Courts have been formed under other names. The chief difference being that they derive their authority from the Government of India, not from Parliament In Burma there is a Chief Court, with three or more judges, in the other provinces the chief appellate authority is an officer called the Judicial Commissioner In Sind the Judicial Commissioner is termed Judge of the Sudder Court and has two colleagues

The High Courts are the Courts of appeal from the superior courts in the districts, criminal and civil, and their decisions are final, except in cases in which an appeal lies to His dency Towns of Calcutta and Bombay Elsc-Majesty in Council and is heard by the Judicial Conmittee of the Privy Council in England, many staff of magistrates and police officers. The High Courts exercise supervision over all unaided by jurors

courts are able, by examining the returns, by ending for proceedings, and by calling for expinations, as well as from the cases that come before them in appeal, to keep themselves Whilet this change to some extent acquainted with the manner in which the courts generally are discharging

Lower Courts

The Code of Criminal Procedure provides for the constitution of inferior criminal courts it; led courts of session and courts of magisdency towns, is divided into sessions divisions on disting of one or more districts, and every sessions division has a court of session and a trial and punishment for offences, a committee reasions judge, with assistance if need be be appointed to consider what amendments. These stationary sessions courts take the place should be rade in the provisions of the Code of the Luglish Assizes, and are competent to of Criminal Procedure, 1898, which differentiate try all accused persons duly committed, and between Indians and I proposed British subjects to inflict any punishment authorised by law, tion by the highest court of criminal appeal in incs and to a port on the less methods of giving the province Magistrates' courts are of three erect to their preposits. As a result of the classes with descending powers Provision recommendations of the Racial Distinctions is made and largely utilised in the towns, Committee the law on the subject was further for the appointment of honorary magistrates, and the training Law Amendment in the Presidency towns Presidency magistrates. in the Presidency towns Presidency magistrates deal with magisterial cases and benches of Justices of the Peace or honorary magistrates dispose of the less important cases

Trials before courts of session are with assessors or juries. Assessors are either with assessors or juries. Assessors assist, but do not bind the judge by their opinions, on juries the opinion of the majority prevails it accepted by the presiding Judge. The Indian law allows considerable latitude of appeal. The prerogative of mercy is exercised by the Governor-General in-Council and the Local Covernor-of the agent and the Local Covernor of the control of th Government concerned without prejudice to the superior power of the Crown

The constitution and jurisdiction of the inferior civil courts varies Broadly speaking Broadly speaking one district and sessions judge is appointed for as District Judge he presides in each district its principal civil court of original jurisdiction, his functions as Sessions Judge have been described For these posts members of the Indian Civil Service are mainly selected though some appointments are made from the Provincial Next come the Subordinate Judges Service and Munsiffs, the extent of whose original jurisdiction varies in different parts of India The civil courts, below the grade of District The civil courts, below the grade of District Judge, are almost invariably presided over by Indians There are in addition a number of Courts of Small Causes, with jurisdiction to try money suits up to Rs 500 In the Presidency Towns, where the Chartered High Courts have original jurisdiction, Small Cause Courts dispose of money suits up to Rs 2,000 As Insolvency Courts the chartered High Courts of Calcutta, Bombay and Madras have jurisdiction in the Presidency towns In the mofussil similar powers were conferred on the District

is, therefore, to be presumed that it had its origin in one of Dravidian languages Now, if tuppasi corresponds to dubhāśi and primarily signified an 'interpreter', it is clear that it would be applied in this acceptation to the indigenous Christians who might be acquainted with Portuguese,1 just as well as to the descendants of the Portuguese who would speak besides Portuguese one or more of the Indian vernaculars, and as such would be frequently employed as interpreters between the Europeans and the Indians 2 And in this sense the term is used by Portuguese and other"Those who have wants mani-

in the south of India In the early history of the Company these people were extensively enlisted as soldiers' H H Wilson fest and set them forth very well without topaz, or interpreter" Lucena "Appreciating greatly the occasion of finding himself without topaz". Id, Bk ii, ch 16

Afterwards, when the word came to be used of one particular race, and there were interpreters the other from classes, some of the Dravidian languages, in order to avoid confusion, imported the term dubási, as tatsama, in order to designate an interpreter general, as well as a factor or agent 1 (See Hobson-Jobson and Schuchardt, Beiträge, etc.)

[With the object of settling the vexed question of the derivation of the word 'Topaz or Topass', Sir R C Temple collected in chronological order as many references to, and definitions of, the term as appear in Hobson-Jobson, the OED, the Ceylon Antiquary, and his own notes from original records and

COUPT RICLIVER AND LIQUIDATOR AND ASSISTANTS

Wadia, H. H., M.A. Bar at Law Chinov, A. I. J., LL B. Mankar, M. N., M. V., Attorney at-Law Court Receiver and Liquidator lirst Assistant to do Second Assistant to do

The word topi, topi or toppi. which is found in the Gaurian and Dravidian languages, with the meaning of 'cap or hat', is traced by some philologists to the Portuguese tope or topo ('the top, the uppermost end') But the Roteiro da Viagem de Vasco de Gama ('The Log Book of Vasco de Gama') mentions tupy as corresponding to the Port barrete, 'cap', in the list of Malabar words Indian dictionary writers connect topi with topa or top, 'big hat, helmet and (in Konkani) mitre'

[Wilson (Glossary, p 525) has "Toppi-kuda, Malayal A hatumbrella, a hat with a projecting brim on the crown, worn by fishermen and other castes in Malabar, the term seems to be of old, and to precede the Portuguese"]

Toranja (Citius decumana, the shaddock or 'the pomelo') Konk torónz (neut, the fruit), torónz (fem, the plant) — Marturany, toranyan — Guj Hindust turany — Sindh turúnyu — Tel turany, turányu — | Turk túruny | —

The plant is a native of Java, probably introduced by the Portuguese into India The

name is the Arabic turun,, Persian turun, which appears to be the immediate source of the word in many of the languages

[The pomelo has no Sanskrit name It was known to the early Dutch traders as 'Pompelmoes' (=pumpkin citron), hence some of the modern names It reached India and Ceylon in the 17th century

The pomelo is presumed to have been introduced into India and Ceylon from Java, hence the name batávi nebu, and it was carried to the West Indies by a Capt Shaddock after whom it is known there. The best quality of the pomelo is the thin-skinned Bombay variety, hence the South Indian name for it of bombalinas. See Watt, The Comm. Prod. of Ind.

Toro ('trunk or body of a man') Mal, Jav, toro, a kind of jacket According to Dr Heyligers it is an abbreviation of báju-toro (Mal) and rasulan-toro

Tôrre (tower) Konk tôrr, vern terms gopur, burinz— Tet, Gal tôrri

Torto ('squint eyed') Mal torto (Haex)

some —Sindh tuphanu, hurricane, extravagance, calumny Tuphāní, boisterous, quarrelsome, calumniator — Punj tufán, storm, strife, calumny Tufāní, a disorderly fellow — Kash tuphán, tempest —Tel tuphánu -Kan, Tul tuphanu, hurricane, groundless accusation, calamity -Anglo-Ind tuphoon —Khas tupan —Mal tufán - Jap tarfu - Peis tūfán, tūfán, strong winds, inundation —Ar tután, inundation, overpowering rain, cataclysm

Portuguese dictionary-writers, with the exception of Fr João de Sousa, point out as the original of the Portuguese word the Greek typhon, which normally ought to give typhão or titão But was the term current in Portugal? Fernão Pinto says "We went through such a terrible southwind which the Chinese call tufão" And in another place "The storm w bich the Chinese called tufão "

The same source is indicated by Diogo do Couto, and

corrobotated by John Barrow and Giles, who derive the word from the Chinese syllables ta-fung, 'great wind', and by Di Hirth, who derives it from the local Formosan term t'ai and fung

Webster (s v typhoon) says that the whirlwind which raises clouds of dust was called typhoon "because it was regarded as the work of Typhon or Typhos, the giant who was struck with a thunderbolt by Jupiter and buried under Mount Etna" But the meaning he gives to the word is "a violent tornado or hurricane occurring in Chinese seas"

Yule and Burnell admit that the word was first employed in the China Sea and not in the Indian Ocean, and observe that the Portuguese tufão distinctly

[&]quot;They had very rough weather, which the inhabitants (of the port of Chincheu) call Tufão, which is a distur-

bance so great and fierce and causes so many storms and earthquakes ," V, vm, 12 "The fly of the compass was moving as fast as do the tufões of China" Id, VIII, 1, 11

^{[&}quot;It was accompanied by such a furious storm of rain, with lightning and hail, that those who were familiar with these coasts declared it to be a tufon, a form of storm much dreaded in those parts" Manrique, Travels, Hak Soc, Vol II, p 53]

THE INDIAN POLICE.

Origins —Cornwallis was the first Indian administrator to take the burden of policing the country off the zemindars and to place it on Government He ordered the District Judges of Bengal in 1793 to open a Thana (Police Station) for every 400 square miles of their jurisdiction, and to appoint stipendlary thanadars (Police Station Officers) and subordinates

In Madras in 1816 Sir Thomas Munro took superintendence of police out of the hands of the sedentary judges and placed it in the hands of the peripatetic Collector, who had the indigenous village police system already under his control In this way the Revenue Department controlled the police of the districts and still to some extent does so, especially in Bombay Presidency

In Khandesh from 1826 36 Outram of Mutiny fame showed how a whole time military commandant could turn incorrigible marauders into excellent police, and Sir George Clerk, Governor of Bombay in 1848, applied the lesson by appointing full time European Superintendents of Police in many Districts

Madras had a torture scandal in 1853 which showed that 3 Collectors had no time for real police superintendence, in 1859 the principle of full-time European superintendence was introduced in a Madras Act of that year and the control of the Collector was removed

The Mutiny led to general police overhaul and retrenchment and the Madras Act was mainly followed in India Act V of 1861, "An Act for the Regulation of Police", which still governs police working everywhere in India except Madras and Bombay, which has its own Police Act (IV of 1890)

Working —Strictly speaking there is no Indian Police With the doubtful exceptions of the Delhi Imperial Area Police, and the advisory staff of the Intelligence Burcau attached to the Home Department, the Government of India has not a single police officer directly under its control The police provided for by the 1861 Act is a provincialised police, administered by the Local Government concerned, subject only "to the general control" of the Governor General

Within the Local Government area the police are enrolled and organised in District forces, at the head of each of which is a District Superintendent of Police with powers of enlistment and dismissal of constabulary, and Police Station Officers may also be dismissed by the DSP

The D S P is subject to dual control. The force he commands is placed at the disposal of the District Magistrate for the enforcement of law and the maintenance of order in the District. But the departmental working and efficiency of the force is governed by a departmental hierarchy of Deputy Inspector General of Police, Inspector-General of Police, and Home Department. Generally speaking the D S P has to correspond with his District. Magistrate on fudicial and magisterial topics, and with his departmental chiefs on internal working of his torce.

The C I D—The Curzon Police Commission of 1902 3 modernised police working by providing for the direct enlistment and training of Educated Indians as Police Station Officers, and by creating specialised police agencies under each Local Government for the investigation or specialist and professional crime These agencies are known as Criminal Investigation Departments and work under a Deputy Inspector General They collate information about crime, edit the Crime Gazette, take over from the District Police crimes with ramifications into several jurisdictions and they control the working of such scientific police developments as the Finger Print Identification Bureaux

Headquarters and Armed Police— At the chief town of each District the D S P has his office and also his Headquarter Police Lines and parade ground This is the main centre for accumulation and distribution to the Police Stations and Outposts of the District of clothing, arms, ammunition, and accountrements Here are the Stores and the Armoury Here also constabulary recruits enlisted by the D S I' are taught drill, deportment, and duties and are turned out to fill vacancles The Headquarter Lines also contain the two hundred or so armed police who mount guard on Trensuries in the District, and also provide prisoner and treasure escort Actually they form a small and mobile local army equipped with muskets (single loading) and bayonets The most highly trained section of them go through a musketry course and are armed with 303 service rifles At most head quarters but by no means all, there is also a reserve 303 service rifles of mounted and armed police

Thanas and Thanadars - Almost throughout India the popular terms for Police Station and Police Station Officer are Thana and Thanadar It is at the Police Station that the public are most in touch with the police and the police with the public. Whether it be in a large city or in a mofussil hamlet the Thana ithe place where people come with their troubles and their grievances against their neighbouror against a person or persons unknown in dealing with such caller, the Thundar who like police of all ranks, is supposed to be always on duty, is chiefly guided by the Fourteenti Chapter of the Code of Criminal Procedure and the Second Schedule at the end of that This schedule shows nearly all penal Code offences and states whether or not they or cognicable by the police. The fourteenth Chapter lays down that a cognisable complaint must then and there he recorded, all d and investigated. A non-cognicable constitution is merely noted in a separate book and the complainant is told to go to court.

Police Prosecutors—The complainant in a cognisable case not only has his comparate recorded but invisitant d without parm it fee. If the thanadar speceds in call hilling a prima facial case against the role of the prima facial case against the role of the prima police prosecutor, who is given the junior plander, charged by Government to be a police cases in the lower courts.

Mundy, Travels, Hak Soc, Vol III, pt I, p 164, n 1

The OED distinguishes between two different Oriental words (1) the a forms, like Port tufão, are referred to Ar tāfa which itself is probably an adaptation of Gk Typhon, (2) tuffoon, tyfoon represent the Chinese taifung. The spelling of the second has apparently been influenced by that of the earlier known Indian word, while that now current is due to association with Typhon

Below is a description of a storm given by Pyrard which is clearly influenced by the Greek conception of Typhon ²] Tumba (a bier for the poor)
Konk túmb —Beng tumbá —
Tet, Gal túmba —? Jap
fumbo, a giave, vern term
haka

The change of t into f in the Japanese word cannot be explained Cf tinta, $m \acute{a}rtin$

Tumor (bump, swelling). Konk, Mar tumbar

Tutanaga (a Chinese alloy of copper, zinc and nickel, also zinc) Anglo-Ind tootnague.

—[Indo-F1 toutenague]

It appears that the immediate source of the Portuguese word is the Tam tuttanāgam, 'zinc', from the Peisian tūtiānāk, 'oxide of zinc' 1

all sail in time, and you would suppose that the masts and yards would give way and the ship be lost Often you see coming from afar great whirlwinds, which the sailors call dragons, if they pass over ships they break them up and send them to the bottom they are seen coming the sailors take naked swords and strike them one against the other, in the form of a cross, on the bows of the ship, or in the direction where they see the storm coming, and they consider that that prevents it coming upon the ship and turns it aside" Voyage, Hak Soc, Vol I, p 11]

^{1 [&}quot;Their houses (of the people of Macao) double tyled, and thatt plaistred over agame, for prevention of Hurracanes or violent wyndes thatt happen some Yeares, called by the Chinois Tuffaones"

^{2 [&}quot;On the 24th August we passed the equinoctial line". Nothing is so inconstant as the weather, but there it is inconstancy itself, in a moment it becomes calm as by a miracle, in half an hour there is on all sides thun der and lightning, the most terrible that can be imagined this is chiefly when the sun is near the equinox Suddenly the calm returns, then the storm begins again, and so on All at once the wind rises with such impetuesity that it is all you can do to lower

Valado (a mound or embankment) Anglo-Ind ualade (l us), vellard (used in Bombay) ¹

[Not in OED The term is applied to the causeways built between Bombay and the neighbouring islands, intended to exclude water and to serve as dry passages over the marshy land

Whitworth's suggestion that the Marathi walhád, to cross over, would supply a derivation for 'vellard or walade' would be an instance of striving after meaning, if there were such a word in Marathi Molesworth does not mention it Olāndane in Mai is 'to cross over']

Valer (to be worth) Mal

Vapor ('a steamship') Konk $\iota \bar{a} por$, vern term $\bar{a} g$ - $b \delta t$, lit 'fire boat', ($b \delta t$ is from the English 'boat')—Tet vapor -? Pers $v\bar{a}pur$ -? Ar $v\bar{a}b\acute{u}r$ - | Turk $v\acute{a}por$ |

Belot derives $v\bar{a}b\hat{u}$ from Italian

Vara (a linear measure, a yard) Konk, Guj. ván Adhaván (Guj.), half a yard —Malayal vána —Kan vánu —Tul vánu, vanu —Mal vana, a stick (Haex) 1

The word is used in Konkani and in Tamil also in the sense of 'the pole of a canopy, and of the staff carried by the chief member of a religious sodality'

Varanda (verandah) Konk varánd, the principal part of the house which one first enters —? Mar varand, varadá, varāndá, varandí, parapet, a wall alongside a verandah, or a street —Guj varandó, gallery —Hındı, barāndá, varāndá, varandá, barandaka, barāmada Hindust barāmada — Beng bārāndá — Ass barandá, a species of thatched cottage -Sinh baránde, barándaya varandaya — Tam, Malayal varanda —Kan, Tul varanda

^{1 &}quot;The Moors were also busy making a vallado in the river" António Bocarro, Dec XIII, p 81

^{[&}quot;The bridge over the "wide breach of land" is now called Breach Candy It is also called "Vellard," a corruption of the Portuguese Vallado which means a fence or hedge, properly a mid wall with a fence of wood upon it" Da Cunha, The Origin of Bomban, p. 57]

^{1 &}quot;All these kinds of cloths are produced in entire pieces each of which measures twenty-three or twenty four Portuguese varas" Duarte Barbosa, p 362

Burnell observes that the meaning referred to above "does not belong to old Sanskrit, but is only to be found in works relatively modern", but does not cite any text

(Mar) Molesworth distinguishes between two varandas, one of Sanskrit origin, in the sense of 'a load of hay', and the other with the various meanings mentioned above. but does not suggest its etymology Candy (Mar) translates English 'veranda' into osrí, padví, padsál, pad-osrí, padšālā, padávi, oti Almost all these words, and in addition to these osió and otó, are current ın Konkanı Gundert (Malaval) admits the Portuguese source Campbell (Tel) adopts the Sanskrit derivation Ziegler (Kan) states that varanda is a foreign term but does not indicate its origin Haex (Mal) mentions baranda ('a story or balcony') as a vernacular term, but Fayre attributes it to a Wilkinson Sanskrit and to Portuguese origin (Sund) derives it from Portuguese

Yule & Burnell were the first to suggest that there existed in Portuguese and Spanish the word varanda, independent of the Indian varanda, with the same or analogous meaning, because the author of the Roterro (1498) employs it without explaining it, and also

1 "And he came to join us where we had been put in a varanda where there was a large candlestick made of brass that gave us light" Pinto (1540) employs the word varanda very often as though it was wellknown "We entered with her into another court much nobler than the first, surrounded on all sides with two kinds of varandas, as if it had been a closster of monks" [Cogan renders this reference to verandas thus about invironed with Galleries" (in And Gasper Correia Hobson-Jobson) "The King was in a varanda, so that he saw everything in the order in which it happened "

[In Chronica de Bisnaga (1525), ed David Lopes, both forms varamdas and baramdas are met with and nowhere is an explanation of the term offered "The palaces of the King (of Vijayanagar) are of this kind they have a gate leading to an open space

and above this gate there is a pinnacle very high built like such others with their varamdas. After going through this gate you find there is a large open space—and you soon come to another gate very like the first—so much so that when you have entered this you have a large open space before you, and on either side of it some low baramdas in which the captains and

warders and convict warders are employed | Indian Year Book, 1922 (pages 670 671) With this is bound up the question of a special class of well behaved prisoners which was tried from 1995 onwards in the Thana Jall

Juvenile Prisoners - 14 regards ful effeaters -re, the a below the are of 15 -the lar provides alternatives to imprisonment, and it is strictly enjoined that boys shall not be sent to all when they can be dealt with other the alternatives are detention in a reformators school for a period of from three to seven years but not beyond the age of 18, discharge after admonition, delivers to the parent or guardian or the latter executing a bond to be responsible for the good behaviour of the culprit and whipping by way of school discipling

The question of the treatment of ' young adult' prisoners has in recent years received adult" prisoners has in recent years received much ettention. Under the Prisons Act, pri soners below the age of 15 must be kept separate from oder prisoners but the recognition of the principle that an ordinary fall is not a fitting place for adolescents tother than youthful habitrals) who are over 15, and therefore in eligibe for admission to the reformators school, has ed Local Governments to consider schemes for teing beyond this by treating young adults on the lines followed at Borstal, and considerable procress has been made in this direction. In 1915, a special class for selected inventies and roung adults was a tabilished at the Diarwar jel in Bombay, in 1908 a special juvenilo jell was opened at Allpore in Bengal, in 1909 the Melktiin juil in Burma and the Tanjore jail h Madras were set aside for adolescents, and a new fail for juvenile and "juvenile adult" convicts was opened at Barelli, in the United Provinces, and in 1910 it was decided to concentrate adolescents in the Punjah at the Lahore District fall, which is now worked on Borstal lines. Other measures had previously been taken in some cases, a special reformatory exetem for 'juvenile adults' lad, for example, been in force in two central jails in the Punjab since the early years of the decade and "Borstal enclosures" had been established in some jails in Bengal But the public is slow to applicate that it has a duty towards prisoners, and but little progress has been made in the formation of Prisoners' Aid Societies except in Bombay and Calcutta, though even in those cities much remains to be done

Reformatory Schools—These schools have been administered since 1809 by the Education department, and the authorities are directed to improve the industrial education of the inmates, to help the boys to obtain employment on leaving school, and as far as possible to keep a watch on their careers

Transportation —Transportation is an old punishment of the British Indian criminal law, and a number of places were formerly appointed for the reception of Indian transported convicts The only penal settlement at the present time is Port Biair in the Andaman Islands

Commission of Enquiry, 1919—A committee was appointed to investigate the whole system of prison administration in India with special reference to recent legislation and experience in Western countries. It most perience in Western countries Its report published in 1921, was summarised in the

number of reforms were advocated but, owing to financial stringency, it has not vot been possible to introduce some of the more im portant of them

Fines and Short Sentences -Those sections of the Indian Penal Code, under which imprisonment must be awarded when a conviction occurs, should be amended so as to give discretion to the court Sentences of Impri-sonment for less than twenty eight days should be prohibited

The Indeterminate Sentences -The sentence of every long term prisoner should be brought under revision, as soon as the prisoner has served half the sentence in the case of the non-habitual, and two thirds of the sentence in the case of the habitual, remission earned being counted in each case. The revision should be carried out by a Revising Board, composed of the Inspector-General of Prisons, the Sessions Judge and a non official. In all cases, the release of a prisoner on parole should be made subject to conditions, breach of which would render him liable to be remanded to undergo the full original sentence. The duty of seeing that a prisoner fulfils the conditions on which he was released should not be imposed upon the police or upon the village headman, but special officers, to be termed parole officers, should be appointed for the purpose parole officers should possess a good standard of education, though not necessarily a university degree, and should both protect and advise the released prisoner and report breaches of the conditions of release

Transportation and the Andamans -If any fresh attempt at colonisation is made, it should be in an entirely new locality. A fresh attempt at colonisation in the Middle Andaman is not recommended. The retention of the settlement at Port Blair on the present lines is not recommended The entire abandonment of the Andamans as a place of deportation is not recommended Deportation to the Andamans should cease, except in regard to specially dangerous prisoners and any others whose removal from Indian jails is considered by the Government to be in the public interests. The existing restrictions as to age and physical condition of prisoners sentenced to transportation to the Andamans should, unless special medical grounds exist in any particular case, cease to apply The Indian Penal Code should be amended by the substitution of rigorous imprisonment for transportation. In provinces where the available prison accommodation will not permit of the immediate cessation of deportation of all but selected prisoners, the Star class should be the first, and the habitual the last, should be the first, and the Institute the last to the key to be detained in Indian jails. No female should in future be deported to the Andamans, and those now there should be brought back to India and distributed among the Provinces to which they belong In those Provinces where the jails are insufficient to detain prisoners. now deported, additional accommodation should be provided as soon as possible

Criminal Tribes —The first essential of success in dealing with the criminal tribes is the provision of a reasonable degree of economic

cerebral sounds, and is employed solely among the Christians together with other terms (vasió, vasií) and in a meaning which is peculiar to it. Sixthly, the English form veranda or verandah betrays clearly its Portuguese, and not indigenous, origin had it been the latter, it would have become uarand in the sole of th

The third hypothesis, little probable proposed by Webster and C Defréméry, points out as the primary source of varanda the Persian barāmada (introduced into Hindustani) a compound of bar ('from above') and āmada ('coming'), and equivalent to 'coming forward, Yule thinks projecting possible that it may be a Persian 'striving after meaning' in explanation of the foreign word which they may have borrowed

[The OED says that 'verandah' was originally introduced into English from India, where the word is found in several of the native languages as Hindi varandā, Beng bārāndā, mod Sansk baranda, but it appears to be merely an adoption of Port and older Sp varanda (baranda), railing, balustrade, balcony The Fr véranda appears to it to have been adopted from English, but to Dalgado from Indo-Fr through Portuguese]

[Varela (an idol, a Buddhist temple and monastery in Indo-China China and in Japan) Anglo-Ind varella ¹

This word which is to be met with in the works of old Portuguese writers is believed to be the Malay barhālā (Jav biāhalā) 'idol,' and to have

¹ Dr Schuchardt finds that in the Romanic languages the actual meaning of taranda is not brought out because the Port taranda Sp baranda, Catalan barana ('balustrade') are derived from the verb 'barrar', Beurage, etc [Barrar in this connection would be derived from barra bar of metal or wood and barrar would mean either 'to support on bars', or 'to lay bars across']

^{1 [&}quot;And they consume many canes likewise in making of their Varellaes or idole temples, which are in great number, both great and small. They be made round like a sugar loafe, some are as high as a church, very broad beneath, some a quarter of a mile in compasse. They consume in these Varellaes great quantity of golde, for that they be all gilded aloft, and many of them from the top to the bottome." Ralph Fitch, in Foster Early Travels, p. 35]

The Laws of 1931

 \mathbf{BY}

RATANLAL RANCHHODDAS, Advocate, High Court,

ANT

MANHAR R VAKIL, Barrister-at-Law

- 1 The Punjab Criminal Procedure Amendment (Supplementary) Act —The Criminal Procedure (Punjab Amendment) Act, 1930, enables the Local Government to appoint Commissioners for the trial of certain specified offences. The present Act provides for an appeal to the High Court by any person convicted on a trial held by Commissioners under the the above Act, and for the submission to the High Court for confirmation of any sentence of death passed by the Commissioners
- 2 The Steel Industry (Protection)
 Act—This Act gives effect to the recommendations of the Tariff Board regarding certain railway materials made of steel A specific duty of Rs 2 4-0 per cwt is imposed on fish bolts and nuts and dogspikes and of Rs 2 per cwt on rivets, gibs, cotters and keys Cromesteel switches and crossings are also brought under the protective tariff Stretcher bars which form part of switches and crossings are liable to the same duty as switches and crossings whether imported with the latter or separately
- 3 The Gold Thread Industry (Protection) Act—Pursuant to the recommendation of the Tariff Board a duty of 50 per cent ad valorem is levied by the present Act for a period of ten years on silver thread and wire (including so called gold thread and wire mainly made of silver), silver leaf, imitation gold and silver wire and thread, lametta and articles of a like nature. The duty on silver plate, and silver manufactures, all sorts not otherwise specified, is restored to 30 per cent ad ralorem. In item No 131 of the second schedule to the Indian Tariff Act, 1894, the words 'gold thread and wire' are omitted.
- 4 The Indian Income-Tax (Amendment) Act—Under sub section (1) (e) of s 58 C of the Indian Income-tax Act, 1922, a private provident fund must be vested in two or more trustees The present Act enables the Official Trustee to be appointed sole trustee of the fund should those concerned desire to appoint him
- 5 The Indian Territorial Force (Amendment) Act—The Indian Territorial Force Act, 1920, does not empower the Governor-General in Council to prescribe extra (voluntary) training for persons enrolled under the Act—The effect of this is that such persons, not being officers, are not subject to the Indian Army Act, 1911. The present Act makes good this omission by substituting incl. (d) of sub sec. (2) of s. 13 of the original Act, the words "preliminary and periodical military training, compulsory and voluntary, for—for the words "the preliminary and periodical training to be undergone by

- 6 The Auxiliary Force (Amendment)
 Act—Under cl (f) of sub sec (2) of s 30 of
 the Auxiliary Force Act, 1920, the GovernorGeneral in Council is empowered to make rules
 for the grant of pay and allowances to persons
 hable to perform military service under the Act
 The present Act empowers the Governor
 General in Council to make rules for the grant
 of pay and allowances to persons who may be
 required to undergo military training under the
 Act but are not liable to perform military
 service The words "persons liable to
 perform military service under this Act", in
 clause (f) of sub-sec (2) of s 30 of the original
 Act
- 7 The Cantonments (Amendment) Act—
 This Act removes certain minor defects from the Cantonments Act, 1924 A proviso is added to sub sec (1) of sec 39 of the original Act which allows a quorum of four to a nominated board (8 2) In sub sec (1) of s 52 of the original Act certain words are omitted which enable the officer commanding-in-chief, the Command, to intervene promptly when he considers it necessary to do so (8 3) Sections 4 and 5 of the present Act remove verbal flaws from so 75 and 77 A of the original Act Under so 99 A of the original Act the Local Government may only exempt property or goods or class or property or goods belonging to the Secretary of State for India in Council from payment of tax Section 6 of the present Act provides for the exemption from taxation of property which does not belong to the Secretary of State for India in Council Unders 236, prosecutions for the offences of loitering for the purpose of prostitution, etc, can be instituted on the complaint of police-officers not below the rank of Sub-Inspector employed in the cantonment Section 7 of the present Act enables a sergeant of police to institute such prosecutions A new section is added which enables Assistant Secretaries to pass routine orders on behalf of the Executive Officer during the latters absence from the cantonment (8 8)
- 8 Indian Naval Armament (Amendment)
 Act—The London Naval Treaty, 1930, was signed on behalf of His Majesty and certain Powers in order to prevent the dangers and reduce the burdens inherent in competitive armaments, and to carry forward the work begun by the Washington Naval Conference and to facilitate the progressive realisation of general limitation and reduction of armaments. This treaty pre-cribes further limitations relating to the displacement of armament of aircraft carriers and submarines. The pre-cent Act gives effect to the London Naval Treaty 1930 so far as British India is concerned, by securing the observance of the restrictions pre-cribed

Labour in India.

During previous years very little authentic submission to the Royal Commission information was available regarding Labour in India, and the sections dealing with this question in The Indian Year Bool were more or less confined to a description of the main Acts in Labour Legislation in India and to such information as could be gleaned from the official Reports of the administration of these Acts and from the Reports published of Enquries conducted by the Labour Office of the Government of Bombay With the appointment of a Royal Commission on Labour in India all Provincial Governments and Railways, and many of the larger labour-employing organisations and Associations of such organisations have made enquiries into labour conditions in their respec tive territories and jurisdictions, and have com piled fairly comprehensive Memoranda for

of these Memoranda have been published, and contain a fund of the most valuable information possible No use could, of course, be made of such information as the Governments and others submitting these Memoranda desire to keep confidential But, where descriptions are given of existing conditions which must be known to large bodies of persons in the respective localities concerned and which could easily be obtained by any person enquiring into them, use has been made of them and every endeavour his been made to make this section as complete as possible by the presentation of essential facts The Editors of The Indian I car Book gratefully acknowledge the sources which have been made use of in the compilation of this note

GROWTH OF THE LABOUR PROBLEM.

India is and has always been a pre eminently and predominantly agricultural country and and predominantly agricultural country and 72 98 per cent of her people are dependent on the soil for their livelihood. Except in a comparatively few cases there is no settled and permanent labour force in most industrial centres in India. The vast majority of industries draw the labour they require from the village—labour which seldom breaks its contact. with village life and periodically returns to renew its associations with it This fact cannot be its associations with it. This fact cannot be too strongly emphasised. If it is lost sight of it would be most difficult to understand how large bodies of comparatively low paid men and women can afford to participate in strikes involving complete stoppage of work and loss in wages for periods of half a year Such strikes would be impossible if Indian industrial labour did not have agriculture to fall back upon as a subsidiary occupation during periods of pro-longed industrial disputes

The emergence of Indian Industrial labour as such may be considered to be associated with the year 1880. Its growth and development since that date may be divided, for purpoment since that date may be divided, for purposes of broad generalisation, into four periods (1) from 1880 to 1915 (2) from 1916 to 1921, (3), from 1922 to 1927, and (4) from 1928 to the present day. The first period marks the growth of factory development with a slow but steady decline in cottage industries. The total number of cetter mile in India roce from 188 number of cotton mills in India rose from 58 to 264 and the number of persons employed from 40,000 to 260,000. The total number of jute 40.000 to 260,000 mills rose from 22 to 65 and the number of persons employed from 27,000 to 216,000. There was a vast expansion in railways and many new industries were established. Labour was immoblie, earnings in agricultural pursuits were extremely low, commodities were comparatively cheap, and industrialists were able to get all the labour they wanted by tapping the adjacent villaces at any rates of wages they liked to offer so long as they were higher than those which could be carned by work in the Both the men and the women employed were considered to be a part of the plant of the factors, child labour was exploited, and lattle thought was given to the human of men't help? I the worler. Hours of work were consider, no amenities wen provid d because the only thing

that the worker was expected to do was to work. eat and sleep The provision of housing was a necessary evil which had to be provided where factories were situated away from towns Factories Act was modelled more on the lines of providing against loss of life due to accident rather than from the grinding work which a factory worker was expected to do The humanitarian employer was considered to be a pest who would ruin industry and all that industrialists thought of was the greatest return which could be obtained from the capital invested

The second period emerged soon after the outbreak of war. Large contingents of Indian troops were sent overseas, and had to be supplied with adequate clothing and the munitions of war Imports of manufactured articles into India were restricted owing to the bulk of the available British tonnage in ships having been commandered for transport of men and materialto the various seats of war. Heavy d mands to the various scars or war account of a money were made by the bellicerent countries for ray products. India secured the opportunity for which she had been looking for generation. Her the returns on capital invested in course branch of trade and industry became phonomenal Prices source high Owing to the indus of large bodies of persons to the towns, leading became hopelessly inadequate and ren's rose to such an extent as to call for legislating restions. But nobedy thought of these who were mainly responsible for the creation of the add I wealth of India. Labour was still coest! related by the hat inarticulate part of the plan of the factory which it had always been. The call of the War brought vilons of an Uto, i. I seemmercial and indicated commercial and indicated for their product Labour was in great demand no only in agriculate the along the prices for their product. Labour was in great demand no only in agriculate the along the increases in rates of who stimp and the factorial increases in rates of who stimp and in the coet of living. Where distribution is confidently in the coet of living the country of the country of the product in of the country of the product in of the country of the product in the coefficients. But nobody thought of the who wir

^{2 [&}quot;The principall and commonest

cation of their paper the "Kranti" and they i were successful, by holding almost daily meetings at which revolutionary speeches were delivered and by the publication of hand-bills, in capturing the imagination of the workers and keeping the strike going for a period of nearly six months. They also took an active part in the prolonged strikes of the same year in the Tata Iron and Steel Works at Jamshedpur and in the workshops of the Bengal-Nagpur Railway at Kharagpur They actively asso-clated themselves with the strike on the South Indian Railway and they secured an entry into several Unions connected with Municipalities, Port Trusts and other Public Utility Services After the calling off of the General Strike in the Bombay Mills on the 6th October, 1928, they endeavoured to paralyse the cotton mill industry in Bombay by calling several lightning strikes in individual mills on the flimsiest of pretexts, even though the terms of the settlement of that strike required that all disputes between the employers and employed on the interpretation of the terms of agreement should be referred to the Bombas Strike Enquire Committee which had been appointed by the Government of Bombay to express opinions on the matters in contention

Bombay has seen few rlots and disturbances of the type which broke out in the City on the 3rd February 1929 and which resulted in the death of 149 persons and the destruction of property The Riots Enquiry Committee appointed by the Government of Bombay found that the origin of the riots was the series of inflammatory speeches delivered by certain leaders of the Girni Kningar Union during the General MillStrike of 1928 and again during the Bombay Oil Strike which lasted from the 7th

December 1928 till after the date of the riots 1929 the Girm Kamgar succeeded in calling another General Strike in the Bombay Mills on questions connected with dismissals which they interpreted as a direct attack by the Millowners to undermine the Union The strike, although not so mine the Union The strike, although not so complete in character as the strike of 1°28, nevertheless lasted from 26th April to 18th September, 1929, and was called off only when the Court of Enquiry appointed by the Government of Bombay under the Trade Disputes Act had reported in unequivocal terms that the whole blame for this strike lay with the Bombay Girni Kamgar Union But the Communist group was able to capture the Indian Trade Union Congress at the 11th Session held in Nagpur and to force the moderate elements, consisting of Messrs Diwan Chaman Lall, N. M. Joshi, B. Shiva Rao, V. V. Girl, R. R. Bakhale, etc., to secede from the Congress on that body passing resolutions boycotting the Royal Commission on Labour in India and the International Labour Conference, by appointing the Workmen's Welfare League, a Communist organisation in England, 13 their Agents for Great Britain, and the declaration of Independence and the establishwhole blame for this strike lay with the Bombav declaration of Independence and the establishment of a Socialist Republican Government of the Working Classes in India

It is of importance to lay stress on the problems connected with the Communist menace in The object of the Communists is not so much the welfare of labour as the spread of Their ultimate nim is the destruct hundreds and cover a very wide field revolution

tion of capital and the replacement of the established Government by a dictatorship of the proletariat The manner in which they can achieve this is by penetrating trade unions, by calling strikes in industries, by unduly prolonging them by putting up strings of preposterous and absurd demands by refusing conciliation or arbitration, and by sending masses of workers seething with discontent into the districts to preach their gospels of class hatred and class war to the ignorant masses in the villages of India Fortunately for the industry many of the avowed Communists are awaiting their trial at Meerut or are in jail Some of them have now been released from jail and are making frantic efforts to regain their hold on labour unions But luckily the good sense of the workers has now begun to prevail and ther are allowing little or one quarter to them

Royal Commission on Indian Labour

The British Government, in consultation with the Government of India, appointed on 24th May, 1929, a Royal Commission 'to enquire into and report on existing conditions of labour in industrial undertakings and plantations in British India, on health, efficiency and standard of living of workers and on relations between employers and employed, and to make recommendations" The Royal Commission consisted of the Right Honourable Mr J H Whitley as Chairman with the Rt Hon Mr Srmiyasa Sastri, PC, Sir Alexander Murriv, Kt, CBE, Sastn, P.C., Sir Alexander Murray, At., CBE, Sir Ibrahim Rahimtoolah, Kt., KCSI, CIE, Sir Victor Sassoon, Bart, Dewan Chaman Lal, MLA, Miss Bervl M. Le Power Power, Deputy Chief Inspector, Trade Boards, England, and Messrs N. M. Joshi, MLA, A. G. Clow, CIE., ICS, G. D. Birla, MLA, Kabeer-ud-din Ahmed, MLA, and John Claff, Assistant General Secretary, Transport and Railway Workers Union, England as members and with Messrs S. Lall. England, as members, and with Messrs S Lall, ICS, and A Dibdin from the Indu Office, London, as Joint Secretaries Mr J H Green, WBE, as Assistant Secretary Lt -Col A J H Russell, CBE, IMS, was subsequently appointed as a Medical Assessor and Mr S R Deshpande, B Litt (Oxon), Semor Investigator of the Labour Office, Government of Bombay, was appointed as a Statistician to the Commission The Commission arrived in India on the 11th October 1929 and after visiting several places in India and examining several representatives of the Central and Provincial Governments, the Railways and Associations of Employers and Employed left for England on the 22nd March 1930 The Commission returned on the 11th of October 1930 and after touring Ceylon and Burma went to Delhi in November

The Report of the Commission was published in June 1931 and is a document of first rate im tance which will be the text book of social legislation and labour welfare for many vears to come Moreover, the value of its recommends portions is enhanced by the fact that they are practically unanimous and represent the considered opinion of employers workers, legislators and officials, all of whom were represented on the Commission Livery aspect of the labour problem in India has been considered and dis cussed and the recommendations number many

The provision of shelter for rest and refreshment is in many cases necessary, and the possibilities of workers' canteens should be examined with a view to their wider adoption

Greater rigour should be shown in the enforcement of the Factories Act in Bihar and Orissa

An officer with medical qualifications should be appointed as an Inspector of Factories in every province, part or full time according to the requirements of the province Certifying Surgeons should be empowered as inspectors
Women Factory Inspectors are desirable in every province

Seasonal Factories

The law should establish standards for seasonal factories not necessarily identical with those for perennial factories, but enforced with equal

The present limits of maximum hours, 11 per day and 60 per week, may remain for seasonal factories but the exigencies of seasonal industries do not justify any extension of those hours

for the individual

The 'seasonal' list should include in all provinces cotton-ginning factories, lac factories, indigo factories, coffee factories, rubber factories, jute presses and, in North India, tea factories Other groups may be included with reference

to particular provinces
Where overworking of women is prevalent, local Governments should have power to prohibit in any particular group or class of factory the employment of women outside such hours, not less than 11 in the aggregate, as they may specify

Before plans submitted under Sec 9 (1) of the Cotton Ginning and Pressing Factories Act are approved, the prescribed authority should be satisfied that adequate ventilation will be

secured

Owners of existing tea factories should be required to install efficient dust-extracting machinery within a specified period and new factories should not be allowed to be built without it

In new rice mills steps should be taken to compel the installation of necessary protective machinery against the dissemination of dust, and freer use should be made of the power of inspectors to demand its installation in existing mills

Where women are employed in any process creating an impure atmosphere, the owner should be required to set up some temporary shelter in

the compound for their infants

Local Governments should have power for any or all classes of factories, to prescribe standards of height for children, employment of those under standard being made illegal

The inspection of cotton-ginning factories and other seasonal factories should be largely carried out by part-time Inspectors Officers of the grade of Industrial Surveyors should not be employed for this purpose Selected revenue officers of suitable grade should be given a short course of instruction under the Chief Inspector with a view to their employment in districts where such factories are found This system should not apply to tea factories in Bengal and Assam Regular forms should be prepared by the Factory Inspection Department for Issue to part-time inspectors and a copy of the report of each inspection should be submitted to the Chief Inspectors of Factories

Unregulated Factories

A—Small Factories using power—In the case of factories using power and employing less than 20 but not less than 10 persons, only the following sections of the Factories Act should apply automatically

Section 5, Chapter III (excluding sections 12 and 15), sec 37 and the appropriate parts of Chapter VIII with sec 50 Local Governments should retain the power of applying the

whole Act by notification, and should be given power to apply selected sections to any such factory

Local Governments should be given power to apply the sections specified above to similar places employing less than 10 persons where conditions are dangerous

The "number employed" for this purpose should be the aggregate number employed for any part of the 24 hours

B—Factories not using power—A separate Act, brief and simple, should be passed to apply to factories, without power machinery, employing 50 or more persons during any part of the year

The starting age for children under this Act should be 10 years in the first instance, and protection in the matter of hours should be confined to children between 10 and 14 years

Hours of children should fall within limits to be specified by local Governments, but in no case should the working hours exceed seven nor should they fall outside a period of nine hours, with a rest interval of at least one hour The overriding maxima should be embodied in the Act

No child who has been employed full time in a factory should be allowed to work overtime or to take work home after factory hours

The expediency of penalising the giving of advances to secure the labour of children and the execution of bonds pledging such labour should be examined by Government In any case a bond pledging the labour of a person under 15 years executed for or on account of any consideration should be void

Every factory of this class should be entirely closed on one day of the week to be specified beforehand by the local Government Subject to particular exemptions the closing day should be the same for all factories in the same district

Local Government should have power to extend any of the provisions of this Act to factories employing less than 50 persons this should be done forthwith in the case of offensive trades, the power should also be exercised in the case of industries, classes of establishments and individual establishments employing an appreciable number of voung children or where larger places have been broken up to escape regulation

The policy of gradualness which underlies the proposals made for legislation should also influence its enforcement

In the Manganese Mines in the Central Provinces, steps should be taken to apprae the workers of the repeal of the Workman's Breach of Contract Act

1628-37—"On the tops of these interlaced trees we saw large numbers of monkeys and below some abadas or rhinoceroses, which frequent those wilds" Manrique, *Travels*, Hak Soc, Vol I, p. 124

Fryer helps to explain why Goa was noted for mango pickles

1672-1681 — "They [the Goa women] sing, and play on the Lute, make Confections, pickle Achars, (the best Mongo Achars coming from them) Fryer, East India, Hak Soc, Vol II, p 28

1640-41—"After numerous dishes of various kinds of flesh, both of domesticated and wild animals and birds, with stimulants of sundry achares, made of cucumber, radish, limes, and green chillies, soaked in strong fragrant vinegars, that served to spur the appetite" Manrique, Travels, Hak Soc, Vol II, p 127

Adarga (a buckler made of buffalo hide) Anglo-Ind adarga (obs) Neither in Hobson-Jobson nor in the OED

1638 — "Every Cavallero was bravely apparelled with an adarga, which is a great pastboard or leather buckler on his armo" Mundy, Travels, Vol III, pt 1, p 266

Aduana (customs-house) Anglo-Ind aduano (obs.) Neither in Hobson-Jobson nor in the $O \ E \ D$

1610 — "To-morrow we purpose to send you the copy hereof by the old scrivano [q v p 149] of the Aduano of "Danvers, Letters, Vol I (1602–1613), p 51

Afogado (a kind of stew) Konk fugād, arios fugād, rice boiled in broth—Anglo-Ind foogath

"Foogaths are vegetables fried with onions and the usual mussala" (condiments) Indian Cookery, p 94
There are recipes for various kinds of foogaths' in the book

Aguila, Aquila (aromatic wood, see p 8)

Below is a very early Anglo-Indian form of this word which clearly discloses its connexion with the Portuguese vocable

1619—"As to the sale of the prize goods left at Jask, 'especially of that called by the name of Aglia, which we understand to bee lignum aloes, and was a fitt commodity for England" Foster, Eng Fact (1618-1621), p 141

Alcatraz (Diomedia exulans, L, see p 11)

The following two quotations are not in *Hobson-Jobson* The second is interesting because it introduces us to a new form of 'albatross' not in the $O \ E \ D$

7 11

to all the major ports

With a view to decasualisation and to sceure Council working in conjunction with divisional more equitable distribution of employment, or district and local or works committees. All a system of registration of dock labour should be clief should be elligible for election but where there is necessal and union workers represente these on committees should be entitled to assistative of shipowners, stevedors and from an officer of the union. On Rallway and labourers 1616 —"Also a present determined to be given the Judge of the Alfandica, the particulars, viz

2 vests cloth, 1 damask piece, 2 sword blades, 6 knives, 1 bottle strong water, 1 perspective glass, 1 dozen spectacles, 6 gorgoletts [see p 170], 6 wine glasses, 12 plates, 6 gilded dishes, 1 looking glass gilded " Ibi dem, p 198

The last citation is instructive inasmuch as it throws very interesting light on the customs-officials in India in the 17th century

Almadia (a small boat or canoe, see p 13) Anglo-Ind almadee The earliest instance of this word—not this form—in the $O \ E \ D$, from English sources, is of 1681

1630—"Har Vaisya also told them that among the Portuguese prisoners in the hands of the English is one of especial noate and quality, for whose escape a plan has been arranged with some Parseis or Muccadams there about Swally, the idea being to get him away (with the connivance of certain Englishmen) in one of the boats of the fleet or a small almadee of the Portugalls, Foster, Eng. Fact (1630–1633), p. 101

Almude (a Portuguese measure for wine or oil, "twentysix almudes make a pipe" Vieyra) Anglo-Ind almode, almodae (obs) Neither in Hobson-Jobson nor in the OED

1644 — "22 almodes of oil" Foster, Eng Fact (1642-1645), p 217 1673 — "1 Barrel is six Almoodaes" Fryer, East India, Hak Soc, Vol II, p 130

Alviçaras (a reward given for good news) Konk alvis — Anglo-Ind albiicias (obs)

The word in the citation below may also be the Spanish albricias

1638—"In this 20 Daies space wee had variable News of our Merchantts att Cantan, sometymes thatt they would bee here within a Day or two, other tymes thatt itt would bee long ere they could come Once [at Macao] the Jesuitts Man came running, calling for Albricias (which is a terme thatt signifies a gratification for good newes), which was given him "Mundy, Travels, Vol III, pt I, p 270

Ananás (pine-apple, see p 16)

The following quotations are of interest inasmuch as they show what value was set on this fruit in the early seventeenth century

1615—"Soe [the Governor of Surat] giving me two Pines, with a long speech of the dayntenes, which I bade a servante take telling him I knew the fruict veary well, I took my leave" Sir T Roe, Embassy, Hak Soc, Vol fp 68

1 16-19 — "Their fruits are very answerable to the rest, the countrey [of the 'Great Mogol'] full of muskmelons, water melons, pomegranats, pomecitrons, limons, oranges, dates,

own houses should be encouraged but a certain degree of supervision is essential

Municipal Council should undertake prelimi nary work without writing for additional legis

lation

Qualified health officer should be appoint (a)ed and numbipal health organisations should

be improved and strengthened

Bre laws dealing with health, housing sanitation should be revised and ennitation and brought up to-date

(c) Health office reshould see that all bee lans

are impartially and algorously applied

(d) Applications for permission to creet new buildings or to noter existing ones should be closely scrutinised in order to ensure that the grant of permission will not result in increased congestion

(c) Plans should be prepared for the exten-sion and improvement of areas set apart for

housing selemes

Workmen's Compensation—The Workmen's Compensation 1ct should now be extended to cover as completely as possible the workers In organised Industry, whether their occupations are hazardous or not and there should be a product extension to workers in less organised employment, beginning with those who are subject to most risk

The following classes of workmen should

now be included

(a) Workmen employed in factories using power and employing not less than 10 persons, and in factories not using power employing less than 50 persons

(b) Workmen in all mines except open quar ries in which less than 50 persons are employed

and no explosives are used

All workmen employed in docks
All workmen employed in work on (d) olltlelds

(e) Seamen on Indian registered ships of not less than 50 tons and on all inland vessels propelled by steam or motor engines and perpublic ferries not so propelled

(f) Work none

Workmen employed on plantations and on tea, collector rubber plantations employing not less than 50 persons

Workmen employed in the operation of sically propelled vehicles which are mechanically propelled vehicles which are maintained for the transport of pissengers or

for commercial purposes

Workmen engaged in the construction, maintenance or demolition of canals, sewers, public roads, tunnels, nerial rope-ways and plik lines, and of dams, embankments or creavations 20 or more feet in height, and of all permanent bridges

(i) Workmen engaged in building work as in the allerting days but the reference in the latest process.

In the existing clause, but the reference in this clause to industrial and commercial purposes

should be omitted

Workmen employed in connection with the generation and distribution of electrical

energy

The question of the inclusion of persons employed by the larger agricultural employers and of those employed in reserve forests deserves examination

(a) Steps should be taken to insure that the agreement to pri compensation

Schemes for the erection by workers of their accordance with the Indian Act is obligatory on all shipowners engaging Indian seamen and that dependents are capable of enforcing this agreement

(b)The possibilities of giving Indian seamen the right to compensation whilst serving on ships registered outside India should be further explored by the Government of India and the HomeOffice Special attention should be given to the possibility of extending the Act to Indian scamen whilst serving on all ships within India's territorial waters and on British ships engaged in the coastal trade of India

The limitation of the benefits of the Act to workmen in receipt of not more than Rs 300 a month should be generally applied and the exception relating to the armed forces of the Crown should be modified, if this is necessary, in order to include persons who are genuinely

industrial workers

Whlowed sisters and wildowed daughters

should be added to the list of dependents

I or adults in receipt of not more than Rs 30 a month, payments for temporary disablement should be based on two thirds of wages and for minors on the full wage rate. The scale should be subject to a minimum of Rs 5 for each half monthly payment, but the rate of compensation should not exceed the rate of wages. No person, receiving more than Rs 30 a month should receive less compensation than he would have got if his wages had been Rs 30

The minimum compensation for death in the case of adults should be Rs 600 and for complete permanent disablement Rs 840 The minimum for partial disablement should be correspondingly

raised

The maximum half-monthly payment should be raised from Rs 15 to Rs 30 and the present maxima for death and permanent disablement should be abolished

The waiting period should be reduced from

ten days to seven

The exceptions in the second proviso to section 3 (1) should not apply where death or a permanent loss of 50 per cent or more of earning capacity result from the accident

The following additions should be made to Schedule III (List of occupational diseases) -

Poisoning by benzene and its homologues (ı) or sequelæ, and

(11) Chrome ulceration or its sequelæ

The administration of the Act should entrusted, as far as possible, to specially qualified commissioners (not necessarily a whole-time officer), and there should be at least one such officer in every major province. The appointment should not be linked with one in which transfers are frequent and it should be possible to appoint more than one conmissioner for the same area

Pamphlets summarising the provisions of the Workmen's Compensation Act should be made available to workmen and, if the Act is substantially amended, steps should be taken to diffuse information of the amended law

Notice to the Commissioner should be compulsory in the case of all fatal accidents occurring to employees while they are on the employers'premises or while they are on duty in elsewhere

1673 —"The Portugals striving to possess themselves of Muschat, were put to such stress that had not their Armado come to their relief, they must have desisted their Enterprize" Fryer East India, Vol I, p. 193

Arrasador (one who ruins or destroys) ? Anglo-Ind ransadoes (obs)

"The second eveninge came before our hellhound Governour, who stope inge against all our and our frinds reasons sayd wee were ransadoes and one with the [Dutch*] and comanded the Cottwall to keepe us saufe till nixt, morninge" Foster, Eng Fact (1622-1623), p 73

Arrendador (revenuefarmer see also Rendeno p 310) ? Anglo-Ind rendedare (obs)

1632—"Our suite to this King (advised you in our last) mett with opposition by Mirza Rosvan rendedare of this place, and chancellour of this kingdome' Foster, Eng Fact (1930-1633), p 22.

Ata (custard-apple, see p 26)

The quotation below is, according to Sii Richard Temple the earliest notice of this fruit by European writers

1636 —[At Goa] "A Delicate Fruit recembling a pine, butt when ripe it is off and of an Admirable tast, called Atae." Mandy, Vol. III, pt I, p 58

Atambor (a drum) Konk

tambor — Malayal tampêre (a kınd of drum)

See Ind Antiq Vol LVII, Nov, 1928

Bacamarte (a blunderbuss, a gun with a bell mouth)
Anglo-Ind boca-mortis, bocamortass bukmai (obs)

Sir Richard Temple (Ind Antiq, Vol L, p 227) offers an ingenious derivation of the Portuguese word, viz Port boca, 'mouth', and mortis, 'death' hence 'death-dealing mouth' Death in Port morte and not mortes Longworth Dames's conjecture is that the word might conceivably stand for boca-Martis. and thus mean 'the mouth of Mars', instead of 'the mouth of Death' This word must not be confounded with the Port bracamarte which means a broadsword or cutlass The Portuguese dictionaries derive this latter from the French, through Low-Latin, braquemant, 'cutlass', but offer no derivation of bacamarte The Anglo-Indian forms are neither in Hobson-Jobson noi in the O E D

"They kept at a small distance firing their muskets and bocamortasses and flying granadoes" Ind Antiq,

The Assam Labour Board should be abolished

The Government of India should appoint a Protector of Immigrants in Assam to look after the interest of emigrants from other provinces who have not vet settled in Assam This officer should also be entrusted with respon-

sibility for emigrants during the journer (b) The cost of the Protector of Immigrants and his staff should be defrayed by a cess on

emigrants

(c) The tea industry should give publicity to the advantages which the plantations have to offer to the inhabitants of other provinces

The emigrants should be encouraged to maintain touch with his own people by means

of correspondence

Repatriation

Every future assisted emigrant to an Assam tea garden, whether from an area of free or controlled recruiting should have the right after the first three years to be repatriated at

his employer s expense

The Protector should be empowered to repatriate a garden worker, at the expense of his employer, within the one year of his arrival in Assam if this is necessary on the ground of health, the unsultability of the work to his capacity, unjust treatment by the employer or for other sufficient reason, and at any time before the expiry of three years if he is satisfied that the immigrant is unable with due diligence to secure a normal wage and desires to be repatriated

A worker dismissed before the expire of the three years should be entitled to repatriation at the expense of the employer dismissing him, unless it is established that the dismissal

was due to wilful misconduct

Wages on Plantations.

Wage fixing machinery in the Assam planta tions -

(a) The establishment of statutory wage-fixing machinery in the Assam plantations, if practicable, is desirable, and, there are reasons for believing that if proper methods are adopted, a practicable scheme can be devised (b) Before legislation is undertaken, an enquiry should be instituted as to the most

suitable form of machinery, the actual rates paid and the variations in these rates between district and district and between garden and garden. The tea industry should be invited to co operate in this enquiry.

Health and Welfare in Plantations

On all plantations managers should be required to maintain birth and death registers, and by inspection Government should ensure that these are reasonably accurate

Where possible, garden managers should make a more generous allocation to workers of land

for grazing and for vegetable cultivation

A more active policy should be adopted by all plantation managements in regard to antimalarial work carried out under skilled advice and supervision

Wherever conditions are suitable, tube well-should be constructed. Where possible, piped water supplies should be provided

Workers houses should be suitably spaced out and not built back to back. They should be in blocks of two rooms, and wherever possible on high ground

Women doctors should be employed by each medical group organisation for confinements in hospital, for the training and supervision of midwives and dais, and for child welfare work. The practice of giving free food to indoor patients.

tients should be adopted in all plantation hospitals

Maternity benefits should be provided for by legislation

The practice of feeding non-working children without charge should be generally adopted

Plantation managers should assist in organising suitable recreation for their workers and should provide playing fields for general recrea-

tional purposes

When young children become orphaned and have no relations settled on the estate, the district magistrate or some suitable authority should invariably be approached to get into touch with any existing relations and, if a desire is expressed for the return of the child, arrangements should be made for repatriation

The employment either directly or with their parents, of children before the age of 10 years should be prohibited by law

Boards of Health and Welfare should be established under statute for convenient planting areas

Burma and India.

The general recommendations in other parts of the Report are intended for Burma as well as India and are designed to meet the needs of Burmese labour in Burma as of Indian labour

in India

The Protector of Immigrants should work in co-operation with the Government of Burma but should be solely responsible to the Govern-

ment of India

Government should approach employers with a view to securing direct payment of wages without legislation of this fails, the question of legislation for direct payment in certain sections of industry should be taken up

If any other industry finds it necessary to recruit in India, it should repatriate the recruited worker as soon as it ceases to pay him his

normal wages

A policy of decisuali-ation for dock labour in Rangoon is urgently needed

lor a sound immigration policy, further statistical information regarding immigrant labour is urgently required. Accurate figures should be obtained bearing on the extent of employment available at different seasons and the movements of immigrant labour in earch of work

Whatever steps are taken to regulate immi gration, satisfactory conditions of life and work should be maintained for the immigrant

populations

Government employers and all concerned should accept a much greater measure of responsibility for the immigrant

Statistics and Administration

Statistics and Intelligence - in examination should be made of the cau as of delay in the

The earliest reference for this word in the O E D is of 1673. But the form banda is not mentioned

1616 - "Besides the danger in intercepting our boats to and from the shore, etc. their firing from the Banda, would be with much difficulty" Foster, Letters, Vol IV, p 328

1673 -" We fortify our Houses have Bunders or Docks for our vessels, to which belong Yards for Seamen, Soldiers, and Stores" Fryer, East India, Vol I, p 289

Banean (a Gujarati trader, see p 38)

To the compounds of this word mentioned on p 39 two might be added others Banyan-day and Banyan-fight They appear to have acquired a currency as early as the seventeenth century

The first of the following quotations is of special interest because it recalls to mind the not unsimilar efforts made by Governments trading and houses in India to combat the trade and financial depression at the present day

The expression 'banian-fight' notin the O E DThe earliest reference in it for 'banian-hospital' is of 1813, but though the name is not used the hospital ıtself

described by Fitch (c 1585) See R Fitch in Foster Early Travels, pp 14 and 25

1634 - "As rigid economy is necessary 'in these sad deplorable tymes, whenas India affoardeth little or nothing whereon to begett a profitable trade for the Honourable Company', the commanders are charged to be as frugal as possible in regard to harbour provisions They are to deliver lists of their men and the number of their messes, 'and accordingly a computated proporcion of what they may spend in such diett for Banyan daies (so called) as this place affoards and the Company allowes, with promise that for the other dates care shalbe taken at Suratt that fresh meat be provided conveniently sufficient " Eng Fact (1634-1636), p 38

1690 - "Of this [Kedgeree or Kit chereel the European Sailers feed in those parts once or twice a Week, and are forc'd at those times to a Pagan Abstinence from Flesh, which creates in them a perfect Dislike and utter Detestation to those Bannian Days, as they commonly call them " Ovington, Voyage to Surat, OUP, p 183

1666 -- "The men are great clowns they make a great noise when they have any quarrel, but what passion soever they seem to be in, and what bitter words so ever they utter, they never come to blows" Thevenot, Travels into the Levant, pt III, p 51 (Eng tr of 1687)

1690 -" Next to the Moors the Banmans are the most noted Inhabitants of Suratt who are Merchants all by Profession, and very numerous in all parts of India They are most innocent and obsequious, humble and

Industrial Workers in India

In 1922 In lia of third reco, nition by the In the of Nations as one of the cicht chief.

In lest-ful States in the world. The grounds of the cicht chief in lest-ful States in the world. The grounds it is impossible to say how far and to what extent on which this claim was hare a stated in the the fluores given above hold good to-day. The Memoran luming papered by the India Office. Rillways of India alone offer employment to which gave the following fluores to illustrate very nearly a million workers. The number the industrial importance of the country—

of workers employed in Plantations according

enustrial importance of the country— 25,00,000 a ricultural word (excluding psi int proprietors), 111,000 marktime workers, lisear, etc. a figure s cond-only to that for the United Kingdom, over 20,000,000 workers in industries, including cottage industries, mines and

transport, railway mileage in excess of that in every country except the United States"

to the 1921 G usus amounted to over three quarters of a million. The latest figures for the numbers employed in factories are those available in the All-India Report for Factories. for 1929, which are reproduced in Summary Lorm in the tables given below -

Gro clh of I actorus

Icir	Number of Eactories	Average Daily Number of Persons Lmployed
1922 1923 1924 1925 1926 1927 1927	5,144 5,085 6,406 6,026 7,251 7,515 7,963 8,120	1,361,002 1,409,173 1,455,592 1,404,958 1,518,391 1,533,382 1,520,315 1,553,169

tee and Sex Distribution of Factory Labour

Statistics for 1929

Province	Number of Factories	Average Dally Number of Persons Employed
Madras Bombay Bengal United Provinces Panjab Burina Bihar and Orissa Central Provinces and Berar Assam North West Frontier Province Baluchistan Ajmer-Merwara Delhi Bangalore and Coorg	1,530 1,543 1,393 319 521 976 284 769 610 29 6 38 55 27	143,217 305,029 589,860 91,188 49,875 98,077 68,726 69,291 45,884 1,207 1,255 15,456 10,109 2,995 1,553,169

(obs.) The latter of these two forms is not in the $O\ E\ D$

"Sends him a 'barrecoe' of beer and desires a supply of provisions" Foster, Eng Fact (1622-1623), p 138 [Safi Khān] "begs therefore a couple

ot 'barreckes'" Op cit, p 292

Barricada (a barrier)

Anglo-Ind barracodo (obs)

"The enemy's vessels were 'extraordinary great ships The rearadmiral was the largest of all, and had been 'built upon a carack at Cochin

only for to make a battery and to be a barracodo to the rest of her fleet ' Eng Fact (1624-1629), p 49

Bata (subsistence allowance, see p 41)

The citation below gives proof of a much earlier use of this word in Anglo-India than do those in *Hobson-Jobson*

1638—"They have received daily batta' but this need not be deducted from their wages' Foster, Eng Fact (1637-1641), p 51

Batão (difference in exchange, see p 43)

In the citations below are Anglo-Indian forms not mentioned in Hobson-Jobson nor in the $O \to D$, they are also of an earlier date than those mentioned there

1634 —"Thus much of your silver was sould for new rupees, to be paid daily out of the mynt as it could be covned, whereout we had hoped to have covned some advantage, in gayneing the exchange betwint them and

mamooths here called buttaw "Foster, Eng Fact (1634-1636), p 68 See also Vol of 1637-1641, p 100

1651—"When he asked Davidge he did not demand 'the vattaw of cuzzana [khazāna=treasury] rupees due to the Company from Mr Knipe, he with stern lookes and high words told me I was a sawcy knave to demaund of him about the Companies accompts" Foster, Idem, (1651-1654), p 81

The Marathi form of the Hindust battau is $v\bar{a}t\bar{a}v$, but it is scarcely likely that the Marathi form is used above, it appears to be a normal case of the exchange of v for b and vice versa

Batel (a small boat, see p 45)

With regard to this word it is useful to note what Professor Hodivalla says in *Ind Antiq*, Vol LX, p 88

"Whatever the source of the Portuguese 'Batell', it is certain that the Bombay 'Batelo' or the Bengal 'Patello' is not directly derived from it as the form batla occurs in the Târîkh-i-Fîrûzshâhî of Baranî, which was completed in 1385 AC (Bibl Indica Text, p 490, 1 7)"

Portuguese dictionaries derive batel from the Lat batellum Dalgado does not include batel in his Glossário in

, 1 1

3 1 1076 B 1 1 11 1 17 -Left · ft 11 1 1 _ 1 , 1 118 2 27

- () Terminent interation where economic er other reasons have caused a permarent di threment of population

In the first three ease, the emberants invariof ly return to their villages. In the fourth and fifth eyes the majority of workers return for a short at it after two or three years, but I there is a considerable minority which has settled down at the industrial centres in which they have norted Tyblence is however, everyle linky that ewing to the home loving character of the Indian worker he seldom or never breads his contact with his yillage home The number of workmen of rural origin who have revered their connexion with their village and with a cleature is very small and is usually confined to such skilled workers as have left their homes permanently to settle in the import ant centres of factors industry. As the large majority of workers return home annually blennish there is little disturbance of family life, except in the case of Assum where the system of regultment now in force directly encourages the importation of families, and women are almost as numerous as men in the

BÚFALO

fact but even are so in name, as they are called bueyes throughout India' Manrique, *Travels*, Hak Soc, Vol I, p. 57

Bor in Portuguese, buey in Spanish means 'a bullock'

Bolsa (purse, bag, see p 54) Anglo-Ind bulse (obs)

The term was used to indicate a packet of diamonds or gold dust

1711—"Received a bulse, said to be of gold, of Manuel Tavoch of Macao, merchant, sealed as above, which I promise to deliver to Mr Frederick, the dangers of the sea excepted J Scattergood" The Scattergoods and the East India Co, in Ind Antiq, Vol LX, Supp p 77

Botica (a shop, see p 57)

The citation below gives evidence of earlier use of this word in Anglo-India than do those in *Hobson-Jobson*

1668 — "Rent of the botica x 16 0 0" Yearley Rent Rowle of Bombaim, etc in Ind Antiq, Vol LIV, p 1

Braça (a measure of extent, see p 57) Anglo-Ind barsa (obs)

1638—"Good drincking cuppes att 1d and 1½d, and Fruitt Dishes att 2½d, each, the rest according to that rate For a whole barsa, which is 2 tubbes, will cost 28 or 30 Ryall eight, and they usually contain aboutt 600 peeces little and great" Mundy, Traiels, Hak Soc, Vol. III, pt. 1, p. 305

'Barsa' in the passage above means a fathom, i.e., a six-foot cask This form is not in the O E D

Breda do mar (lit 'seabeet', an edible seaweed) Anglo-Ind breda de Marr (obs) See Scattergood's List of goods procurable at Malacca in Ind Antiq, Vol LVI, Supplement p 76

Brinco (curios, bric-à-brac) Anglo-Ind biinquo (obs.) Not in the $O \to D$

"Thomas Keiridge at Suiat to John Bangham at Lahore, April, 26, 1626, Sends a copy of his last, and again, urges the sale of his goods, 'least Manoell de Payva his brinquos cause yours to be disesteemed and this your cautious wayting produce my further prejudice'" Foster, Eng Fact (1624-1629), p 130

Búfalo (buffalo, see p 58)

Below are some citations with Anglo-Indian forms of this word not mentioned in Hobson-Jobson They help to show the tentative forms through which this word passed before the present day spelling became stabilised One of them from Fryer contains a description of the buffalo which it would be hard to beat for accuracy

1673—"We passed Five Mile to the Foot of the Hill on which the City [of 'Canorein'] stands, and had passed half a Mile through a thick Wood,

Recruitment for Assam—It has already been stated that the Assam tea industry is the only industry which is controlled in its recruitment of Indian Labour—Other industries, and even the tea industry in the Duars, Diriceling and Madras Presidency are free from Governmental control—There is a considerable body of opinion in favour of freeling the Assam tea industry from control, but the Indian Tea Association is not only not in favour of this but has definitely urged that Government control should continue—The Association contend that if recruiting were free, abuses would arise as they did in the past from the competitive spending of money to secure labour—There appears little doubt that if control were removed, all the abuses which were associated with the ArLatic system of recruitment would be revived

The present system of recruitment is controlled by Act VI of 1901 called the Assam Labour and Lmigration Act 1901, as umended by Act XI of 1903, Act VIII of 1915, Act XI of 1915, Act XI of 1920 (Devolution Act) and Act XXXI of 1927 The Act extends to the Provinces of Bengal, lithar and Orissa, United Provinces, Central Provinces, Madras and Assam. In the Bombay Presidency Act No VI of 1901 is not enforced There the Government of Bombay have allowed recruitment provided the emigrants are produced before a Magistrate The most important provision of the Amending Act of 1915 is the abolition of the system of recruitment by contractors, and their recruiters, commonly known as Arkatis In all recruiting areas, where the provisions of Act VI of 1901 are in operation, except the local areas in which recruitment is prohibited by notification under section 3, recruitment is carried out only through the medium of garden sirdars, under the provisions of Chapter IV, working under a local agent duly licensed under section 64 of the Act The only recruiter now recognised is the sirdar who must himself engage the coolies Any arrangement for the direct supply of coolies to a tea estate by a contractor or for the supply to sirdars of coolies collected through the agency of a contractor or arkati would be illegal and would render every person who is a party to such an arrangement liable to prosecution and punishment under section 164 of the Act Even an

employer cannot himself legally engage labour in a recruiting district, he must do so through the agency of his garden sirdars. In the Bombay Presidency, agents other than garden sirdars are allowed

Latest Statistics—The Annual Report on the working of the Assam Labour Board during the year ending the 30th June 1931 has been published. The Report shows that the total number of persons recruited during the year was 50,555 as against 58,150 in the previous year. The average of advances to garden sirdars for each adult recruit fell in 24 and rose in 9 agencies as compared with the preceding year. No cases occurred in which the local Agents were found to be extravagant or indiscrect in the matter of giving advances to sirdars. The total number of garden sirdars prosecuted for offences in connexion with recruitment was 69 as compared with 107 in the previous year. The rate of cess on garden sirdars and emigrants was one Rupee per head during 1929-30. The actual receipts from the cess amounted to Rs 69,119

Reforms in the Bombay Cotton Mill Industry—In a circular letter dated the 8th January 1930 the Bombay Millowners' Association have instructed all mills affiliated to the Association to introduce, wherever possible, a policy of direct recruitment of labour instead of the existing practice of recruitment through jobbers. The introduction of a system for providing Discharge Certificates to operatives leaving service has also been recommended. The certificates are to contain a record of the service of the operative concerned and in all cases of recruitment, the men presenting themselves for employment will be asked to produce their Discharge Certificates. Notices are to be posted at all mills stating (a) that all persons will be engaged by the Manager or by the head of the department concerned, and (b) that any heads of departments, assistants or jobbers accepting bribes from the workpeople will be instantly dismissed.

and would Several groups of mills are considering the o such an possibility of employing labour officers who will d punish be responsible for the direct recruitment of Even an labour and for welfare work generally

ABSENTEEISM AND LABOUR TURNOVER

Though there is meagre statistical information available on this subject, it may be stated with a fair amount of accuracy that the Indian worker is more habituated to absent himself from work than his prototype in other countries. He has yet to get himself thoroughly adapted to the industrial environment in which he finds himself. The reasons for his absence are not always connected with his love of rest but in many cases absence is due to causes beyond his control such as sickness, domestic difficulties, etc. The effects which poor and indifferent housing have on his work have been dealt with in the Section on Industrial Housing

The Factory Labour Commission of 1907 made an inquiry into the number of absent workers and came to the conclusion that the average worker took 2 days off every month and a further holiday of from 3 to 7 weeks every car In addition, he receives the weekly

holiday and from 4 to 10 Indian holidays during the year The question of absenteeism received the attention of the Indian Tariff Board (Cotton Textile Industry) and it was urged in evidence before them that the efficiency of labour in Bombay was greatly reduced by the high percentage of absenteeism among the operatives The Board came to the conclusion that Ahmedabad had a great advantage over Bombay in the matter of absenteeism, both in respect of a low rate throughout the year and also of the absence of the wide seasonal variations which were apparent in other centres of the textile industry They therefore recommended that in order to minimise the effect of absenteeism there should be a general adoption of a system already in force in a few mills in Bombay under which a certain number of spare hands are entertained in each department, except the weaving The Board

Ralph Fitch, in Foster, Early Travels, OUP, p 11

1644 — "She [the Seahorse] is then to proceed to Goa to buy some cairo" Foster, Eng Fact (1642-45), p 167

Caju (the cashew tree and fruit, see p 65)

The quotations below reveal some very strange forms of this word in Anglo-India form cadyu though, as we have observed (p 66), only recently noticed in India was used by Rumphius who died in 1693 The first of the following citais of special interest tions because of the reference in it to Cromwell and his The O E D does not contain the forms 'cadjew' and 'ca-100ra', and the earliest instance it has of the word is of 1703

1655—"Concerning Generall Crom well' he [Capt James Martin] declared 'that before these warrs begunn hee was a pore cowardly fellow and would take a cuff on the eare from any man', while as for Cromwell's wife, 'the stone or excrescence of a fruite called a cadjew would fitt her very well for a tooth'" Foster, Eng Fact (1651–1654), p 123

1638—"Cajooraes of a straunge propertye Cajoora trees, whose blos some casteth a Most Fragrant smell into the ayre, the Fruit somwhatt harsh in tast and strong "Mundy, Tracels, Vol III, pt 1, p 57 There is evident confusion in Mundy's mind

between caju and khajūrā or khajūrī, the Indian name of the date-palm

"Cadju is not properly speaking an Eastern fruit, but at one time it was brought there from the West Indies" Rumphius, Herbarium Amboinense, I, p 177 He also mentions that in Amboyna the fruit, was called boa frangi, that is 'fruit from Portugal'

Caminhar (to travel)
Anglo-Ind caminha (obs)

1632 —"The Dutchman from Masulipatam arrived here on the 25th and, finding little hope of a market, hastened for 'Ninapooly and adjacent aldeas', but being 'tardiff in caminha', he was overtaken by Cartwright at 'Baputly' on the 28th" Foster, Eng Fact (1630-1633), p 232

Campo (a field, see p 72)

Here is a citation which contains an earlier instance of the use of compound in Anglo-India than those mentioned in *Hobson-Jobson* or in the $O \ E \ D$

1676 —"Company's goods by reason of several thatch hovells within and round about the compound, which are very dangerous in respect of fire, which often happens in Dacca" Hedges, Diary, Hak Soc, Vol II, p connections See also instances on the same page and the next

Canja (in the sense of 'starch used by Indian washermen, and also in that of 'nice gruel', see p 76)

Below are instances of this word in Anglo-India older than those in *Hobson-Jobson* or in

per cent between the 20th and the 30th year and the remaining 9 per cent joined the first mill after they had attained the age of 30

Sixty three per cent of the workers were borninthe Konkan and 27 per cent in the Decean while the rest came from different parts of the country. Not a single worker gave his place of origin as Bombay City

About 4S per cent of the workers covered by the sample continued in the employment of the same mill without change, 34 per cent served in two or three mills and 1S per cent had served in 4 or more mills. The highest number of mills served by an individual was 15. The cause of leaving the mills was "for going to native place" in 26 per cent cases, "low wages and for bettering prospects in 21 per cent cases, "cabsence due to illness" in 14 per cent cases and "ratrenchment in 10 per cent cases Other causes for leaving mills were unsuitable conditions of work, dismissal, strike, resignation, etc.

The approximate period of total service (including the period of non attendance) was reported to be less than 5 years in 37 54 per cent cases, 10 to 15 cent

LABOUR IN FACTORIES

The conditions of factory labour until 1913 were regulated by the Indian Factories Act of 1881, as amended in 1891 Under the chief provisions of the amended Act Local Governments were empowered to appoint Inspectors of Factories and Certifving Surgeons to testify as to the age of children A mid-day stoppage of work was prescribed in all factories, except those worked on an approved system of shifts, and Sunday labour was prohibited subject to certain exceptions. The hours of employment for women were limited to 11, with intervals of rest amounting to at least an hour and a half, their employment between 8 p.m and 5 am was prohibited, as a general rule, except in factories worked by shifts The hours of work for children (defined as persons below the age of 14) were limited to 7 and their employment at night-time was forbidden, children below the age of 9 were not to be employed Provision was made for fencing of machinery and for the promulgation of rules as to water supply, ventilation, the prevention of overcrowding, etc

The next Factory Act to be passed into law was Act XII of 1911. This Act extended the defluition of 'factory' so as to include seasonal factories working for less than 4 months in the year, shortened the hours within which children, and, as a general rule, women might be employed and further restricted the employment of women by night by allowing it only in the case of cotton ginning and pressing factories. It also contained a number of new provisions for securing the health and safety of the operatives, making inspection more effective and securing generally the better administration of the Act. The most important feature of the Act, however, was the introduction of a number of special provisions applicable only to textile factories. The report of the Factory Commission showed that excessive hours were not worked except in textile factories. The Act, for the first time, applied a statutory restriction to the hours of employment of adult males by laying down that, subject to certain

vears in 15 88 per cent cases, 15 to 20 years in 9 13 per cent cases and more than 20 years in 14 08 per cent cases. The percentages of workers who had not changed mills was 67 in the case of operatives with less than 5 years' service and 42 for workers with 5 to 10 years service. In the other service groups, the percentage of operatives working in the same mill varied between 25 and 45

The actual active service was reported to be less than 5 years in 46 51 per cent cases, 5 to 10 years in 24 26 per cent cases, 10 to 15 years in 13 95 per cent cases and 15 to 20 years in 7 20 per cent cases. In the remaining 8 08 per cent cases the actual service was more than 20 years.

A large number of workers in the age groups 15-20 and 20-25 had served for a period of less than 5 years while the most common period of service in the age group 25-30 was between 5 and 10 years. In the age group 30-35 about 30 per cent of the workers had served for less than 5 years and 19 per cent for a period of 5 to 10 years. Among workers of 35 to 40 years of age, the number of those falling in each of the first five service groups was between 16 and 20 per cent.

exceptions, "no person shall be employed in any textile factors for more than 12 hours in any one day." It also provided in the case of textile factories that no child may be employed for more than six hours in any one day and that (subject to certain exceptions, which were factories worked in accordance with an approved system of shifts) no person may be employed before 5 30 a m or after 7 pm (the new limits laid down generally for the employment of women and children)

The Acts now in force -The ratification by India of the Conventions adopted by the International Labour Conference held in Washington in 1919 necessitated radical revision of the Indian Factories Act of 1911 This was undertaken during 1921 and the Indian Factories Amendment Act, 1922, introduced a series of Important reforms including the adoption of a 60-hours week, the raising of the minimum age of children from 9 to 12, the prohibition of night work for women, the extension of the Act to a large number of small factories, drastic restriction of the exempting provisions, etc. The principal object of the amending Act of 1923 was the removal of a difficulty which had arisen in connection with the law relating to the weekly holiday. The experience gained during the three years which immediately followed the revision of the Act in 1922 indicated that the amending Act had worked smoothly and that the main principles followed in 1922 commanded general acceptance It was not considered necessary, therefore, to modify any of the main principles of the lat. principles of the Act, but several administrative difficulties had arisen in connection with some sections of the Act—one such difficulty relating to Section 21 which provided for intervals Local Governments were asked in June 1923 to consider a possible solution of the difficulty and to bring to the notice of the Government of India any difficulties which might have arisen in connection with other provisions. On receipt of their replies, a conference of Chief

1626—"By reason of the Dutch's inveterate hate and malice all passages round about us are waylaid, either with a guard of Dutchmen or by the Governor, who they and Malaya together put in, which we make no doubt costs them caro" Foster, Eng Fact (1624–1629) p 131

Cartaz (a pass, safe-conduct) Anglo-Ind curtass, cartasse, (obs) See p 82
Neither in the OED nor in Hobson-Jobson

1618—' If they misenforme not from Mesolapatan, there is great store of indico shipt at some ports to the sowth, all which take curtasses of our enemies' Foster, Eng Fact (1618–1621), p 3

1618—"Shee hath her cartasse without stopping at Suratt and upon conclusion sent to mee for my passe, els the merchants would not stirr" Ibidem, p 4

1621—"The Dutch in the Red Sea gave cartasses or assurance to the juncks to pass free, and yet most treacherously, to their great infamie, made seisure of six vessels" Ibidem, p. 324

Castiço (child of Portuguese parents born in India, see p. 85)
Anglo-Ind Castilian, Castez
Not in the O.E.D.

"Kanappa confiscated a quantity of rice, unjustly, defrauding the 'Castilian' who brought it for sale' Foster, Eng Fact (1651-1654), p 240 Foster conjectures that 'Castilian' here is intended for castiço and it appears rightly so

"Richard Trenchfield married a Castez" The Diaries of Streynsham Master (1675-80), ed Temple, Vol II, p 284

Cavalaria (an establishment of horses or other animals)
Anglo-Ind cavelurinee (obs.)
Neither in Hobson-Jobson nor in the OED

1622-23—"As for the coach, one of the oven died and the other went lame and had to be sold, 'which is all the proceed of the caveluriree'." Foster, Eng Fact (1622-1623), p 95 In the same volume (p 45) is also met with the form cavyilluryoo, in the same sense

Cavaleiro (a horseman, a rider) Anglo Ind cavallerous (obs)

"Had intended to keep their ablucks' for sale here, as ordered by the President, but their cavallerous' refused to return without them" Foster, Eng Fact (1624-1629), p 232 Abluck is Ar ablaq, a piebald horse See also quotation under Adarga in Supplement

Centopeia (centipede, see p 92)

Here is an instance of the use of this word in Anglo-India

one cloth to another" Foster, Eng Fact (1651-1654), p 275

Chinche (a bug) Anglo-Ind chince, chint (obs)

1673—"Swarms of Ants, Muskeetoes, Flies, and stinking Chints, Crimices, etc breed and infest them. This Season we experimented, which though moderately warm, yet our Bodies broke out into small flery Pimples augmented by Muskeetoe-Bites and Chinces raising Blisters on us." Fryer, East India, Hak. Soc., Vol. I, p. 100

"Notwithstanding Chints, Fleas, and Muskeeto's torment them every Minute, [the 'Banyans'] dare not presume to scratch where it itches, lest some Relation should be untenanted its miserable abode" Ibidem, p 231.

Chita (printed cotton cloth, see p 104)

Here is an early instance of the use of this term in Anglo-India

1690 —"In some things the Artists of *India* out do all the Ingenuity of *Europe*, viz, in the painting of Chites or Callicoes" Ovington, *Voyage to Surat*, OUP, p. 167

Chuname (prepared lime, see p 105)

The following is an Anglo-Indian form of this word mentioned neither in *Hobson-Jobson* nor in the $O \to D$

1583-91—"And all the time which they ('Chinians') mourne they keepe the dead in the house, the bowels being taken out and filled with chownam or lime, and coffined, and when the time is expired they carry them out

playing and piping, and burne them "Ralph Fitch in Foster, Early Travels, OUP, p 42

Combalenga (a species of pumpkin) Anglo-Ind bolango

The Portuguese borrowed the word kumbalanu, 'a pumpkin', from one of the South Dravidian languages The Anglo-Ind form is not in the $O \ E \ D$

1679—"This countrey [Achin] affordeth Severall Excellent good fruites, Namely Duryans, Mangastinos, Oranges, the best in India or South Seas, comparable with the best of China, Lemons, Limes, Ramastines [Litchis], Bolangos, Monsoone plums [Zizyphus Jujuba or bör], Pumple Mooses [see under Toranja, p 350], etc., and the trees beare fruite both green and ripe all the yeare alonge" Bowrey, Countries round the Bay of Bengal, Hak Soc., p 323

Comprador (a purchaser, see p 115)

Below is an early Anglo-Indian instance of the use of this word, earlier than any in Hobson-Jobson or in the OED

1614—"I make John Phebe did deliver you the two fishes and letter 1 wrote you yesterday He is now grown stately and will not serve in the English house for comprador" Foster, Letters, Vol II (1613-1615), p 227

Concerto (repair) Anglo-Ind conserta (obs)

see ally the Indian'aboutered rates to file that all exists when he finds that the shell of the land in his native place is not pulper at to maintain all the members of his A certain percentage. of the notlers employed to fold is temporally give up their emp ement durin, the sowing, true planting and harve ting r a on During periods of defen ic a in trade and industry, industrial mortice released from employment fallback upon uniculture and thus add to the existing pressure of the population on the land. If the depression in trade and industry synchronizes with the fallure of the mon con, the amount of unemploy ment becomes considerable and the resulting distre s is enormous Various States have devised schemes of Imployment Ixchanges for the purpose of studying the problems in connexion with the demand and supply of supply of labour to control the movements of labour and to place it where it is required. The Govern ment of India and the various Provincial Governments have considered the question of creating Imployment Luchanges in India several times during the last ten years, but opinion is unanimous that owing to the preponderatingly agricultural character of

Lelian late if it is practically impossible to divide any catifactory relieme for the fermation of imployment Lychanges.

In his a State Member of the International I alout to derince and as such she is bound as aline to derince and as such she is bound as aline to the trins of the Treaty of Peace, to rat is an I adopt wherever possible, any to acute nor Leonmendation adopted by the I to tail and Labour Conference. The constitution of industrial unemployment was the tap in the tooyention which was adopted by the Last International Labour Conference to II in Washington in 1919. I ich Member is their this Convention was required—

- (i) to communicate to the International Later Other all information, statistical or otherwise one rains unemployment including to perform measures taken or contemplated to combat unemployment.
- (ii) to a troll hear existent of free public employment as not sunder the control of the cert at authority, and to appoint Committees, it could be represented to employers and movements to addition matter concerning the operation of the exercises.
- to be an been from ht me arran emutate been established, to make some for been established from the memploment have been established, to make the form of the form

In addition to this Convention the Lirst International Labour Conference also adopted a Persummentation which advocated—

- (a) the abolition of employment agencies, which charge feet or which carry on their business for profit
- (b) the etablishment of an effective system of unemployment insurance, and
- (c) the execution of public works as far as practicable during periods of unemployment and in districts most affected by it

The draft Convention was ratified by India but in communicating this ratification to the International Labour Organisation at Geneva, the Secretary of 5t ite for India found it necessary in order to avoid subsequent misunderstanding to explain at some length the peculiar position of India in this matter and to emphasise the difficulties connected with a complete ratification by India owing to the predominently agricultural character of the country. The tovernments on the question arising out of the draft Convention and Recommendation adopted by the International Labour Conference, invited views on the following points—

(i) Advisability of creating Public Employment Agencies in congested areas to facilitate 1673—"These Islands are in number seven Bombaim, Canorein, Trumbay, Elephanto, the Putachoes, Munchumbay, and Kerenjau, with the Rock of Henry Kenry" Vol I, p 159

"Having in a Week's time compleated my Business, returning the same way, we steered by the South side of the Bay, purposely to touch at Elephanto, so called from a monstrous Elephant cut out of the main Rock, bearing a Young one on its Back" Ibidem, p. 194

Escrito (a writing, see p 147)

The quotation below would lead one to the view that this Portuguese word was used not only in the sense of 'a note under one's hand or attestation', but also in the sense of 'a hasty note' in which 'chit' is used to-day in India The word in this sense is not in the O E D

1615—"All your letters having been liker to screets than letters" Foster, Letters, Vol III, p 154

See also quotation under *Scritto* in Supplement

Escritorio (a writing desk, see p 148)

The quotations below are of an early date, provide new forms of the word, some of which are not found in the O E D, and go to show what a brisk trade there was in these desks between the Far East

and India as early as the beginning of the seventeenth century

1615-1616—"Among other things I should mention a great number of cabinets of all patterns, in the fashion of those of Germany This is an article the most perfect and of the finest workmanship to be seen anywhere, for they are all of choice woods, and inlaid with ivory, mother-of pearl, and precious stones, in place of iron they are mounted with gold The Portuguese call them Escritorios de la China" Pyrard, Voyage, Hak Soc, Vol II, pp 176 and 177

1617—"There are two scriptoris which are sealed up to be delivered to you by Mr Methwold" Foster, Letters, Vol VI, p 27

1617—"I sent a gold box by Richard Kinge to buy me some skrettores of mackee [maki ye= lacquer] work" Ibidem, p 104

seventeen sundry parcels of contores and scrittores marked with R W [Richard Wickham] The freight of them I pray pay to the master how much it is I have been at Meaco and talked with the makeman [maker of lacquered goods] who hath promised that in short time he will have done He hath fifty men that worketh night and day, that, so far as I see, he doth his endeavour" Ibidem, p 169

1617—"I give you thanks for the book of Sir Walter Rawli's which you sent me, and have no good thing to send unto you, only two small scritoris" Ibidem, p 266

1690 —"It [Suratt] is renown'd for Traffick through all Asia, both for rich Silks and for Agatts, Cornelians

Reporting of accidents—Section 34 of the Indian Lictory's Act requires the manager to report all accidents which can a death or halfly injury whereby the person injured is 1 (vented from returning to his work in the factors during the 45 hours next after the occurrent of the secident All class sofaceidents namily, fital or flows is excellents which prevent a per n returning to work for 21 days or more, and minor, ire to be reported to the Inspector of I neter is and to the Di triet Magistrate and, In cales of any accident resulting in death to the other in charge of the Police Station is the duty of the Inspector of Lactories to male an investigation as soon as possible into the cause of and the repossibility for a fatal or earlors accident, and to tale steps for the projection of the person concerned if it is found that the death or serious injury resulted from any infringement of the provisions of the Act or of the rules framed under the Act The Act also requires notice to be given of an accident which is due to any cause that has been notified in this behalf by a Local Government, even though no injury may have resulted of the Lactori's Act. They have also been therefrom to any person. So far notifications granted powers under the provi lons of the lave been therefrom to any person. So far notifications transcribed powers under the provi lons of the lave been issued under this section only in Bom-Bombay Maternity Length Act. The Director bay, Length and Burma

use of this term in an Anglo-Indian document but also of the hatred in which the chief 'foreiros' or revenue farmers of Portuguese days were regarded by the people of Bombay

1664—"Whereas this Island being formerly belonging to the Crowne of Portugall, there were in each Division thereof Foreiros Mayores or Cheife Farmers men powerfule, arrogant, and Exorbitant violators, Ecclesiastiques as well as Civil, whose manner of Government was absolute, bringing the inferior sort of us so much under, and made so small accompt of them, as comparatively wee may say the Elephant doeth of the Ant

Wherefore, we humbly beseech your Majesty for the love of God and the wounds of Jesus Christ, to take pity and compassion on us by not consenting to alienate us from your Government, and the Obedience thereof upon any Consideration or agreement whatsoever neither to permitt any more Foreiros Mayores in this Island' Potition to Charles II in Khan, Anglo Portuguese Negotiations, O U P, p 451 ct seq

Fresco (subst, a cool wind, see p 161)

The following quotation not only illustrates the use of the above word in Anglo-India but furnishes a very vivid and interesting account of the hot season in Gujarat

1689 —"In the Middle of May, before the Southerly Winds set in,

which bring the Rains along with them, the Air at Surat is so very dry, that it licks up the Moisture in the Pen, before we are able to write it out, and so intensely Hot, especially about 3 in the Afternoon, that we cannot endure the standing for any long time upon the Grass, where the Sun's Beams have their full force causes our sprinkling the Floors of our Chambers frequently with Water, to create a kind of Fresco in them, during this Season, and makes us Employ our Peons in Fanning of us with Murchals made of Peacock's Feathers, four or five Foot long, in the time of our Entertainments and when Repose" Ovington, we take our Voyage to Surat, O U P, pp 82 and 83

Fusta (a pinnace or small ship, with sails, or oars) — Anglo-Ind fusto, fuste (obs)
These forms are not in the OED

1614—"The king keepeth there (Reshire) continually 100 fustoes and galleys with them to cut off all passengers that offer to go from Ormus to Balsora" Foster, Letters, Vol II (1613–1615), p 146

1615 —"It is hoped that the Osiander will be there to carry them before the fustes can arrive" *Ibidem*, Vol III, p 10

Galeota (a small galley, see p 164)

The following note of Foster (Letters, Vol III, p 296) throws new light on the derivation of Anglo-Ind gallevat which Dalgado says is derived from the

WORKMEN'S COMPENSATION

The Workmen's Compensation Act of 1923 came into force on July 1st, 1924. The Act as passed by the Legislature covers ten classes of workmen. Some of these, such as members of fire brigade, telegraph and tele phone linesmen, sewage workers and tramway-men are small, and as the definition of scamen is limited to those employed on certain inland vessels, only a very small proportion of Indian seamen come under the Act Compensa tion for seamen, however, has been secured by agreement between the Government of India and ther foreign steamship companies, under which the latter agree to the insertion in the ships articles of a clause whereby the companies agree to pay compensation to injured Indian seamen on the same basis as if they were covered by the test and the state of t red by the Act and all questions as to compensa-tion are decided by Commissioners of Workmens' Compensation in India An Indian seaman employer on a British ship legally comes under Compensation in India the Inglish Act and the insertion of the clause referred to above does away with the practical difficultes which would arise if Indian seamen had to claim compensation in the English or other foreign courts. The five important or other foreign courts. The five important classes covered are the workers in factories, mines, docks and on railways, practically all of whom are included and those engaged in certain types of building work, notably the construction of industrial and commercial buildings and any other buildings which run to more than one storey. The most important classes excluded altogether are agricultural workers and domestic servants. Non-manual labourers getting more than Rs 300 a month are excluded, except on the Rs 300 a month are excluded, except on the railways Power is taken to include other hazardous occupations by notification from time hazardous occupations by notification from time to time All occupations in olving blasting operations were thus declared by the Governor-General in Council, as hazardous occupations Compensation is to be given as in the English Act, for personal injury by accident arising out of and in the course of employment. It is also to be given for diseases in certain cases. The provisions for diseases have been so framed that if a certain class of workmen contracts a scheduled diseases, it will appeals be extremely difficult for the employer. workmen contracts a scheduled diseases, it will usually be extremely difficult for the employer to defeat a claim for compensation On the other hand, other workmen will find it equally difficult to get compensation for disease, as they will have to prove that the disease arises "solely and directly" from the employments. The disease scheduled at present are entired. The diseases scheduled at present are anthrax, lead poisoning and phosphorous poisoning Whether compensation can be claimed for diseases other than those scheduled is doubtful, but the list is made something of extensions. but the list is made capable of extension Mercury poisoning was thus added to Schedule III by notification, dated 28th September 1920

In order to bring the Indian law into conformity with the provisions of the Draft Convention concerning Workmen's Compensation for occupational diseases adopted at the Seventh International Labour Conference held at Geneva in 1925, which has been ratified by India,

necessary changes were made in sub-section (2) of section 3 and in the list of occupational diseases given in Schedule III of the Certain occupations in connection with operations for winning natural petroleum or natural gas and in connection with the load-ing, unloading and fuelling of a ship in and harbour, roadstand or navigable water were also brought within the purview of the Act by notification issued by the Governor General in Council in exercise of the powers conferred by sub section (3) of section 2 of the Act

The Amending Act of 1929 —With a view to revise the Act so as to amend those Sections or parts of Sections which were admittedly defective and to introduce changes which were likely to raise no important controversial questions and which would be generally recognised as improve-ments, the Government of India introduced into the Legislative Assembly on 21st September 1928, a Bill further to amend the Work-men's Compensation Act, 1923 The main features of this Amending Act are (1) that men's Compensation Act, 1923 The main features of this Amending Act are (1) that the discriminating restrictions placed on workmen employed in the construction, repair or demolition of a building or bridge, with regard to their ineligibility for compensation except in the case of death or permanent total disablement has been removed, (2) that all payments to dependants of the deceased workmen (except advances to the extent of Rs 50 for funeral expenses of the deceased workmen (except advances to the extent of Rs 50 for funeral expenses of the deceased workmen and to the extent of a hundred rupees on account of compensation to any dependent) and any lump sums payable to minors should be paid through the Commissioner, (3) deposits of trivial amounts, i.e., less than Rs 10 have been done away with (4) provision is made for the protection of lump sums payable to a woman or a person under legal disability by empowering the Commissioner to invest, apply or otherwise deal with them for the benefit of the woman, or of such person during his disability, (5) powers are vested in the Commissioner to recover any amount obtained by any person by fraud, impersonation or other improper means and amount obtained by any person by fraud, impersonation or other improper means and (6) the benefits of the Act are extended to (a) any person employed for the purpose of loading, unloading, fuelling, constructing, repairing, demolishing, cleaning or painting any ship of which he is not the master or a member of the crew, or (b) employed on a railway as defined in Sections 3 (4) and 148 (1) of the Indian Railways Act, 1890, by a person fulfilling a contract with a railway administration or (c) employed as an inspector, mail guard, sorter or van peon in the Railway Mail Service, or (d) employed in connexion with operations for winning natural petroleum or natural gas as a rig-builder, driller, driller, shelper, oil-well puller or bailing or cleaning oil wells or putting in and taking out casings or drill pipes in oil wells or (c) employed in any occupation involving blasting operations any person employed for the purpose of loading,

In February 1931 tha Act was further extended to cover workmen engaged in the construc-

Below is an early instance of this term employed in the sense of the Telugu language

1645—"This instant wee received a letter from the King by two of our owne servants. The translate of that letter out of Jentue into English we send unto you for your perusall." Foster, Eng Fact (1642-1645), p 291

Jaca (jack-fruit, see p 178)

The citation below is of interest, not only because it is of a fairly early date, but because it helps to show what keen observers the old travellers were, and how keenly and sympathetically they were interested in obtaining and setting down information about the fauna or flora new to them

1637 -"The ancients called this island [Ceylon] the healthy, pleasant, fertile, flourishing and rich Taprobane Healthy on account of its temperate climate and lovely air, fertile owing to numerous streams of excellent water pleasant owing to the fact that most of its mountains and forests are filled with aromatic cassia or cinnamon , or else of great leafy fruit-trees like the bread-fruit which bears a sort of apple of huge size, Outside they are called jack-fruit covered with small prickles which, although sharp to the touch, do not prevent one's getting at the kernel, which is enclosed in a yellow, sweet pulp, very pleasant to the taste From this pulp, and from the kernel many dishes are prepared which are

most excellent and delicious Mother Nature, in her foresight, perceiving that the branches would not suffice to support so great a weight, arranged for this fruit to sprout from the trunk itself, by throwing out roots or stems, which are so strong that, unless you have a knife or other sharp instrument, it is difficult to get them off "Manrique, Travels, Hak Soc, Vol I, pp 448 and 449

Jagra (coarse sugai, see p 179)

The quotations from Fitch and Terry (p 179) show how by jagra they meant the coco-nut or the coco-nut tree'. The latter of the two citations below will show how jaggery was a term applied to spirit obtained from palm-sugar, and the former how the form jagra in its correct meaning of 'palm sugar', was in vogue earlier than jaggery

1630—"April 18 Took some coconuts and 'jagra' from a Malabar junk" Foster, Eng Fact (1630–1633), p 133

1631—Wedell brought a hog's head of jaggery for his owne drinking at sea" Court Minutes for May 20, 1631

Jangada (a raft formed by two boats lashed together with boards across them see p 181)

The quotations below are of interest because they contain

Effect on Industry -A compulsory system have had to pay as compensation on a single down their mines due mainly to the severel and of these are the Claims Bureaux in Calcutta, depression with which the industry has been and Madras. In these provinces and in Bombay faced. In the Punjab the proprietors of the insurance is widely resorted to by the employers coal mines in the Jhelum District are reported but in the other Provinces accident insurance to be not satisfied with the privileges enjoyed does not appear to have made much progress by the miners under the Act as some of them

of workmen's compensation enhances the accident more than they could earn during a cost of production but not to any appreciable extent. In the case of coal mines, the increase in cost has been estimated to be not make a big hole in the profits of a concern but more than annas four per ton of coal (vide para the remedy for this lies in accident insurance specified by the Report of the Indian Coal Committee, Hacklites for accident insurance are now being provided by a number of leading insurance small coal mines have been compelled to close companies in the country and the most important that the country and the most important that the country are the country and the most important that the country are the country and the most important that the country are the country and the most important that the country are the country and the most important that the country are the country and the most important that the country are the country and the country and the country are the country and the country are the country and the country and the country are the country and the country and the country are the country are the country are the country and the country are the country are the country and the country are the country a

INDUSTRIAL HOUSING.

One of the most vital problems facing industrial employers in India to-day is that connected | with the housing of the labour which they The importance and the urgency of providing decent housing cannot be sufficiently emphasized

The conditions of industrial housing in India are, in many cases, appalling and the majority of buildings, tenements or huts in which industrial labourers are housed are insanitary and more or less uninhabitable from Western points of view Provincial Governments, Municipalities, Improvement Trusts and the larger employers have done a great deal to mitigate the evils resulting from an insufficiency of decent sanitary housing for labour, but a considerable amount still remains to be done before this question can be considered to have been satisfactorily boylog

Several commissions and committees inquiry appointed by the Government of India and the Provincial Governments in connection various subjects have dealt with the on of industrial housing. The Industrial question of industrial housing Commission in 1918 urged that, in addition to the scheme followed by the Improvement Trust in Bombay, other measures should be adopted such as the refusal of permission with a few exceptions, to fresh industrial concerns to be established, the setting up of a special area for industrial development, the removal of the existing railway workshops from the city, supply of housing accommodation to the supply of housing accommodation to the employees by railways, Government departments and public bodies, improved communications with a view to creating industrial suburbs, and a definite programme of construction to be taken up by local authorities The findings of other commissions and committees with regard to this question follow similar lines

to improve housing conditions in Bombay City was made after the plague of 1896 when the heavy mortality and the great exodus that followed paralysed the trade and industry of Bombay. The Bombay Improvement Trust was established in 1898 "for the work of making new streets, opening out crowded localities, reclaiming lands from the sea to provide room for the expansion of the city and constructing in the larger labour employing organisation. The -The first Bombay Presidency—The first attempt to improve housing conditions in Bombay City

sanitary dwellings for the poor and the police" Owing to its limited powers and the various difficulties which it encountered the Trust had to content itself for the first few years of its existence with "slum patching," the development of a few building sites, the construction of a few chawls and the development of main In more recent years, however, the Trust has been able to do considerable good work in the direction of industrial housing and has built over 1,300 tenements for housing its own labour and 99 chawls containing 8,896 tene-ments in all for housing labour in general The Bombay Port Trust which engages on an aver age about 8,300 manual workers in all its departments has provided accommodation for a little over 8,000 of its workers The Bombay Muniover 3,000 of its workers The Bombay Muni-cipality has provided a large number of chawls for its employees as will be evidenced by the for its employees as will be evidenced by the fact that 5,538 out of 7,537 scavengers employed are provided with quarters. Varying proportions of the numbers of employees in the other departments of the Municipality are also provided with adequate housing According to the information collected by the Bombay Labour Office in 1925, 28 out of the 76 textile mills in Bombay City which furnished information for the enquiry had provided housing for their operatives. 7 out of these mills provided residential accommodation only for employees residential accommodation only for employees in the Watch and Ward Department and the the 22 mills which provide partial housing for all classes of operatives, the number of workers who lived in the tenements provided amounted to 12,149 out of 64,720 employed. The G I P Railway owns 20 chawls containing \$41 one room tenements and the B B & C I Railway owns 303 one-room tenements for housing their employees

No action was taken by the Local Government in Bombay City for housing general industrial labour till after the end of the war A ment in Bombay

1652—"Friar Ephraim who was pastor or curate unto the Mostezaes of Madraspatam" Foster, Eng Fact (1651-1654), p 92

Monção (monsoon, see p 229)

Below is a very strange Anglo-Indian form which, if Yule's conjecture that the Anglo-Indian monsoon proceeds directly from the Dutch monsoon or monsoon is correct, perhaps marks a transition stage between the present Anglo-Indian word and the Dutch term. It is not found in the OED

1642—"Wee have in this our 15 or 16 monthes residence throughly experienced the trade of this place, and doe finde that the first markets at the begining of the monzoane is most proffitablest. Besids the country people having then fully supplyed themselves retorns not till the next moonzoane to replenish their wants." Foster Eng Fact (1642–1645), pp. 57 and 58

Morador (an inhabitant) Konk morādor —Anglo-Ind moredor (obs.)

In the Konkanı of Goa the word is used in the specific sense of an inhabitant of a village of which he is not a member or a 'componente'

1632 —"Whereon one Grua Redie [Guruva Reddi], a moredor of Mondrero, gathered head, to the number of three or four hundred in armes "Foster, Eng Fact (1630-1633), p 233

MORIM

Morim (a thin white cloth for shirting) Anglo-Ind. mooree, morye, moory (obs)

The O E Dderives the Anglo-Ind word from Portuguese, but Sir Richard Temple (Ind Antiq, Vol L, Supp p 9) is of the view that the Port morim is more likely a corruption of $m\hat{u}_{i}\hat{i}$ than that $m\hat{u}_{i}\hat{i}$ is a corruption of morim, as it was a common custom of the Portuin adopting Oriental guese names ending in i to add a final m or nMoum means ' Moor cloth', 1 e cloths intended primarily for Mohammedan It was cotton cloth wear manufactured principally in the Nellore district of Madras for sale to the Mohammedans of the Malay peninsula It is identical with Salampore The earliest instance of the use of this word in the OED is of 1696

1618—"Such severall sorts of goods as Bantam requires viz white moryes, white percallaes, white salamporyes, white and redde beteles, dragons malaia, dragons salala, fine gobare serasses fine tappy serasses fine and course Japon tappes, tape chindees, tape anacke, caine goulons, and such

supply and conservancy arrangements in barts are abominable. Government and other public agencies do not provide housing, as in Bombay, for industrial purposes but some Government and public concerns do provide quarters for their own employees.

Bihar and Orissa—All the collieries in the Jharia coal field are amply and efficiently equipquarters for their own employees

Madras Presidency—As a result of the exertions of the Labour Department of the Government of Madras and the Co-operative Building Societies and a number of local authorities some houses have been built for poor workmen in Madras City Out of 1,530 registered factories 211 factories are reported to have provided housing for a small number of their employees Almost all plantation estates in the Milgiris, Malabar and Combatore provide 'lines' for the cooly labour employed

United Provinces —Out of 330 regulated factories 83 make some provision for the housing of workmen and their families Altogether about 5,400 single room and 1,045 double room tenements are provided by the employers The McRobertsganj, Allenganj and the Juh-settlements of the British India Corporation at Cawnpore are about the only important exam ples of housing provided by employers for their workmen in that city A scheme has however been launched by some of the owners of factories in Campore for providing housing for some twenty thousand workmen and their families nut it is still under discussion Except as employers the Government of the United provinces has done nothing in connection with industrial housing The Improvement Trust of Cawnpore has put up some temporary housing and the Improvement Trust of Lucknow has put up a model barrack in the area set apart as an industrial area. In the basts or hatas where housing is provided by private landlords the type of tenement available is usually a small mud hut with a room at the back and a room or a verandah in front. The size and height vary. The usual size is $10 \times 8'$. The normal height is 6' to 8'. The only outlet for ventulation is the small main door Even such tenements are reported to be shared by 2, 3 or even 4 families and as many as 10 persons may be found as inmates

Central Provinces—Housing is provided for about 7,500 workers by some of the larger factories and mills in the Central Provinces Mineteen per cent, of textile labour and 7 5 per cent of the labour employed in minor industries is housed. The Pulgaon Cotton Mill. muintains a settlement covering an area of 15 acres on which the millhands are allowed to build their own houses on payment of a nominal ground rent of annas 4 per annum per 100 sq ft Probably the most mignificent scheme of industrial housing conceived in India is that district nousing concerves in according to the agency of Viscos Tata Sans Limited at Nappur These of Messrs Tata Sons Limited at Nagpur These mills have leased a plot of 200 acres at Indora, a suburb of Nagpur, two miles from the mills The scheme is based on a desire to establish a model village The idea is to build houses The scheme is based on a desire to establish a model village. The idea is to build houses of the bungalow type standing on their own ground in plots measuring 30 53 with the limitation that building will not be allowed on more than one-third of the space provided. The houses are let to the workers on the hire.

Jharia coal field are amply and efficiently equip-ped with approved types of houses Their design, construction, ventilation and general amenities are governed by the Jharia Mines Board of Health Workers recruited from villages within five miles from the mine frequently prefer to live in their own villages and walk backwards and forwards to their work In five collieries employing about ten thousand workers 4,775 houses are provided, five of the worst equipped mines employing 424 workers provide 156 houses and five normally equipped mines employing 3,084 workers provide 1,162 houses In many cases more than one employee is accommodated in one dhoicra or house frequently a man and his wife and his family all of whom may be recorded as separate labourers in the figures of the mining population occupy one house Every house must be licensed Licenses are not given unless the standards are complied with If labourers are found in occupation of unlicensed premises the management is liable to prosecution No rent is however charged and subletting is not

The Tata Iron and Steel Works at Jamshed pur have built 4,521 residential buildings these, 301 are rented at over Rs 20 per month Sixteen are rated as hotels The accommodation provided at present is insufficient and one of the problems the Company will have to face is the provision of a larger amount of housing

Assam —Free quarters are provided for all residential employees on tea estate. Such non-resident labour as is employed is casual labour which comes from the adjoining villages and lives in its own houses. In the mines and oil fields free quarters are provided for the labour force employed A Committee of Inquiry appointed in 1921-22 recommended that endeavours should be made to house immigrants from different provinces together in hamlets instead of putting workers from all provinces indiscriminately into burracks or lines. The main objection to this recommendation is the province of the province o dation is the want of land as all available land is under tea. The housing conditions in the coal and oil fields are reported as being quite satisfactory In Assam the ter estateregularly inspected by District and Sub Divisional officers. Although the least powers of interference have been curtailed by the abolition of indentured labour and the repeal of so much of Act VI of 1991 as related to such labour, still in practice the inspecting officers do invariably report on the condition of the lines. They call attention to the need of improvement and the management is generally ready to effect such improvements as are considered necessary

chroniclers from as early as 1545 See Dalgado, Glossário Lus As, Vol II, p 165 The expression 'pão' was also used of silver, whence the phrase 'pão de piata' (silver ingot) In the East India Co's records these ingots whether of gold or silver were usually called 'shoes' See Hobson-Jobson, s v Shoe of Gold

Parau (a small vessel used in war or trade, see p 269)

Here is an earlier instance of the use of this term in Anglo-India than any mentioned in *Hobson-Jobson*.

1653—"Another prau sent to find the Dove Have just heard that the Dove has been taken She might have been saved had there been enough Englishmen here to man the prau instead of natives" Foster, Eng Fact (1651-1654), p 190

Fryer uses the very unusual form 'provoes'.

1673—"They are owners of several small Provoes, of the same make, and Canooses, cut out of one intire piece of Wood" Fryer, East India, Vol I, p 65

Partido (a consignment)
Anglo-Ind partido, partitho
(obs.) Not in OED

1617—"Some good quantities we procured and to enlarge our investments the more, we bought also some partidoes on credit to pay at two

and three months' time' Foster, Letters, Vol VI, p 236

"After the partitho of silk he took was made up and fit to be embarked it lay there three weeks and above before he durst ship it" *Ibidem*, p 139

Patacho (a pinnace) Anglo-Ind patash (obs.) This form is not met with in the O E D

1630—"Do not believe the information regarding the number of frigates and 'patashes', for Hari Vaisya's brother writes from Damān that the force there consists only of the fourteen frigates and eight 'fustoes' belonging to Ruy Freire" Foster, Eng Fact (1630-1633), p 99

Pateca (water-melon, see p 275) Anglo-Ind pateca, putacho (obs)

1673 — "From hence [Elephanta] we sailed to the Putachoes, a Garden of Melons (Putacho being a melon) "Fryer, East India, Hak Soc, Vol I, p 195 See also under Elephanta

Fryer's Putachoes was called in Portuguese Ilha de Patecas and in Anglo-India Island of Patecas, see Ind Antiq, Vol LIV, p 3 By 1724 the 'Island of Patecas or Patachoes' came to be corrupted into 'Butcher's Island', the name by which this island near Bombay is still known to this day

Paulista (a Jesuit, see p 277) Malayal *Paulistákkâr*

A table showing (a) Birth-rate and (b) Death-rate per thousand of population and (c) Infant mortality for 1,000 registered births for certain important industrial centres

Centre	Period	Birth-rate per 1,000 of population	Death rate per 1,000 of population	Infant mortality per 1,000 registered births
Bombay Ahmedabad Sholapur Karachi Nagpur	1930 1929 ''	21 5 47 02 44 03 55 83 50 63	21 2 49 90 34 53 30 97 52 24	296 00 331 65 328 73 230 55 290 77
Amraoti Akola Cawnpore Lucknow Allahabad	91 92 13 11 11	59 60 41 73 36 94 43 98 46 31	49 14 35 36 52 70 70 81 38 44	330 91 251 27 420 34 469 22 258 79

The relation between overcrowding and infant mortality is brought out in the following table extracted from the annual report of the Municipal Commissioner for Bombay City —

Infant Mortality by the Number of Rooms occupied in 1930

Number of rooms	Bi	rths	Death	in Infants	Infant mortality per 1,000 births registered				
Manuel of tooms	Number	Percentage	Number	Percentage	1929	1930			
1 Room and under 2 Rooms 3 Rooms 4 or more rooms Hospitals Homeless and not recorded	10,945 1,500 749 404 11,394 37	43 2 7 15 3 0 1 6 45 0 0 1	5,497 550 202 74 1,154 27	73 2 7 3 2 7 1 0 15 4 0 4	502 306 270 183 101	487 368 297 185 85			
Total	25,229	100 0	7,225	100 0	296	298			

Working conditions —In the Bombay Presidency the working conditions in the factories are usually considerably in advance of the conditions in the homes of the workers Factories Department has recently effected an appreciable improvement in the development of ventilation in factories The working conditions in the average Cotton Mill in the U P are reported to be not very satisfactory and those in the Central Provinces and Berry leave plenty of scope for improvement especially in plenty of scope for improvement especially in ventilation, maintenance of suitable temperature, suitable flooring, proper spacing of machinery and provision of places for meals. Considerable improvements are required in the seasonal factories for alleviating the dust nuisance and for proper lighting. In the Jute mills in Bengal, especially in the sorting and carding section there are no adequate arrangements for taking off the dust and the workers. ments for taking off the dust and the workers get a particular kind of rash all over their bodies in the beginning of their employment are mostly employed in this Department and they bring their infants and children who live in that dust laden and hot atmosphere during working hours Working conditions are how-ever, generally satisfactory in jute mills and other large industrial concerns

Extent of Medical Facilities provided—The result of the enquiry into Welfare work conducted by the Labour Office in 1926 shows that the provision of facilities for medical attendance and the supply of medicines is fairly general in all the larger labour-employing organisations in the Bombay Presidency. The Textile Labour Union in Alimedabad is the only association of employees which provides medical facilities for its member. There are also Government Municipal or charlable hospitals and dispensaries which are open to the public and which are used by the labouring classes. In the United Provinces mann of the larger employers maintain dispensaries but no hospitals. The Duffern hand a private organisation aided by grants from Government and local bodies maintains female hespitals at the most important towns. The Lady Chelinafied Maternity and Child Welfare Learne maintains a number of centres for child welfare and the treatment of maternity case. Many of the employers in the Central Provinces and Brachive provided well-equipped dipenation and medical facilities are within east trach of the workers in almost all the factors and trach of the larger concerns in Bibor and On 2 and 4a

1623—"The reason why the bakers, etc, have not come down in the behaviour of the 'screivas', etc, in custom house, who will not give them a clittee without som feeling [feeing?], but on his threatening to go again to the Governor the desired 'screete' was granted "See under Escrito, p 390 Foster, Eng Fact (1622-1623), p 265

Senhor (lord, see p 325)

From the quotation below it would appear that, just as Indians used to give this title 'Senhor' to Englishmen, the latter used it of the chief foreign officials in India, not necessarily Portuguese—in the passage in question they are all Dutch

1676—"Concerning the affairs of the Dutch Company in this place [Metchlepatam] I understand that Senr Coler is by orders lately come from Batavia to be Governor of Pullicat Senr Peter Smith is to be Cheife at Metchlepatam, and Senr Hartsing, the Cheife at Golcondah" The Diaries of Streynsham Master, ed Temple, Vol I, p 297 This is an earlier instance of the use of this word than the one in the OED which is of 1795

Sombra (lit shadow, also favour, protection) Anglo-Ind sombre (obs.) Not found in this sense in the $O \to D$

"If no sales be effected, the goods should be taken on to Ahmadābād, 'under the cover of your sombre' and delivered to Clement" Foster, Lng Fact (1624-1629), p 79

Sumbaia (a profound reverence, see pp 330 and 332)

1614—"We delivered his Majesty's letter, obtaining what we required, only confined to such orders and customs (though bad) as the Dutch before us had brought in as of Sombay or presents, customs, rents "Foster, Letters, Vol II (1613-1615), p 112

Taça (a cup, see p 338)

In supporting the view that the Anglo-Ind toss was derived from Portuguese and not from Persian we remarked that the Persian tās 'a cup' had not acquired currency in Hindi or Urdu and that the word for 'cup' in the former was $py\bar{a}l\bar{a}$ The following quotation appears to bear out our statement

1608-11—"At the end are drawne many portraitures of the King [of Delhi] in state sitting amongst his women, one holding a flask of wine, another a napkin, a third presenting the peally [small cup], behind, one punkawing [fanning], another holding his sword" William Finch, in Foster, Early Travels, OUP, p 164

Terranquim (a small swift bark, see p 343)

We have pointed out that this Portuguese form is not the original of the Anglo-Ind trankey which comes from the Pers trankeh Here are a couple of passages in which

•

to the state of th

the second term termination is a second terminate to the second termination is a second termination to the second termination to the second termination of the second termination to the second termination the second termination that the second termination termina

Tromba (a species of reed met with near the Cape of Good Hope) —Anglo-Ind strumbloues Not in the O E D

1615 — 'Fifty or sixty leagues out are seen floating in vast numbers the stalks of reeds, with about nine or ten reeds (more or less) attached to each stalk, these are called *trombas*" Pyrard *Voyage*, Hak Soc, Vol. I, p. 20

"These trombas are a kind of great canes about the bignesse of a man's arm and three or four foot long, which flote upon the water with their roots Mandelslo, Travels, cit by Grav in note to passage above

1624—"March 27 Sailed from the Downs July 13 'Mett with weeds called strumblowes, a good sine of neerness to land" Foster Eng Fact (1624-1629) p 23

Tufão (hurricane, see p 353)

Below is an early Anglo-Indian reference

1617—"Two of these Dutch ships were full laden with silk and stuffs which they had taken from the Chinas, as also two junks with the like, but by means of a storm or tuffon the two Holland ships and one junk were driven ashore" Foster, Letters, Vol VI, p 260

Tutanaga (an alloy, see p 356)

The following quotation contains an Anglo-Indian form of this word unrecorded in Hobson-Jobson or in the OED

"Their tutinggle they [the Dutch] bring from Tiwan" [Taiwan, 1e, Formosa] Eng Fact (1642-1643), p 36

Varanda (verandah, see p 358)

The citations below give evidence of earlier use of this term in Anglo-India than do those in Hobson-Johson

1718—"But if the making of such a Compound and Virandas for depositing and securing the Merchants Goods will be so great a convenience we permit you to make it" Old Fort William in Bengal, ed Wilson, Vol I, p 37

1755—"Ordered Mr Bartholomew Plaisted to survey the Verandah" Ibidem, p 34

1756—"They [the Nabob's troops] had infinitely the advantage over us in this attack as they could fire upon our men from the tops windows and verandas of houses which stood close to and overlooked our lines and batteries" Ibidem, Vol III, p 295

Visitador (official visitor), see pp 367 and 368

The quotation below bears out the statement made before (p 368) that the Dutch adopted this Portuguese word for one of their officials

1614—"The first of this month arrived here a Dutch ship coming in three months from Bantam, and in her there comes the Visitador General for the Dutch to visit these coasts" Foster, Letters, Vol II (1613-1615), p 165

Schools for the education of adult workmen! do not exist on the G I P Railway but a school established at Bina for imparting technical instruction and conducting refresher courses in Railway working

For Workers' Children -The facilities provided for the education of the children of railway employees are as under

97 schools for European and Anglo-Indian children and 123 schools for Indian children are maintained at suitable centres and the total number of pupils on the rolls is 4,155 and 15,967 respectively. The total expenditure from revenue on the European and Anglo-Indian schools is Rs 402 lakhs per annum and on the Indian schools Rs 14 lakhs The Railway Department also aids certain schools for children of railway employees The total number of rallway employees The total number of children in rullway aided schools is 3,521 (European and Anglo-Indian) and 7,704 (Indian) and the total numual grants made by the Railway are Rs 40,365 and Rs 46,584 respectively. The Railway Department also gives direct financial assistance to its employees towards the education of the contract education of their children in certain hill schools The total expenditure on this account in 1927-28 was Rs 35 lakhs for Luropeans and Anglo-Indians and Rs 288 thousands for Indians Facilities are also afforded by the grant of passes and concession tickets to enable the

children to attend schools

The present methods of assistance have recently evoked public criticism on the score of their being more favourible to European and Anglo-Indian employees than to the Indian and with a view to eliminating all true of racial discrimination the Railway Board placed Mr C E W Jones, C I E , I L S , on special duty in 1927 with instructions to collect all

facts and figures regarding the assistance given by railways for the education of the children of their employees On a consideration of Mr of their employees On a consideration of Mr Jones' report the Board have now formulated their future policy on the following lines --

All railway schools would be transferred to local authorities or private bodies, special grants being given out of railway funds where necessary The assistance given by the Railway Department would be confined to employees who draw pay below a prescribed maximum and obliged to send their children to boarding schools The assistance would take the form of grants to the employees of a fixed proportion not exceeding one half of the board and tuition fees, the proportion depending upon the pay drawn by the parent and falling with the increase in pay The assistance would be open to all employees without distinction of community, race or creed

Several companies' railways have also signified their willingness to adopt a similar policy the question is still receiving further consideration because of the representations received in connexion with the scheme

Co-operation —The Railway Administration have noticed that heavy indebtedness, degrades the employee and impairs his efficiency and they have therefore encouraged the formation of co-operative credit societies and co operative stores by the employees

Co-operative Credit Societies have been formed on all railways and are managed by committees generally elected from among the shareholders. But in some cases, the heads of the departments are required to be the chair men of the Committees and they have power to nominate some of the members of the

WAGES

It was in 1873 that one of the earliest attempts to collect wage statistics in India was made by issuing instructions to District Officers to submit half yearly returns showing the average monthly wages of certain classes of skilled and unskilled labour The returns thus collected were utilized for compiling a series of comparable statistics of wages for selected Districts in each Province and these statistics were published in the publication "Prices and Vinges" issued annually by the Director-General of Commercial Intelligence and Statistics A reference, however, to Mr Dutt's Report on an Enquiry into Rise of Prices in India would show that these sta-tistics were found to be wholly unreliable and consequently these half yearly returns from District Officers have been discontinued since District Officers have been discontinued since 1910 In their place a quinquennial wage census was adopted in all Provinces, except in the Central Provinces where an annual return was obtained from District Officers The first quinquennial wage census was held in 1911 12 and the second in 1916-17 The statistics regarding wages continued to be published in 'Prices and Wages' which give the results of the opinionental wage censuses in respect of a few quinquennial mage censuses in respect of a few urban and rural occupations. As the statistics were still far from satisfactory the third wage census, which was due in 1921-22.

doned except in Madras and the Punjab 1921 an attempt was made by the Government of India to hold an All-India censu- of industrial wages with the active and voluntary co-operation of employers, but nothing could be done partly because a number of employers either filled to submit returns or submitted incomplete returns and partly because neither the Central nor the Local Governments were able to provide the course of the returns a country of the course of th the staff required for the purpos owing to financial stringency. The annual 1 are of Prices and Wages were also suspended in 1920 as a result of retrenchmen and no regular official wage statistics are now published i -British India as a whole

In the United Provinces a scheme for the of Industrial Waters to be taken along m_i by regular census m_i s an interval 1 and 1 regular census m_i s an interval 1 and 1 regular census m_i s an interval 1 and 1 has been carried cut even the points and 1 for same 1 and 1 which of certain charten of weak 1 and the 1 much of certain charten of which 1 and 1 and 1 by unian could has, and at certain 1 and by unian could has, and at certain 1 and stations to scene a means of unsparason 1 of the same point 1 weaks 1 and 1 are the same 1 are the same 1 are the same 1 and 1 are the same 1 are the same 1 and 1 are t יביתבים בייחבייו the

Gins and Presses

The male coolies in the gin factories in Madras and the Punjab earn on an average annas 8 per day while the female coolies get only as 5-1 and as 6 respectively. In the Central Provinces the average daily earnings of male and female coolies are as 10 2 and as 5-10 respectively.

The average daily wages of female press coolles in Madras and the Central Provinces amount to annas 5-10 while those of male coolles amount to annas 9 6 and annas 13-10 respectively

The Plantations —Labour in the tea gardens in Assam is paid on a piece-work basis

In addition to the standard daily task which the worker must execute in order to earn his wages (called Hanra) the labourer is given an opportunity at certain seasons to supplement his earnings by the performance of a second task the payment for which is known as ticca In some cases where it is impracticable to prescribe a definite task as in leaf plucking at the beginning and the end of the season payment is made by time. A distinctive feature of work in the gardens is that the labourer usually brings his family with him and the wife and sometimes the children are also wage earners. The joint earnings of a family must always be taken into consideration. The average family of a labourer

The year 1 11 - may be eald to be a landmark in the terr (112 may be said to be a randmark in the history [11]. Indian Trade Union movement for from that y ar inwards there has been a more for from that var awards there has been a mixed for from that var with fittide unions despite the or less stendy of with fittide unions despite the or less stendy of with its in their prosperits. The or received on a reconstruction for the formation of the trade of trade of the trade of the trade of the trade of the trade of trade of the trade of trade of the trade of economic circumstances of the time must be regarded as the d minant factor contributing to regrated as the dominant factor contributing to the establishment of trade unionism in India in the two years fall wine 1918 the epidemic of industrial arrifact mount certain processing and industrial arrifact mount and industrial arrifact mount certain processing and industrial arrifact mount in the certain processing and industrial arrifact mount in the certain processing arrival mount in the certain processing and industrial arrival mount in the certain processing and industrial arrival mount in the certain processing arrival mount in the cert in the two years in any true the proportions and industrial strife as uned serious proportions and industrial strife as usual serious proportions and reached a climax t wards the cline of the year 1920. The number flatour unions also increased rest rapidly and and as were formed of workers very rapidly and and as were formed of which had been the industries and occupations. In all preside in justice and occupation. Strike of these Unions were however, merely before Committees brought into existence (their before to committees brought into existence other to committees brought in order either to committees prought into existence either before |
or after particular strikes in order either to
engineer or to conduct them. These Committees engineer or to conduct them These committees were either disclived as soon as their purpose was terried or remained dorman until another was terried or remained dorman Mest of the retrike in the trade broke out ftrike in the trade broke out. Most of the remaining. Unions formed during the Period 1918-20 were unstable and nearly 75 per cent of them died an early death in the following year. There was a definite thest to the progress. the trade union movement in India during the mext two or three vers. But although individual I nions collapsed as rapilly as they were found I nions collapsed as rapilly as they were found itself showed signs of the movement itself showed signs of These agitations of the movement of perhaps the most important factor which have instituted discussed the movement of perhaps the growth in the growth in the movement of perhaps the growth in the movement of perhaps the growth in the growth i of them died an early death in the following year There was a definite check to the progress of the trade union movement in India during the trade union movement as rapilly as they were dual I nions collapsed as rapilly as they were formed the movement itself showed signs of the premanence and vitality

The history of trade unionism in India is a which they really were, was the definitely hostile the history of trade unionism in India is a which they really were, was the definitely hostile present in It was not until 1018 attitude of the employers to all combinations of the indian frade Unions Act which made it that he is that year very little effort and the indian frade Unions Act which made it that have been made to establish organial morally obligatory on employers to recognise appears to have been made to establish organial. their employees. It was not until the passage of the Indian Frade Unions Act which made it morally obligatory on employees to recognize those I nions of their employees which had those I nions of their employees which had relatered under the Act, that a change in the angle of vision was notleegable.

Nature of leadership The Indian Trade I nion movement, in its (arly beginnings, was a nially an economic one and to regard inhour mean table and the regard in the case of the own trails an economic one and to regard inbour unions as being engineered solely by Politicians as the result of their propagands is to misread the result of their propagands is to misread the result of their propagands. as the result of their propagators is to misrcan the origin of this movement. The Indian the origin of this movement. The Indian workman is predominantly illiterate and has even now few leaders from his own class to whom even now it with a derivation his own cites to whom the can turn for juidance. In consequence, trule unions in India have been led by middle trule unions in India have been led by middle trule unions (specially professional last one and these men appropriate professional last one and true unions in india have been led by middle dase men especially professional lawyers and others who have not perhaps in all cases made a distinction between compounts and rediffical others who have not perhaps in all cases made a distinction between economic and political considerations. In the words of Mr. A. Burnett Hurst, social workers did not take the limitative but allowed the lawrer-rollician Burnett Hurst, social workers did not take the initiative but allowed the lawyer-politician these to enture and control these bodies who were drawn from the lawyer politician who were drawn from the lawyer politician class often exploited the importance and credulity class often exploited the ignorance and credulity of the labour force for their own material avantage of for their own material for the labour force for the propagation of their pet constant of the labourers. There were, however, welfare of the labourers. There were, however, the labourers are the labourers and the Rev. C. F. averal notable exceptions. Leaders like Mr. Y. Joshi Dewan Chaman Lai the Rev. C. F. Andrews. Mr. M. Gandhi Mr. V. Sarabhai Mr. B. Shi a Rao and Miss Anasuya Sarabhai and Wr. B. Shi a Rao and Miss Anasuya benefit of the Shi a Rao and Miss Anasuya then the workers and for the general improvement the workers and for the general improvement in the conditions of life and work of the labouring in the conditions of life and work of the labouring conditions of life and work of the labouring the last few years, however, who were arrawn from the ignorance and credulty

in the conditions of life and work of the labouring classes. During the list few years, however, the principles of communism have been discominated amongst the masses of India by the members of the Workers and Peasants Party which is an agent in India of the Communist which is an agent in Communist agents in International The Communist prevalent in advantage of the economic unrest prevalent in the country early in the year 1928 and usurped the country early in the year 1928 and usurped anyancing of the contour unrest prevaient in the country early in the year 1928 and usurped the leadership of the working classes within a the leadership of the working classes within a short period of time and were able to assume control over the executive of the principal textile and enters where to possible the principal textile. control over the executive of the punished and railway unions in Bombay. Madras and Bombay The Communists captivated the minds Benzal The Communists captivated the minds of the workers by painting the existing conditions as black as possible and contrasting them with a contrast of worth and harmfore which is as black as possible and contrasting them with a supreme state of wealth and happiness which is promised under the regime of a dictatorship of workers' proletariat The discontentment workers' the majority of the proletariat the state of th workers proletariat The discontential workers amongst the workers over conditions of work has been aggravated by the incressant preachings of revolutionary doctrines. The credulity of the of revolutionary doctrines. of revolutionar documes are creature of the Indian labourer has been of treat advantage to of revolutionar doctrines incian informer has two of areas arrantage to

ment in India shown any desire to become

The eleventh Session of the Trade Union Congress held in Calcutta in July 1931 led to further disintegration in the ranks of labour and one again the Compunist from Rember affillated to the Congress further disintegration in the ranks of labour and once again the Communist from Bombay were responsible. The Girni Kamgar Union had split into two parts, both bitterly opposed to each other. One lead by Mr. S. V. Deshpande, to each other. One lead by Mr. S. V. Deshpande, General Secretary of the Trade Union Congress and the other by Mr. G. H. Kandalkar and the other by Mr. G. H. Kandalkar President of the G. K. U. and a Vice President of the Congress and both groups claimed to be of the Congress and both groups claimed to rrosment of the Grand both groups claimed to be the Girni Kamgar Union and therefore entitled the Girni Kamgar Union and therefore entitled to vote at the Congress politician decided in SC Bose a Congress politician decided in favour of Mr Kandulkar whereupon Mr Deshtavour of Mr Kand tikar whereupon Mr Desh-pande and the representatives of a few other union broke away from the Congress with the unions proke away from the Congress with the result that this organisation which should nion movement and control the Irade Union movement in Irada to a method and office the hosts of the Irada to the guide and control the frace chon movement in India is a useless and effect body with no in many is a users and energy influence and trilling membership

workers were on strike brought a suit against members for the purposes of furthering any such leader of the local labour union which was object of the Trade Union as is specified to labour union seeking to in Section 15, unless the agreement is an agree to fany agreement made between the members for the purposes of furthering any specified members restrain them from inducing the plants for workmen to break their contracts and suing for The damages for their utions in this respect damages for their actions in this respect. The Madras High Court to whom the sult was referred gave their decision granting an interim injunction restraining the defendants from inciting the restraining the defendants from inclume the strike plaintiffs employees to continue the strike like case was eventually withdrawn but the proceedings augmented that in the absence of proceedings augmented that in the absence of The case was exentually withdrawn but the proceedings suggested that in the absence of proceedings suggested that in the absence of legislation, even legitlimate trade union activity legislation, even legitlimate trade union activity as attended by considerable peril. As a result or a resolution moved by an an about and accepted by the Legislative Assembly in March, accepted of the Legislative Assembly in material 1921, Government were committed to take steps 1921, Government were commuted to take steps as soon as practicable to introduce such legislation as might be necessary for the registration of the steps of the protection of Trade Unions The Government of India, accordingly formulated certain tentative proposals and circulated them for eliciting public opinion The opinions expressed were by the many manipules of the considered the proposal considered the proposal considered the proposal considered the considered public opinion The opinions expressed were by no means unanimous,—some considered the proposed legislation premature, whilesome others realised that legislation was necessary but at the considered Trade Unions as a perniclous and dangerous growth which should be perniclous and dangerous growth which should be considered. pernicious and dangerous growth which should be rigidly controlled, and others again urged that oe rigidly controlled, and others again urged that sufficient protection should be granted to them a sufficient protection should be granted to them of India in the India in circularised a draft Bill for opinion The Bill conferred certain privileges only on registered. Trade Unions and left the question of registration at the option of Frade Unions themselves. Provision was also made to ensure that the fundamental provision was also made to ensure the fundamental provision where the fundamental provision was also made to ensure the fundamental provision was also well as al Provision was also made to ensure that the funds of a registered Trade Union are not expended on causes in which the bulk of the members have little interest A regular audit of the funds was proposed to be made compulsory and the manner in which the executive should be composed was also provided for

A number of amendments were made by the A number of amendments were made by the Select Committee and in the Legislative Assembly A clause permitting registered Trade Unions to maintain funds for political Prade Unions to maintain lunds for positical purposes was added. The provision was on the model of the British Law on the subject and those members who contracted out of the liberative description. liability to subscribe should not be compelled to contribute to the Political Fund nor would failure to contribute involve any disability or disability and advantage except in so far as the control and management of the Political Fund was concerned management of the roncoal rune was concerned.

The Bill was passed on the 8th February and the 25th March 1926 It came into effect from the 25th Murch 1926

Mr N M Joshi introduced in the Legislative Assembly on the 9th February 1928, a Bill to assembly on the 9th February 1928, a Bill to assembly on the 1ndian Penal Code in a mend Section 43 of the Indian Penal Code in a section 43 of the officers and members of a section 45 the officers and members of the section of the s the 1st June 1927 amend Section 43 of the Indian Penal Couo in order to extend to the officers and members of unregistered Trade Unions the protection afforded by Section 17 of the Indian Trade unich large down that 'no unich large down that 'no unregistered 17 of the Indian Trade afforded by Section 17 of the Indian Trade Unions Act, 1926, which lays down that 'no officer or member of a registered Trade Union officer or member of a registered under sub-section onicer or member of a registered Trade Union shall be liable to punishment under sub section (2) of section 120B of the Indian Penal Code, in respect of any agreement made between the

A Bill was introduced in the Legislative Assembly on the 4th September 1928 with a New to amending Section 11 of the Indian Trade Unions Act, 1926 It was pointed out in the Unions Act, 1926 It was pointed out in the Statement of Objects and Reasons that the existing section 11 of the Act admitted of doubt Statement of Objects and Acasons that only existing section 11 of the Act admitted of doubt existing section 11 of the Act admitted of doubt in two respects namely (1) It did not indicate in two respects namely (1) It did not indicate clearly whether the first appeal lay to the judge appointed for the area within which the Act appointed for the area within which the The appointed for the union is situated appointed of the trade union is situated that the amendment is intended to make it clear that the latter is the competent court. (2) It did not amendment is intended to make it clear that the latter is the competent court, (2) it did not indicate clearly what judge might be appointed to hear appeals in the Presidency towns and in Rangoon The amendment is designed to make it clear that in such areas the appeal lies to the Rangoon The amendment is designed to make the clear that in such areas the appeal lies to the thick court and there is no second appeal. The High Court and there is no second appear opportunity has also been taken to define clearly opportunity has also been when to define clearly the powers of the High Court in second appeals

and received the passed and received Governor-General on The Bill was of the assent September 1928

Working of the Act—The Act has Full been in operation for more than 3½ years Full information regarding the total number of Unions registered in all Provinces in India is not available The following table, however, shows the number of Unions registered and the character of the membership as at 1st April 1930 for the number of Unions registered and the character of the membership as at 1st April 1930 for those provinces for which information is available able

The first Committee Bombay Presidency to be any notice it formers from the was the library of the country appoint flooting on a recine and with his handes Is trustling sure to metricular part on the for the prevents of and early themselvery Infu test digate. This committee made Firstly recommendation with to aid to the attitule employers should adopt towards I nior of their worker and the recognition of such Customs, Words Committee Welfar Work, Comparative Societie, Howing of Labour, etc. Their recommendations were in the nature of measures that might contribute to the prevention of industrief disputes. With regard to the methods of retitement when such disputes either develop brecomellable differences between} cap alore labour or close come a monace to the car material to tenantice recommended the formation of a notice of the account
In ferr upn e of the re-ommendations made In the Infatrial Diputes Committee 6 exercises to formulas published a bill to position or enquiry into an lottlement of trade digute in the bond to Government Garette in Mrs 124 It was intended to introduce this bill in the bountax to islettice council it the Lorence ton in July of the same year, but in the m anybile the Government of India asked the Lord Government not to proceed with this mexice because they them elses intended to introduce unitar to islation for the whole of fulls. This however was not the first occusion on which the Government of India considered the que tion of the advisability of introducing leat fation to provide for the settlement of disputes. In 1920 they circularised all Local toorerments asking their opinions as to the adviability of providing legislation on the lines of the Industrial Courts Act 1919. The opinions obtained by provincial Governments were almost unanimous that labour was not properly organised and that therefore no aseful purpose would be served by such legislation the majority of the provincial Governments adopted the same siew

Bonus Dispute Enquiry Committee—The next Committee to be appointed by the Government of Bombry was the Committee of Linquiry with Sir Korman Medeod, as Chairman to enquire into the general strike of the Bombry cotton mill workers of the year 1924 in connexion with the non-payment of an annual bonus for the year 1923 by the Bombry mills

The findings of the Committee were -

(1) That the mill workers had not established any en helm, customars, legal, or e he annual pa meut

This: will to dealt with below under the heading Trade Disputes Act

Bengal -Several special Committees were appointed by the Government of Bengal during the period of intense industrial unrest during the 3 cars 1920-21

As the result of a strike of taxi drivers (1) and professional drivers of private cars in Calcutta which was cursed by objections to certain rules, particularly (a) a new rule requiring medi cal examination of applicants for professional driver k license, and (b) another rule forbidding the carrying of attendants in taxls, Government appointed a Committee of Liquity into the exist

ere a neer to be the many regulations and the control of taxl at a generally. The strike lasted from the 12th to the 4th January 1921 and ceased as a tault of the institution of the inquiry. The committee made a number of proposals for arien incits in the existing regulations were ultimately accepted The e page sale a 1 I mucht into effect on the 12th October 1 1.1

- (a) At the result of a strike of drivers and on luctor of Calcutta and Howrah tramways, which is ted from the 27th Innuary to the 24th LeTrusty 1921 Government appointed a Committee of Loculty after the resumption of work by the strikers on the 5th March 1921 The min is used work towards, the end of fetrums on conditions (a) that the Calcutta Transass Company would investigate their eri vances and announce their decision within a week and (b) that if the men were dissatisfied with the Company e decision, Government would appoint a Committee of Enquiry was control actes ment between the Company and the men's representatives in regard to the maintity of the Committee s recommendations Som , however, of the Directors of the Company dff not need the terms. Inother strike of the trainway employees of a much more protracted character broke out in 1922. It lasted from 20th December 1922 to 27th January 1923. No committee of Enquiry 1923. was appointed although the representatives of the men raised coveral points which arose from the previous inquiry. Work was resumed un
- (3) During a strike on the light railway of Messrs Martin and Company in the 24 Pargamas and Howrah which lasted from the 15th June to the 2nd July 1921, a special Conciliation Board was constituted by Government by a special resolution at the joint request of the employers and the employees concerned. The result of the Board's efforts was a compromiscon most of the points ruised by the workers, and as a result of the Board's recommendations It was a read that joint works committees should be set up on the Howrth Amta and Howrah-Sheakhafa lines Works Committees were established soon after the Board's report was
- The Bengal Legislative Council passed a resolution on the 4th March 1921 to the effect that Government should appoint a Committee to enquire into the general causes of the prevailing unrest and to suggest remedial measures. The report of the Committee was published on the 18th June 1921. The main recommendations of the Committee were-
 - (a) the establishment of joint works committees in industrial concerns,
 - (b) non intervention of Government in private industrial disputes, which it was considered, should be settled by voluntary conciliation,

persons whose work was vital to the welfare of the community generally should not be entitled to enter into a strike before sufficient time had been given to examine the merits of their grievances and to explore the possibilities of arriving at a possible settlement — Provisions of a somewhat similar type already exist in the Indian Post Offices Act, in a number of Municipal Acts in India, and the principle is one which is widely accepted in other countries

Clauses 16 to 20 of the Bill contained certain special provisions relating to illegal strikes and lock-outs These clauses followed closely the provisions of sections 1, 2 and 7 of the British Trade Disputes and Trade Unions Act, 1927 They were to be applicable only in the case of the strikes and lock-outs which satisfied both of two conditions in the first place, the strike or lock-out must have other objects than the mere furtherance of a trade dispute within the industry to which the strikers or employers belonged, and, in the second place, the strike or lock-out must be designed to coerce Govern ment either directly or by inflicting hardship on the community If these conditions were satisfied, the strike or lock-out would become illegal Persons furthering the strike or lock-out were liable to punishment and would be deprived of the protection granted to them by the Indian Trade Unions Act, while persons refusing to take part in it would be protected from Trade Union disabilities to which they might otherwise be subjected

The motion for circulation was adopted in the Legislative Assembly and the Bill was circulated to all Local Governments for opinion Some Provincial Governments recommended that questions connected with picketing and intimidation of the type which were entirely responsible for the undue prolongation of the general strikes in the cotton mills of Bombts (its of the vers 1928 and 1929 and the rioting in Bombts in the year 1929, should also be covered The Bill was referred to a Select Committee of the Legis lative Assembly in February 1929

The Select Committee decided to limit the duration of the Act to five years. In connection with the definition of the term "Public Utility Services' they were of the opinion that the wide power enabling the Government to declare any industry business or undertaking to be a public utility service was undertaking to be a public utility service in connection with some amendments would restrict its scop impairing its effectivene this section they made application of money to merch of any connection with some amendments would restrict its scop impairing its effectivene this section they made application of money to merch of any connection with some amendments would restrict its scop impairing its effectivene this section they made application of money to merch of any connection with some amendments would restrict its scop impairing its effectivene this section they made application of money to merch to five the diagration of money to merch to five the diagration of money to merch to five the diagration of money to merch to five this section they made application to convene a Court of Inquiry or a similar provision from the usedess to fetter the discretion of the Government as to the further subspect of the diagration of money to merch to five this section they made any proposals

include persons having an interest in the dispute or in any industry affected by it, and in this connection the Committee proposed a further definition of the term "An independent person" The clause relating to the publication of the findings of Courts and Boards was maintained on the lines of the English Act so as to make it quite clear that every report of a Court or Board, whether final or interim, must be published and that only the publication of such information or evidence as the appointing authority thought fit should be left to its discretion. It was considered inadvisable to forbid the representation of parties before Courts and Boards by legal practitioners subject only to exceptions and they redrafted the clause in such a manner as to permit that such representation would ordinarily be permissible subject, however, to such conditions and restrictions as might be provided by the rules

The Select Committee accepted the principle underlying the clause in connection with strikes in public utility services but they held that the clause as originally drafted was open to certain For example, it was pointed out that criticisms many persons are actually employed upon a daily wage which is in practice paid monthly also that the clause as provided would appear to penalise al-tention from work on the part of a particular individual and further that the clause was one-sided and inflicted no penalty upon an employer who locks out his workmen. The latter point was considered as one which should certainly be met as by the nature of his employment a casual or day-to-day labourer must be entitled to cease work at any moment and be similarly liable to dismissal and it was agreed that he should therefore be excluded altogether from the operation of this clause. The Committee adopted a suggestion made by the Government of Bornbay which made it clear that the cessation of work must be in the nature of a strike as defined in the Bill and it was provided that in order to render it a penal offence the strike must be in breach of a definite contract between the employer and the workmen Committee added a collateral provision penallaing an employer for locking out his workmen in breach of any contract. The Committee a lopte i the clause in connection with illegal strikes but with some amendments which in their opinion, would restrict its scope without materiall impairing its effectivenes. In sub-clause 2 of this section they made it clear that for the application of money to be illegal it must not mercly tend to further or support the strike but have the direct effect of so dome intended to exclude a case in which more is spent upon the relief of the dependant of strikers. A further sub-clause is britour if fire a a similar provision from the I ne'll have of 12-7 explaining the circum the Fn_1 is left of 1 1-7 explaining the circum tances in which a group of workmen should be decreal to 1 within the same trade or in 1 ex was a first. The penalties provided for the instant in of an illegal strike were mislight. With regard to clause 20 of the draft I 1 the Computer 1 1 that there was no suffering to the continuous for a circum an on the total. t with the firm giving an op for to the c 1 11-

Travel in India.

Thirty years ago, a tour in India was possible only to the wealthy, the leisured and those who had friends in the country. The cost of the journey was very high, the methods of transportation were very slow, and the facilities for travel were so indifferent that he was a bold man wno consigned himself to the morcles on the country without a sheet of letters of introduction. Now the mail which is posted in London on Thursday night, reaches Bombay in 14 days, and the passenger can travel by the same route and with the same speed as the mail. It is also possible to reach Bombay in 11 days from Genor or Venice by means of the Lloyd-Triestino line. A dozen lines have covered the sea route between Europe and India and Ceylon with a plexus of regular services while Imperial Airways have a weekly service from Croydon to Karachi and from there the Indian State Air Service takes you to Delhi and before long it is hoped to Calcutta. The Indian Railways provide facilities on the trunk lines equal to many of the best services in Europe and the Indian hotel has grown into a really comfortable carryanservi

The traveller to India has a choice of many ports by which he may enter To the majority of visitors from Europe and the West, Bombay provides their first glimpse of India, while others enter by Calcutta, Madras and Karachi and via Colombo

Owing to its geographical position Bombay is known as the Gateway of India through which for more than a century, the import and export trade of India has largely passed. Ash-purple rgainst the dawn, the spurs of the Western Ghats, thrones of mystery, stand sentinel about the inner sanctuary of Bombay Harbour Among and above these mountain heights Wellington fought the battles which earned for him his early military greatness. Every schoolboy knows the story of the Mahrattas—of the races within races that populate this vast country where two hundred and twenty-two different verneculars are spoken. There is never an end to the land of India. You will find life in its most up-to-date form and next to it the customs and habits of a nation which have not changed for hundreds of years. Life will surge past you in a picturesque procession. You will hear a medley of strange sounds—the tinkle of the temple bells, the throb of the drum, the chant of the 'muezzin' announcing that God is Almighty and Mohrumed is his Prophet, the song of the Sharma the cry of the wild beast in the jungle. The tropical sun blazing like a ball of molten gold in a turguoise sky, the silver moon sailing across the purple vault of heaven will awaken in you feelings which you have never known before If the visitor seeks variety and picturesqueness there is no region in all the world so full of vivid colour, of populous cities, of buildings designed by master architects of bygone days, of diverse races, of absorbing subjects for study and world.

observation such as the customs, religions, philosophy and art of one of the oldest civilisations

To the true lover of nature, the botanist and the naturalist, India can offer every charm in forest, mountain, valley, cultivated plain, and wild waste

To the sportsman, it can furnish sport such as few countries can give, the tiger in the forest, the great muhseer in many rivers, the will snipe on the jheels, the strong winged duck, the jinking pig and many another kind

To the mountaineer, the Himalayas offer the highest mountains in the world and some of the few famous peaks which are still unclimbed

To the statesman, businessman or politician who seeks rest and change without idleness, India presents a sense of busy administration, a nation in the making and an experiment such as has never before been tried

Bombny itself is cosmopolitan like many of the world's great ports and in it you will find jostling each other in the streets representatives of half the races of mankind. The Towers of Silence and the Caves of Elephanta are among the sights to be seen. Elephanta is one of those delightful islands which are freely scattered upon the waters over which Bombay reigns as Queen.

But Bombay is a gateway and through it many interesting trips await the visitor and northwards to Delhi he has the choice of two routes either by the G I P Railway via the Ellora and Ajanta Caves, Sanchi, Gwalior, Agra and Muttra or by the B B & C I Railway via Baroda and through Rajputana with its famous cities of Mount Abu, Udaipur, Ajmer and Jaipur to Agra and Muttra II you decide to go by the G I P Railway route, you will find at Ajanta frescoes which rival many of the old frescoes found in Europe while at Ellora are the most wonderful caves in the world, mountains cut into colossal sanctuaries. You will be able to compare the work of the Buddhists, the Jains and the Brahmins and learn more of Indian mythology than many hours of study will give you. At Sanchu are Buddhist buildings dating back to 150 B C. The stone carvings are remarkable and are well worth a visit. As you proceed further north, Gwalior has been described by Fergusson as "the most remarkable and interesting example of a Hindu palace of an early age in India. Seventy miles further on lies Agra and of all the romantic cutes of India, Agra must surely come first for it contains that crowning glory in marble, the Taj Mahai Generations have come and gone since that far day when that most splendid of emperors Shahjehan bowed his head before his wife a coffin in the vault of the Taj The building is better known in the vord.

of that dynasty made it a place of Royal, Residence, reminiscences of which are to be found to-day in the pleasure gardens, tombs, mosques and parillions of Moghul architectural beauty which have won undying fame for that

dynasta here and elsewhere in India

Khyber Pass, the great natural highway into India through the almost impregnable mountain barrier of the North-West Frontier, is rich in historical association and has from time immemorial been the route by which conquering hosts have passed into India to disturb the peace of her people and continually alter their destiny. It is still the great trading route between India and the Central Asian States On Tuesdays and Fridays when the continual string of caravans of great shaggy camels laden with merchandise, accompanied by stern, strong and picturesquely dressed men with their women and children from Central Asia are moving to and from Afghanistan, the pass presents a most interesting and unique sight

Kashmir described by poets as 'an emerald set in pearls' is a land of rich forests and upland pastures, of slow flowing rivers and glittering mountain torrents, ringed with an almost unbroken girdle of mountain snow capped all the very If you can imagine Venice set in the heart of Switzerland that is Sringgar, the capital of Kashmir Life is good as voit glide along the face of the lakes in a houseboat when the lotus flower is out and the banks are one mass of colour with the snow-capped mountains in the background When days are warm on the lakes, a trip can be made up the valleys and you can live in Arcady and see the bear in his native haunts and the mountain deer on the hill tops

For those who have arrived at Delhi ria Bombay an interesting return trip can be made ria Benares and Calcutta Many visitors, however, enter India ria Calcutta and from here also many interesting tours can be made

Calcutta, one of the first trading ports of the British East India Company in India, was founded by Job Charnock, it is now the second largest city in the Empire Its public buildings, the Indian museum, the Fort buildings, the Indian museum, the Fort the Jain Temple, the Hindu bathing ghats along the river front, the Hindu shrines, are

all worthy of attention

Before winding your way towards Delhi
trips should be made to Darjeeling to see the
roof of the world and Mount Everest the highest mountain and to Puri, the home of the famous temple of Jagannath The ambition of every visitor to Darjeeling is to see Mount Everest, the world s highest peak, and, in order to do so they must travel some 7 miles away, past Ghoom station to Tigers Hill (8,514 ft) as from Darjeeling the mountain is not visible. The best time to see sunrise on Mount Everest is in the early Spring or late Autumn Then at the end you will find a view unequalled over 20,000 feet with the awe inspiring Kanchinjunga in the centre are spread out before 200

Pura also is an easy run from Calcutta in front of the gite of the temple is the famous black marble pillar, one of the most beautifully black marble pillar, one of the most beautifully and pay homage to the gallant band who held worked things in India with a tiny figure of the it during the Mutiny against terrific odds

Drwn on its capitol Incongruous as it may seem, in Puri all caste vanishes The signiin the significance of this can be understood only by those who know India Once a year the image of Vishnu is carried in procession upon the famous Jagannath cars to the Garden Temple These cars, 45 feet high, standing on solid wooden wheels, seven feet in diameter, are drugged along by the devotees

Twenty miles north of Purl, along the sea const, or 54 miles by motor road stands the Black Pagoda at Konarak, the temple of the

Sun God Surva

On the road to Delhi, the visitor will travel through the Gangetic plain, one of the most fruitful areas of India Here he will find cities sacred to the Hindus such as Budh Gaya and Benares, cities intimately connected with the mutiny like Lucknow and Campore and other flouri-hing cities

Budh Gaya is one of the most famous and most interesting of all the sacred sites of the Buddhists for it is the scene of the 'Great Renunciation' and the Enlightenment of Gautama afterward named Buddha It marks the site of his long penance and his final victory

over worldly desire

Benares is reputed to be the oldest city in India, but there is no authentic record how old it is except that it is mentioned in those two great Hindu epics, the Mahabharata and the Ramayana, which deal with events long before the Christian era Benares 13, however, one of the most holy cities in India for the Hindu, and its spiritual significance is shown in the quotation "Happy is the Hindu who dies in Benares, for he is transported at once to Siva's Himalayan Paradise on Mount Kailasa, worth of Tale Money where the great threenorth of Lake Manasa, where the great three-eyed ascetic seeing the past, the present and the future, sits in profound meditation"

Benares rests on the banks of the Ganges and floating down the river in a boat the sight of Aurangzeb's Mosque and the many picturesque temples and ghats recalls to one simagination through the dim vistas of time the endless processions of devout people wending their was down the narrow lanes to the temples with frigant garlands to hang round the neeks of the gods or to wretthe in solemn devotion the

emblem of Siva s divinity

About 4 to 5 miles away from Benares lies Sarnath where Buddhn preached his first sermon after obtaining divine wisdom at Gaya and in the adjoining Deer Park is a Museum of Archeology of vivid interest

Lucknow is a city hallowed by memories of a grim struggle, of heroic deeds and noble sacrifice, its appeal to the Westerner is influenced by its historical connections its intuenced by its historical connections its beautiful buildings and the mysterious glamour so closely associated with the East Legend connects the founding of the city with Laken mann, son of King Dasaratha of Avodhya and brother of Rama, the mythical hero of the Ramayana, the epic poem of the Hindus but Lakehmanpur or Lucknow as it is now called was at its greatest under the five Kings of Oudin (1732-1856)

All visitors wend their way to the Pesidency

Hill Stations

In India especially during the months of April and May and at Christians time, exervisedy tries is much as possible to take a holiday in the hills. Being anything from 2 000 to 8,000 feet above the level of the sea and difficult of access for motor traffic the hill stations are delight fully cost and pages ful. Here one can usually ride, walk play tends and golf, or simply lead in be autiful surroundings and forget all about the trials of work and prickly heat. These are the principal hill stations in alphabetical order.

Darrechip (8000 ft)—From Darjeeling the highest mountain peaks in the world can be seen. The temperature averages 2° above that of London all the year round that is it mether exceeds 80 in summer nor falls below '0° in winter. Darjeeling is the summer seat of the Government of Rengal. To reach it, the traveller must start from Calcutta by taking train to Siliguri a journey of 10 hours. I rom Siligure the journey is completed either by motor or hill railway in about 6 hours. The principal hotels in Darjeeling are the Mount I yearst, the Grand (Rockville), and the Park.

Kangra Valley—The Kangra Valles is situated about 100 miles east-north-east of Lahore at the foot of the Dhaula Dhar Range of the Himalayas. There are magnificent landscapes and many historic temples and buildings. The visitor must take train from Lahore to Pathankot where he changes over the newly opened narrow-grays railway running between Pathankot and logindarnagar in Mandi State. Places to stay at are Dalhousie Dharmsala and kangra. The best hotels at Dalhousie are Stiffles Grand View and the Arranmoor, and at Dharmsala the Switzes s

Kathmir — Perhaps the most famous beauty spot in the world can be reached by taking train (either G. I. P. or B. P. a. C. I.) from Bombay to Rawalpindi (about 48 hours) whence the remainder of the journey is accomplished by motor. The average height of the valley is about 6,000 feet, and it is entirely surrounded by the lofty, snow outer ranges of the Larakoram and Himalaya. Visitors usually stay either at Schagar or Gulmarg. At Schagar one can live at Nedon's Hotel or in bourding houses, or one can hir a houseboat and live on the River Jachum. At Gulmary Nedon's is the only hotel. As it Schagar visitors usually take up the liquarters in wooden huts rented through the Schagar agencies or in tents.

Kodaikanal (7,000 ft)—Regarded by many as the most be utiful of South India's hill stations, is situated on the precipitous southern side of the Paini Hills overlooking the plains Reached by metre gauge from Madras to hodaikanal Road and thence by a 4 hours' motor run. The Carlton is the principal hotel There are also boarding houses.

Matheran (2,500 ft)—The nevest hill station to Bombay, ideal for walkers and anybody winting rest and quiet Reached by taking train from Victoria Terminus, Bombay, to Yeral (about 14 hours) whence Matheran may be reached by hill railway (2 hours) or by pony, rick-shaw, or on foot by a good walker—Stay at the Rugby Hotel

Mahobleshwar (4, 500 ft)—Until recently, when expenditure had to be cut down, the summer seat of the Government of Bombay Those who do not motor the whole way from Bombay, a distance of about 180 miles, usually take train to Poona and then hire a car from Poona to Mahableshwar Mahableshwar is noted for its delightful vegetation orchids and lillies bloom in April and May Hotels—Race View and Inderick

Mount Abu (4,500 ft)—An ideal place for combining the pleasures of a mountaineering holiday with the interests of an archælogical excursion. Reached by B. B. & C. I trains to Almedabad, thence by metre gauge to Abu Road, whence the journey is completed by car. The Rajputana Hotel is recommended. There is also a Dak Bungalow containing four furnished rooms permission to use which must be obtained from the Assistant Engineer, P.W.D., Mount Abu.

Murree (7000 ft)—The summer headquarters of the Northern Command Magnilicent views and walks. Visitors take train to Rawalpinds whence they complete the remaining 37 miles by car. The principal hotels are the Cecil and the Viewforth.

Mussoorie (7,500 ft)—Much frequented on account of its exceptionally fine climate Reached from Bombay by G I P or B B & C I trains to Dehra Dun, a journey of 35 hours, where it is necessary to change over to motor which reaches Mussoorie about two hours later. The leading hotels are the Cecil, Charleville, Hackman's Grand, and the Savoy

Nam Tal (6,500 ft)—Is the summer residence of the Governor of the United Provinces From Bombay there are two ways of getting there. The first is to take either G I P or B B & C I train to Muttra, thence by metre-gauge to Kathgodam, and thence by motor (2 hours). The second route which takes about 5 hours longer is to take G I P train to Lucknow and then change over to the metre-gauge rallway. The Grand, Metropole and Royal are the best hotels.

Octacamund — Familiarly known as Ooty is situated on the famous Migiri Hills at an altitude of 7,500 feet. The mean average of temperature for the year from sunrise to sunset is 57 33 degrees. Octacamund is the administrative centre of the District and the seat of the Madras Government for six months of the year

The New Capital.

The transfer of the capital of India from Calcutta to Delhi was announced at the Delhi Durbar on December 12, 1911 It had long been recognised as necessary, in the interests of the whole of India, to de-provincialise the Government of India, but this ideal was unattainable as long as the Government of India were located in one Province, and in the capital of that Province—the scat of the Bengal Government—for several months in every year It was also desirable to free the Bengal Government from the close proximity of the Government of India which had been to the constant disadvantage of that Province To achieve these two objects the removal of the capital Calcutta was essential its disadvantages had been recognised as long ago as 1868, when Sir Henry Maine advocated the change Various places had been discussed as possible capitals, but Delbi was by common consent the best of them all Its central position and situation as a railway junction, added to its historical associations, told in its favour, and, as Lord Crewe said in his despatch on the subject, "to the races of India, for whom the legends and records of the past are charged with so intense a meaning, this resumption by the Paramount Power of the seat of venerable Empire should at once enforce the continuity and promise the permanency of British sovereign rule over the length and breadth of the country

The foundation stone of the new capital was laid by the King Emperor on December 15, 1911, the finally selected site being on the eastern slopes of the hills to the south of Delhi, on the fringe of the tract occupied by the Delhi of the past. The land chosen is free from liability to flood, has a natural drainage, and is not manworn. It is not cumbered with monuments and tombs needing rever in treatment and the site is near the present centre of the town of Delhi. A Committee consisting of Surgn-General Sir C. P. Lukis, Mr. H. T. Keeling, O.a.I., A M. I.O.E., and Major J. C. Robertson, I.M.S., was appointed to consider the comparative healthiness of the site and of an internative one to the North of the existing city. Their report, dated 4th March, 1913, states that "the Committee, after giving full consideration to the various points discussed in the above note is bound to advise the Government of India that no doubt can exist as to the superior healthiness of the southern site, the medical and sanitary advantages of which are overwhelming when compared with those of the northern site."

those of the northern site"

The Town Plan and Architecture—A report by a Town-Planning Committee, with a rian of the lay-out, was dated 20th March, 1913 Work was begun in accordance with it and its main lines have been followed throughout The central point of interest in the lay-out, which gives the motif of the whole, is Government House, and two large blocks of Secretariats This Government centre has been given a position at Raisina hill near the centre of the neacity Sir Edwin Lutyens is the architect for Government House and Sir Edward Baker for the Secretariats The former building is estimated to cost approximately Rs 140 lakhs and the latter groups were originally estimated

to some Rs 124 lakhs The provision made in the design of the Secretariats for extensions in The Secretariat personnel has largely increased in the past few years and numerous additional rooms had to be provided to make room for Army Headquarters, which moved into the new capital at the end of the Simla season, 1929 To the east of the forum, and below it, is a spaclous forecourt defined by an ornamental wail and linked on to the great main avenue or park-way which leads to Indrapat Across this main axis runs an avenue to the shopping centre Other roads run in different directions from the entrance to the forum The axis running north east towards the Juma Masjid forms the principal approach to the new Legislature Chambers They are officially described as the Council House and the road is named Parliament-street The railway station for the new city finds its place about half way between the old and new cities off the road through Pahargun, which lies to the west of Old Delhi in the direction of The Ridge The main roads or avenues range from 76 feet to 150 feet in width with the exception of the main avenue east of the Secretariat buildings where a parkway width of 1,175 feet has been allowed The principal avenues in addition to the main avenues are those running at right angles to the main east to west axis

For a temporary capital, for the use of the Government of India during the period of the building of the new capital an area was selected along the Alipur Road, between the existing civil station of Delhi and the Ridge The architecture and method of construction were similar to those adopted in the exhibition buildings at Allahabad in 1910, but the buildings have outlasted the transitional period for which they are intended Army Headquarters were still housed in them in the winter until the season 1929-30 and others are occupied for various purposes including the temporary accommodation of Delhi University

In October, 1912, by proclamation, there was constituted an administrative enclave of Delhi under a Chlef Commissioner. This enclave was entirely taken from the Delhi district of the Punjab and its total area is 573 square miles On the basis of the Census of 1911, the population of the area originally included in the Province was 398,260 and of the new area 14,552, or a total of 412,821 The population of the Municipal town of Delhi was 2,29,144 The pinns of the New Capital allow for a population within it of 70,000 Its present population is approximately 40,000 Sites have been allotted for forty Ruling Princes and Chlefs to build houses for their own occupation during their visits to the new city, and several of these habitations have been erected

There was, as regards architecture, a prolonged "battle of the styles' over Delhi Finally, to use the language of the architect, it has been the aim "to express within the limit of the medium and of the powers of its users the ideal and the fact of British rule in India, of which the New Delhi must ever be the monument" The inspiration of the decimal is manifestly Western, as is that of British but they combine with it desures without abandoning

site close to the south east of the Secretariats The building is an imposing pile circular in shape, consisting in the main of three horse shoe shaped Chambers for the Chamber of Princes, Council of State and Legislative Assembly respectively and surmounted by a large dome over a Central Library connecting all three Chambers

HE the Viceroy (Baron Irwin) proceeded would be in state to the new Legislative buildings plan was thenceforward to be known as the Council buildings and formally declared them open by the con 18th February 1927 The India legislature provision

began its sessions in them next day

During 1928, official and public attention became focussed on the need to effect drastic improvements in some of the crowded areas of the old city and to provide for its expansion and for suburban developments. This led to the examination of the possibilities of the area lying between the old and new cities and of the desirability of driving connecting roads through the Clts walls in order to give access outwards in this direction. The old city is now rapidly expanding in a westerly direction, te, towards and up the Ridge which runs behind both cities and the spaces between the two cities are being developed and utilised. So far the plan for a direct thoroughfare from the midst of the new city through the old city wall to the middle of the old city has not been proceeded with and consequently the magnificent thoroughfare, name Parliament Street which was constructed for the purpose in New Delhi remains in a truncated condition

All India War Memorial—H R H the Duke of Connaught on 10th February, 1921, lid the foundation stone of an All-India War Memorial at the southern end of the Central Vista The place chosen is a fine position in the centre of the circular Princes' Park and the construction of the building was for economy's sake proceeded with slowly. It is now practi-

cally complete

The Memorial takes the form of a triumphant arch spanning Kingsway, the avenue running down the centre of the Vista. It is generally similar to the Arc de Triomphe in Paris but is simpler. The monument reaches a height of 160 feet and the inner height of the arch is 87 feet 6 inches and its breadth 70 feet. Over the arch on both fronts appears in capital letters the single word INDIA and this is flanked on each side by the initials MCM (1 e. 1900) whilst immediately below them on the left hand are the initials XIV (1 e., 14) and on the opposite side the figures XIX (1 e., 19). Above the Arch is a circular stone bowl 11½ feet in diameter. A column of inoffensive chemical smoke ascends from this on ceremonial occasions and anniversaries and is illuminated by electric light reflections after dark. The memorial is solely Indian in purpose and bears the names of British and Indian officers and NCOs men of the Indian regiments who fought on the Indian Frontier in the Great War (those fought on other fronts being commemorated by memorials exceed in those countries)

Public Institutions—It was proposed during 1914 that a higher college for Chiefs should be established at Delhi and in this connexion a conference of Chiefs and Political Officers was held at Delhi at which the Vicerov

presided The proposal is still under consideration To implement it would require an estimated capital outlay of Rs 12½ lakhs

The Government of India further in the Spring session of their Legislature in 1922 introduced and carried a Bill for the establishment of a unitary, teaching and residential University of Delhi, the buildings for which would be erected in the new capital. The plan was to provide a local university on the model recommended for Dacca University by the Calcutta University Commission. The provision of funds for the complete realisation of the university must be a matter of time and it was, therefore decided to commence work with the existing colleges in their present buildings and to permit them gradually to modify their organisation. The initial work of organisation was quickly effected by the Executive Council Unfortunately the inability of the Government of India to allot considerable funds was a severe handicap. It was hoped that H. E. the Viceroy would be able to lay the foundation-stone of the university buildings in November, 1922, but this proved impracticable. The general question of the finances of the University was in 1927 the subject of inquiry by a special Committee appointed by Government For the time being the University was housed in the temporary buildings in old Delhi occupied by the Civil Eccretariat until 1929 and in 1931 Old Viceregal Lodge was allocated to it for its future home.

H E the Vicerov on 10th January 1930 laid the foundation stone of a large European and Indian General Hospital to be built in the course of the next few years at a cost of Rs 75 lakhs for the service of both old and new cities A portion of the scheme will at a cost of Rs 40 lakhs be executed as a first stage during the ensuing two years. This will provide 254 beds and the necessary laboratories and administrative and residential quarters. The second stage will provide another 110 beds The hospital is situated between the old and new cities. No progress has yet been made with the building

The new city was the scene of notable inauguration ceremonies in February, 1931. The first of these was the unveiling of four "Dominion Columns" suitably placed about the great place between the two Secretariat blocks. The columns are of red stone surmounted each by a gilded merchantman of the old style in full sail. The columns are designed to resemble the historic ones crected in various parts of the land by Asoka and were presented by Canada. Australia, New Jealand and South Africa. The first two and fourth of these Dominions sent their own representatives to perform the extremol of unveiling. New Jealand nominated a Member of the Government of India to act in her behalf for the same purpose. The second great extemony was the inauguration of the War Memorial. This was purformed in State by His Excellent the Viceros in the presence of representatives of every unit of the urmy in India of the Royal Air Force and of a large concourse of official and other spectators. Then was a large popular facts on the ground lying blow though for the Accellencies the Viceroy and Lady Ira'in arranged a programms of fre livities at The Viceroy a House.

Here "Orion" unrecognized at home, aided in the secosion of some of its members who inrisdiction in India. By far the largest is the obtained a warrant, on the recommendation of the obtained a warrant, on the recommendation of the first the next largest is the third and the number parent Lodge from the Grand Lodge of England of Lodges under Ireland is as yet small. The Two years later it was discovered that no notification of the existence of "Orion-in the-West." Five District Grand Masters independent of each that reached I ngland, nor had any fees been other and directly subordinate to the Grand received, although these including quarterses. Master of England by whom they are appointed. received, although these including quarterages, Master of England by whom they are appointed had been paid into the Provincial Grand Lodge Coast of Coromandel It was further ascertained that in granting a warrant for a Bombay Lodge that in granting a warrant for a Bombay Lodge the Provincial Grand Vaster of Coromandel had exceeded his powers Ultimately a new warrant No 598 was granted as already stated in 1833 Lodge "Perseverance" was started an Bombay No 518 in 1828. Up to this time the jurisdiction of the terand Lodge of Lugland in 1836 Dr. Lodges Dis G. W., Rt. Wor. Bro. A. Y. G. Campbell, C.S. I., O. I.E., C. B.E., I.C. S., Lames, Rurners was appointed in the Gened Lodge. James Ruthes was appointed by the Grand Lodge of Scotland, P. G. M. of Western India and its Dependencies. No Provincial Grand Lodge however was formed until 1st January 1838. A second Scotland Residence of London 1838. second Scottish Province of Lastern India was started which on the retirement of the Marquis of Tweedale was absorbed within the jurisdiction of Dr. Burnes, who in 1846 became Provincial Grand Master for all India (including Aden) but 34 Lodges with the provise, that this appointment was not to not in restraint of any future sub-division of Owen I the Presidencies Burnes may be best described as being in 1836, in ecclesiastical phrase as a Provincial Grand Master "in partibus infidelium" for whatever Lodges then existed throughout the length and breadth of India were strangers to Scottish Masonry. But the times were propitious. There was no English Provincial Grand Lodge in Bombay and the Chevaller Burnes, whom nature had endowed with all the qualities requisite for Masons. Administration, seen not requisite for Masonic Administration, soon got to work and presented such attractions to Scottish Freemasonr; that the strange sight was witnessed of Lucilian Masons deserting their mother Lodges, to such an extent that these fell into abeyance, in order to give support to Lodges newly constituted under the Grand Lodge of Scotland In one case, indeed, a Lodge "Perseverance" under England went over bodily to Scotland, with its name, jewels, furniture, and belongings, and the charge was accepted by belongings, and the charge was accepted by Scotland This Lodge still exists in Bombay and now bears No 338 on the Register of Scotland From this period, therefore, Scottish Masonry flourished, and Luglish Masonry declined until the Year 1848 when a Lodge St George No 807 on the Rolls of the Grand Lodge of England was again formed at Bombay, and for some years was the solltary representative of English Masonry in the Province In 1844 Burns established a Lodgo "Rising Star" at Bombay for the admission of Indian gentlemen the result of which is seen at the present day Thus the seed which is seen at the present day Thus the seed planted at Trichinopoly in 1774 by the initiation of Umdat-ul Umra has borne fruit, resulting in the initiation of thousands of Indian gentlemen of all castes and creeds, and which has gone far to establishing that mutual trust between West and Last, a distinguishing characteristic of Speculative Freemasonry A Provincial Grand Lodge was re-established in Bombay in 1860, and converted into a District Grand Lodge in 1861

CMG, CIE Southern " ,, W Murdoch, O B E Eastern ** ,, 37

The Grand Secretary is R W Bro J C Mistree, J P, 17, Murzban Road, Fort, Bombay

The Grand Lodge of Ireland granted a warrant to establish a Lodge at Kurnal in 1837, but it was short lived An attempt was made ont it was short here. An attempt was made in 1869 to establish a Lodge in Bombay, but on the representation of the Grand Secretary of England, to the Deputy Grand Secretary of Ireland that it would be objectionable to create a third masonic jurisdiction in the Province, there being two already, riz, English and Scottish, the Grand Lodge of Ireland declined to grant the warrant In 1911, however, a warrant was sanctioned for the establishment of Lodge "St Patrick" and since that year two other Lodges have sprung into being one of which is now defunct

The Grand Lodge of Ireland has no District Grand Master in India at present, the Lodges Grand Lodge in 6 in

In the discovery of large numbers of new forms and species and by increasing our knowledge of the distribution of Indian Mammalia has enabled the revision of Blanford's Mammalia to be stated in the first term of Volumes dealing with the Latina of Indian Mammalia to be undertaken and early in 1921 the Secretary of the distribution of Indian Mammalia to be stated in the first term of Volumes dealing with the Latina of Indian Mammalia to be undertaken and early in 1921 the Secretary of the Indian Mammalia to be stated in the first term of Water and the Indian The memorial term of Maumals in the "Latina" The memorial term of Maumalia in the "Latina" The Signer 12 mgre c has the first the entire of the first the firs When demobilization rendered it possible the India Testing and the Testing and the Testing and the Survey which had been in abeyting standard work on Indian Mammals. Blan ance during the war was resumed and a collection and shoot was love to the shortcomings of the Merchipelago and Mr. Oldfield Thomas then have been to research. Further knowledge in regard among those Islands. Mr. Primrose then began recent research and classification and the Inland but ow to

lite action of new appelea have readered I's fort practically objecte.

To re-wir this defect at the ineligation of " na therities of the British Museum, the Bom "ar hainfal History Society decided to institute of the row known as the Mammal Survey 'Ve W. S. Millard, then Hen. Secretary of the Sects, issued in an appeal to its members to grad to the Society to engage the services of irst of Lumpean collectors so as to make a systematic extection of the mammals of India Russia and Coulon. The response to the appeal to be in over a lake of tures, being raised to tween 1911 and 1921 partly by subscriptions from the boolets 4 members, contributions from to tian Trivers, and grants from the Indian to no prent, the tovernment of Burina, Coslon, Malar States and the Provincial Governments 5 lectifiers were also reclised from a few learner before and Institutions in England and America. By the outbreak of the war tho Survey had been carried on over large areas of Western In the aportion of Sind, the whole of Gujerat, Kutch and Kathlawar; the Southern In the acountry and Kanara in Southern It is, in Come and Mysore, in the centre large tracts of the Central Provinces and some It tric's of Bengal and Behar, in Northern In his the Society's collectors had worked over Kumaya, Darjeeling and Sikkim and the Birtan Duars. In Burma, collections were made along the Chindwin river, in Central Burma and in the Shan States Peru and a portion of The whole of Ceylon was also Te maserlm sy tematically surveyed.

The material, which up to the outbreak of War comprised some 17,000 specimens, was

the lased on tital observatories tital position at the publication of Tide Tables for reads 40 posts between Suband Sheapper the Magnetic Suban astronomical observaastronomical observa trace with severa scraphic and meteorological, recordent Deten Din andre ofeth Investigations of an international character. In regard to which In lin chijus a unique polition between the secretal Lichards of the norid and a deep commenter line to the Antirctic Indian presion has this dis lost by far the largest known an mallex of gravitational attraction in the earth's erms, which have led to some of the man trip stant developments of modern real to receive

While expending out per raphical and goods tie work all funds allotted by Imp that Revenues the Digarrin of is stradily developing the post was allimate all surveys in various ways, on payment by thence normal. These miscel larewis operations include all fore t and canton meet surveys and work for Boundary Commis-sions, many riveraln irrigation railway and city surveys and surveys of tea gardens inlining for the a mith a great deal of control levelling for the a mireclandous administrative assitaken at 1 of cers are given to the revenue Printing of cex do much work for other Govern ment departments such as printing special mays illustrations for Archivological Reports all diagrams for I stents de. The Mathematical Instrument Office gives valuable aid to all Government departments by ensuring a high standard of in trum neal equipment, especially in connection with optical work and by the manufacture and repair of high-classin-trum atwhich would oth rwis have to be imported fro n algord

The Department is also responsible for all curves operation required by the Army and has rapidly been developing measures to meet the greatly increased complexity of modern mill was constituted in 1911 with a sum of supees tare requirements a pacially in connection with five laking (£33 000) set aside as an endowment air survey. The development of air surveys for the prosecution and assistance of research. for various civil purposes is also receiving all possible encouragement and assistance, while the latest methods of stereo photograph are being studied experimentalls

Administration is by the Surveyor General under the Lineation, Health and Jands Depart-ment of the Government of India Head quarter offices are at Calcutta under the Assistant Surveyor General

There are seven Directors, including the Director Map Publication who is in administrative charge also of the Photo Litho Office and the Mathematical Instrument Offices, at Calcutta, and the Director, Geodetic Branch, at Dehra Dun I or topographical purposes India is divided into five Circles, each under a Director as follows—Frontier Circle which deals chiefly with the Army, has Headquarters at Simla, Central Circle Headquarters Mussoorle, Eastern Circle, Headquarters Shillong, Southern, Circle Headquarters Bangalore and Burma Circle Headquarters Maymvo Anv inquiries regarding surveys may be addressed either to the Headquarters office or any of the Directors. the Headquarters office or any of the Directors concerned, from whom also maps and publica-tions of the Survey of India can be obtained, as well as from the Map Sales Office, situated at 13, Wood Street, Calcutta

Indian Science Congress-The Indian Science Congress was founded largely owing to the efforts of Prof P S Macmahon and Dr J L Simonsen These two gentlemen worked jointly ng Honorary General Secretaries of the Congress till 1921. The Asiatic Society of Bengal under-takes the management of the Congress finances and publishes annually the proceedings of the Con-gress The objects are (1) to encourage research and to make the results generally known among science workers in India, (2) to give opportunities for personal intercourse and scientific companionship and thus to overcome to some extent one of the chief drawbacks in the life of workers in science in India, (3) to promote public interest in science, for this end the Congress is held at different centres annually, and evening lectures open to the public form an important part of the proceedings of each Congress

The Congress which is progressive and vigorous, meets in January each year, the proceed-ings last for six days. The Head of the Local tovernment is Patron of the Congress, the Congress session is opened by a Presidential Address delivered by the President for the year. The President is chosen annually, the different sections being represented in turn. The sections are (1) Agriculture, (2) Physics and Mathematics, (3) Chemistry and Applied Petans. Rotany, (4) Geology and Ethnography, (5) Rotany, (6) Geology, (7) Medical Research, when the sections meet separately each section is presided over by its own President also chosen annually The mornings are devoted to the reading and discussion of the papers, the afternoons to social functions and visits to places of interests, in the evenings public lectures are delivered

The Indian Research Fund Association -This Association, which is a much older body than the National Research Council in England, was constituted in 1911 with a sum of rupees for the prosecution and assistance of research, the propagation of knowledge and experimental measures generally in connection with the crusation, mode of spread and prevention of communicable diseases. It can claim to be amongst the pioneers in organised medical research on a large scale and has been referred to by other countries in very complimentary language. Still better, it has been copied by several other nations

During 1929 the constitution of the Governing During 1922 the constitution of the Governing Body was altered by the Government of India It was considered that, in view of the largely increased activities of this Association, the Governing Body, which had hitherto most expeditiously and economically conducted the business of the Association should be now made more representative in character It was accordingly enlarged by including two non-official members from the Legislative Assembly one from the Council of State, two from the Medical Faculties of the Universities and one non medical scientist The creation of a Recruitment Board in India for selecting the personnel employed by the Association and of a Consultative Recruitment Board in England also came under the consideration of Government It was further decided that the Governing Body of the Indian Research Fund Association should be the

POST OFFICE

who states is similar to that of Deputy Patria to the and

the D to stoffe Oberisat Lonlay

for portal purposes the Indian Empire is livided into nine circles as shown below, Pengal and Assam Bihar and Oris a, Bombay, Burma, Central Madras, Punjab and North West Propiler United Provinces and Sind and Baluchistan I ach of the first eight is in Haluchiletan . charge of a Postmaster General and the Sind and Baluchistan (in le is controlled by a Director, Po to A Telegraphs The Central Circle comprises roughly the Central Provinces and the Central In lia and Rajputana Agencies

The Postmasters to a rainre responsible to the Director Gen ral for the whole of the postal arrangements in their respective circles, including those connected with the conveyance of mails by railways and infind steam re-All the Post riasters General are provided with Deputy and As Istant Po timasters General. The nine Postal Circles are divided into Divisions each in charge of a Super ntendent of Post Offices or Railway Mail Service as the eas may be and each Superint indent is assisted by a certain certain number of officials styled Inspectors

Generally there is a head post office at the head quarters of each resenue district and other

The control of the Polis and Tel graphs of accounts. The Postmasters of the Calcutta, et In livia vested in an officer destanted Hombay, and Mudras General Post Offices Director General of Posts and Telegraphs who and of the larger of the other head post offices Director General of Posts and Telegraphs who and of the larger of the other head post offices works in subordination to the Government of the in subordination to the Government of the in subordination to the Government of the in subordination to the Depart of the intervent working of the Depart of the intervent working of the Depart of the intervent of the intervent working of the Depart of the intervent working of the interv incorporating therein the accounts of their branch offices, and frequently have direct dealings with Government local sub-treasuries The result of a lublicity Other attached to the officer in charge of such an office works it is at leading to the assistance of that either single handed or with the assistance of one or more clerks according to the amount of business

Branch offices are small offices with limited functions ordinarily intended for villages, and are placed in charge either of departmental officers on small pay or of extraneous agents such as school-masters, shopkeepers, land-holders or cultivators who perform their postal luties in return for a small remuneration

The audit work of the Post Office is entrusted to the Accountant-General, Posts and telegraphs, who is an officer of the Fluance Posts and Depute, on the Government of India and is not subordinate to the Director-General. The Accountant-General is assisted by Deputy Accountants General, all of whom, with the necessary staff of clerks, perform at separate headquarters the actual audit work of a certain number of postal circles

In accordance with an arrangement which has been in force since 1883, a large number of sub post offices and a few head offices perform telegraph work in addition to their postal work and are known by the name of combined offices The policy is to increase telegraph facilities everywhere and especially in towns by opening post offices in the same district are usually a number of cheap telegraph offices working subordinate to the head office for purposes under the control of the Post Office

The Inland Tariff (which is applicable to Ceylon and Portuguese India except as indicated below) is as follows -

	When the postage is prepaid	When the postage is wholly unpaid	Whe_ the postage is insufficiently prepaid

Sanitation.

The listory of the equitary departments in India goes back for about lets years that period great improvements have been en eled in the sanitary condition of the towns, though much temains to be done, but the pro-gress of rural sanitation which involves the lealth of the great bulk of the population has been slow and incommens trate with the thought and labout benomed on the subject r aron lies in the apathy of the people and the t us it with which they cling to domestic castoms injurious to health. While the in hal itants of the plains of India are on the whole distinguished for personal cleanliness, the sense of public elecutions has ever been wenting Orest improvements have been effected in many places, but the village house is still often ill ventilated and over conducted the village site dirty, crouded with cattle choked with mak regetation and poisoned by stagnant pools and the village tanks polluted, and used in discriminately for hathing cooking an Idrinking That the way to improvement lies through the election of the people has always been recognised."

Of recent years the pace has been speeded of recent years the pace has been specially up as education progressed education developed, and funds were available. In a resolution issued in May 23rd, 1914 the Government of India summarised the position at that time, and laid down the general lines of advance. This resolution (Gazette of India, May 25th, 1914) about the studied by all who wish to under stand the attitude of the Government of India. stand the attitude of the Government of India towards canitation prior to the passing of the Reform Act of 1919. It will be found gummarised in the Indian Year Book of 1922 (page 475 et seq) and earlier editions. One of the greatest changes effected by the Reform Act of 1919 was the transfer of sanitation to the provinces making it a subject directly responsible to local control through Ministers. It is yet too early to attempt to indicate the effects of this change

The Public Health Commissioner with the Government of India in a general review of health organisation in British India which he lail in January, 1923, before the Interchange Study Tour organised for Medical Officers of Needland Officers of Study Tour organised for Medical Officers of Needland Officers Health from the Far Lastern Countries by the Health Organisation of the League of Nations, concluded that the State effort in regard to Health Organisation in British India is one of no mean importance, that it has evolved concluded over a couple of centuries during which many mistales in policy must be admitted that it has provided the Officers and the stimulus neces sar) for laying the foundations of medical edu-cation, that it has tried to uphold the ethical standards of western medicine and that in whichever way it is regarded it is an effort of which no Government need be asliamed." He quoted the remark of the Government of India in their Resolution of 1914, that "in the land of the ox cart is likely to be urged in the course of the revision one must not expect the pace of the motor car" of the Constitutional Reforms now in progress

The Public Health Commissioner in his annual report for the year 1925 noted the introduction of the political element into health matters is a result of the Reforms and said that the improvements being introduced before the Reforms were in some provinces now in a fairway to myturing but that in other provinces "with ices after ration of the actual needs so far from alting to the organisation as they have found it have shown a desire to scrap even some of what they or mails possessed" But, he though the picture is neither bright nor the future row it is becoming increasingly extient that a considerable section of the Indian community is thinking seriously on these public health problems amid much futile and I structive criticisms of State and municipal efforts here and there valuable and suggestive riticism can be met with which goes to prove ms contintion

India e birth rate in 1925 was nearly twice that of Ingland and Wales her death rate was twice that of Fugland and Wales and nearly three times that of New Zealand and her Infan tile mortality rate was nearly 21 times that of he land and Wales and nearly 41 times that of New Zealand The information furnished for the LR at group of infectious diseases of world import ic plague cholera, small-pox, yellow fever typhus malaria and disentery shows can the Public Health Report already cited) that if we except typhus and yellow fever, India is one of the world s reservoirs of infection for the others and the main reservoir of fleance of these facts must adds the Commis-The signitheir implication is that India s house, from the public health point of view is sadly out of order and that this disorder requires to be attended to It is not for India to say that so far as she is concerned prevention is impossible think of the effect of sunlight on tubercle ridden children, of the effect of feeding on richets, scursy and beri berl of the way in which malaria cholera yellow fever, dengue, ankylos-

The Public Health Commissioner in an address before the annual congress of the Far Eastern Association of Tropical Medicine, held in Cal-cutta in December, 1927, urged the import-ance of instituting a Central Ministry of Health which should be charged with the functions of co-ordinating the policies and activities of the departments concerned in the several provinces and with keeping them abreast of scientific progress. There is at present no public Health Act for the whole of India, nor under existing administrative arrangements is one immediately possible, but the desirability of

THE HEALTH OF THE ARMY

General Health statistics of the British Army in India during the year 1929

1929	e Strongth	Admi	ssion	.5	De	aths		vali sent lome		Disc	valids harged India	dis in	nvalids inally charged United ingdom	Con	verage stantly ick
	Average	No	Rati per 1,000	N.	۔ ا د	Ratio per 1,000	No	Ra pe 1,0	er	Zo	Ratio per 1,000	No	Ratio per 1,000	No	Ratio per 1,000
Officers	2,395	9,96	415	9 :	17	7 10	34	14	20	{ 			l i	36 6	
British Other	55,628	33,908	609	5 1	58	2 84	544	9	78		:			1,693 4	7 30 44
Ranks British Other		1,259	321	1	9	2 30	58	14	79			1		43 3	4 11 05
Ranks' wives British Other Ranks' wives		826					1	, ;				1	1 1	33 8	4
—parturition British Other Ranks' chil-		1,690	274	3 1	87	14 12	11	2	27			1	; • 	62 0	0 10 06
dren Others		2,005			40		23							73 9	3

There were 158 deaths or 284 per 1000 of the strength compared with 295 per 1,000 in 1928 and 334 in 1913

The most important causes of mortality Local injuries Enteric group of fevers Preumonia	were — 22 19 16	Drowning Tuberculosis of lung Malaria Effects of heat Succedes	877.66
Appendicitis	9	Sincides	Ü

 $544\,$ or 9.78 per 1,000 of the strength were sent home as invalids compared with 9.87 in 19.8 and 7.49 in 1913

The principal causes of intaliding	to the
United Kingdom were	
Tuterculesis—	
Pulmonary 40 \	57
Other forms 175	
Diseases of middle ear	52
Mental diseases	52
Disordered action of heart	36
Epilepsy	23
Deformities of the feet	17
Neurasthenia and hysteria	. 17
Valvular disease of heart	14
Bronchitis	12
Dysentery	10
Dislocation and displacement	10
Rheumatic fever	9

The invaliding rate shows no significant change, the slight fall that has occurred was due to a decrease in the number of invalids for middlear disease and deformitles of the feet

The average number constantly sick in hospital was 1,693 47 or 30 44 pcr 1,000 of the strength, compared with 25 04 pcr 1,600 in 1925, 29 18 in 1927 and 29 68 in 1913

81,437 men, or 1,464 0 per 1,600 of the strength were treated as out path nts, with an averagidally number under treatment of 1 105 e7 or 19 SS per 1,000

The combined ratio con tanth sick in her pital and under treatm in as our patients was 50 32 per 1,000 of the stringth compared with 46 97 in 1928

The netual loss to the army in India in working days was 615,110 die to sick in larracke making and 403 642 due to sick in larracke making a total of 1,021,755 days compared with 970,60% in 1925

Ophthalmology, in places like Madras and Calcutt; where ample facilities exist At these schools advanced teaching and research in ophthalmology would be carried out, and the next step would be to organise a system of ophthalmic relief at selected centres all over India" (There are now schools of ophthalmology at Madras, Bombay, Calcutta, and Lahore)

Associations known as "Blind Relief" Associations have been working for several years in Western India in conjunction with Government hospitals, to alleviate this affliction of blindness The number of eye doctors in India is notorionely small and those there are stay mostly in the large towns The Associations work by means of travelling hospitals, which bring relief to the villages in the rural areas They also work by means of trained village workers, whose duty it is to find out the hidden blind and get them to the medical centre for relief, to find out cases of small-pox (a constant source of blindness in children), to inspect new born children for the detection of ophthalmia neonatorum, to keep registers of all blind and partly blind persons and persons suffering from eye disease, and to treat in the villages simple cases of conjunctivitis or sore eves Since their inception the Associations have been the means of restoring sight to thousands of blind people and of preventing blindness in many thousands more The work is capable of indefinite extension and the need for some such organisation has been shown In 1917 Colonel Elliot wrote as follows, 'To me it seems that the duty and privilege of undertaking this work with the State and that no sum spent on such a task could be too large Unfortunately this is not the view that has been taken by those

in authority and consequently we see the spectacle of private enterprise endeavouring to undertake this colossal task It is at least permissible to voice an admiration for the stand taken by Mr Henderson [Founder of the Blind Relief Association movement, who began the work in 1913] The best that one can hope for his endeavour is that he will succeed in arousing the conscience of educated Indians to the needs of their less fortunate countrymen, and that this little cloud, no bigger than a man's hand, will end in a monsoon of active effort" As the above was written in 1917, it is not altogether applicable to the criticism of Government of to-day, as it has already been shown that there are now several schools of ophthalmology in India, and the Government eye hospitals are doing tremendous work, but these hospitals are situated in the large towns and cannot possibly by any stretch of imagination, give relief to the millions living in the rural areas

The All-India Blind Relief Association.—
(The Green Star Society) exists to co-ordinate and centralise the various Associations in the mofussil and to extend their work. It is under the patronage of the Governor of Bombay, and has for its life President, Mr. C. G. Henderson (late I. C. S.) who founded and managed for many years all the branch Associations working in Western India. It is affiliated to the International Association for the Prevention of Blindness, which has its headquarters in Pyris and was formed on September 14th, 1929, under the auspices of the League of Red Cross Societies and the American Society for the Prevention of Blindness. The organising Secretary is R. Crawford Hutchinson, The Town Hall, Bombay

A beginning has been made, but it is only a beginning, and it is but the fringe of this vast problem that has been touched. The schools of ophthalmology in India, are turning out ophthalmic surgeons who are crowding their profession in the cities and large towns. A scheme for taking these men and placing them in selected centres has been worked out, all that is required is monetary help. The cost is minimal and here is an opportunity for the generous and public spirited to emulate Sir Ernest Cassel, and give to India an eve service of which India and the whole world could be proud, and to the peoples of India that which to them is probably their most precious posses sion—their sight

Central Provinces—In these provinces corresponding benefit to the people the Child Welfare Division of the Red Cross visitors are also at work in one of Society receives a considerable grant from important of the Orissa Feudatory St Government for the support of child welfare schemes in the virious towns and districts There is a great demand for these, and fortunately the demand can be met since the presence of a Health School provides the necessary number of Health visitors. The work is excellently organised and it appears probable that the health workers in the province may be formed into a proper cadre in the not distant future. The Health School is entirely maintained by Government

The high degree of organisation shown in a province usually regarded as backward is remarkable and is due mainly to the enthusiasm of the Secretary who though not a paid worker, devotes a great deal of time to the work

United Provinces -In these provinces the work is organised by a medical woman, a member of the W M S who is assistant to both the Inspector General of Civil Hospitals and the Director of Public Health As a result the work has made rapid progress and many centres The triining school at Lucknow are at work supplies the workers Government gives extensive grants to the committee of management which is a sub-committee of the Indian Red Cross Society There is also a midwives training school which trains large numbers who go to work in the districts subsequently. Buby and Health Weeks are also celebrated with aid work in the districts subsequently from hendquarters

A course of training in Health work for women Sub assistant Surgeons was commenced in 1931 diploma is granted by the State Medical Faculty, U.P. This course supplies a long felt want for training medical women to do maternity and child welfare work

The Puniab - The work here is perhaps more directly official, than in any other An Inspector of health centres works under the Director of Public Health who constantly tours and inspects the centres giving much advice and encouragement. The local management of centres is usually in the lands of voluntary commutees which receive grants in aid both from the provincial Government and local hodies. Though the province is passing through a time of fluorial stress the principle of grants in aid is recognised and will be adhered to The truning school for health visitors is wholly undertaken by the provincial government. The high quality of the work done in the virious centres is mainly due to the excellent training received at the school

Assum -There is no organised work on the part of the provincial government, though in a iew places in effort is being mide to stirt it The poverty of the province, the poor education of the women and the nature of the country make progress very difficult

Bihar and Orissa -This is also a poor and Bihnr and Orissa—This is also a poor and and try to lear a new the developed cuntern as beckward province but a beginning has been that a substitution of a substitution of made at Pitha and Cuttack with the appointment of Maternity supervisors to control the work first critical months, only to have them perfect of Indigenous dats. In the coal mine are is, at a later stage from the many list that childhood after many verus of hesitance, a start has been is heir to in a land of great poverty, under non-made which should lead to great activity and rishment, epidemics and famine in Western

Health visitors are also at work in one of the most important of the Orissa Feudatory States

Delhi -The work in Delhi was early in the history of the movement, and it has been carried on in a manner worthy of the seat of Government The Municipality employs a medical woman who superintends the work under the Medical Officer of Health Centres are placed strategically throughout the city the indigenous midwives are taught and controlled and medical inspection of school children is carried on Delhi and the district are under the Medical Officer of Health New Delhi is also the sent of the oldest Health School in India which is mainly supported by the Maternity and Child Welfare bureau and which turns out well qualified health visitors every year as well as running two welfare centres

North West Frontier Province—Practically the only civil work is carried on at Dehra Ismail Khan This was started some years ago and has continued to flourish ago and has continued to flourish A provincial dais training school is found here which provides for the training of dais from various districts of the province

Baluchistan -At Quetta the maternity work of the city has resulted in very complete control of the indigenous practising midwives to the great advantage of the people

Raiputana -The Maternity Home, Aimer, trains midwives for many of the States, and a certain amount of child welfare work is also carried on Child welfare work is in existence at Jaipur and Nasirabad and there are possibilities latent in the various states which good organisation could develop

Child Welfare in the Army -The care needed by the wives and children of sepovs is being increasingly realised and nowhere more than in the units themselves The result has been, in the last tew years, the opening of much work in this direction. Much of it is purely medical work which in the absence of families hospitals for the Indian soldiers, is a necessity But genuine child welfare activities are also present in some centres many of them as isted by the M & C W Bureau Indian Led Cross Society which has undertaken the organising work in place of the Lady Birdwood Army Child Welfare Committee A remarkable feature of this movement is the keenne-- of the men themselves to aid it realising as they do the benefit to their own women and children There are now very few cantonments where some work of this kind is not going on

So far all the schemes have devoted their attention to educating women in the elements of mothercrift and attempting to preserve infant lives and improve child health. In a land of so many languages and superstitions progress will necessarily be slow and India has Jet to decide whether she will work intensively and try to rear a few well developed children as

St JOHN AMBULANCE ASSOCIATION

(Indian Council)

for its objects .

- (a) The instruction of persons in rendering First Ald in cases of accident or sudden illness and in the transport of the sick and injured,
- (b) The instruction of persons in the elemen tary principles and practice of nursing, and also of hygiene and sanitation, especially of a sick room,
- (c) The manufacture, and distribution by sale or presentation, of ambulance material, and the formation of ambulance depots in mines, factories, and other centres of industry and traffic,
- (d) The Organisation of Ambulance Corps, Invalid Transport Corps, and Nursing Corps,
- (c) And generally the promotion of instruction and carrying cut of works for the relief of suffering of the sick and injured in peace and war independently of class nationality, or denomination

The St John Ambulance Association was Sanitation and 9,602 tokens such as Vouchers, founded in 1877, by the Order of the Hospital Medallions, Labels and Pendants for special of St John of Jerusalem in England, and has proficiency in those subjects. The object of the proficiency in those subjects. The object of the Association is not to rival, but to aid, the medical man, and the subject matter of instruc tion given at the classes qualifies the pupil to adopt such measures as may be advantageous pending the doctor's arrival, or during the intervals between his visits

> In 1930 the Indian Council spent Rs 70,094 in furthering its objects and closed the year with Govt securities of the face value 70,000 The Association has of Rs grades of members, namely, Patrons, Hono-rary Councillors, Life Members, Annual Members and Annual Associates Their res-pective subscriptions are Rs 1,000, Rs 500, Rs 100, Rs 5, and Rs 2

Their Excellencies the Viceroy and the Countess of Willingdon and His Excellency the Commander in Chief as President, Lady President and Chairman, respectively, with 17 members form the Indian Council The general business of the Indian Council is conducted by an Executive Committee of which the Hon'ble
An Indian Council of the Association was
constituted on a regular basis in 1910 It has
since issued 1,90,703 certificates of proficiency in
First Aid, Home Nursing, Home Hygiene and KT, CSI, CIE, ICS, the Honorary Treasurer

INSANITY AND MENTAL HOSPITALS IN INDIA

The accommodation for the treatment in British India of persons who suffer from mental disorders is still very inadequate In the Indian States, the condition of affairs is even worse, for, with the sole exception of Mysore State which has a small and highly archaic "mental hospital' at Baugalore, there are no mental hospitals in existence so that persons suffering from all forms of mental disease are confined in the Jails where, of course, no provision exists for any kind of treatment. According to the left Congress (1921) out of a total popular. to the last Census (1921) out of a total popula-

, - - - <u>-</u>

tion of 318,942,480 (India and Burma) there are 88,305 persons insane, making a proportion of insane to sane of 3 per every 10,000 In the United Kingdom the proportion of insane to sane is roughly 40 per 10,000, while in New Zealand it is as much as 45 per 10,000 In reviewing these figures it must be borne in mind that there of the United Kingdom and New Years that those of the United Kingdom and New Zealand include the "feeble-minded" an item that is not included in the figures for British

As regards the incidence of invanity among the various rices of India as well as the incidence of insinity in relation to occupation, no reliable information is available in view of the comparative paucity of cases in proportion to the general

population that come under observation. On the other hand the incidence by age is shown fairly well in the Census Report of 1921 which is as follows—

INDIA.

AGE				Insane		Distribution of the in- sane by age per 10,000 of each sex		
				Male	Female	Male	Female	
YEARS

A further result of the widespread ignorance and apathy both official and non official, towards psychiatry and its cognate interests, is the lack of any provision for the care and treatment of mentally defective children In 1925, the Hon'ble Haroon Jaffer moved the Council of State to recommend to the Governor-General in Council that the Provincial Governments be asked to investigate the best means of dealing quickly and adequately with cases of mental defectives A discussion followed which was remarkable only for the ignorance of the subject displayed by all who took part in it The motion was eventually withdrawn

Finally there is still a lamentable failure everywhere to appreciate the intimate associa-

tion of crime with mental disorder and the extreme paucity of medical men throughout the whole of India with any real knowledge of mental diseases leave the decision of questions involving what the law terms 'responsibility in crime in the hands of medical men who are in no sort of sense "experts". In other words the current ideas both as regards the theory and practice of dealing with insanity and crime in India can only be described as archaic

(See also "Insanity in India" by Colonel G F W Ewens, I VS, and 'Lunacy in India' by Colonel A W Overbeck-Wright, M D D P E I M.S and Colonel H P Jago Shawshook)

Her Excellency Lady Goschen The Association has under its management—The Iady
Ampth.ll Nurses Institute, Western Castle,,
Mount Road, Madras Fully trained and
experienced nurses for all cases of illness both
among Furopeans and Tadians, always available The Ladu Willington Aurana Home, Western Castle Mount Road Madras, and Afgin Mount Road Madras, and Nitgir Aursing and Convalescent Home for Medical Surgical and Maternity The Nilgirl Aursing Home affords admirable facilities for convalescents

Bombay Presidency—The Bombay Presidency was amongst the first in India to realise the value of nursing in connection with hospital work. The first steps were taken on the initiative of Mr. L. R. W. Forrest at St. George's Hospital, Bombay, where a regular nursing cadre for the hospital was established together with a small staff of nurses for private cases. This was followed by a similar movement at the J J and Allied Hospitals and afterwards spread to other hospitals in the Presidency Ultimately the Government laid down definite principle with regard to the financial aid which they would give to such institutions. agreeing to contribute a sum equal to that raised from private sources Afterwards, as the work grew, it was decided by Government that each nursing association attached to a hospital should have a definite constitution and consequently these bodies have all been registered as Associations under Act 21 of 1860 By degrees substantial endowments have been built up, although the Associations are still largely dependent upon annual subscriptions towards the maintenance of their works. This Association was incorporated under the Societies' Registration Act of 1860, in the vear 1911, with the primary object of establishing a nursing service from which the Nursing staff at Government aided hospitals under management of Nursing Association might be recruited This function however, was never carried out by the Bombay Presidency Nursing Association, and under the present circumstances it appeared to the Committee improbable that it could be the Committee improbable that it could be carried out, but up to now the auxiliary function of the examining and granting certificates to nurses and midwives, and maintaining a register of qualified nurses and midwives and also maintaining a Provident fund for the employees of the affiliated associations have been successfully Memorandum, carried out from 1911 to 1928 Rules and By-laws of the Association were however revised or brought into line with the

Towards the end of 1927, the Committee decided that some steps must be taken to do so and accordingly appointed a sub committee to consider the revision and amendment of the Memorandum, Rules and By-laws The Sub Committee Rules and By-laws The Sub Committee reported that it appeared to be impossible to amend and revise the present rules piecement and that the only way to put things in order would be to draft an entirely fresh constitution and rules

After fully considering the Sub Committee's report the Committee agreed that the Association be incorporated by an Act on the line of the Registration Act in the United Kingdom Pending the passing of the Act the new Mcmorandum of Association having received the approval of Government was brought into operation from 1st April 1929

THE WOMAN SUFFRAGE MOVEMENT

Within the abnormalis short period of been secured by this large band of some cleven years the Woman Suffrage movement (councillors, and every year sees a greater lastisen in India, swept through the country number of women serving on these local Councils sympathetically and achieved the political and Boards enfranchisement of women in all the nine; British Provinces and In four Indian States

religions to the feminine aspect of life equally with the masculine as shown by the importance of goddesses by the necessity for the presence of the wife at all ceremonies performed by a Brahman, by the idea of the sacred mystery of womanhood implied by the purdah, and by the general veneration of motherhood. Secondly the time was psychological for a new era was beginning for the Indian people by the intro-duction of a Scheme of Reforms in Indian government which was planned to give a basis of representative government on a much extended scale. The door was being opened to complete Self government but only men were being invited to enter through it, although women compose half the people of the country and it had been by the joint efforts of men and women that the agitation for reform in the government had been made. The men and women of India were too awakened and too just to allow this injustice to remain unredressed. Thirdly, the long and strenuous agitation for the vote by women in Britain and America and their recent victories had brought vividly to the consciousness of all educated Indian men and women the whole question of the inclusion of women in public life, and it was also a national and international necessity that Indian women should be given as high a status as women in other parts of the Empire

Though the Municipal franchise had been granted to the women of the Bombay and Madras Presidencies over fifteen veurs agolt; was so limited in numbers that it did not make a large impact on women's consciousness and indeed no protest was made when it was suddenly withdrawn from Madras women some years later. Over 1,700 women are qualified years meer Over 1,700 women are qualified to vote for the Bombay Corporation and a fair percentage of these have polled at each election, and similarly in other Municipalities in that Presidency women have exercised their vote responsibly and intelligently Since 1922 over 100 women have become Municipal Councillars and members of Local Government Councillors and members of Local Government Boards Their appointment has chiefly been by nomination but there have been notable sexts won by election in open contest with men, such as the election of all the four women who first entered the contest for seat in Bombay Corporation, also the instance in which the single woman contestant in the Municipal elections in Lucknow secured the largest poll of any of the candidates Many important local reforms have of the franchise or for service in public life

It was owing to the rise of the political agita Three fundamental causes have led to this that women began to wake up to their remailable success first the deep veneration position of exclusion by British law from any transfer and Muhammadan share in representative government. The internment of one of their own sex, Dr Besant, *timulated political activity and political self-con-clousness amongst women to a very great extent The moment for the ripe public expression of their feelings came when the Secretary of State for India came to India to investigate and study Indian affairs at first hand in 1917

> During the Hon E S Montagu's visit only one Women's Deputation waited on him but it was representative of womanhood in all party of India, and it brought to his notice the various reforms which women were specially desirous of recommending the Government to carry out

> The first claim for women suffrage for Indian women was made in the address presented to Mr Montagu at this historic All-India Women's Deputation which waited upon him in Madras on the 18th December 1917 The section refer ring to enfranchisement merits full quotation

"Our interests, as one half of the people, are directly affected by the demand in the united (Hindu-Muslim Reform) scheme (I 3) that ' the Members of the Councilshould be elected directly by the people on as broad a franchise as possi-ble,' and in the Memorandum (3) that 'the trunchise should be broadened and extended directly to the people' We pray that, when such a franchise is being drawn up, women may be recognized as 'people,' and that it may be worded in such terms as will not disqualify our sex, but allow our women the same opportuni-ties of representation as our men In agreeing with the demand of the abovementioned Me-morandum that 'a full measure of Local Self-Government should be immediately granted, we request that it shall include the representation of our women, a policy that has been admittedly successful for the past twenty years in Local Self-Government elsewhere in the British Empire The precedent for including women in modern Indian political life has been a marked feature of the Indian Atlanta. modern Indian political life has been a marked feature of the Indian National Congress, in which since its inception women have voted and been delegates and speakers, and which this year finds its climax in the election of a woman as its President Thus the voice of India approves of its women being considered responsible and acknowledged citizens, and we wrecettly claim that in the drawing up of all urgently claim that, in the drawing up of all provisions regarding representation, our sex shall not be made a disqualification for the exercise

In In. 1 from after the All India Women's) tively I he had seen after the All India Women's I ducational Reform was held in Patin, the legislative council of Behar and Orissa gave wemen the right of voting election and nomination to the Council on the same terms as men. Thus the whole of British India has now given to won negari political rights, with men-The neult has already demonstrated itself in the complable a lyancement of all the interests of women along the lines of education health tersing, morality and social customs

The Indian Native States of Travancore Cochin and Rajkot are the only places in India whon the statisfication has been completely a moved from the statute book. These have allowed women the right to stand for elec-tion for the Designitive Council as well as the right to vote for it and two women have been elecal to the newly formed Representative, Council of Lajkot The ver 1925 has been not worth for the appointment of the first woman Minister to Government Mrs Poonem; is came a member of the Travancore Lesi lative council on taking the position of State Darbar Physician Sheneted as Minister for Health to the State for three years Cochlin State nominated Mrs. Madhayi Amma as a member of its ii at Leal lative Council

In British India by the terms of the Reform Bill the Council-had no power to after the disauxhification of ex which remains against the right to stand as candidates for election to the This could only be changed by the Conneil: sote of the british Parliament, and the gaining sote of the british Parliament and the galling of this right to mained as a further objective of the women suffragiets. Many large, influential metings were held claiming the right of women to entry of the Legislatures. A deputation of women about this subject waited on the Madras Governor and their claims were supported by him and by his Government. The Imperial Legislative Assembly and the Council of State had been recorded the newer. Council of State had been accorded the power to grant women the franchise for their assemblies also by resolution, but only for those provinces which had already granted women the Legislative tranchise The Legislative Assembly his passed by rlarge majority a Reso lution granting the Assembly franchise to the women of such Provinces Accordingly in November 1923 women in Indiavoted for the first time for the elections of both Provincial Legislative Councillors and members of the Legislative Assembly The number of women who voted in the large cities was surprisingly large in Bombay and Madras Presidencies and comprised women of all castes and communities

enabled This to become women members of the Councils which have functioning since then But the permission came too late for women to stand for election with any great chance of success, so the Women's Indian Association asked that women be nominated by Government for the new Councils in those Provinces which had voted to admit them and that women also be nominated to the 14 embly and the Council of State. Thus the year 1026 marked another milestone passed on the road to the complete political emancipation of Indian womanhood

In 1926 the Central Provinces, the Punjab and Bengal all granted the Frinchise to women The year 1927 was notable for the nomination of the first woman member to a Legislative Council in British India, the recipient of the honour being Dr MUTHULAKSHMI AMMAL, and she was further honoured by being elected unanimously by her colleagues in the Madras Legislative Council, to the Office of Diffuri-President of THE COLVEIT Since then Mrs. Kale has been nominated to the Legislative Council of the Central Provinces, and Mrs. A himed Shaw to that of the United Provinces. A Deputation from the All-India Women's Conference in Delhi in 1925 writed on the Viceroy requesting him to nominate two women to the Legislative Assembly That has still remained ungranted

women enfranchised the vote throughout number of the grant of India will not be more than a million under the present qualifications Property and not literacy is the basis of the franchise, though the grant of the vote to every graduate of seven years' standing ensures that the best educated women of the country as well as those who have to shoulder the largest property responsi-bilities will be those who rightly will be the legislating influence on behalf of womanhood As regards the custom of purdah prevailing in parts of India special provisions have been made in Municipal voting for purdah recording stations for purdah women in which a woman is returning officer and this has been found quite satisfactors and has been adopted also where desired in connection with Legislative Council elections

Though the Women's Indian Association was the only Indian women s society which had woman suffrage as one of its specific objects, almost all other women's organisations have combined in special efforts for the gaining of municipal and legislative rights and the following ladies have identified themselves specially with the movement Lady D Tata, Lady A Bose, Lady T Sadasivaler, the munities

In April, 1926 as a result of a favourable recommendation of the Muddiman Committee on I ranchise Reforms, the Rule was changed in the Reform Bill which disqualified women from entering the Legislatures Power was granted to the Councils and the Assembly to pass Resolutions allowing qualified women to be elected or nominated as members of these bodies Again Madras Council on the 17th July, was the first to pass a Resolution admitting women to its membership Lombay and the Punjab followed its lead in August and October respec

specially with the movement Lady D Tata, Lady A Bose, Lady T Sadasivaler, the Begum of Camba), Mrs Ramabai Ranade Mrs Sarojini Naidu, Mrs Valia, Mrs Sariangamma, Mrs Rasanit, Mrs Mrs Mrs Chandraschnara Iyer Miss S Sorabji, Mrs Khedkar, Dr Mistry, Dr Muthulakshmi Ammai, Mrs Palmer, Mrs Saraladevi Choudhuri, Mrs Kumudini Basu, Mrs K N Rov, Lady Shafi, Mrs Hassan Imam, Miss S B. Das, Mrs P K Sen, Mrs Rustomij Faridoonli, Mrs B Rama Rao, Mrs Deep Narain Singh, followed its lead in August and October respec

for both commissioned and non-commissioned officers of the regular and other forces in India It bears on the obverse the bust of King Ldward VII and on the reverse a laurel wreath encircl ing the words For Distinguished Service medal, 12 inches in diameter, is ordered to be worn immediately to the right of all war medals suspended by a red ribbon 11 in wide, with blue edges i in wide This medal may be conferred by the Viceroy of India

Indian Order of Merit -This reward of valour was instituted by the H E I Co in 1837, to reward personal bravery without any reference to length of service or good conduct It is divided into three classes and is awarded to native officers and men for distinguished conduct in the field. On the advancement from one class to another the star is surrendered to the Government, and the superior class substituted, but in the event of the death of the recipient his relatives retain the decoration The order carries with it an increase of one-third in the pay of the recipient, and in the event of his death the allowance is continued to his widow for three years. The First Class consists of a star of eight points, 12 in in diameter, having in the centre a ground of dark blue enamel bearing crossed swords in gold, within enamel bearing crossed swords in gold, within a gold circle, and the inscription Reward of Valour, the whole being surmounted by two wreaths of laurel in gold. The Second Class star is of silver, with the wreaths of laurel in gold, and the Third Class entirely of silver The decoration is suspended from a simple loop and bar from a dark-blue ribbon 11 in

Indian Distinguished Service Medal—This Since 1878, however, any person European or medal was instituted on lune 28th, 1907, by an native, holding a commission in a native region Order published in Simil as a reward ment, became eligible for admission to the for both commissioned and non-commissioned Order without reference to creed or colour The First Class consists of a gold eight-pointed radiated star 14 in in diameter The centre is occupied by a lion statant gardant upon a ground of light-blue enamel, within a dark-blue band inscribed Order of British India, and encircled by two laurel wreaths of gold A gold loop and ring are attached to the crown for suspension from a broad ornamental band once blue, now red, is passed for suspension from the neck. The Second Class is 175 in in diameter with dark-blue enamelled centre there is no crown on this class, and the suspend er is formed of an ornamental gold loop reverse is plain in both classes The First Class carries with it the title Sirdar Bahadur, and an additional allowance of two rupees a day and the Second the title of Bahadur, and an extra allowance of one rupee per day

Indian Meritorious Service Medal —This was instituted on July 27th, 1888, and on receipt of the medal the order states "a non-commissioned officer must surrender his Long Service and Good Conduct medal" but on being promoted to a commission he may retain the M S medal, but the annuity attached to it will cease On the obverse is the diademed bust of Queen Victoria facing left, with a veil falling over the crown behind, encircled by the legend Victoria Kaisar-i-Hind On the reverse is a wreath of lotus leaves enclosing a wreath or paim tied at the base, having a star beneath, between the two wreaths is the inscription for loop and but from a dark-blue ribbon 1½ in in width with red edges, bearing a gold or silver buckle according to class

Order of British India—This order was instituted at the same time as the Order of Merit, to reward native commissioned officers for long and faithful service in the Indian Army

occurrent the two wreads is the inscription for a certorious service. Within the palm wreath a certorious service within the palm wreath is the word India. The medal, 1½ in in diameter, is suspended from a scroll by means of a red ribbon 1½ in wide. The medals issued during the reigns of Queen Victoria's successors bear on the obverse their bust in profile with the legend altered to EDWARDVS or GEORGIVS.

THE KAISAR-I-HIND MEDAL.

important and useful services rendered to Us in Our Indian Empire in the advancement of the public interests of Our said Empire, of the public interests of Our said Lupire, siver for the Second and taking also into consideration the ex- Cypher on one side pediency of distinguishing such services by some mark of Our Royal favour Now for the purpose of attaining an end so desirable by a dark blue ribbon as that of thus distinguishing such services

This decoration was instituted in 1900, the preamble to the Royal Warrant—which and by these presents for Us, Our Heir, and Successors, do institute and create , and by these presents for Us, Our Heir, and Successors, do institute and created, and by these presents for Us, Our Heir, and Successors, do institute and created, and by these presents for Us, Our Heir, and Successors, do institute and created, and by these presents for Us, Our Heir, and Successors, do institute and created, and by these presents for Us, Our Heir, and Successors, do institute and created, and Successors, do institute and created, and Successors, do institute and create and Successors, do institute and created, and successors, do insti new Decoration "The decoration is styled "The Kalsar-I-Hind Medal for Public Service in India" and consists of two classes The Medal is an oval-shaped Badge or Decoration—in gold for the First Class and in giver for the Second Class—with the Royal Cypher, on one side and on the constant Cypher on one side and on the reverse the words "Kalsar-l-Hind for lie Service in India"; it is suspen eft breast

and riflemen in front of him, he silenced their to him before he died He kept his gun in action, and showed the greatest coolness in removing defects which had twice prevented the gun from firing He did magnificent work during the remainder of the day and when a withdrawal was ordered assisted with covering fire until the enemy was close to him He displayed throughout a very high standard of valour and devotion to duty.

Ressaldar Badin Singh, 14th Lancers attached 29th Lancers—For most conspicuous bravery and self-sacrifice on the morning of the 23rd September 1918, when his squadron charged a strong enemy position on the west bank of the River Jordan, between the river and Kh. es Samariveh Village On nearing the position Ressaldar Badin Singh realised that the squadron was suffering casualties from a small hill on the left front occupied by machine game and 200 interest. Without machine guns and 200 infantry Without the slightest besitation he collected six other ranks and with the greatest dash and an entire disregard of danger charged and captured the position, thereby saving very heavy casualties to the squadron. He was mortally wounded to the squadron He was mortally wounded to the shielded him with his body on the very top of the hill when capturing one of the machine guns single-handed, but all the machine guns and infantry had surrendered continual effort and by loss of blood.

His valour and initiative were of the highest order.

Rifleman Gobar Sing Negl, 2nd Battalion, 39th Garhwal Rifles —For most conspicuous bravery on 10th March 1915 at Neuve Chapelle During an attack on the German position he was one of a bayonet party with bombs who entered their main trench, and was the first man to go round each traverse, driving back the enemy until they were eventually forced to surrender He was killed during this engagement

Sepoy Ishaw Singh, 23th Punjabis —For devotion and bravery "quite beyond all praise" in Waziristan on 10th April, 1921 He received a severe gunshot wound in the chest while serving a Lewis gun, and when all the havildars had been killed or disabled he strug gled to his feet, ralled to his assistance two men, and charged and recovered the gun, re-toring it to action. He refused medical attention, lasisting first on pointing out where the other wounded were and on carrying water to them

PASSPORT REGULATIONS.

A -British Subjects

- British Indian passports are issued only to —(1) British subjects by birth, (2) wives and widows of such persons, (3) British subjects by naturalization and (4) British protected per-ឧករាធ

 4 In order to obtain a passport an application (showing, among other things the reasons for the proposed journes) should be the reasons for the proposed journes) should be filled in by the applicant and the applicants declaration certified by a Political Officer Nazis strate, Justice of the Peace, Police Officer not to their round the applicant and the applicants takes time applicants also proved as the proposed points of the proposed form of the proposed points of the propo

SELECT OPINIONS

- Sylvain Levi: The Gaekwad's Series is standing at the head of the many collections now published in India.
- Asiatic Review, London: It is one of the best series issued in the East as regards the get up of the individual volumes as well as the able editorship of the series and separate works.
- Presidential Address, Patna Session of the Oriental

 Conference: Work of the same class is being done in Mysore, Travancore, Kashmir, Benares, and elsewhere, but the organisation at Baroda appears to lead.
- Indian Art and Letters, London: The scientific publications known as the "Oriental Series" of the Maharaja Gaekwar are known to and highly valued by scholars in all parts of the world.
- Journal of the Royal Asiatic Society, London:

 Thanks to enlightened patronage and vigorous management the "Gaekwad's Oriental Series" is going from strength to strength.
- Sir Jadunath Sarkar, Kt.: The valuable Indian histories included in the "Gaekwad's Oriental Series" will stand as an enduring monument to the enlightened liberality of the Ruler of Baroda and the wisdom of his advisers.
- The Times Literary Supplement, London: These studies are a valuable addition to Western learning and reflect great credit on the editor and His Highness.

at I also e that errekt ia i ii f (17) (17) (17) H-bind the mangrove line lated he high tides, in which the most valuable species is the saundri" (Heristers fa (18) recruitment being a matter for the local Governments. A certain number of posts in the service are filled by the promotion of specially promising Rangers. Owing to the establishment of a course for the training of probationers for the Indian Forests. Service at Dehra Dunsince 1926, the Provincial Service course ceased to exist from 1928.

(4) The Subordinate Service consists of Forest Rangers (about 840), Deputy Rangers (about 900), Foresters (about 2,000) and Forest Guards (about 11,500) The Rangers are at present trained at three different centres—the Forest College at Dehra Dun (for provinces other than Burma, the Central Provinces, Bihar and Orissa, Bombay and Madras), the Burma Forest School at Pyinmana (for Burma) and the Madras Forest College at Colmbatore (for Madras, Bihar and Orissa, Bombay and the Central Provinces) These three institutions were established in 1878, 1898 and 1912 respectively the training of subordinates below the rank of Ranger is carried out in various local forest schools and training classes.

Research -For the first fifty years of the existence of the Forest Department in India no attempt was made to organize the conduct of forest research, and thus to co-ordinate and elaborate the scientific knowledge so necessary to successful economic working A commencement in organized forest research was at last made in 1006 by the establishment, at the instance of Sir Sainthill Eardley-Wilmot, then Inspector-General of Forests, of a Forest Research Institute at Dehra Dun The Forest Research Institute, is under the administrative control of the Inspector General of Forests who is also the President There are five main branches of research, namely Sylviculture, Forest Botany, Forest Economic Products, Entomology and Chemistry, each branch being in charge of a research officer The Timber Testing, and the Wood Preserva tion experts are engaged temporarily on short term contracts Indian Assistants have been appointed under them to receive the necessary technical training and experience in these subjects, with the object of eventually taking the place of experts if and when properly qualified The Wood Technology, Paper Pulp and seasoning section, are in charge of Indian exprits who have received special training in their various subjects in Europe and America

Since 1906 research work has been prosecuted energetically so much so that in 1920 a new scheme was sanctioned for the expansion of the staff and site of the Institute Since then new land has been acquired, on which new buildings have been built for accommodating the various expanded branches and the new machinery obtained from the United Kingdom As a result of this steady progress is being made in the investigations which should ultimately lead to the fuller and better utilization of the raw products produced by Indian forests

Forest Products —Forest produce is divided into two main heads—(1) Major produce, that is timber and firewood, and (2) Minor products, comprising all other products such as bamboos, leaves, fruits, fibres, grass, gums, resins, barks, animal and mineral products, etc.

The average annual outturn of timber and fuel from all sources during the quinquennium ended Blat March 1930, the latest date for which statistics are available, was 347,800,000 cubic feet against an average of 340,000,000 cubic feet per annum attained in the preceding quinquennium highest figure ever attained under this head occurred in 1921-22, when a total of 361,383,000 c ft was reached, the year 1923-24 coming next with 353,690,000 c ft The annual outsurn of timber and fuel from all sources during the quinquennium 1928-29 averaged 81,78 00,000 cubic feet against an average of 3,0,000,000 c ft during the preceding quinquennium trade in bamboos was almost stationary, with expectations of great development under commercial exploitation in the near future. The five years witnessed the initiation and developogo at men of series and large exploitation schemes, These especially in Madras, which had indifferent 1878 success It was hoped in Madras by utilising modern American methods to extract and utilise very large quantities of valuable timbers, but the final result proved that this extensive exploitation was justified neither by the stand of timber in the forests nor by the possibilities of satisfying markets The Provincial Government after this experience adopted a more cautious policy,

An important measure for the development of forests in the Andamans was sanctioned by the Government of India Hitherto, elephants had been employed for extraction of timber, the result that only the fringe of the forests could be touched. The new plan is for the employment of American methods. American logging machinery was purchased and an American expert engaged to take charge of the work. Escuberc in India a great part of the trade in timber lies in the hands of contractors who are regarded as on the whole trustworthy if sufficient control over their operations is maintained.

Forest Industries — The important role which the forests of a country play in its general Industries -The important rôle commercial welfare and in providing employcommercial welfare and in providing employment for its population is not always fully recognized Fifteen years ago it was estimated that in Germany work in the forests provided employment for 1,000,000 persons while 3,000,000 persons, earning £30,000,000 a year, were employed in working up the raw material yielded by the forests If accurate estimates were available for India, they would no doubt show that apart from the jungle population which is directly dependent on the forests and the large numbers of wood-cutters. forests and the large numbers of wood-cutters, sawyers, carters, carriers, raftsmen and others working in and near them, employment on an excessive scale is provided to persons engaged in working up the raw products Among these latter may be mentioned carpenters, wheelwrights, coopers, boat-builders tanners, rope-makers lac-manufacturers basket-makers, and many other classes of skilled labourers Indian census shows over a million people and their dependents so employed in British India and nearly a further half million in Native States, but these are probably below the actuals, as much forest labour is not whole-time labour, devoting seven or eight months in the year to forest work and the rest to agriculture the opening up of the he extension of systematic working, of knc

After negotiations extending over several years, an Indian Broadcasting Company was broadcasting granted a license to establish services upon lines similar to those of the British Broadcasting Corporation, and transmitting stations were erected in Bombay and Calcutta, the services at the former being inaugurated by His Excellency the Vicerov in July 1927 and the latter by the Governor of Bengal a month | later These stations had each an aeral imput of three kilowatts the same as that of the 2LO stations in London of which they are practically duplicates. The programmes were so arranged that both Indian and European music are broadcast daily and the news bulletins and market and weather reports are read in two languages

Bombay broadcasts normally on a wavelength of 357 metres and Calcutta on 370 metres Reception in either of these cities, and for a distance of twenty or thirty miles around, is possible on crystal sets, of which a very large number have been sold Valve sets are necessary for those living further afield, but although there has been a considerable demand for these, the sales have not reached expectation. One of the greatest difficulties in India is the maintenance of batteries which is no inconsiderable item when sets containing five or six valves are employed Partly with a view to overcoming this problem and to render broadcasting available on two-valve sets in any part of India the the Broadcasting Company investigated the possibilits of transmitting simultaneously on long and short waves. It took no action on the results of such investigations

Broadcasting Company Indian wound up in 1930 and its operations have since been conducted by the Government of India, in the Industries and Labour Department or the mustries and Labour Department Government for this purpose formed an Indian State Broadcasting Service and instituted a Central Broadcasting Advisors Committee, representative of the non-official public in association with the Departmental officials, to keep them in touch with public opinion. The Committee has as its chairman the Member of the Vicerus & Freenties Council in charge of the Vicero's Executive Council in charge of the Subject (now the Hon Sir Joseph Bhore) of the Subject (now the Hon Sir Joseph Bhore) and upon it sit at the present time Messrs

N. B. Macbeth and N. M. Dumasha, M. L. A.

Bombar, H. H. Revlands and K. C. Neozy

M.L.A. Calcutta, M. R. Coburn, Financial Adviser to Government in the Posts and Tele-lated the Country of the manufactured in this country than the can be imported and such an industry would find graphs. Department and B. Rama, Rao, Joint 1 the right kind of skilled labour already in India.

Secretary to Government in the Industries and Labour Dept It is now proposed to and Labour Dept It is now proposed to establish a series of additional broadcusting stations in different parts of India so as to spread broadcasting receivable on low-powered sets throughout the land Important proposals with this purpose in view were discussed by the Advisory Committee in Calcutta in December,

Licenses -Broadcast receiving licenses are issued at Head Post Offices at a fee of ten rupees per year and cover the use of receiving sets throughout British India except Baluchistan and the North-West Frontier Province Licenses for the North-West Frontier Province Licenses for fixed stations for transmitting and experimental purposes are much sought after, and despite a careful scrutiny of the applicants more than 300 have been issued. The number of triders in wireless apparatus who are required to take out special Import licenses has increased considerably during the past year. This improvement must be ascribed primarily to the commencement of breadesting. primarily to the commencement of broadcasting

Prospects -The Government of India have always encouraged the development of wireless in India by private enterprise and to this source that India may look in the future for considerably increased internal radio com-munication. There are two most promising lines of development, ciz -

- Erection of small sets either for speech or morse in districts where no land lines exist and to link such districts with the existing landlines In this connection it may be remarked that modern small radio sets are capable of using either morse or speech at will and if used for peech can be operated by the ordinary desk telephone instrument in daily use all over
- The use of radio as a substitute for land line to form the trunk telephone route between two cities which already have telephone facilities

These would it is thought open up a new industry which if properly forstered would very

controlled by the Gagging Act which Canning passed in June 1857 on account of the license of a very few papers, and owing still more to the fears of its circulating intelligence which might be prejudicial to public interests. The Act was passed only for a year at the end of which the press was once more free

On India passing to the Crown in 1858, an ern of prosperity and progress opened for the whole country in which the press participated There were 19 Angio-Indian papers at the beginning of this period in 1858 and 25 Native rise in the next generation, but the rise in to be published daily

the Mutiny its recetom had to be temporarily | induence and also circulation was satisfactory Famous journalists like Robert Knight, James Maclean and Hurris Mookerji flourished in this generation The Civil and Mulary Gazette was originally published in Simla as a weekly was originally published in Simla as a weekly paper, the first issue being dated June 22nd, 1872 Prior to and in the days of the Mutiny the most famous paper in Northern Indid was the Mojuszilute, originally published at Meerut, but afterwards at Agra and then at Ambala After a lively existence for a few years in Simla the Civil and Military Gazette acquired and incorporated the Mojuszilute, and in 1876 the office of the paper west transferred. papers and the circulation of all was very small and in 1876 the office of the paper was transferred. The number of the former did not show a great from Simia to Lahore, and the Gazette began

INDIAN PRESS LAW

Before 1835 all printing of books and paper was subject to licence by the Governor-General in Council, and the licences were issued or refused at the discretion of Government Act XI of 1835 repealed the old Regulations and merely required regustration of the printer and made a few minor requirements That Act was replaced in 1867 by the present Press and Registration of Books Act, and, except for an Act which was in force for one year during the Mutiny, there was no further legislation directly affecting the Press until 1878 when the Vernacular Press Act was passed That Act was repealed during the Viceroyalty of Lord Ripon in 1882 I rom that date until 1907 Government made no attempt to interfere directly with the liberty of the Press, the growth of sedition being dealt with in other ways by the passing in 1898 of section 124A of the Penal Code in its present form, which had been originally enacted in 1870, and by the introduction into the Penal Code of section 153A and into the Criminal Procedure Code of section 108 There were a certain number of prosecutions under those sections up to 1907, but the dissemination of sedition through the Press continued In 1908 the Newspaper (Incitement to Offences) Act was passed which dealt with papers inciting to murder or to acts of violence This Act failed to have the desired effect

The Indian Press Act, 1910, was a measure of wider scope, the main object of which was to ensure that the Indian press generally should be loss with the limits of loss with the limits with the limits of loss with the limits of loss with the limits with the limits of loss with the limits of loss with the limits with the limit be kept within the limits of legitimate discus-

The Act deals, not only with incitements to murder and acts of violence, but also with other specified classes of published matter, including any words or signs tending to reddier them. soldiers or sailors from their allegiance or duty, to bring into hatred or contempt the British Government, any Native Prince, or any section of His Majesty's subjects in India, or to intimidate public servants or private individasis

The different sections of the Act have in view (i) Control over presses and means of publication, (ii) control over publishers of newspapers, (iii) control over the importation into British India and the transmission by the post of objectionable matter, (iv) the suppression of seditions or objectionable newspapers, books, or other documents wherever found

Repeal of Press Legislation -By the autumn of 1917 the Government of India had begun to consider the desirability of modifying at least one section of the Press Act to which great exception had been taken on account of the wide powers that it gave Finally, after more than once consulting Local Government, a Committee was appointed in February 1921 after a debate in the Legislative Assembly, to examine the Press and Registration of Books Act, 1867, and the Indian Press Act, 1910, and report what modifications were required in the That Committee made an un existing law animous report in July 1921, recommending :-

The Press Act should be repealed.

(2) The Newspapers Incitements to Offences Act should be repealed

(3) The Press and Registration of Books Act and the Post Office Act should be amended where necessary to meet the conclusion noted below (a) The name of the editor should be inscribed on every issue of a newspaper and the editor should be subject to the same liabilities as the printer and publisher, regards criminal and civil responsibili regards criminal and civil responsibilities.
(b) any person registering under the Press and Registration of Books Act should be a major as defined by the Indian Majority Act, (c) local Governments should retain the power of confiscating openly seditious leaflets, subject to the owner of the press or any other person aggrieved being able to protest before a court and challenge the seizure of such document, in and challenge the seizure of such detailed, which case the local Government ordering the confiscation should be called upon to prove the sections conferred by Sections 13 to 15 of the Press Act should be retained Customs and Postal officers being empowered to seize seditions literature within the meaning of Section 124A of the I P C subject to review on the part of the local Government and challenge by any persons interested in the courts, (e) any person challenging the orders of Government should do so in the local High Court, (f) the term of imprisonment prescribed in Sections 12, 13, 14 and 15 of the Press and Registration of Books Act should be reduced to six months (9), the provisions of Section 16 of the Press Act should be reproduced in the Press and Registra-tion of Books Act

Effect was given to these recommendations

during the year 1922

in which the Bank may engage, though the older limitations are modified in some minor points. It permits for the first time the constitution of a London Office and the borrowing of money in England for the purpose of the Bank's business upon the security of assets of the Bank, but not the opening of cash credits, keeping cash accounts or receiving deposits in London except from former customers of the Presidency Banks. The Act provides for an agreement between the Bank and the Secretary of State, and this agreement, which was signed on the 27th January 1921 and is for a period of ten years determinable thereafter by either party with one year's notice, provides, inter alia, for the following important matters—

(1) All the general banking business of the Government of India is to be carned out by the Imperial Bank (2) The Bank will hold all the Treasury Balances at Headquarters and at its branches This involves the abolition of the Reserve Treasury system.

(3) Within five years the Bank undertakes to open 100 new branches of which the Government of India may determine the location of one in four The branches and agencies of the three Presidency Banks prior to the date of amalgamation numbered 69, including the Colombo branch of the Bank of Madras The Bank of Bengal had no branches prior to the proposal to transfer Government business to the Bank in 1861-62 but no less than 18 branches were established before 1868

established before 1868
(4) The management of the Public Debt will continue to be conducted by the Bank for specified remuneration.

JOINT STOCK BANKS.

Previous to 1906 there were few Banks of this de cription operating in India, and such as small importance and had their business con-resulted in a very large number of that Bank fined to a very restricted area. The rapid the principal being that of the Indian Specie development of this class of Banl, which has Bank been so marked a feature in Banking within were then in existence were of comparatively recent years, really lind its origin in Bombay of India and the Indian Specie Bank in 1906 After that time there was a perfect stream of new flotations and although many of the new Companies confined themselves to legitimate banking business, on the other hand a very large and can harily be properly classed as Banks
These Banks made very great strides during

that the husbress of many of the Banks was of a very speculative and unsafe character and it was a matter of no great surprise to many people when it became known that some of the

Banks were in difficulties

The first important failure to take place was that of the People's Bank of India and the loss of confidence caused by the fallure of that Bank

Since those events οť ten 3 CATS ago and set in with the establishment of the Bank | confidence has been largely restored. But in April 1023 the Alliance Bank of Simla suspended proment and is now in voluntary liquidation The effect of the failure of this old established Bank might have been disastrous but for the prompt action of the Imperial Bank which number engaged in other businesses in addition dealt with the situation in close association and can hardly be properly classed as Banks with the Government of India. The Imperial These Banks made very great strides during Bank undertook to pay the depositors of the the first few years of their existence, but it Alliance Bank 50 per cent of the amounts due was generally suspected in well informed circles to them. A panic was averted and a critical than the lands was properly suspected in well informed circles to them. A panic was averted and a critical than the lands were supported to the lan period was passed through with little difficulty

> During 1923 the Tata Industrial Bank, which was catabilished in 1918, was merged in the Central Bank of India

The following shows the position of the better known existing Banks as it appears in the latest available Balance Spects -

INDIAN PRIVATE BANKERS AND SHROFFS.

in India long before Joint Stock Banks were ever thought of, and it seems likely that they

will continue to thrive for some very considerable time to come The use of the word 'Shroff' is usually associated with a person who charges usurious rates of interest to impecunious people, but this is hardly fair to the people known as "shroffs" in banking circles, as there is no doubt that the latter are of very real service to the business community and of very great assistance to Banks in India Under present conditions the Banks in India can never hope to be able to get into sufficiently close touch with the affairs of the vast trading comtouch with the analis of the vast trading com-munity in India to enable them to grant accom-modation to more than a few of these traders direct and it is in his capacity as middleman that the shroff proves of such great service. In this capacity also he brings a very con-siderable volume of business within the scope of the Presidency Banks Act, and enables the Presidency Banks to give accommodation which, without his assistance, the Banks would not be permitted to give The shroff's position as an intermediary between the trading community and the Banks usually arises in some-thing after the following manner A shop-keeper in the bazaar, with limited means of his own, finds that, after using all his own money, he still requires say Rs 25,000 to stock his shop suitably He thereupon approaches the shroff, and the latter after very careful inquiries as to the shopkeeper's position grants the accom-modation, if he is satisfied that the business is a hoondee broker, and in the case referred to the latter may probably approach about ten shroffs and secure accommodation from them to the extent of Rs 2,500 each A hoondee usually drawn at a currency of about 2 months is almost invertably taken by the shrofts in respect of such advances

A stage is reached however when the demands on the shroffs are greater than they are able to meet out of their own money, and it is at this extent

Indian private Bankers and Shroffs flourished | point that the assistance of the Banks is called long before Joint Stock Banks were into requisition. The shroffs do this by taking a number of the bills they already hold to the Banks for discount under their endorsement, and the Banks accept such bills freely to an extent determined in each case by the standing of the shroff and the strength of the drawers. The extent to which any one shroff may grant accommodation in the bazaar is therefore dependent on two factors, viz., (1) the limit which he himself may think it advisable to place on his transactions, and (2) the extent to which the Banks are prepared to discount bills bearing his endorsement. The shroffs keep in very close touch with all the traders to whom they grant accommodation, and past experience has shewn that the class of business above referred to is one of the safest the Banks can engage in

> The rates charged by the shrofts are usually based on the rates at which they in turn can discount the bills with the Banks and necessarily vary according to the standing of the borrower and with the season of the year Generally speaking, however, a charge of two annas per cent per mensem above the Bank's rate of discount, or 1½ % is a fair average rate charged in Bombay to a first class borrower Rates in Calcutta and Madras are on a slightly higher scale due in a great measure to the fact that the competition among the shroffs for business is not so keen in these places as it is in Bombay

> The shroffs who engage in the class of business above described are principally Marwaries and Multanis having their Head Offices for the most part in Bikaner and Shikarpur, respectively, the business elsewhere than at the Head Offices being carried on by "Moonims" who have very wide powers

> It is not known to what extent native bankers and shroffs receive deposits and engage in exchange business throughout India, but there is no doubt that this is done to a very considerable

THE BANK RATE.

Formerly each Presidency Bank fixed its own Bank Rate, and the rates were not uniform. Now the Imperial Bank fixes the rate for the whole of India The rate fixed represents the rate charged by the Banks on demand loans fixed its against Government securities only and advances on other securities or discounts are granted as

The following statement shows the average Bank Rate since the Imperial Bank constituted -

a rule at a slightly higher rate. Ordinarily such advances or discounts are granted at from one-half to one per cent over the official rate. but this does not always apply and in the monsoon months, when the Bank rate is sometimes nominal, it often happens that such accommodation is granted at the official rate or even less

The Indian Gauges

The randard gauge for India is five feet six lecture. When construction was started that had pauge soled was strong, and it was thought a feet to be feet to have a broad gauge in a derivation to the feet the influence of evelones. But in 1870 when the State system was adopted it was to be to be did no more economical gauge, that the e.g. of the field a more economical gauge, that the e.g. of the field and the metre-gauge of the first of its of adopting the metre-gauge of the first of its of adopting the metre-gauge of the first of its of adopting the metre-gauge at that time it its of adopting the metre-gauge of the first of its of adopting the metre-gauge at that the first of the consecution was to made the refree-gauge lines provisional, they were to be consected into broad gauge system in the trailier expanse to the consected into the trailier expanse to the consected first of the first plane in propose the carrying power of the mere gauge lines than to convert them to the last above the first of the strategie situation demanded an orthogonal pauge the metre gauge lines mere impleased and they become a permanent feat of it the railieral system. Now there is a press or expanse to the system in Southern India mere and a their system in Southern India ends of the Southern Maratha and the South India so ems. There are not very connected, I title the converse gauge fertain feeder and hill than a last of the southern Maratha and the South India so the notice gauge fertain feeder and hill than a last of the Lof gauge there has lead to be to convert gauge.

State versus Company Management — The relative advantages and disadvantages of State and Company management of the railways onred by Government which comprise the great balk of the railway mileage in India have been the subject of discussion in official circles and the public press for many years. In India the que tion is complicated by the fact that the more important companies have not in recent years been the owners of the rallways which they manage and the headquarters of their Boards are in London The subject was one, perhaps the most important, of the terms of reference of the Acworth Railway Committee That Committee was unfortunately, unable to make a unant mous recommendation on this point, their mem bers being equally divided in favour of State management and Company management They were, however, unanimous in recommending that the present system of management by Boards of Director in London should not be extended besond the terms of the existing contracts and this recommendation has met with general public acceptance. During the year 1922-23, the question was again referred to certain Local Governments and public bodies and opinions collected and discussed. collected and discussed The approaching termination of the East Indian Railway contract on 31st December 1924 and of that of the Great Indian Peninsula Railway on 30th June 1925 rendered an early decision on this question imperative When the question was debated in the Legislative Assembly in February 1923, the

non official Indian Members were almost unanimously in favour of State management and indeed were able to carry a resolution recommending the placing of the Last Indian Railway and the Great Indian Peninsula Railway under State management at the close of their present contract. The Government of India, however, expressed themselves as being so convinced by the almost universal failure of this method in other countries that they proposed, while accepting the necessity for taking over the management of the East Indian Railway and the Great Indian Peninsula Railway to continue their efforts to devise a satisfactory form of Company domiciled in India to take these milways over eventually on a basis of real Company management There have been certain definite advantages during a transition period in having advantages during a transition period in having a central authority with necessary powers to co-ordinate the work on railways and that the results have been satisfactors are borne out by the fact that Indian railways have contributed 47 million pounds to General Revenues during 1927-28 and nearly 4 million pounds during 1928-29 in addition to paying in 37 million and 17 million pounds respectively during these two years to the Railway Reserve. during these two vers to the Rullway Reserver I und The future organisation will, however, need car ful organisation. I specience in other countries has shown that difficulties arise in a Government fully responsible to the Legis lature or under any constitution which imposed on the Railway Department the necessary on the Railway Department the necessary restrictions which must apply as between ordinary departments of the State. The solution found in other countries such as Germany, Canada, Belgium, Austria and clawhere, where State ownership has thrown on the State the obligation to manage its own railways, has been to create by a statute an authority charged with the management of the State Railway property with statutory prescription of the objects with statutory prescription of the objects division of railway profits between the State and the Railway Authority This authority may take the form of a company as in Canada and in Germany or follow the simpler lines of a statutory commission On 1st January 1925 the Last Indian Railway was amalgamated with the Oudh and Rollikhand Railway and brought under direct State Management while on 1st July 1925 the Great Indian Peninsular Railway followed suit The Nain Jubbulpore Section of the Last Indian Railway was transferred to the Great Indian Peninsula Railway on 1st October 1925

On January 1st 1929 the contract with the Burma Railways Company was terminated and the management taken over by the State. The purchase of this railway has entailed the payment to the Burma Railways Company of the sum of three millions sterling being the share capital originally contributed by the Company. The financial effort of taking over the line is estimated to be an increase of about half a crore of rupees in the net annual revenue to Government.

The purchase of the Southern Punjab Railway of an aggregate length of about 927 miles worked by the North Western Railway was effected on the 1st January 1930 It is estimated that the financial result of the purchase which cost approximately Rs 703 lakhs will be a gain to Government of about Rs 47 lakhs a year.

The period and the state of the separation to be seen a second and transcallent due to the e, est a the matter has been held

Re organisation problems - The growing complex yet rallway administration in India teame have given a stimples to the efforts of The percent direct of the their organizations. The percent direct of in which this re-organisation is the reconsolidation. into one department of the operating or trans portation work of the railway, including the fire of power. The election which is common to known as the distinguish extent was Cret a tiplet of the Great Indian Peninsula. Its was during 192, 27

- mpl- nt from Mor Chaturvell James Presid & Co Jampur in reard to the rates charged for hiddy (i) Complement Chaturvedi leav sover the Ben, al Napur, Great Indian Penin ula and Last Indian Lallway from Jarsin, pur to Jaunquir
- (a) Complaint from Mesers Shoo Dixil Ramfi Dixs, Jampur, against the Last Indian Rallway in connection with the rate for saft from rid Cawn pore to certain stations which it was alleged, were on a ligher basis than the corresponding rates on another line
- (iii) Complaint from the Sri Ranga Vijas Ginning Weaving and Splinning Mills. Coimbatore, regarding the rate charges for virn from Colimbatore to Shalimar over the South Indian Madris and Southern Wihratta and Bengal Nagpur Rallway which it was alleged, con-etituted preferential treatment owing to a lower rate being charged for finilar traffic from Madura to Shallmar
- (ii) Complaint from the proprietors of a rice mill at Chakulia regarding the alleged high rates charged over the Bengal Nagpur Railway for rice and paddy to and from Chakulia

- (r) Complaint from the Collect Chamber of Commerce against the Madras and Southern Mahratta Railway for not allowing for raw materials for the manufacture of manures the same rate, as were being allowed on the South Indian Rallway
- (r) Complaint from the Kalvanpur Line Works Calcutta regarding the alleged unreasonableness of rates over the Last Indian Pallwas for lime from D litt on Sone to Howrih and cert in stations on the Bengal and North Western Rillwis as compared with the corresponding rates from certain competing centres on the Naini-Jubbulpore section of the Great In lian Peninsula Railway
- con Complaint from certain sugar factors proprietors at Campore regarding the rates for jugger over the Bengal and North Western Railway when constitued to stations on other railways er Campore the allegation being that the rates were unduly high
- (riii) Complaint from certain fruit dealers in Calcutta regarding the minimum weight condition applicable for a rate quoted by the Inst Indian Railway for mangoes from ria Mokamih Ghat to Howrah, being too high to enable them to take adv intige of the rate

Of the collabt cases, the last mentioned was compromised when it came up for hearing before the committee. The first five were reported on by the committee during the year under review and the recommendations made by them, which were all in favour of the railway administrations concerned were accepted by Government. The committee also reported on two other cases which had been referred to them during the previous year. These were -

- (i) Complaint from a dealer in marble regarding the high rates charged from Rombus to stations on the South Indian Railway over the Great Indian Peninsula Madras and Southern Mihratta and South Indian Railways
- (n) Complaint from the Burhanpur Tapti Mill regarding the rate for piecegoods from Burhaupur to Calcutta being higher than from Bombay to Calcutta, which it was alleged constituted preferential treatment

The recommendations of the Committee in both these cases in the first in favour of the complainint and in the second in favour of the rallways concerned were accepted by Government

At the close of the year the committee had under investigation two out of the eight cases referred to them during the year and one, dealing reterred to them during the verrand one, dealing with the question of the levy by the Assam Bengal Railway of terminal charges on loose jute, which had been referred to them in October 1928. The enquiry in the latter case has been prolonged owing to the necessity for compiling detailed statistics showing the earnings from terminal charges and the averaged two constitutions. terminal charges and the expenditure on terminal facilities

Bengal and North-Western
The Bengal and North-Western Railway was constructed on the metre-gauge system by a company without any Government assistance other than free land and was opened to traffic in 1885. The system was begun in 1874 as the Tirhut State Railway. In 1890 this line was leased by Government to the Bengal and North-Western Railway. Since then extensive additions have been made in both sections. It is connected with the Rajputana metre-gauge system at Cawnpore and with the Eastern Bengal State Railway at Khatihar and the East Indian. Railway at Benares and Mokameh Ghat.

Bengal-Nagpur
The Bengal-Nagpur Ballway was commenced as a metre-gauge from Nagpur to Chhatisgarh in the Central Provinces in 1887. A company was formed under a guarantee which took over the line, converted it to the broadzauge and extended it to Howrah, Cuttack and Katni. In 1901 a part of the East Coast State Railway from Cuttack to Vizagapatam was transferred to it and in the same year sanction was given for an extension to the coal-fields and for a connection with the Branch of the East Indian Bailway at Harlharpur

Bombay Baroda
The Bombay, Baroda and Central India
Bailway is one of the original guaranteed
rallways It was commenced from Surat tra
Baroda to Ahmedabad, but was subsequently
extended to Bombay. The original contract
was terminable in 1880, but the period was
extended to 1905, and then renewed under
revised conditions In 1885 the RajputanaMalwa metre-gauge system of State railways
was leased to the Company and has since been
locorporated in it. On the opening of the
Nagda-Muttra, giving broad-gauge connection through Eastern Rajputana with Delhi
the working was entrusted to this Company
On the acquisition of the Company in April 1907
the purchase price was fixed at £11,685,581

Burma Railways
The Rurma Railway is an isolated line, and although various routes have been surveyed there is little prospect of its being connected

future In reply to a question in the Imperial Legislative Council in 1919, Sir Arthur Anderson said -' During 1914-15 extensive survey operations were carried out to ascertain the best alignment for a railway connection along the coast route between Chittagong and certain stations on the Burma Railways south of Mandalay A rival route via the Hukong Valley bethe northern section of the tween the northern section of the Assam-Bengal Rallway and the section of the Burma Rallways north of Mandalay was to have been tween surveyed during the following year but was postponed because of the war It is now proposed to commence this survey during the coming cold weather, and on its completion, Government will have sufficient information to enable them to decide which route shall be adopted Thus no arrangements for the construction of a line have yet been made nor has any concession been granted, but it is probable that the line selected will be built at the cost of Government and worked by one or other of the main lines which it will connect It was commenced as a State Hallway and transferred in 1896 to a Company under a guarantee From January 1st, 1929, its working has been taken over by the State

The Eastern Bengal State Railway was promoted under the original form of guarantee and was constructed on the broad-gauge. The first portion of the line running to Calcutta over the Ganges was opened in 1862. In 1874 sanction was granted for the construction on the metre-gauge of the Northern Bengal State Railway, which ran from the north bank of the Ganges to the foot of the Himalayas on the way to Darjeeling. These two portions of the line were amalgamated in 1884 into one State Railway.

East Indian
The East Indian Railway is one of the three railways sanctioned for construction as extern mental lines under the old form of cuarantee. The first section from Howrah to Pandua was opened in 1854 and at the time of the Mutny ran as far as Rankani It gives the only direct access to the port of Calcutta from Northern India and is consequently fed by all the large railway systems connected with it. In 1880 the Government purchased the line, paving the shareholders by annuties, but leased it again to the company to work an incident a contract which was terminable in 1919.

The contract was no terminated it i January 1st 1925, when the State took or the management From July 1st, 1925 the Outh 1 Rohllkhund railwa was amaigama 1 mgs i

INDIA AND CEYLON.

The possibility of connecting India and Ceyion by a railway across the bank of sand extending the whole way from Rameswaram to Mannar has been reported on from time to time, and since 1895 various schemes having been suggested

The South Indian Railway having been ex tended to Dhanushkodi, the southernmost point of Rameswaram Island, and the Ceylon Government Railway to Talaimannar, on Mannar Island, two points distant from each other about 21 miles across a narrow and shallow strait, the possibility of connecting these two terminal stations by a railway constructed on a solid embankment raised on the sand bank known as "Adam's Bridge," to supersede the ferry steamer service which has been established between these two points, is one of the schemes that has been investigated

In 1913, a detailed survey was made by the South Indian Railway Company, and the project contemplates the construction of a causeway from Dhanushkodi Point on the Indian side to Talaimanuan roint on the Indian side to Talat-mannar Point on the Ceylon side, a length of 20 05 miles of which 7 19 will be upon the dry land of the various lands, and 12 86 will be in water The sections on dry land will consist of low banks of sand pitched with coral and pre-sent no difficulty The section through the sea will be carried on a causeway which it is no will be carried on a causeway which it is proposed to construct in the following way A double row of reinforced concrete piles, pitched at 10 feet centres and having their inner faces 14 feet apart, will first be driven into the sand These piles will then be braced together longitudinally with light concrete arches and chains and transversely with concrete areas and chains and transversely with concrete ties, struts and chains Behind the piles slabs of reinforced concrete will be slipped into position, the bottom slabs being sunk well into the sand of the sea bottom. Lastly, the space enclosed by the slabs will be filled in with sand

The top of the concrete work will be carried to six feet above high water level, and the rails will be laid at that level. The sinking of the piles and slabs will be done by means of water jets. This causeway, it is expected, will cause the suspended sand brought up by the currents,

coast route appears to be the best one but at present would not be remunerative This would start from Chittagong, which is the terminus and headquarters of the Assam-Bengal Raijway and a seaport for the produce of Assam. The route runs southwards through the Chittagong district, a land of fertile nce fields intersected by big rivers and tidal creeks and it crosses the Indo-Burma frontier, 94 miles from the town of Chittagong. For about 160 from the town of Chittagong For about 160 miles further it chiefly runs through the fertile rice lands of Arrakan and crosses all the big tidal rivers of the Akyab delta These include the Kalidan river which drains 4,700 miles of country and even at a distance of about 30 miles from its mouth is more than half a mile wide About 260 miles from Chittagong the railway would run into the region of mangrove swamps which fringe the seacoast north and south of the harbour of Kaukkphu stretching out into the mangrove swamps like ribs from backbone Innumerable spurs of Arrakan Yoma have to be crossed Yoma is a mountain ridge which extends from Cape Negrals northwards until it loses itself in a mass of tangled hills east of Akyab and Chittacong At its southern end the height of the ridge is insignificant but it has peaks as high as 4,000 feet before it reaches the altitude of Sandway and further north it rises much higher It is a formidable obstacle to railway communication between India and Burma This route is estimated to cost about £7,000,000 and would have to be supplemented by branch lines to Akyab where there is at present a considerable rice traffic and the cost of this would have to be added to the £7,000,000 already referred to

The other coutes examined have been the Hukong Valley route and the Manipur route which were surveyed by the late Mr R A. Way many years ago The Manipur route was estimated to cost about £5,000,000 as it has to cross three main ranges of hills with summit levels of 2,650, 3,600 and 8,900 feet long. Altogether there would be about four miles of tunnelling through the three main ridges and through other hills and more than 100 miles of expensive un-dulating railway with grades as steep as 1 in 50 the suspended sand brought up by the currents, to settle on either side bringing about rapid accretion and eventually making one big island of Rameswaram island and Mannar island

Indo-Burma Connection

The raids of the Emden in the Bay of Bengal in 1914, and the temporary interruption of communications between India and Burma, stimulated the demand for a direct railway connection between India and Burma Government accepted the position and appointed Mr Richards, M. Inst. C E, to be the engineer-in-charge of the surveys to determine the best route for a railway from India to Burma. The and 11,000 feet of aggregate rise and fall

the state of the s

In contrast to the preceding year there was a slight fall in the total output of iron and steel The production of pig iron fell from 722,950 tons in 1929 to 695,923 tons in 1930, but there were increases in the production of steel (including steel rule) from 410,923 tons in 1929 to 427,035 tons in 1930, and of ferro-manginese from 3 630 tons in 1929 to 4,576 tons in 1930. The production of pig-fron by the Bengal Iron Co fell from 196,080 tons in 1929 to 103,929 tons in 1930 their output of products made from their plg iron in 1930 amounted to 3,153 tons of sleepers and chairs, and 34,833 tons of plges and other castings, against 11,153 tons and 32,445 tons, respectively, in 1929 The Indian Iron & Steel Co decreased their production of plg iron from 451,050 tons in 1929 to Rs 41 2 (£2 05)

to 354 772 tons in 1930 The output of pig-iron by the Mysore Iron Works fell from 21,452 tons in 1929 to 20,668 tons in 1930 The total production of pig iron in India fell from 1,391,541 tons in 1929 to 1,175,292 tons in 1930

Exports of Piguron — With the decrease in the production of pig iron in India recorded above, the quantity exported fell slightly from 548,881 tons in 1929 to 502,629 tons in 1930 Japan is still the principal consumer of Indian plg iron, but the proportion fell from 70 per

MANGANESE ORE.

This industry was started some thirty in Bihar and Orissa, with an initial production years ago by quarrying the deposits of the Vizagapatam district, and from an output of 674 tons in 1892, the production rose rapidly to 92,008 tons in 1900 when the richer deposits in the Central Provinces were also attacked, and are now yielding a larger quantity of ore than the Vizagapatam mines The most important deposits occur in the Central Pro rinces, Madras, Central India, and Mysorethe largest supply coming from the Central
Provinces The uses to which the ore is put
are somewhat varied The peroxide is used
by gloss manufacturers to destroy the green colour in glass making, and it is also used in porcelain painting and glazing for the brown colour which it yields The ore is now used in the manufacture of ferro-manganese for use in steel manufacture Since 1904, when the total output was 150,190 tons, the progress of the industry has been remarkable owing to the high prices prevailing

Record Output in 1927—Before the year 1926, the record production of manganese in India took place in the year 1907, when 902,291 tons were raised. In 1926, the output rose to 1,014,928 tons, valued at £2,590,357, fob Indian ports, the rise in output was, however, accompanied by a decrease in value In 1927 the production rose to the highest yet recorded figure of 1,129,353 tons, accompanied by a rise in value to the peak figure of £2,844,237,fob Indian ports During the year 1928, the upward tendency of manganese was not maintained, the output falling to 978,449 tons, valued at £2,321,201, fob Indian ports In 1928, the upward tendency was not maintained the output falling to 978,449 tons valued at £2,198,895 fob Indian ports In 1929, the output rose again slightly to 994,279 Record Output in 1927 -Before the year valued at £2,195,895 I O D indian ports In 1929, the output rose again slightly to 994,279 tons, but the value fell heavily to £1,571,030, and in 1930 the output fell substantially to 829,946 tons with a heavy fall in value to £1,200,236 The decrease, totalling 164,333 tons, was distributed over all producing districts and states, except Sandur State which showed an increase of some 5.000 tons. One new proan increase of some 5,000 tons One new producer appeared on the scene, namely Bonai State

of 165 tons

The continued fall in the price of manganese-ore from 1924 to 1930 is to be correlated with the fact that from 1924 to 1927 the rate of increase of the world's production of manganese-ore was much greater than the rate of increase in the world's production of plg iron and steel And although there was a fall in the world's output of manganese-ore in 1928, there was a very large increase in 1929, greater than was justified by the increased production of iron and steel in that year, and it is evident that the world's available supplies of manganeseore are now much in excess of requirements Russia, by non-economic methods of exploitation and finance, is able to place large quantities of ore on the market at a price well below both the critical figure of 13 0 pence referred to above and also below any revised figure allowing for the fall in index figures The large deposits of high-grade manganese-ore discovered near Postmasburg in South Africa are also being developed, and it may be anticipated that eventually South Africa will secure a substantial portion of the world's market It is not surportion of the world's market. It is not sur-prising, therefore, that in spite of the apparent prosperity of the Indian manganese industry in 1929 and 1930 as judged from figures of production and export, yet by 1930 the industry as a whole had arrived at a stage of relative depression, causing many operators to cease work.

The present chief sources of production of manganese-ore are now India, Russia, the Gold Coast, and Brazil, whilst substantial supplies of ore are forthcoming from Egypt and Czechoslovakia

There is a steady consumption of manganese-ore at the works of the three principal Indian iron and steel companies, not only for use in the steel furnaces of the Tata Iron and Steel Company and for the manufacture of ferro-manganese, but also for addition to the blast-furnace charge in the manufacture of pig-iron. The consumption of manganese-ore by the Indian iron and steel industry in 1930 amounted to 46,099 tons, against 47,435 tons in 1929

to 64,800 tons valued at Rs 64,80,075 (£480,005) against 67,408 tons valued at Rs 68,00,030 (£507,532) in the preceding year

Gem Stones -The only precious and semi-Gem Stones—The only precious and semi-precious stones at present mined in India are the diamond, ruby, sapphire, spinel tourmaline garnet, rock-crystal, agate cornelian, jadeite and amber The production of diamonds in Central India fell from 1 627 5 caracts valued at Rs 1 27,101 (£9,485) in 1920 to 1,321 2 caracts valued at Rs 72 533 (£5,373) Of this latter production 1,197 8 caracts were produced in Panna State and the remainder in Charkhari Ajrigarh and Bijawar

A severe decline in the output from the Mogok ruby mines of Upper Burma in 1924, followed in 1925 by a marked drop in value, bore witness to a serious decline in the industry The Burma Rubr Mines Limited, ultimately decided to go into liquidation and the mines were offered for sale in September, 1926 The skeleton organisation left in charge of the mines, however, made good use of its opportunities with the result that the value of the output in 1926 exceeded that of the previous year by over a lakh of rupees This encouraging result was

of a system of co-operation with local miners, and was assisted by some good finds of sapphires in the Kvaungdwin mine-the only one still worked by European methods

During 1927, however, production fell in value by over 14 lakes of rupees, due mainly to a decrease in the value of the supphires and spinels produced, there having been a slight increase in the value of the rubies During 1928, there was another very large decline in value, amounting to over a lakh of rupees, due to a severe drop in the value of the sapphires produced as before, there was a slight increase in the value of the rubies The value of the 1929 production was slightly above that of 1928, due to a considerable increase in the value of the rubles found, largely balanced by another large fall in the value of sapphires produced In 1930 there was a further substantial fall in production and in total value, though the value per carat of the sapphire produced is the highest recorded for many years Judging from reports in the Rangoon Times this is due to the opening up by the Burma Ruby Mines, Ltd, of the new Pagoda mine at Kathe leading to the find of a fine sapphire of 630 carats and a star sapphire of 298 carats effected by a rigorous economy and an extension | The find of a ruby of 100 carats was also reported

SALT

There was a slight increase in 1930 in the total output of salt amounting to some 2,000 tons a very substantial increase of 128,202 tons from Aden, with a small increase from Bombay and Sind, being largely neutralised by substantial falls in the output of Madras (79,452 tons) and Northern India (50,395) and a slight fall in Burma Imports of salt into India increased substantially by \$1,000 tons, the major portion of the increase being due to Italian East Africa, with smaller increases from Germany, Egypt and Spain Decreases were shown by the United Kingdom and Aden

Special Work

formed by the Chamber is that of arbitration are goods to be measured and during the busy in commercial disputes Rules for this have season are on duty early and late The certi-In commercial disputes Rules for this have season are on duty early and late. The commercial disputes Rules for this have season are on duty early and late. The commercial disputes and have decades granted show the following details—worked most satisfactorily. The decisions are in all cases given by competent arbitrators appointed by the General Committee of the Chamber and the system avoids the great expense of resort to the Law Courts

A special department of the Bombay Chamber is its Statistical Department, which prepares a large amount of statistical returns connected with the trade of the port and of great importance to the conduct of commerce The department consists of fourteen Indian work in the Customs House and have every Customs and at their disposal by the lities They compile all the Customs authorities They compile all the statistical information in connection with the trade of the port, in both export and import divisions, which it is desirable to record No other Chamber in India does similar work to the same extent

The Bombay Chamber publishes a Dally Arrival Return which shows the receipts into Bombay of cotton, wheat and seeds, and a Daily Trade Return, which deals with trade by sea and shows in great detail imports of various kinds of merchandise and of treasure while the same return contains particulars of the movements of merchant vessels

The Chamber publishes twice a week detailed reports known as Import and Export manifests, which give particulars of the cargo carried by each steamer to and from Bombay

Three statements are issued once a month One shows the quantity of exports of cotton seeds and wheat from the principal ports of the whole of India The second gives in detail imports from Europe, more particularly in regard to groy cloths, bleached cloths, Turkey red and scarlet cloths, printed and dred goods, fancy cloth of various descriptions, woollens, yarns, metals, kerosene oil, coal, aniline dyes, sugar, matches, wines and other sundry goods The third shows, classified, the number of packages of piece-goods and yarns imported by individual merchants.

The "Weekly Return" issued by the Chamber shows clearances of a large number for every co-of important designations of merchandisc, as annual su-

A return of "Current Quotations" is issued once a week, on the day of the departure of the English mail, and shows the rates of exchange for Bank and Mercantile Bills on England and Paris, and a large quantity of general banking and trade information

The annual reports of the Chamber are substantial tomes in which the whole of the affairs of the Chamber and the trade of the port during the past year are reviewed

The Chamber has also a Measurement Department with a staff of 10, whose business is that of actual measurement of exports in the docks before loading in steamers Certificates are issued by these officers with the authority of the Chamber to shippers and ship agents as to the measurement of cotton and other goods in bales or packages. The measurers One of the most important functions per- are in attendance on the quays whenever there

induced a row of wealth into Bombay, the in it centre of the trade, for which there wis no outlet. The consequence was an unprecidented outlinst of speculation known as the "Share Maria," and when the surrender of Lee is opened the Southern Ports widespread rule followed. It is estimated that the surplus wealth brought into the country by the American Civil War aggregated £02 millions. Since then the cultivation of Indian cotton, although interrupted by familie, has steadily increased for the last senson for which returns are available, 19-9-00 the total area in all territories reported on was computed at 25 022,000 neres and the total estimated outturn was 5,125,000 bales of 400 lbs.

B mbay, the Central Provinces and Hydrahad are the chief producing centres. The following table gives the rough distribution of the outturn. The figures are the estimated fluores for the past season, and are not exact, but they indicate the distribution of the crop.

Progress of the Industry

Far record of the jute industry may well be said to be one of uninterrupted progress. The following statement shows quinquennial averages from the earliest year for which complete information is available with actuals for each year from 1917-18 up to 1926-27 and the figures in brackets represent the variations for each period, taking the average of the quinquennium, from 1879-80 to 1883-84 as 100—

~ ·

The production of the mills has increased to a still greater extent. The following figures show the exports of jute manufactures and the declared values for the same periods. The value of jute manufactures exported by sea in 1924-25 was over thirty-three times as great as the average value of the export in the period 1879 80 to 1883 84.

î -

THE WOOL INDUSTRY

Wool expirted from India consists not only of well grown in India itself but of Imports from for the source—these latter coming into India to the level and by sea. In ports, by sea come—the term level but a certain quantity from 1 rsia also comes by land, while the mai in our are from Afghanistan Central Asi—lifet and Nepal Quetta, Shikar pur A riter and Multim are the main collecting—the street whence it is almost invarially raid in Karachi for subsequent export— is

Production in India—The production of wood in India is estimated at 60 million lbs the estimate being arrived at from the available figures of the number of sheep in the country and their estimated yield per fleece, the average quantity of wood yielded per sheep per annum being taken at only 2 lbs

All Indian wools are classed in the grade of carpet wools and it is correct to say of perhaps tally half the breeds of sheep found on the plains of India that they yield a kind of hair rather than of wool. They are reared chiefly on account of the mutton, and the fleece has been generally regarded as of subsidiary interest. In many respects in actual fact, the Indian plains sheep approximate more nearly to the accepted type of the goat rather than of the sheep. Short remarks in his manual on Indian cattle and sheep, particularly with respect to the Madras type, that they "resemble a greyhound with tucked up belly, having some coarseness of form, the feet light, the limbs bony, sides flat and the tall short"

Mill manufacture—The number of woollen mills at work in British India in 1902 was three, with an authorised capital of Rs 38,50,000, and employing 23,800 spindles and 624 looms The number of persons employed

in the industry then was 2,550, and the quantity of woollen goods produced 2 148,000, lbs At the end of 1917 the number of mills had reen to five, with an authorised capital of Rs 2,55 ,0 000 employing 30,608 spindles and 1,155 looms. The weight of goods produced then was 9 744,264 lbs and the number of persons employed 7,824. With regard to Indian States, there was one mill in Mysore in 1903 with a capital of Rs 6,00,000, employing 1,430 spindles and 45 looms. The quantity of goods produced was 1,136,000 lbs. and the number of persons employed 297. In 1907 there was still only the one mill working in an Indian State—the authorised capital had been increased to Rs 15,00 000, the quantity of goods produced to 1,724,087 lbs, and the number of persons employed to 563. Three of the mills manufacture all classes of woollen and worsted goods, the remainder manufacturing blankets only. The existence of these mills in India proved of great service to Government in the meeting of war requirements, and they were all employed to their fullest capacity in supplying army demands for great coat cloth, serges putties, flannels, blankets and hostery. Their total capacity, however, was not sufficient to meet the full requirements of the army, and consequently their supplies had to be supplemented by large imports from home. The bulk of the wool used by the Indian mills is Indian wool, although it is supplemented to some extent by the importation of merinos and cross-breds from Australia for the manufacture of the finer classes of goods. Their market for manufactured goods is almost en tirely in India itself.

Blanket weaving and carpet manufacture are carried on in various parts of the country, notably in the Punjab and the United Provinces Woollen pile carpets are made in many of the jails. Amritar had a considerable trade at one time in weaving shawls from pashm, the fine under ficece of the Tibetan goat, but its place has been taken to some degree by the manufacture of shawls from imported worsted yarns, but more generally by the manufacture of carpets of a fine quality which find a ready sale in the world market This work is done entirely on hand looms and the carpets fetch a high price

Bibliography —Notes on wool in India By A H Silver and J K Mehta, Govt Press, Calentta, (1919)

Silk Industry" In a short Prefatory note | Mr Bainbrigge Fletcher (Imperial Entomologist) explains that the object of the Bulletin is to place on record some of the more important experiments which were commenced at Pusa, in the year 1910 and have since been carried on in the endeavour to fix a superior multivoltine race of the Mulberry Silkworm which would not degenerate and which would vield silk better both in quality and outturn than that supplied by the multivoltine races which are reared at present

Central Nurseries—The report of the agricultural Department, Bengal, for the year ending June 30, 1913, gives an account of a scheme which has been devised with the object of reclaiming the silk industry. The aim of the scheme is gradually to establish throughout the slik districts a sufficient number of central nurseries with rearing houses and thus enable the whole of the seed cocoons required in the the whole of the seed cocoons required in the province to be supplied under Government supervision. It is believed that this is the only really effective method of dealing with the problem. A number of the existing smaller nurseries were closed during 1913 and others are being converted into enlarged and improved central nurseries with rearing houses complete The utimate success of the scheme depends

largely on the willingness of the rearers to pay an adequate price for pure seed

A pamphlet was published in 1915, by Mr M De, Sericultural Assistant at Pusa, which contains practical hints on improved methods which are recommended to be used for reeling mulberry silk in Bengal and other silk produc-ing districts It has been found that, by the provision of two small pulleys to the ordinary Bengal type of reeling machine, superior thread can be obtained, the cost of the extra apparatuis merely numinal (five or ela aunas per machine) whilst the suitability of the machine for cottage workers is maintained By attention to such simple points as the stifling and storage of cocoons and the temperature and quality of the water used in the reeling pane, great improvements can be effected in most slik centre in Bengal and other districts

Exports of Silk —As a result of the war the trade has shown in some degree signs of revival from its decadent condition, both as regards its volume and value. The value of exports during 1915-16 improved by Rs. 11 lakhs to Rs. 271 lakhs, of which raw sill accounted for Rs. 24 lakhs. In 1916 17 the total exports rose to Rs. 547 lakhs. In 1920 31 exports of raw silk and silk manufactures amounted to Rs. 10 lakhs in value, or a third of the total that of the residues reserved. of that of the previous year

Indigo.

a genus of Leguminosae which comprises some 300 species, distributed throughout the tropical and warm temperate regions of the globe, India having about 40 Western India may be described as the headquarters of the species, ro far as India is concerned, 25 being peculiar to that Presidency On the eastern side of India, in Bihar, Bengal, Assam and Burma, there is a marked decrease in the number of species but a visible increase in the prevalence of those that are met with

There is evidence that when Europeans first began to export the dee from India, it was procured from the Western Presidency and shipped from Surat It was carried by the Portuguese to Liebon and sold by them to the dyers of Holland, and it was the desire to obtain a more amyle supply of dye stuff that indicate the formation of the Dutch East India Company and so to the overthrow of the Portuguese supremacy in the East Opposition to indigo in 17th century Europe was keen owing to its interference with the wood industry, but it was competition to obtain indigo from other sources than India that led on the first decline of the Indian indigo industry There is evidence that when Europeans first on the first decline of the Indian indigo industry In the middle of the eighteenth century, when the cultivation of indigo in the West Indies had In the middle of the eighteenth century, when the cultivation of indigo in the West Indies had difficulties, have greatly correctly the been given up—partly on account of the high been given up—partly on account of the high duties imposed upon it and partly because sugar and coffee were found to be more profitable—the industry was revived in India, and as one of the many surprises of the industry, the province of Bengal was selected for this revival It had no sooner been organised, however, thun the quarter is fully distributed by the additional of the many surprises of the industry, the province of Bengal was selected for this revival It had no sooner been organised, however, thun the quarter is fully difficulties, have greatly a correctly the position of natural indication, have greatly all the position of natural indication, have greatly at the position of natural indication, have greatly at the position of natural indication, and as conference was find at Delive the position of natural indication, and as conference was find at Delive the position of natural indication, and as conference was find at Delive the position of natural indication, and as conference was find at Delive the position of natural indication, and as one indication, and as one indication of natural indication, and as one indication, and as one indication of natural indication, and as one indication, and as one indication of natural indication of natural indication of natural indication, and as one indication of natural indication of nat

Indigo dves are obtained from the Indigofera genus of Leguminosae which comprises some cuitivators and the Government, which may be said to have culminated in Lord Macmilat's famous Memorandum of 1837. This led to another migration of the industry from Lower and Eastern Bengal to Tirbut and the United Provinces Here the troubles of the industry did not end, for the researches of the chemical laboratories of Germany threatened the very existence of any natural vegetable due. The first killed the maddar due of Europe, then the safflower, the lac and the alders of India, and are now advancing rapidly with synthese indigo, intent on the complete anni-illation of the natural dve Opiniors differ on man aspects of the present vicis-itude, rean'in the exports from India have sectorly declined. the exports from India have scriously declined and salvation admittedly the in the rath of cheaper production both in colitivation and manufacture. These issues a chairs visconously faced and some progres has been accomplished, but the future of the industry can scarcely help being described as of great uncertainty. The is used the advantage of new regulations of land traure but one excusively of natural regular synthetic in 1/20 (See Watt's Commercial Products of India'). In this connection it no her nor of that increase in the price of coal in England, due to latour difficulties, have greatly suggested the

Tea.

Among plantation crops in India tea is the said, however, that the foundations of the most important. The indigenous tea plant, present tea industry were laid between 1856 growing in a wild condition was first discovered and 1850. Since the latter date the growth in Assam about 1820. It soon drew the attention of the Fast India Company, which after less than a hundred years the British Empire some enquires started an experimental garden has become the tea garden and tea shop of the in 1857. After working for five years it was world. handed over to the As am Company It may be

The following table shows the growth of the industry since 1875

Progress of the Industry

Year	Area under tea m 000 aerea	Production in 000,000 lbs	Year	Area under tea in 000 acres	Production in 000,000 lbs
1875 Trave 120) 1880 84 1855 89 1900 1904 1916 1915	173 241 307 500 533 594	34 57 90 195 249 352	1920 1925 1926 1926 1927 1928 1929	654 672 679 690 702 712	322 335 364 361 372 401

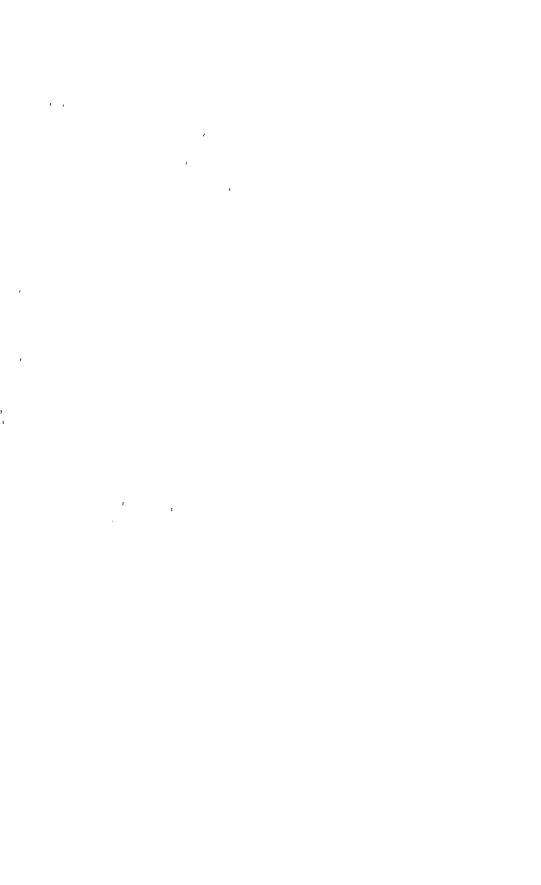

has increased more than ten times

It will be seen from the above table that. Assum and Bengal are the two most important during the last fifty years while the area under centres of the tea industry in India Assum alone teach is risen by over 300 per cent, the production accounting for more than half, the total production

The following table shows the various centres of the industry in the country and their relative Importance -

Provinces	Area under crop '000 acres	Production '000 lbs	Average dally working strength (permanent and temporary)

^{*} Less than 500 acres

of bangles and lampware side by side with bottle-making on a small scale. This, therefore, is the criterion which determines the two welldefined classes of the industry in its present stage, (i) indigenous Cottage Industry and (ii)

the modern Factory Industry

(i) The indigenous Cottage Industry which is representated in all parts of the country, but has its chief centres in Firozabad District of U P, and Belgaum District, in the South, is mainly concerned with the manufacture of cheap bangles made from glass cakes or blocks' made in larger Factories The industry is at present in a flourishing state and supplies nearly one-third of the ludian demand for bangles The quality has been improved by the discovery of new glazing processes and for the present the turnover in this line has gone up to 20 lakhs of rupees a year But these bangles have now to face a very hard competition from Japan whose "silky bangles are ousting the old type Indian ones

(ii) The modern factory type of organization of this Industry is just in its infuncy at present The existing Factories either -top at producing glass cakes for bangles as in Firozabad or simple kind of lampwares and bottles With the existing state of knowledge and machinery in India they can neither produce heet and plate glass, nor do they pretend to manufa ture laborator; or table glass Arti-ne glassware is out of the question and the private capitalists who have to run their concerns mostly with com mercial ends do not think it worth their while to spend money and labour on it War caused a great decrease in volume—though not so much in value which was much increased—of the imports of the lampware, etc., and in order to meet the Indian demand for them new Factories were started and old revived which produced only cheap and simple kind of lampware and bottles on small scale The total production of these Indian Glass Works has not been exactly estimated, but it is generally supposed that they were able to meet in these war years nearly half the Indian demand for this kind of glassware There are at present 14 Factories engaged in the production of lumpware, of which two or three only produce bottle and carboys The chief centres for the former kind are oala Bombay, Jubbulpore Allahabad and Bijhoi and Ambala, while bottles are only manufactured t Naini and Lahore, and recently at Calcutta

During the later years of the war period a number of Glass Works were opened in the Bombay Presidency and adjoining districts local manufacture having been stimulated by the cessation of imports of German, Austrian and Belgian glass

Causes of failure -Records of the earlier ventures have shown that the failures in some cases were due in part at least to preventible causes, prominent among which were (1) Lack of proper causes management (2) Lack of proper causes in the failures in some state of the failures in some state of the failures in some causes, prominent among which were (1) Lack of proper causes, prominent among which were (1) Lack of proper causes and Labour, 1922 causes and 1922 causes

commercial basis, as in some cases the proprietors had a number of other more larger concerns (3) Bad selection of site to look to an ideal site for a Glass Factory would be determined by the (a) nearness of quartz and fire-clay, (b) nearness of fuel, and (c) by the nearness of market At least two must be present concerns, two were absent (4) Specialisation was lacking, some factories in their initial stages trying to manufacture three or fou different kinds of glassware simultaneously like lamp-ware, bottles, and bangles, etc (5) Paucity of sufficient fluid capital for initial expenses for machinery or other improvements or even in some cases for running the concern in the beginning

But beyond these there are certain real and special causes that contributed to the failure of some of these and hinder the progress of the chief among them are (1) The Industry i in its infant stage and hence such failures are but incidental (2) No expert guidance in this ine, there is a lack of n en and good literature 3) Paucity of skilled labour of higher type the present Indian workmen in this line and blowers are few in number and Illiterate They, therefore, master the situation and are unamendable to management (4) Heavy cost of good fuel, the works usually being situated where good sand and quartz can be obtained, and onsequently, in most cases, at a great distance from the coal-fields (5) To a certain extent, competition from Japan and European countries

Aikalı used is almost entirely of Luglish manufacture being Carbonate of Soda 98-99% This Alkali has almost in a powdered form completely taken place of the various Alkaline Earths formerly employed by the Glass Bangle manufactures as the latter cannot be used in the manufacture of glass which is to compete with the imported article These points must be carefully noted for future guidance

The Industry developed considerably under conditions, but in peace times, in this transition stage, immediate efforts must be made in the direction of what the Indian Industrial Commission say in their Report (Appendix E) riz "The Glass Industry, even in its simplest form is highly technical and can be eilici ently carried on only by scientifically trained managers and expert workmen. The present The present stage has been reached by importing men, only partially equipped with the necessary qualifi-cations, from Europe and Japan, and by sending Indian students abroad to pick up what know ledge they can The glass industry is a closed trade and its secrets are arefully guarded, so that the latter method has not proved conspiouously successful."

INDIAN INVENTIONS AND DESIGNS.

A handbook to the Patent Office in India for some twenty years Difficulties which is published by the Government from an uncertainty as to the effect of the Press, Calcutta, gives the various Acts, rules, Royal Prerogative Drevented earlier action, action, and instructions bearing on the subject together with hints for the preparation of specifications with muts for the preparation of specifications and drawings, bints for scarchers and other valuable information that has not hitherto Royal Prerogative prevented earlier action, and, owing to some informalities the Act itself valuable information that has not hitherto been readily accessible to the general public in so convenient a form. In the preface the Controller of Patents and Designs explains explains explains the scope of the Patent laws in India and indicates where in they differ from English laws. and, owing to some informatities the Act itself was repealed in the following year. In 1859 it was re-enacted with modifications, and in 1872 the Patterns and Designs Protection Act was passed. The protection of Inventions Act of 1883, dealing with exhibitions, followed, and indicates wherein they differ from English law of 1883, dealing with exhibitions, followed, and the inventions and Declara Act of 1888 and procedure then the Inventions and Designs Act of 1888 The foundation of patent legislation through All these are now replaced by the present Act of 1911

out the world lies in the English Out the world lies in the English Statute of Monopolies, which was enacted in 1623, the 21st vear of King James the First In part this Act has been repealed, but the extant portion Statute of of the more important section 6 is as follows or the more important section o is as ionows—
"Provided also that any declaration before
mentioned shall not extend to any letters
patent and grants of privilege for the term
of fourteen venrs or under, hereafter to be made patent and grants of privilege for the term of fourteen years or under, hereafter to be made the sole working or making of any manner of new manufactures within this realm to the true and first inventor and inventors of such true and first inventor and inventors of such manufactures, which others at the time of making of such letters patent and grants shall not use, so as also they be not contrary to the law nor mischlevous to the State by raising or commodifies at home or hurt of trade. prices of commodities at home, or hurt of trade, or generally inconvenient, the said fourten Sears to be accomplished from the date of the first letters patent or grants of such accomplished from the date of the years to be accomplished from the date of the first letters patent or grants of such privilege hereafter to be made, but that the same shall be of such force as they should be if this Act hereafter.

contained in the Indian Patents and Designs
Act, 1911 supplemented by the Indian Patents
and Designs (Temporary Rules) Act 1915 and
the Rules made under those Acts The The existing Indian Patent Law is contained in the Indian Patents and Designs Act, 1911 supplemented by the Indian Patents and Designs (Temporary Rules) Act 1915 and by the Rules made under those Acts The Patent Office does not deal with trade many or with copyright generally in books, pictures, or with copyright generally in books, pictures, music and other matters which fall under the Indian Copyright Act III of 1914 Indeed the registration of Iaw in British Indian for being the priority given to Indian Patents and (IV of 1889) which forms Chapter XVIII of the cation Similarly a cation Similarly of the Indian Inventors (IV of 1860).

On the whole, Indian law and procedure closely follow that in the United Kingdom for the protection of in ventions and the registration the protection of inventions and the registration of designs, as they always have done in matters of major interest. One main difference exists, further amended by Act VII of 1936 and inof designs, as they always have done in matters of major interest. One main difference exists, however, as owing to the absence of provision of frade manie. nowever, as owing to the absence of provision of law for the registration of trade marks; India cannot become a party to the International Convention under which certain rights of priority are obtainable in other countries

The first Indian Act for granting exclusive Privileges to inventors was passed in 1856, after an agitation that had been carried on fitfully

. "

The existing Acts extend to the whole of British India, including British Baluchistan and the Santhal Parganas This of course includes Burma, but it does not embrace the Native States Of the latter three, viz, (1) Hyderabad (Deccan), (2) Mysore, (3) Gwallor have ordinances of their own for which particulars unit be obtained from the Government of the States be obtained from the Government of the States in question as they are not administered by the Indian Patent Office in Calcutta The object of the Act of th by the Indian Patent Office in Calcutta The op-ject of the Act or 1911 was to provide a simpler more direct, and more effective procedure in regard both to the grant of patent rights and to their subsequent existence and operation The changes made in the law need of here he retheir subsequent existence and operation The changes made in the law need not here be referred to in detail They gave further protection both to the inventor, by providing that his application should be kept secret until the facilities for opposition at an effective period At the same time a Controller of Fower to dispose of many matters previously Patents and Design was established, with power to dispose of many matters previously referred to the Governor-General in Council, referred to the Governor-General in Council, and provision was made for the grant of a sealed "patent," instead of for the mere exclusive privilege." The modifications those of the Art follow with the necessary modifications those of the British Inventions and Designs Act of 1907

12 months from the date of the Indian appli-12 months from the date of the Indian application. Similarly an applicant for a British india for 12 months from the date of his British

If an Application comprises more than one invention the additional inventions may be made the subject matter of additional applications having the same date. may be made the samplest matter of additional applications bearing the same date

The term of the Patent will be 16 years

The net income of the Indian companies under thir life assurance business from premiums and interest amounted to 17/8 crores in 10.0 and was in excess of 2.3 crore over the corresponding Income of the previous very Chims amounted to 1.23 crore and exceeded the previous very singure by 1 crore. Claims by death showed an increase of 87 lakhs and claims by survivance of 1.4 lakhs. For the first time during 1020 claims by survivance were larger than claims by death.

The life assurance funds increased to over 11 cross during 1929 and amount dito 181 cross-

at the end of that year. The average rate of interest carned on the life funds during the year was nearly 54 per cent as against 5 1/3 per cent realised in the previous year.

The Post Office Insurance Fund was instituted by the Government of India in 1883 for the buefit of the postal employes but gradually admission to it has been thrown open to almost all classes of Government servants who are employed on civil duties

The following are some of the important particulars relating to the business of the Fund during the two years 1920 and 1930 —

~				+		
1	New busine a during vent		in torce a	se remaining tithe end cycar		Life

Fire, Marine and Miscellaneous Insurance Business. The net Indian premium income of all companies under insurance business other than life assurance during 1020 was nearly 3 crores of which the Indian companies' slare was over 1 crore and that of the non Indian companies nearly 21 crores. The total amount is composed of—

- 1,55 lakhs from fire.
 - 68 lakhs from marine, and
 - 76 laklis from miscellaneous insurance business

The Indian companies received-

23 lakhs from fire,

- 11 lakhs from marine, and
- 18 laklis from miscellaneous insurance business

The total assets of Indian companies amount to 25 crores of which the stock exchange sourifles form the bulk. These securities are shown in the accounts at a net value of 18 crores. Loans on policies and mortgages are shown at 21 crore, land and house property are valued at 11 crore, deposits, cash, stamps, ctc are shown at 11 crore agents' balances and other outstanding items at 1 crore, and loans on personal security and other miscellaneous assets at 2 crore. Over half a crore of the total assets of the Indian companies is invested outside India

vary from province to province The governing principle in flying these rates is the highest duty compatible with the prevention of illicit distillation In the Bombay Presidency the issue of spirit to all country spirit shops has been rationed on the basis of consumption for the year 1920-21 From that consumption reduced to proof gallons 10 per cent is deducted in the case of shops in Bombay City and 5 per cent elsewhere and the ration is then fixed for each shop according to the issues in the corresponding month of This is the most important step taken by the new Government to reduce consumption Two large distilleries in the Presidency have been placed entirely under Government management, thus partially superseding the Contract Distilling system

Sap of the date, palmyra, and cocoanut palms called toddy, is used as a drink either fresh or after fermentation In Madras and Bombay the revenue is obtained from a fixed fee on every tree from which it is intended to draw the liquor and from shop license fees In Bengal and Burma the sale of shop licenses is the sole form of taxation Country brands of rum, and so called brandies and whiskies, are distilled from grape The manufacture is carried out in juice, etc private distilleries in various parts of India A number of breweries has been established, mostly in the hills, for the manufacture of a light beer for European and Eurasian consump-The uniform fee of 8 annas per gallon is tion levied all over India at the time of issue

Foreign liquor is subject to an import duty at the tariff rates, which are set out in the Customs Tariff $(q \ v)$ It can only be sold under a license

Since the war Brandy and Whisky have been manufactured in considerable quantities at Baroda

The base used is the Mhowra flower It is drunk in big towns as a substitute for German spirit, and is excised at tariff rates

Drugs -The narcotic products of the hemp plant consumed in India fall under three main categories, namely, ganja or the dry flowering tops of the cultivated female hemp plant charas, or the resinous matter which forms an | Provec into Province

active drug when collected separately, and bhang, or the dried leaves of the hemp plant whether male or female cultivated or uncultivated. The main features of the existing system are restricted cultivation under supervision, storage in Bonded Warehouses, payment of a quantitative duty before igsue, retail sale under licenses and restriction on private possession Licenses to retail all forms of hemp drugs are usually sold by auction The sale of charas has been prohibited in the Bombay Presidency except Sindh from the 1st April 1922

Opium -Opium is consumed in all provinces in India The drug is commonly taken in the form of pills, but in some places, chiefly on social and ceremonial occasions, it is drunk dissolved in water Opium smoking also prevails in the City of Bombay and other large towns. The general practice is to sell opium from the Government Treasury, or a Central Warehouse, to licensed vendors. The right of retail to the public is sold by annual auction to one or several sanctioned shops Further legislation against opium smoking in clubs and dens is now under contemplation

The revenue from opium is derived mainly from exports of what is called provision opium to foreign countries and from the sale to Provincial Governments of excise optum for internal consumption in India The entire quantity is now exported under the system of direct sales to Foreign and Colonial governments, the system of auction sales in Calcutta to traders for export of authors having been stopped with effect from 7th April, 1926 In no case are exports permitted without an import certificate by the Government of the country of import as prescribed by the League of Nations

It has been decided to reduce the total of the opium exported since the calendar vear 1926 by 10 per cent annually in each subsequent year until exports are totally extinguished at the end of 1935

Excise opium is sold to Provincial Governments for internal consumption in India at a fixed price based on the cost of production. This oplum is retailed to licensed vendors at rates fixed by the Provincial Governments and varying from

SALT.

The salt revenue was inherited by the British and evaporated by solar heat. In the Rann Government from Native rule, together with a of Cutch the brine is also evaporated by solar miscellaneous transit dues. These transit dues heat and the product is known as Baragara were abolished and the salt duty consolidated and raised There are four great sources of that salt were opened in Dhrangadhra State in supply, rock salt from the Salt range and 1923 In Bombay and Vadras sea water is Kohat Mines in the Punjab, brine salt from let into shallow pans on the sea-coast and evathe Sambhar Lake in Raiputana, salt brine porated by solar heat and the product sold condensed on the borders of the lesser Rann of throughout India In Bengal the damp climate

The Salt Range mines contains an inexhaustible supply They are worked in chambers excavated in salt strata, some of which are 250 feet long, 45 feet wide and 200 feet high The Raiputana are comes from the Sewitz from the Sambhar Lake

salt Important works for the manufacture of that salt were opened in Dhrangadhra State in 1928 In Bombay and Vadras sea water is Cutch, and sea salt factories in Bombay, Madras together with the large volume of fresh water and at the mouth of the Indus the Bay of Bengal render the manufacture of sen-salt difficult and the bulk of the supply, both for Bengal and Burma is imported from Liverpool, Germany Aden, Bombay and Madras.

retained at 31 per cent, the duty on machinery | 1906 was retained at 21 per cent and the duty on cotton plece-goods at 11 per cent, the other increases being accepted In 1925 the Cotton Exclae duties were finally abolished Full details with regard to the customs duty are set out in the section on Indian Customs Tariff (q v) The Customs duties have been repeatedly raised in recent Budgets both as a protective measure and for revenue purposes The latest duties will be found in detail under the 1930 31 and 1932-33 taxation proposals in the Financial Section of the Year Book The estimated revenue from the Customs in 1930-31 is Rs 41 49

The Senior Collectors were Covenanted Civilians specially chosen for this duty, before the introduction of the Imperial Customs Service in

Since that date, of the five Collectorship at the principal ports (Calcutta, Bombay, Madras, Rangoon, and Karachi) three are ordinarily reserved for Members of the I C. S (1 e, "Covenanted Civilians") The other two are reserved for members of the Imperial Customs Service

Assistant Collectors in the Imperial Customs Service are recruited in two ways (a) from members of the Indian Civil Service-3 vacancies, and (b) by the Secretary of State-19 vacancies There are in addition a few Gazetted Officers in what is known as the Provincial Customs Service These posts are in the gift of the Government of India, and are usually filled by promotion from the subordinate (in the Government sense of the word) service The "subordinate" staff is recruited entirely in India

INCOME TAX.

The income tax was first imposed in 2,000 rupees at the rate of four pies in the rupee India in 1860, in order to meet the financial or about 5d in the pound. In March 1903 dislocation caused by the Mutiny It was the minimum taxable income was raised from levied at the rate of four per cent or a 500 to 1,000 rupees. The income tax schedule little more than 9 id in the pound on all incomes was completely revised raised, and graduated of five hundred rupees and upwards. Many in the Budget of 1916-17 in the general scale of of five hundred rupees and upwards Many changes have from time to time been made in the system, and the present schedule was con- arising out of war conditions solidated in the Act of 1886. This imposed a Since then the process has been This imposed a than agriculture which were exempted incomes of 2,000 rupees and upwards it fell raising fresh revenue. The last tevision was at the rate of five pies in the rupee, or about in the Supplementary Finance Bill of 1931, 61d in the pound, on incomes between 500 and when the scale was fixed as follows—

into the reserve, the remainder being used for capital expenditure on railways. The Gold capital expenditure on railways. The Gold Standard Reserve was called into action before the year 1907-08 was out Exchange turned against India, and in March 1908, the Government of India offered bills on the Secretary of State up to half a million sterling, while the Secretary of State sold £1,000,000 Consols in order to meet such demands During April to August, further sterling bills were sold for a total amount of £8,058,000 On a representation by the Government of India, the Secretary of State agreed to defer the application of coinage profits to railway construction until the sterling assets of the Gold Standard Reserve amounted to £25,000,000 On the outbreak of the war in August 1914 the Reserve was drawn upon to meet the demands for sterling remittances, and Government offer to sell£1,000,000 of Bills weekly

Since 1870 there had been no colnage of double mohurs in India and the last coinage of single mohurs before 1918 in which year coinage

was resumed, was in the year 1891-92

A Royal proclamation was issued in 1918 establishing a branch of the Royal Mint at Bombay It stated —Subject to the provision of this proclamation the Bombay Branch Mint shall for the purpose of the coinage of gold coins chall for the purpose of the collage of gold coins be deemed to be part of the Mint, and accordingly, (a) the Deputy Master of the Bombay Branch Mint shall comply with all directions he may receive from the Master of the Mint whether as regards the expenditure to be into the Madras and Bombay Presidencies by Act XXII of 1844 curred or the returns to be made or the transmission of specimen coins to England or otherwise and (b) the said specimen coins shall be subject to the trial of the px under section 12 of the Coinage Act, 1870, so that they shall be examined separately from the coins coined in Double pice or half-anna England or at any other branch of the Mint, and (c) the Deputy Master of the Bombay Branch Mint and other officers and persons employed for the purpose of carrying on the business of the Branch Mint may be appointed, promoted, suspended and removed and their duties assigned and salaries awarded and in accordance with the provisions of section 15 of the Coinage Act, 1870 Pending the completion of the arrange-ments at the Branch, Royal Mint, power was taken by legislation to coin in India gold mohurs of the same weight and fineness as the sovereign Altogether 2,109,703 pieces of these new coins of the nominal value of Rs 3 16,45,545, were struck at the Bombay Mint The actual coinage of sovereigns was begun in August, 1918, and 1,295,372 sovereigns were coined during the year This branch of the Royal Mint was closed in April, 1919, owing to difficulties in supplying the necessary staff.

The Indian Currency Act of 1927 established mohurs of the same weight and fineness as the

rate of one shilling and fivepence forty-nine from circulation

one-half of the coinage profits should be paid | sixty-fourths was notified as Government's selling rate for sterling to meet these obligations

> With the receipt of large consignments of gold, the Bombay Mint made special arrangements for the refining of gold by the chlorine process and at the end of the year 1919 20 the Refinery Department was capable of refining a daily amount of 6,000 ounces of raw gold The Refinery turned out 16,62,466 fine tolas of refined gold in 1920-21

mas closed in April, 1919, owing to dimedities scribed the design of the coin, which has a waved in supplying the necessary staff edge with twelve scollops, the greatest diameter. The Indian Currency Act of 1927 established of the coin being 21 millimetres and its least a new ratio of the rupee to gold. It established diameter 19 8 millimetres. The desirability of this ratio at one shilling and slypence by enacting that Government would purchase gold at a by the Government of India in 1999, but after price of twenty-one rupees three annas ten consultation with Local Governments it was ples per tola of fine gold in the form of bars decided not to take action in this direction until containing not less than forty tolas and would the people had become thoroughly familiar with sell gold or, at the option of Government the present one-anna coin The two-anna sterling, for immediate delivers in London at inicial coin was introduced in 1917-18, and the the same price after allowing for the normal four-anna and eight-anna nickel coins in 1910 cost of transport from Bombay to London A. The eight-anna nickel is now being withdrawn

in India were cashed at the Government Treasuries Now if the Secretary of State sold Council Bills only to meet his actual requirements, it follows that the balance of trade in favour of India over and above this figure would be liquidated, as it is in other countries, by the importation of bullion or by the creation of It is a fact that owing to the failure credits of the policy of encouraging an active gold circulation to support the gold standard, gold tended to accumulate in India in embarrassing quantities In 1904 therefore the Secretary of State declared his intention of selling Council Bills on India without limit at the price of one shilling fourpence one-eighth—that is to say gold import point The effect of this policy was to limit the import of gold to India, for it was generally more convenient to deposit the gold in London and to obtain Council Bills against it. than to ship the gold to India Nevertheless as the Egyptian cotton crop was very largely financed in sovereigns it was sometimes cheaper and more convenient to ship sovereigns from Egypt, or even from Australia, than to buy Council Bills Considerable quantities sovereigns found their way into India and circulated freely, particularly in the Bombay Presidency, the Punjab and parts of the Central Provinces

Sterling Remittance -This aystem worked until 1907-08 A partial failure of the rains in India in 1907, and the general financial stringency all over the world which followed the American financial crisis in the autumn, caused the Indian exchange to become weak in Novem-This was one of the occasions contemplated, in a different form, by the Fowler Committee when it proposed the formation of the Gold Standard Reserve There had been very heavy coining of rupees in India and the amount in the Reserve was ample But the Reserve was in securities not in gold, and was therefore not in a active workers in it as a "limping standard

liquid form, nor was the time an opportune one for the realisation of securities Moreover the authorities did not realise that a reserve is for use in times of emergency It had been assumed that in times of weakness it would be sufficient for the Secretary of State to stop selling Council Bills, and it would firm up , meantime he would finance himself by drawing on the funds in the Gold Standard Reserve But it was apparent that the stoppage of the sales of Councils was not enough, there was an insistent demand for the export of gold, or the equivalent of gold The Government of India refused and exchange fell to one and threepence twenty-three thirtyseconds Ultimately the authorities had to give It was decided to sell in India a certain quantity of sterling bills on London at one and threepence twenty-nine thirty seconds, representing gold export point, and the equivalent of the export of gold These were met in London from the funds in the Gold Standard Reserve to the extent of between eight and nine millions sterling were sold, which regularised the position and the Indian export trade recovered were gradually evolved the main principles of the Indian currency system It consisted of silver rupees and rupee notes in India, with the sovereign and half sovereign unlimited legal tender at the rate of fifteen rupees to the sovereign, or one and fourpence. The rate of exchange was prevented from rising above gold import point by the unlimited sale of Council Bills at gold point in London, it was prevented from falling below gold point by the sale of Sterling Bills (commonly called Reverse Councils) at gold export point in India But it was not the system proposed by the Fowler Committee, for there was no gold mint and only a limited gold circulation, some people invented for it the novel term of the gold exchange standard, a term unknown to the law of India It was described by one of the most

THE CHAMBERLAIN COMMITTEE

This brings us to the year 1913 There were ! many critics of the system Some hankered for a return to the open mints, others objected to the practice of unlimited sales of Council Bills as forcing rupees into circulation in excess of the requirements of the country But the general advantages of a fixed exchange were so great as to smother the voices of the critics, and the trade and commerce of the country adjusted itself to the one and fourpenny rupee But there gradually grew up a formidable body of criticism directed against the administrative measures taken by the India Office These criticisms were chiefly directed at the investment of the Gold Standard Reserve in securities instead of keeping it in gold in India, at a raid on that reserve in order temporarily to relieve the Government of the difficulty of financing its railway expenditure, at the transfer of a solid block of the Paper Jurrency Reserve from India to London, at the nording of a portion of the Gold Standard Peserve in sliver in order to facilitate the coining of rupees, and at the unlimited sales of Council Bills at rates which prevented the free flow of gold to India, thus forcing token rupees into circulation in quantities in excess of the require- [as the Chamberlain Committee

ments of the country. The cumulative effect of this policy was to transfer from India to London an immense block of India's resources, aggregating over seventy millions, where they were lent out at low rates of interest to the London bankers, whilst India was starved of money until at one point money was not available for loans even against Government securities and the bank rate was artificially high All these things were done, it was contended, on the obiter duta of a small Finance Committee of the India Office, from which all Indian influence was excluded, and on which London banking influence was supreme The India Office for long ignored this criticism, until it was summarised in a series of articles in Tle Times and public opinion was focussed on the discussion through the action of the India Office in purchasing a big block of allver for coining purposes from Messrs Montagu & Co. instead of through their recognised and constituted agents, the Bank of England The Government could no longer afford to stand aloof and yet another Currency afford to stand also and yet also he chairman-committee was appointed under the chairman-thin of Mr. Austen Chamberlain. This is known ship of Mr. Au-ten Chamberlain

(1) Thereducido corthe tineves or weight of are expedients that cannot be recommended

(iii) The incintenance of the convertibility of the note issue is essential, and proposals that the cost of do not adequal protect the Indian paper | Kingdom cuttency from the risk of becoming inconverti bir connor be entertained

(ar) The rise in exchange, in so far as it has chiefaed and mitigated the rise in Indian prices, has been to the advantage of the country as a whole, and it is desirable to secure the continuance of this benealt

(c) In firm trade is not lik it to suffer ant primary a injury from the fixing of exchange at

a blah level

If contrary to expectation, a great and rapid fall in world prices were to take place and if the costs of production in India fail to adjust themenlyes with equal rapidity to the lower level of prices, then it might be necessary to consider the problem afterh

(ri) The development of Indian industry would not be seriously hampered by a high rate

of exchange

(rii) The gain to India of a high rate of exchange for meeting the Home charges is an incidental advantage that must be taken into conelderation

(riii) To postpone fixing a stable rate of exchange would be open to serious criticism and entail prolongation of Government control
(ix) The balance of advantage is decidedly

on the elde of fixing the exchange value of the rupce in terms of gold rather than in terms of sterling

(x) The stable relation to be established between the rupes and gold should be as the rate of R* 10 to one sovereign, or, in other words at the rate of one rupes for 11 30,016 grains of fine gold, both for foreign exchange and for

internal circulation

(xi) If sliver rises for more than a brief period apovethe parity of 2s (gold), the situation should be met by all other available means rather than by impairing the convertibility of the note issue Such mercures might be (a) reduction of sale of Council Billa, (b) abstention from purchase of Fliver, (c) use of gold to meet demand for metal-lic currency If it should be absolutely necescare to purenage silver, the Government should be prepared to purchase even at a price such that rupees would be coined at a lo-s

(211) Council Drafts are primarily sold not for the convenience of trade but to provide for the Home charges in the wider sense of the term There is no obligation to sell drafts to meet all trade demands but, if without inconvenience or with advantage the Secretary of State is in a position to sell drafts in excess of his immediate needs, when a trade demand for them exists, there is no objection to his doing so subject to due regard being paid to the principles governing

the location of the reverves

Council Drafts should be sold as now by open tender at competitive rates, a minimum rate being fixed from time to time on the basis of the sering cost of shipping gold to India At present this rate will vary but when sterling is again equivalent to gold, it will remain uniform

The Government of Indiashould by authorised the raper the issue of 2 or 3-rupee coins to announce, without previous reference to the of lower proportional silver content than Secretary of State on each occasion, their readithe present rupee or that sue of a nickel rupee, mess to sell weekly a stated amount of Peverse Councils (including telegraphic transfers) during periods of exchange weakness at a price based on the cost of shipping gold from India to the United

> (xili) The import and export of gold to and from India should be free from Government control

> (xir) The statutors minimum for the metallie portion of the Paper Currency Reserve should be 40 per cent of the gross circulation

> As regarde the fiduciary portion of the reserve the holding of securities i-sued by the Government of India should be limited to 20 crores The balance should be held in securities of other Governments comprised within the British Empire, and of the amount so held not more than 10 crores should have more than one year smaturity and all should be redeemable at a fixed date. The balance of the invested portion above these 30 crores should be held in short-dated securities, with not more than one year's mcturity, issued by Government within the British Empire

> The sterling investments and gold in the Paper Currency Reserve should be revalued at 2s to the rupee The depreciation which will result from this revaluation, cannot be made good at once, but any savings resulting from the rise in exchange will afford a suitable means of discharging this liability in a limited number of years

> (xr) With a view to meeting the seasonal demand for additional currency, provision should be made for the issue of notes up to five crores over and above the normal fiduciary issue as loans to the Presidency Banks on the security of export bills of exchange

> Minority Report -The main object of the Committee, it will be seen, was to secure a stable rate of exchange, without impairing the convertibility of the Note I sue, and without debasing the standard silver rupee in India, or substituting another coin of inferior metallic content, which would be dehasement in another form In order to attain these ends it was imperative to fix a ratio for the rupee in relation to gold which would ensure that the Government was able to purchase eliver for coining purposes without more than temporary loss For reasons given in the report they fixed this point at two shillings gold all other recommendations are subsidiary thereto But in this they were not unanimous an important member of the Committee, Mr Dadiba Dalal, of Bomoav, appended a minority report in which he urged the adoption of the following course"

- (a) The money standard in India should remein unaltered, that is, the standard of the sovereign and gold mohur with rupees related thereto at the ratio of 15 to 1
- (b) Free and unfettered imports and exports by the public of gold bullion and gold coins
- (c) Free and unfettered imports and exports by the public of silver bullion and silver coins
- (d) The existing silver rupees of 165 grains of fine silver at present in circulation to continue full legal tender

A Minute of Dissent —Whilst all the mem-A Minute of Dissent — whise an the members of the commission signed the report, one of the number of the Purshotandas Thakordas, the first part of the Minute Str. Purshotandas did so subject to a minute of dissent In the first part of this Minute Sir Purshotamdas subjected the long correspondence between on currency policy to a detailed analysis on currency to which he came were that throughout the Government of India had striven fixed as the liability in respect of the contractibility of the rupe, circulation of the contractitions are made to secure that an amount equal or decrease in the number of silver rupes in the face value of any increase cessive secretaries of State, who had in view of the contraction of the face value of silver rupes in the number of to one fifth of the face value of any increase cessive Secretaries of State, who had in the number of silver rupees in something which was often called the

The rise in the volume of the paper currency | sation which would link currency with credit in Pombar there was started a Currency With credit is one of the most remarkable features in Indian in ancial history It developed from no change in the status of the note itself, it was always convertible on demand but from increased facility. vertible on demand, but from increased facilitles for the encashment of notes, beginning with the introduction of universal notes of small denomination and steadily progressing as experience was gained the conclusion of the Commission that the best We can therefore endorse Way to foster the use of currency notes is to establish confidence in their practical convertibility, and this confidence has been secured not 80 much by a legal obligation to encash them at currency offices as by making rupees readily available to the public at centres where there is a demand for them.

There has been another factor in popularising the note which commands less attention The rise in prices made the rupea an unsuitable medium for large commercial There has been another transactions from the bulk and weight of the amount of currency required

The Commission therefore propose that whilst the legal obligation to convert into rupees all the legal obligation to convert into rupees and the notes in circulation shall remain this obligation should not attach to the new notes to be issued by the Central Bank, and coincidentally the one rupee note, which had acquired great popularity before it was discontinued on the ground of economy, shall be re issued. The Central Rank will be to legal obligation on the Central Bank will be to Rive legal tender money, either notes of smaller denominations or silver rupees, at its option, that it will be the duty of the Real to complete the complete that the duty of the Real to complete the complete that the complete the complete that the complete the complete that the co but it will be the duty of the Bank to supply rupees freely in such quantities as may be rerupees ireely in such quantities as may be reguired for circulation, and of the Government to furnish the Bank with such coin rency Position is such that the change in the legal status of the note will be unfelt suffering from a surfeit of rupees, the total Suffering from a surreit of rupees, the total volume of which is estimated at approximately Rs 400 crores. There are Rs 85 crores of silver.

The whole tendency coin and bullion in reserve will be in the direction of a return of rupees to will be in the direction of a return of rupees to the reserve rather than to an appetite therefor Not only will there exist the fullest capacity to The whole tendency supply rupees on demand, but there will be a supply rupees on demand, but there will be a positive inducement to the currency authority to encourage a demand for rupees in order to get rid of its redundant stock. It is clear that the present opportunity of freeing the currency authority from the dependence on the silver market which has hampered India for so many years is exceptionally favourable, and should be seized without hesitation

The reception of the Report followed very closely the lines indicated as probable in the article in The Bankers' Magazine which we have article in The Bankers' Magazine which we have quoted extensively above There was a considerable protest, strongest in Western India the proposal to stabilise the rupee at one shilling and sixpence and a demand for a reversion to and streence and a demand for a reversion to one and fourpence. There was, particularly Bank, with the functions proposed to be remitted to the Reserve Bank. These voices were so loud that they overbore the consideration of the basic recommendations of the Report, a true gold

In Bombay there was started a Currency League main efforts were directed to the ratio, and to the idea that the legal ratio should be one and four, not one and six

In August 1926 the Government published the text of a Bill designed to fix the intio at one and six, and to support it by the sale of bullion on the lines laid down in the Report quest of a large body of opinion in the Legislative Assembly, which urged that there had not been Assembly, which urged that there and not been time to study the Report and that the papers were not available the discussion of this measure was postponed until the 1927 session On the company of India beautiful to the company of India beautifu orember 18th the Government of India Essued a notification to the following effect "After considering the report of the Royal Com-

mission on Indian Currency and Finance the Secretary of State for India in Council in agreement with the Government of India, is prepared to accept as a whole the recommendations of the Commission subject to such further considera tion of details as may prove to be necessary. The necessary legislation to give effect to these recommendations will be introduced in the Indian mendations will be meroduced in the factoring session.

The new Ratio —So far from closing the discussion this notification intensified Feeling ran high on the subject of the ratio, convinced that one shilling and sixpence was a higher rate than the manufacturing and agricultural industries could bear without prolonged and disastrous readjustment found strong expression when the Bill to give effect to the new rate was brought before the Legislative Assembly in February March 1927 The Indian Currency Bill was however accepted by the Assembly by a small majority, and adopted by the Council of State It established the ratio of one shilling and sixpence by enacting the ravio of one snining and sixpence by enacting that the Government would purchase gold at a price of twenty-one rupers three annas ten ples per tola of fine gold in the form of bars containing not loss than torre tolas and would call taining not less than forty tolas and would sell gold or, at the option of Government 4t-rling for immediate delivery in London at the same price after allowing for the normal cost of transport from Bombar to London A rate of one shilling fivepence forty-nine sixty-fourths Was notified as Government's selling rate for sterling to meet these obligations

Exchange has since remained stable at the one and sixp nor rate, but the proposal to establish a Reserve Rank for the control of Currency has not matured owing to differences between the not matured owing to dinerences between the form of the Bank World trade depression in made it increasingly difficult and sixpence and a demand for a reversion to one and fourpence. There was, partien to in Bombay, a reluctance to agree to the establishment of the Reserve Bank, coupled with the sterling. But the Imperial Bank of India should sterling. By the end of the Gold standard sterling, with the functions proposed to be remitable. In September 1931 and the rules was linked to sterling. By the end of the year expents of from India had been and on December 1931. the last few that made it increasingly difficult for the Gottenment of India to maintain the statutory ratio but their difficulties were solved made in the Gotten and the statutory ratio but their difficulties were solved when Grant Intrain want of the Gott standard standard, and the establishment of an organirate had risen to 1,6 1, compared with 1 527

THE RESERVE BANK

An essential part of the scheme formulated by Currency Commission was the formation of a Reserve Bank, to take over the Note Issue act as a true banker's bank. The Commission pointed out that India was one of the few great Countries where the control of currency was divorced from the control of credit, and where divorced from the control of credit, and where Government carried out immense financial immense financial and propose transactions through its own agency, and propose the Reserve Bank as the apex of the new finan-

The Government accepted these recommenda tions, and in January 1927 introduced a Bill to give effect to the Commission's advice give enect to the commissions advice. They proposed a shareholders bank, with a commercial directorate tempered by Government nominees, and a new agreement with the Imperial imposed. The Bill was referred to a Selant Bank freeing it from some of the restrictions imposed. The Bill was referred to a Select Committee, when a marked divergence of opinion was manifested. A majority of the Committee carried recommendations for the transferance of a shareholders' bank into a State Bank. ference of a shareholders' bank into a StateBank. lerence of a snareholders wank into a State Bank, with a strong element of directors selected by the legislatures. This changed Bill was before the legislature in September, and was withdrawn the Covernment for further consideration. by the Government for further consideration, by the Government for intriner consideration, it being understood that the Secretary of State for India objected to the drastic changes made in the original scheme.

These objections to the original scheme have been summarised under the following heads
That a Reserve Bank in charge of the credit and anat a Reserve Dank in charge of the credit and currency should be responsible to the legislature that only a State Bank would carry the ture that only a State Bank would carry the confidence of the people, that a Reserve Bank does not require much capital, and therefore

there was no need to create a body of share holders and that if a bank with share capital was created there was the risk of it falling under the domination of foreign capitalists, or of Indian

LOTAL

The real ground of objection was the first the legislature sought to make the Bank responsible to the legislature that opened the great question whether the Reserve Bank should be

The New Bill —After conferring with the authorities in London, the Finance Member authorities in London, the Finance Member published in January 1928 the draft of an entirely new Bill On the main point it was noompromising. It provided for a share-interest in the management by sciuded political members of the legislatures were precluded from interest in the management by stipulating that members of the legislatures were precluded from becoming directors. On all other points it sought to meet the objections to the original members of the original of the original of the original origin The provisions in this respect governed the directorate and the qualifications for share-As these are important they are set out here -

The Shareholders —(1) The original share capital of the Bank shall be five crores of supees divided into shares of one hundred rupees. capital of the Dank Suan be live crores of rupees divided into shares of one hundred rupees each, which shall be fully paid up

(2) No amount in excess of twenty thousand rupees shall be issued to any one person or to any two or more persons fointly, and no person that the character of two or more persons jointly, and no person shall be allowed to acquire an interest in the share capital of the Bank, whether held in his own right, or held jointly with others, or held partly to a value in excess of twenty thousand rupees

The fires from Kirachi are as follows—to Lighdad 244 to Athens 269 to London 1295. The through fare from Karachi to London allows for a weight of 100 kilos (221 pounds) per pas enger, and a passenger i entitled to free conveyance of luggige to the extent of the difference between his own weight and the 221 pounds mentioned above. The rate for excess luggige is just over twelve shillness partillo. Children in arms are weighed with and carried under the same tickets as their mothers or nurses, and other children are others of full fare.

On the Indian State Air Service between harachi and Delhi, ria Todhpur, the fare is Its 160, and the same rule regarding baggage applies but the charge for excess baggage is naturally its

Africa and the Far East

Several new air services which are of considerable importance to India have been inaugurated, and of these the most notable is the Ingland Africa service which connects with the Ingland-India service by a connection from the to Gallice and provides an entirely new route between Delhi and South Africa

Other important air lines recently established are the Irtach service between Paris and Saigon and the Dutch service between Amsterdam and Batavia, both of which pass through Baghdad and Karachi

Baghdad, in particular, is developing rapidly in importance and it is said, not without reason, that it will soon become the Clapham Junction of the air This will certainly be the case if the projected services from Persia and Russia materialise

The proposed extension of the England-India all mail to Australia is still under discussion—a state of affairs which conceivably may be hastened by the establishment of the 1 rench and Dutch services to the Far East,

to endorse their programme of "progressive five years Now, it was not full boycott, the non-violent non-co operation" which was ban being placed only on the legislatures reiterated by the annual session at Nagpur Sadder and wiser—but, unfortunately, not which, on Mr Gandhi's motion, changed its sufficiently sad and wise—he exempted law old creed into "the attainment by India of country, schools, etc., from his scheme. Complete the country of the attainment by India of country, schools, etc., from his scheme. Complete the country of the coun Swirij by allegitimate and peaceful means "independence was declared and non-co-operation. The stern measures adopted by local Govern- was revived. Indeed the Congress Executive ments led to the Imprisonment of a large was authorised to give the signal also for a number of active Congressmen with the campaign of non-payment of taxes and civil result that the Ahmedabad Congress in 1921 grim resolve to challenge the pression movement 'bu appointing Mr Gandhi as dictator and by resolving to start a 'No Tax' campaign at Bardoli The riots in Chauri Chaurs in 1922 preceded by the Bombay riots in 1921 during the Prince of Wales Visit (ser 1923 and 1924 editions of this book) opened Wr Gandhis eves to the impossibility of imaintaining a non-violent atmosphere under exciting He suspended his proposed civil disobedience emprign and replaced it by what is known as the Bardoll Programme which eschewed all the aggressive items of non-co operation in favour of the promotion of inter-communal unity and khaddar Soon after Mr Gandhi was arrested for sedition, tried and sentenced to undergo imprisonment for six years (See 1923 and 1924 editions)

This turn of events threw cold water ou the enthusiasm of non co-operators who got discouraged In order, therefore, to sound the country's readiness for aggressive action once more, the All-India Congress Committee appoint ed a Committee, known as the Civil Disobedience Committee in June 1922 The Committee toured the country and in October, 1922, pro duced two reports, one favouring Council cutry to offerobstruction to Government and the other recommending the adoption of the Bardoli Programme A battle royal ensued between the two parties for two or three years, the Swara-pists—or the 'Co operators,' as they were derisively called by the non-co operators— carrying the div throughout Every little triumph of the Swirijists meant a diminution of the prestige and influence of the No-Changers
This went on for some time until the Belgaum
session of the Congress, presided over by
Mr Gandhi himself, suspended the non-cooperation programme. Thereby the movement
was practically killed, and, strange to say, it
received its death-blow at the hands of the
prescapathor of its hears. But the fond recreat very author of its being. But the fond p did not lose heart and blded his time But the fond parent chance came in 1928 when the Congress was split into two warring camps One was ready to accept Dominion Status for India, while the other would have nothing short of independent the proposed more than the p dence At the psychological moment Mr Gandhi staged a re-entry into the political arena—he had been but a silent spectator during Gandhi staged a re-entry into the political members of the Commission Even moderates, arena—he had been but a silent spectator during reputed for their sobriety and reasonableness the five preceding years—and, professing to affected extremism. The Vicerov endeavoured effect a compromise within the Congress, provided —but in valu—to explain the position to a loophole for the revival of non-co-operation Indian leaders (See Year Book of 1928) Although Dominion Status was actually declared in 1929 to be the goal of Indian political progress, Mr Gandhi insisted on having it on the spot and when that was naturally refused be returned to his old love, non-co-operation and bovcott |

as revited indeed the signal also for a campaign of non-payment of taxes and civil disobedience Early in 1930 the Congress executive appointed Mr Gandhi as 'Dictator for all India and give him power to launch civil disobedience as and when he thought fit. This Mr Gandhi did in March and practically the whole country was set ablaze was open deflance of the law all over the land notwithstanding the efforts of the Government to put down illegal activities The movement naned by the end of the year through sheer exhaustion and civil disobedience was suspended carly in 1931 as a result of negotiations between the Vicerov and Mr Gandhi The year 1931 was a year of negotiations although the discussions centred round alleged breaches of the Vicerov Gandhiunderstanding. The efforts for Peace were carried to the point of inducing Ir Gandhi to participate in the Round Table Conference in London to formulate a constitution for India All this however, proved to be a full in the storm which again broke out in full r fury early in the New Year

Congress in 1925-30

The career of the Congress between the Belgrum session, when the N C O movement was suspended, and the verrs 1929-30, when civil disobedience was revived, was comparatively dull During the first half of 1925 the Congress policy was one of aimless drift The death of Mr C R Das demoralised the Swarzjists Mr Gandhi promptly went to their rescue and at the end of the year the Swarnists' political programme was formally adopted by the Cawnpore Congress The 41st session of the Congress, which met in Assam during Christmas week in 1926, set its face against the acceptance of ministerships or other offices in the gift of the Government-in other words, discountenanced "Responsive Co-operation", a new creed which had sprung up within the Swarajist ranks and approved of the policy of rejection of budget and refusal of supplies until a response to the 'national demand' was forthcoming

All this talk and quarrel about the internal affairs of the Congress were set at rest by the non-inclusion of Indians on the personnel of the Royal Commission on Indian Reforms Most of the leaders rancied that it would be an insult to India if Indians were not appointed

Congressmen, of course, met during Christmas 1927 and resolved to boycott the Simon Commission, declared independence as the goal of Indua and offered some solutions for the Hindu-He had been biding his time, and the astute Muslim problem. In the following year the politician, that he is, he reintroduced in Congress in its plenary session at Calcutta December 1929 his formula that had been dead declared specifically, though conditionally, that

By the time the Hierals foregathered at Midris things had moved pretty rapidly in Congress calls of Severance of Ligits. Connection led "Hiterals to break away from the extremete". Once again the Liberals extressed disapproval of Congress methods. Bir Phiro. So than who presided denounced the molement which aimed at the severance of India's connection with the Impiro and opposed the campaign of civil disobedience.

The liberal Parts s leaders had a busy time of it throughout the year 1930. They had, on the one hand to set their faces against the civil disobedience movement conducted by the Congre's and, on the other, to prepare a strong for Indian Reforms such as would withstand the attack of dichards in Britain.

Among the British Indian Delegation to the Round Table Conference the Liberal Party had a large representation consisting of twelve members out of 57. These members played a very important part on the various committees of the Conference in London. Two among them namely, Sir Tej Balandur Sapru and the Rt. Hon V S. Sastri, were mainly responsible for guiding and directing the proposals of the

were allowed to meet in Allahabad to discuss, informal conferences to arrive at an understandthe pronouncement. At first they were in no mood to see the merits of the scheme and had all but decided to reject it when they received an appeal from Sir Tej Bahadur Sapru and the Rt. Hon. V. S. Sastri to defer decision until after they had interviewed the Vicerov Lord Irwin. Mr. Gandhi took the whole of the Congress Working Committee with him to Delhi where numerous interviews took place between Mr. Gandhi and the Working Committee on the one hand and H I the Vicerov and his Procutive Council on the other. As a result of these negotiations the Congress agreed to give up its larren and ruinous policy of non co-operation and the Irwin Gandhi Pact was concluded whereby Mr. Gandhi on behalf of the Congress accepted the three main planks of the Premier's statement and consented to particle pate in the Round Table Conference

The annual section of the Congress which met at Karrehi shortly after ratified the pact by an overwhelming majority and chose Mr Gandhi as its sole representative at the London Conference. Petween then and his departure however a controversy arose over the fulfilment of the terms of the Delhi Pact, especially regard ing the release of prisoners the return of forfeited property and relief in the shape of remission of find resenue to those personts who had become impoveri h d as a result of their participation in the tongress no rent campaign after Itolonged and delicate negotiations carried on a nt Simia between Mr. Gandhi and the new Viceroy Lord Willingdon another agreement was arrived at which in effect confirmed the Delhi' Pact and by meeting some of the Congress demands enabled Mr. Gandhi to sail for London.

The session of the second Round Table Conference began with the meetings of the Federal Structure Committee Progress however unfortunately hampered firstly by the British General Flections as a result of which the members of the Cabinet could space little time for Indian affairs and, secondly, by the unhelpful—described by some as obstructive, attitude of the Minoritles especially the Mahome dans. They declared that unless their rights were effectively safeguarded in the new constitu tion they would non co-operate with the work of the Conference

Indeed, at one time it was feared that the Conference would be brought to an abrupt end without achieving anything substantial The return to the House of Commons of about 500 Conservatives and the presence in the new National Government of a majority of Tories lent strength to this fear. It was actually proposed to restrict the Reforms to the grant Provincial Autonomy, but an influential letter addressed to the Premicr and signed by all the Liberal and Independent members of the Conference, not excluding Messrs Gandhi and Malaviya, brought about a welcome result. It is believed that this strong attitude on the part of the majority of the delegates induced the Premier to talk the Muslims round

By far the greatest difficulty which confronted this session of the Conference was the communal problem, the Minorities question The Minoritles Committee of the Conference was called only to be adjourned and for some weeks the members of the various communities held ing The Muslim had already crystallised their demands in the shape of their Fourteen Points (see the Muslim section) The depressed classes which had till then consented to joint electorates with reservation of seats now made a somers rult and plumped for separate electorates Turopeans and Anglo Indians and to a certain extent the Sikhs also joined Numerous proposals were made and after prolonged negotiations the differences were narrowed down to one or two sents in one or two provincial legislatures But unfortunately unwise counsels prevailed and the schism between the majority (Hindus) and the minorities became unbridgeable. This led the minorities alone to enter into a covenant for safeguarding their rights

The Congress attitude was uncompromisingly set out by Mr Candhi who however, yielded ground to the Princes to enable them to enter the Federation and to the Mahomedans for sateguarding their position. But on the question of the depressed classes he was adamant and refused to concede them separate electorates on the ground that the depressed classes formed part of the Hindu community and any distincserve to widen them and Hindus would only serve to widen the gulf between them He suggested adult franchise and representation on a population basis

The Liberal delegates who besides the Congress,

were the only non-communal political party represented at the Conference strove their utmost to bring about a settlement. While they were willing to concede to the Muslims their claims for -afeguards they were not prepared to allow any provision which would impede the formation of nationhood and create a

spirit of communalism

Exentually however, the Conference ended inconclusively and the Premier announced the Pritish Government's scheme of constitutional reforms in India based on the numerous viewpoints that were expressed during the delibera-This scheme was embodied in a White Paper which was immediately placed before the House of Commons and almost unanimously adopted by that body

The White Paper is a long document which, generally speaking, confirmed the Premier's January statement. Only the safeguards were defined more clearly and emphasised in the light of Sir Samuel Houre's speech in the House of Commons namely that they were a condition, precedent to the grant of responsibility in the the Clearer assurances were also given to the Minorities that Parliament would not enact any new legislation unless their rights were specifically and amply safeguarded

The White Paper also foreshadowed the appointment of three committees of the Conference to proceed to India (1) a committee presided over by Lord Lothian to recommend any franchise reform (2) a committee under the Chairmanship of the Rt. Hon. J. C. C. Davidson, to record on the financial expects of Davidson, to report on the financial aspects of the States joining the Federation, and (3) a committee under the Chairmanship of Lord Enstace Percy to suggest financial arrangements new Federal Government The under the personnel of these Committees was not announced before the end of the year

The resident of the League made a firm declaration that to constitution derived for the future of India would be acceptable to the Muslims unless their rights were adequately ta'eguarded

Unlike fre lous years, a determined effort was made in 1931 to effect a Congre a Muslim agree ment "Imflir efforts had, of course, been made In the part, but the, were only of acidemic invicet. This pear communal agreement became a according in view of the important deliberations in London concerning the future constitution of India. The ratification of the Delhi Pact by the Congress and its resolve to participate in the London Conference brought the communal issue to the forefront. The first Round Table Conference had ended with an assurance by the Premier that no legislation result he would be received.

And If the Congress afforded to the minorities. noted to have its relieme accepted by tenference it was up to it to early the Muslims with it laced with the task of making a structure properly the Congress scriously ert etseit maying provisions satisfactory to the Medica and other minorities

It was fer this reason that Mr. Gandhi declared the culd ut to to London without Hindua work on heretending with them. He Gandhi held more to us consultations with prominent Mu lim leaders

The le lies of the community, who lind not the health in er mi es made by the Hindu ridden or a retused to be entistled with anything then entropy quarantees for the protection of the rights and privile in Their suspicions are in reason by the manner in which a few meral exact their community styling themselves him to the teners the leaders the task of course in a received more coupler. A review of conversations was held in the manner between Mr Gandhi, the Muslim is dere and the Nationalist Muslims, but no treful cheme emerged

The Latter leaders on the other hand, strove to a districtic position of the community and type cut a united front at the Round Table tenferere. A special se ion of the All-India Mu lim C nference reiterated the Muslims' Fourten Loints and proced some outspoken regulation. One of these expressed the opinion that the so called non victimes of the Satsaerable con fiting in many cases of students of celle, examt chools is a more sham. little short of on unclean political atratagem adopted in the face of the superior organised forces of the State and es t off in dealing between the communities! The resolution affirmed that the continuance of the majority community in its present state of mind would produce civil war. It accused the British authorities of spineless handling of the polition and warned them that their pandering to the Congress would ruln the country Mr Shankat All in his presidential address to the Conference appealed to the Hindus to accept the Muslim demands A good deal he said depended on the good sense reasonableness and 'let India vi dom of the Hindu community necept the hand of peace offered by Britain in the same way as Maslins will grasp the hand of Hindus if the litter show a change of heart' concluded

The Conference was so strong on the question of guarantees for the continued enjoyment of their rights that a proposal was seriously discussed that if their demands were not conceded the Muslim delegates should refuse to co-operate with the Round Table Conference and oppose Dominion Status or responsibility at the centre The discussion, however, was adjourned sine die

As time presed on it became increasingly evident to the Muslim lenders that Mr Gandhi was trying to play off the Nationalist Muslims against the whole community, and Mr Shaukat All gave a stern and timely warning to Mr Gandhi and the Congress "Mr Gandhi is a danger in Indian polities I am afraid he wants not only Hindus and Muslims to average by not only Hindus and Muslims to quarrel but would be undertal on without entisfaction being desires Muslims and Muslims to cut one another's

For some years since then one heard little | Maulana Shaukat Ali about the public activities of the Committee, the departed leader in domestic quarrels although many of its public of the engaged the attention which could hardly be specified leaders found the Khilafat organisation a useful tool for purposes of their propaganda for boy-cotting the Statutory Commission on Indian Reforms This was successfully achieved by the the London Conference, the Ali brothers effectextremist wire-pullers at Madras in 1927

In the next verr, however, a peculiar situation arose as the result of the publication of the Nehru Report This document raised many controversial issues Its two main recommenda tions, namely, Dominion Status for India and joint electorates with temporary reservation of seats, were not acceptable to the Khilafatists whose ideal was an extreme type of nationalism They wanted coupled with rank communalism complete independence for India but insisted on the continuance of separate electorates Thi-state of mind found expression at the annual session of the Khilafat Conference which met in 1928 at Calcutta

In the years following the publication of the Nehru Report, the Khilaiat Committee re appeared on the Indian political stage and vigorously strove to repudiate that document This it succeeded in doing, as the Muslims with one voice condemned it as pro-Hindu As months passed by, it became increasingly clear to the Muslims that the Congress was getting more and more Hindu-ridden and that they could not expect due protection for their communal rights from the Congress or its eaders. The appreciation of this situation by the Muslim masses was mainly due to the activities of the Khilafat Committee and its leaders. Thus when the approached the Government for the appoint-Knilafat Conference met in Lahore in 1929 it ment of the Haj Inquiry Committee. It was resolved that the Khilafatists should particularly great services to the pilgrims by ticipatein the Round Table Conference convened by the British Government to settle the future constitution of India, although in the same breath the Conference declared itself in favour of independence This latter, however, was but a wordy sop to the extremists, as the main body of Khilafat workers started in 1929 and continued since then a regular fight against the Congress

In the past two years, in addition to the effective prevention of the Muslims from joining the Congress unless the communal question was satisfactorily settled, the Khilafat Committee did a considerable work abroad The Ali brothers, who were the soul of the Khilafat movement, worked for the Arab federation and the Tanzim of Mussulmans all over the world During this time, the movement lost Maulana Mahomed All, who passed away in London in the midst of his strenuous work for his country and his co-religionists, and the work of carrying of allied organisations were also held in Bombay, on the increasing activities of the Khilafat such as the first All India Yuslim Volunteers' Committee fell on the shoulders of his brother Conference and the Muslim Youths' Conference

The invitation to bury the departed leader in the mosque of Omar in Jerusalem brought the Indian Muslims closer to the Arabs This fellow feeling among Muslims Funds, however, continued to be collected in different parts of the globe found expression for the "activities" of the Committee in a huge conference held in Jerusalem which Things served to create a newspirit of internationalism dragged on until the latter half of 1927, when the among the followers of Islam—one of the cherished objects of the Indian Khilafatists

> ively safeguarded their interests. In addition, Maulana Shaukat Ali repeatedly impressed on British audiences and leaders the advisability of keeping the Indain Muslims contented as it would please Muslims in other parts of the world

> The history of the Khilafat movement followed a peculiar course on the North-Western Frontier Province of India There the Khilafat organisation conducted a ceaseless agitation over the local grievances of the Muslim population and the disaffection towards the Government thus created was promptly exploited by the Congress for furthering its own lawless activities Being sturdy people accustomed to fighting, they often found it impossible to observe the Congress creed of non-violence A number of clashes ensued, with attendant casualties

> The Khilafat Committee also did a lot of constructive work during the past two or three years It inculcated a spirit of swadeshism among the Muslim masses, worked for their educational and social upliftment and organised an efficient volunteer corps for maintaining order at public meetings, processions, demonstrations, etc., and in restoring peace in areas where communal tension had prevailed volunteers did much useful work in Bombay, Calcutta, Bangalore and Delhi The Committee giving facilities for their journey, supplying them with information and literature concerning the holy places and attending to their comforts in countless other ways A number of night schools were established in Rangoon, Delhi, Bombay and other places for the education of the adults of the community In Bombay alone there are 30 night schools The committee also organised a volunteer corps with 5,000 "regulars" They made themselves useful maintaining order at public meetings, processions, demonstrations, etc, and also in restoring peace in areas where communal restoring peace in areas tension had prevailed

> The 1931 session of the Khilafat Conference was held in March in Bombay under the presidency of Maulana Abdul Majid of Badaun who repudiated the Congress charge that the Muslims were traitors to the country, and affirmed that they were only fighting for their rights. Neetings

The main fertures of this Pact were -

Special Claims of Mussulmans —A. The North-West Troutler Trovince shall be constituted a Governor's Province on the same footing as other Provinces with due regard to the necesears requirements for the security of the I contler

In the formation of the Provincial Legislature the nominations shall not exceed more than , 10 per cent of the whole

- Sind shall be separated from the Bombay Presidence and made a Governor's Province similar to and on the same footing as other Provinces in British India
- proportion set forth in the Annexure

Special Claims of the Depressed Classes - A He constitution shall declare invalid any et elem or nexte by which any penalty or disedizantee or disability is imposed upon or any el crimination is made quality any subject of the State in regard to the enforment of civic ri ht on a count of Untouclability

- Genrous treatment in the matter of recruitment to Public Service and the orening of call tment in the Police and Military Service
- The Depressed Classes in the Punjab shall I we the length of the Punjab Land Allenation ict extended to them
- D 11, ht of Appeal shall lie to the Governor of General General for redress of prejudicial action or neglect of interest by any Executive ti thorits
- I The Depressed Classes shall have representation rotles than that set forth in the Annexure

Special Claims of the Anglo-Indian Community—1 Generous interpretation of the claims admitted by Sub-Committee No VIII (Services) to the effect that in recognition of the reculiar position of the community special can ideration should be given to the claim for jullic employment, having regard to the maintenance of an adequate standard of living

B. The right to administer and control its , own educational institutions, i.e. Luropean education, sulfect to the control of the Minister

Provisions for generous and adequate grants in aid and scholarships on the basis of present Frants

Tury rights equal to those enjoyed by of the communities in India unconditionally of proof of legitimacy and descent and the right of accused persons to claim trial by either a Eurogean or an Indian jury

Special Claims of the European Community -The Minorities Pact—It has been explained by Indian-born subjects in all industrial and commercial activities

a procedure cannot be introduced except with the previous consent of the Governor General

Federalism Resumed -The failure of efforts to settle the minorities question, and the conclusion of this Pact, created a new situation It has been made clear that the acceptance of responsibility at the Centre, the crux of the lederal Scheme, was conditional, so far as the Moslems were concerned, on the settlement of the communal issue It was therefore a question whether any useful purpose would be served by continuing to consider a constitution from which the seventy millions of Moslems, not to speak of the other minorities, stood aloof The doubt was cleared when the Jederal Structures Committee resumed its sittings on the 16th November, and the spokesmen for the Moslem Community announced that they were willing that the C Mussulman representation in the Central discussions should go forward, on the express D gislature shall be one third of the total number condition that they reserved to themselves the of the House, and their representation in the proviso that unless and until the Moslem demands Central LegLlature shall not be less than the and safeguards were incorporated in the constitution of the representation of the constitution of t tution it would not be acceptable to them

federation necessarily remains inchoate, and an the new constitution which would have the important factor in determining the decision of Individual States as to adherence to the Federation will be lacking In view of the Federation will be lacking In view of the admitted difficulties of the question, the Committee are unxious to assist by friendly suggestions towards the consummation of an acceptable and generally accepted conclusion The Committee are fully aware that the effective establish-The Comment of federation postulates the adherence of the major States and that the absence of even a few of the most important States, however many of the smallest might be included, would place the Federation under grave disadvantages
At the same time, they think that it is essential
that the States as a whole should secure representation which will commend itself to public provide adequate representation for those which cover large areas

Two suggestions have been advanced, in the course of the Committee's discussions, for the solution of this problem The first was that the solution of this problem. The first was that the matter should be entrusted to the Chamber of Princes, with such arrangements as would secure an adequate voice in its deliberations to the small States, and to such States as are not repre-sented in the Chamber at all The second, based on the belief that the inherent difficulties of the problem would prove such that the Princesacting through whatever agency—would be unable to evolve a plan which would meet with general acceptance and satisfy all claims, and consequently that a procedure based upon the first suggestion would merely involve infructuous delay, was that the task of apportionment should be remitted to an impartial Committee or tribunal on which the States themselves should not be given any representation, but before which they would all be invited to urge their claims

The Committee are not in a position, for reasons already stated, to make any definite recom-mendation as to the acceptance of either of these mendation as to the acceptance of either of these suggestions, but they consider that the best course would be to allow a period of time, which should not, they think, extend beyond the end of March, 1982, within which the Princes should be invited to arrive at a settlement, on the understanding that, if within that period a settlement were not in fact secured, an impartial tribunal would be set up by His Majesty's Government to advise as to the determination of the matter of the matter

Special Interests.—We affirm our Special Interests.—We affirm our previous recommendation that provision should be made for the special representation of the Landlord interest, of Commerce (European and Indian) and of Labour The number of seats to be assigned to each of these four interests and their apportionment amongst the various Provinces are questions which should be considered by the Franchise Committee, as also is the ques tion of their method of election Wherever possible, the method should be election rather than nomination

effect of placing either Chamber of the Federal Legislature in a position of legal subordination to the other It would be a misconception of the aims which we have in view to regard either Chamber as a drag or impediment on the activitles of the other In our view, the two Chambers will be complementary to each other, each representing somewhat different, but we hope, not antagonistic, aspects of the Federation as a whole Absolute equality between the two Chambers of a bicameral Legislature is no doubt unattainable, and, if it were attainable, might well result in perpetual deadlock, and there is no less doubt that, the provisions of the constitu-tion notwithstanding, the evolution of political development will inevitably result, in the course of time, in placing the centre of gravity in one Chamber

But so far as the letter of the constitution is concerned we consider that, subject to the consideration shortly to be mentioned, there would be no justification for endowing one Chamber at the outset with legislative powers which are denied to the other We accordingly recommend that, while the constitution should provide that, subject to the special provisions to be referred to later, no Bill should become law until it is assented to by both Chambers, it should contain no provisions which would disable either Chamber from initiating, amending or rejecting any Bill, whatever its character This principle should, however, in the opinion of almost all the British Indian Delegates, be subject to the exception that the right of initiating Money Bills should vest in the Lower Chamber alone, though the States Delegation were almost unanimously opposed to the drawing of this distinction Subject, of course, to the decision on the point just mentioned, the principle of equality also appears to us to demand that the Government should be entitled to test the opinion of the other Chamber if one Chamber has seen fit to reject a Government Bill, and that in the event of its passage by the Second Chamber it should be treated as a Bill initiated in that Chamber and taken again to the first

In the event of rejection by one Chamber of a Bill which has been passed by the other, or of its acceptance by either in a form to which the other will not agree, we recommend that, subject to certain conditions which should be set out in the constitution, the Governor General should have power, either after the lapse of a specified period or, in cases of urgency, at once, to secure the adjustment of the difference of opinion by summoning a Joint Session

As regards the voting of Supply, the opinion of British Indian Delegates was almost unanimously in favour of confining this function to the Lower Chamber Their view was based on the precedent afforded in this respect, not on the precedent about in the state of the precedent about in the state of the actual powers which have been enjoyed, by the Indian Legislative Assembly during the past ten years The States Delegates, however, The two Chambers.—The careful consideration we have now given to the matter has led principle of equality of powers should apply us to the view that nothing should be done in also to the voting of Supply In their view

Federal decitation to the allocation of Income, of equality of treatment ought to be established that is a Practice of the deach, in so far as an I that the Committee of the whole Conference is a refer to a local access of oull we suggest, at their meeting on January 19th, 1931, adopted to the little part of the Report to the little part of the Silver on the local of the Minorities Sub-Committee the real transaction of population, or

Financial Safeguards—The tajorit of the Communication of the his thin if the at fit de of communication of a validation that approached this ques tion in Jonaton 1931, was je tilhol—as they are on local that it was—the financial crists which In the verthelmed is thathe I nited Kingdom er I Irdia in ermorn with so mans other er r to has still further reinforced its need its. The feel for the that in the conditions of provide I but so here and now mediculously to mentage to attempt to decide upon the precise mentage to adop to ensure and command confilence in the stability of the new order, and a sife transition to it from the old. The range of the Committee therefore record It is their view that the conclusions reached in the Committee second Report form an approrefere ha is for approach to the task of framing the constitutional definitions of the powers and interplay in the sphere of finance of the various elements which will compose the Federal Authority which they envisage, and that it would be premature at this stage to attempt to elaborate the application of these conclusions While they are prepared to explore more fully the suggestion of an Advisory Finance Council, they cannot on the basis of the discussion that has taken place commit themselves to the view that such a Council would adequately secure the effective maintenance of confidence in the credit of India, which must be the essential test of the measures necessary in the sphere of finance

Commercial Discrimination—On this subject the Committee record a substantial measure of agreement. They recall that in paragraph 22 of their Report at the last Conference it was stated that there was general agreement that in matters of trade and commerce the principle was published from time to time.

' It the instance of the British commercial community the principle was generally agreed that there should be no discrimination between the rights of the British mercantile community, firms and companies trading in India, and the ri hts of Indian born subjects, and that an appropriate Convention based on reciprocity should be entered into for the purpose of regulating three rights

The Committee accept and reassirm the princi ple that equal rights and equal opportunities should be afferded to those lawfully engaged in commerce and industry within the territory of the Lederation

Position -Tho Conference The Present came to a close on the 1st December 1931, when the Prime Minister Mr. Ramsay MacDonald, made an important declaration of policy. It is important to note that the Declaration referred to earlier came from the head of a minority Government it did not necessarily pledge its successors. The second declaration came from the head of the National Government, and therefore was stamped with authority. The therefore was stamped with authority important features of this speech are contained in the following paragraphs:

' My collergues in His Majesty's present Govcrnment fully accept that statement of January last as representing their own policy. In particular thei de lie to reassirm their belief in an all India I ederation as offering the only hopeful solution of India's constitutional problem. They intend to pursue this plan unswervingly and to do their utmost to surmount the difficulties which now stand in the way of its realisation. In order to give this declaration the fullest authority the statement which I am now making to you will be circulated to day as a White Paper to both Houses of Parliament, and the Government will ask Parliament to approve it this week."

"It is our intention to set up at once the Committees whose appointment the Conference has recommended (a) to investigate and advise on the revision of the Franchise and Constituentcles , (b) to put to the test of detailed budgetary facts and figures the recommendations of the Federal Finance Sub-Committees, and (r) to explore more fully the specific financial problems arising in connection with certain individual We intend that these Committees shall be at work in India under the chairmanship of distinguished public men from this country as early in the New Year as possible"

The White Paper was approved by Par-liament—The committees referred to in this speech arrived in India early in the New Year, and at once proceeded with their inquiries Consultative Committee working directly under the direction of His Excellency the Viceroy was also constituted, and a record of its proceedings

Separation —The Burmese people to decide at the General I lection (due to be held in Novemher next) whether or not they are in favour of ectaration from India

In this connexion the Prime Minister made the significant statement that if an Indian I elevation is established it cannot be on the the, please He supplemented the "clear please of a general constitutional scheme" he had read by pointing out that necessarily in such a statement reservations have to be specified and thus present a formidable appearance. The powers that remained without any reference being a ade to them were very great In addition to ne subjects of which Ministers would have charge in common with Ministers in Indian Provinces, they would have such vastly Important Central subjects as civil and eriminal The state of the first of francial questions, law, posts and telegraphs, communications, the first of taxtion and ruleing customs, and incometan Of 40. Central terms, first the first of the Government subscribed in the schedule of the Government of India Act only half a dozen were proposed to the first of the first of the entrusted to the le excluded from the purview of the Burma Ministry and Legislature.

The Indian Legislature.

The Irdian Legislature with its Assembly, the furth of its line, newly returned by the conell encles, was three times summoned during 1971 the fir t meeting being the ordinary Defil cold weather one, the second the normal nutring meeting, in binda, and the third a special testen called in Delhi in November to puts measures which had been outlined in september to meet the emergency financial fituation frought about in India by the collapse of the marks throughout the normal of the marle, throughout the world

The first meeting of the Delhi winter session of the Assembly was on 14th January and pending the election of President Mr Shanmukham Chetty was nominated by His Excellency the Governor General to take the chair The presidential election on 17th January resulted in the elevation of Sir Ebrahim Rahimtulla to the chair, after a spirited contest in which several candidates participated

H E the Viceroy (Lord Irwin) addressed the Assembly on the afternoon of 17th January "India, life the rest of the world (he said) has suffered seriously from an almost universal trade depression and in the nature of things has felt the full weight of the collapse in world

arising from this state of affairs, as I recently had cause to point out, are being seriously aggravated by the disturbances resulting from wish to dwell at length on this aspect of that movement to day, nor indeed is it profitable to indulge in recriminations about the past." But, said the Viceroy, "a political movement must be judged and dealt with not according to the professions of those who initiate it or correct into offset but, in the light of practical. carry it into effect but in the light of practical results." His Excellency referred to the determined efforts of Congress to establish a parallel government and especially to the perniclous and cruel effort to persuade people not to pay agricultural rents and land revenue He referred to the Ordinances as means which he had taken to combat these insidious and dan gerous attempts to cripple the administration and to save the small agriculturists "from the effects of a propaganda by people who have little to lose but are callously ready to involve the small landholder in the risks of legal processes and even forfeiture of his land". The Vicercy also referred to the Bill to be placed. Viceroy also referred to the Bill to be placed before the Legislature to increase Government's has felt the full weight of the collapse in world power of control over the Press—a Bill the prices of agricultural products. The troubles Legislature later passed.

There would be entitle An law nese were included, but this pin gen pol Nerritor may be disregarded

The Turko Iranian, represented by the Later Realist and Minary of Palachi tan and the Newh West Irontier Province Probably fernalt aft in of Turl land Persian elements, inwhichthe former prodominate. Stature above ment, complexion fair, ever mostly dark but to alynable grey, hair on face plentiful, head tread, note moderately narrow, prominent, and were lengther most prominently is the portent that traite one most prominently is the portent manual treath of their notes, and it is probable. tems length of their noses and it is probably this p-culiarity that I as given rise to the traditic 1 of the Jevish origin of the Afghans

The Indo-Aryan occupying the Punjab, Raj-Durana, and hashmir, and hasing as its characteri is members the liaiputs, kliatris, and Jata. This type, which is readily distinguish able from the Lurio Iranian, approaches most clorely to that ascribed to the traditional Aryan colonists of India The stature is mostly tall, compl xion fair, eyes dark, hair on face plenti-ful, hard long note narrow, and prominent but not specially long

The Scytho-Dravidian, comprising the Mar atha Britmans, the Kunbls, and the Coorgs of Western India Probably formed by a mixture of Scythian and Dravidian elements type is clearly distinguished from the Turko Iranian by a lower stature, a greater length of head, a higher nasal index, a shorter nose, and a lower orbito-nasal index. All of these characters, except perhaps the last, may be due to a varying degree of intermixture with the Dravidians In the higher groups the amount of crossing seems to have been slight, in the lower Dravidian elements are more pronounced

It is one a tel to be a in mind, when dealing putana and in Bihar and represented in its upper strata by the Hindustani Brahman and in its lower by the Chamar Probably the result of the intermixture in varying proportions, of the Indo-Arvan and Dravidian types. The head form is long with a tendency to medium, the complexion sarks from lightless brown to black; the nose ranges from medium to broad, being always broader than among the Indo Arans, the stature is lower than in the latter group and usually below the average according to the scale The higher representatives of this type approach the In io Aryans, while the lower members are in many respects not very far removed from the Dravillans The type is essentially a mixed one, yet its characteristics are readily definable, and no one would take even an upper class Hindustani for a pure Indo-Aryan or a Chamar for a genuine Dravidian. The distinctive feature of the type, the character which gives the real clue to its origin and stamps the Arvo Dravidian as radally different from the Indo Aryan is to be found in the proportions of the nose

The Mongolo Dravidian, or Bengali type of Lower Bengal and Orisea, comprising the Bengal Brahmins and Knyasthas, the Maho-medans of Eastern Bengal, and other groups peculiar to this part of India Probably a blend of Dravidian and Mongolold elements, with a strain of Indo-Aryan blood in the higher groups The head is broad complexion dark, hair on face usually plentiful, stature medium, nose medium, with a tendency to broad. This is one of the most distinctive types in India, and its members may be recognised at a glance through out the wide area where their remarkable aptitude for clerical pursuits has procured them employment. Within its own habitat the type extends to the Himalayas on the north and to Assum on the cast, and probably includes the bulk of the population of Orissa, the western limit coincides approximately with the hilly country of Chota Nagpur and Western Bengal

The Mongoloid type of the Himalayar, copal, Arsam, and Burma, represented by the Kanets of Lahul and Kulu, the Lepchas of Darjeeling and Sikkim the Limbus, Murmis and Gurungs of Nepal the Bodo of Assam, and the Burnese The Fead is broad, complexion dark, with a yellow tinge, hair on face scanty, stature short or below average, nose fine to broad, face characteristically flat, cyclids often oblique

The Dravidian type extending from Ceylon to the valley of the Ganges, and pervading Madras, Hyderabad, the Central Provinces, most of Central India and Chora Nagpur Its most characteristic representatives are the Paniyans of Malabar and the Santals of Chota Nagpur Probably the original type of the population of India, now modified to a varying extent by the admixture of Aryan, Scythian, and Mongoloid elements. In typical si ecimens the stature is short or below mean, the complexion very dark, approaching black, he ir plentiful, with an occasional tendency to curr, eyes dark, head long, nose very broad, sometimes depressed at the root but not so as to make the face appear The Aryo-Dravidian or Hindustani, flat This race, the most primitive of the Indian found in the United Provinces, in parts of Raj types, occupies the oldest geological formation in flat This race, the most primitive of the Indian less than 841,000 or 80 per cent were from destination was Ceylon and the Straits Settle-Madras, 24,000 from Bombay, 18,000 from the ments. There is very little emigration from the Punjab, 17,000 from the North-West Frontier ports of Bombay and Karachi Altogether Province and 11,000 from Bengal. The major about two million labourers returned to India. rity of the emigrants work as agricultural from the colonies during the decade labourers on rubber, tea, coffee and other plantations. Under the Defence of India Rules indentured labour emigration was stopped in March 1917, but there had been a considerable. outflow of labourers to the colonies in the pre-vious years and more than 2 4 millions of natives of India passed through the ports of Madras and Calcutta as indentured labourers for the various colonies during the decade Of the labourers 33,000 went from Calcutta, but the bulk were from the Madras Presidency and their

RELIGIONS

The subject of religion is severely controversial in India, where often it is coloured by politics and racialism. As the Year Book aims at being impartial, all disputed inferences are excluded speaking broadly, of every hundred persons in the Indian Empire 68 are Hindus, 22 Mahomedans, 3 Buddhist, 3 follow the religions of their tribes one is a Christian. the religion of their tribes, one is a Chris-

65—70	81	79	83	75	
70 & over	160	180	145	175	
Mean age	24 8	24 7	24 7	24 7	

In the whole of British India the Infant deathrate amounts to about one-fifth of the total death-rate for all ages and about one fifth of the children die before the age of one year. The ratios of deaths vary in different provinces the birth-rate being an important factor. Thus they are specially high in the United Provinces and Central Provinces where the birth-rate is high and low in Madras which has a lower general birth-rate. The recorded rates in some of the cities are phenomenally high but may, owing to the defective reporting of births, be somewhat exaggerated.

Special causes contribute to the high mortality of infants in India. Owing to the custom of early marriage co habitation and child-birth commonly take place before the woman is physically mature and this, combined with the primitive and insanitary methods of aid iferveriously affects the health and vitality of the mother and through her of the child. Available statistics show that over 40 per cent of the deaths of infants occur in the first week after birth and over 60 per cent in the first month. If the child survives the pre-natal and natal chances of congenital debility and the risks of child-birth, it is exposed to the dangers of death in the early months of life from divretors or dysentery.

Sex Ratio —In the whole of India there is an excess of males over females, the figures being 945 females per thousand males These results being opposed to experience in most other countries of the world have been challenged and attributed to errors in the Indian census reasoning is rejected by the Census authorities, who insist that the disparity between the sexes is due to special conditions in the Indian Empire The sex ratio has fallen in the last twenty years throughout India The statistics of birth suggest that the proportion of females born to males born has, if anything, declined during this period, and in any case there has been a marked decline in the last five years of the last decade in most provinces The decline in the proportion of women however is chiefly due to (a) the absence of famine mortality which selects adversely to males and (b) the heavy mortality from plague and influenza which has selected adversely to females

Marriage —The subject of polygamy has been discussed fully in the report of 1911 Both Hindus and Muhammadans are allowed more wives than one, Muhammadans being nominally restricted to four As a matter of practice polygamy is comparatively rare owing to domestic and economic reasons and has little effect on the statistics The table shows the number of married women per 1,000 married men in India and the main provinces. No definite conclusions however can be drawn from these figures because (1) they probably contain a certain number of widows divorces and prostitutes who have wrongly returned as married and (2) it is impossible accurately to gauge the effect of migration on the figures of the married in any area. The custom of polyandry is recognized as a regular institution among some of the tribes of the Himalayas and in parts of south India It is also practised among many of the lower castes and aboriginal tribes. It's effect is reflected in the statistics of a few small communities such as the Buddhis's of Kashm r where the proportion of married women to married men is exceptionally low, but otherwise the custom is of sociological rather than of statistical interest

Widows —The proportion of widowers in the rep lations, one 6 is per cent, does not differ milely from the firme for European communes but the number of widows is smikingly

Emigration to Natal was discontinued from the 1st July 1011 as the Government of India were satisfied that it was undesirable to continuo to eend Indian labour to that country Emigration to the French Colonies of Reunion. Martinique and Gundeloupe had been suspended prior to the passing of the Act of 1908 on account of repeated complaints of the inadequate precautions taken for the proper treatment

and repatriation of the immigrants
The labour laws of the several Colonies r the protection and welfare of ndlan labourers. The Government also occasionally depute to the provide for the resident indian labourers of India colonies their officers to report on the condition of Indian Inbourers Deputations from Lidla visited Lift and British Gulana in 1921 In spite of all precautions certain social and moral cylichad grown up in connection with the indentured system of emigration and Indian public opinion has during the last decade been strongly opposed to it The whole system was exhaustively examined by the Government of India in 1915 in the light of the report re Me ere McNelll and Chimanlal, celved from and they arrived at the conclusion that the time has come when contract labour should abollshe i The Secretary of State for India accepted this policy and authorised the Government of India to announce the abolition of the indentured system and the announcement to this effect was made in 1916

In 1922 a further step forward was taken in Act VII of 1922 which prohibited indentured emigration and all unskilled emigration, except to countries specially approved by the Legisla ture Fmigration to Ceylon and Malaya was brought under control, and the definition of "I migrant" was extended to cover all persons 'assisted" to depart from India

Position —Indian Present emigration questions have recently taken on a wider aspect The status of Indians in the Empire generally is one in which the Indian public now take keen interest. It is no longer possible to deal with the treatment of Indian labour apart from other classes of Indian emigrants and travellers In several colonies and dominions considerable Indian communities have sprung up, which although composed largely of the descendants of indentured labourers, are themselves free and lawfully domiciled citizens of the countries in which they are settled, but have not yet been placed on a footing of legal. social, political and economic equality with the rest of the population The issues round which public interest at present centres are three

(a) Control of emigration

(b) Rights of Indians to admission to other parts of the Empire.

(c) Rights and disabilities of Indians do-

miciled overseas These questions may be considered sepa-

rately of Emigration -So Control

unskilled labour is concerned, the Government of India have assumed absolute powers of control. The terms of section 10 of the Emigration Act of 1922 are as follows —

"10 (1) Emigration, for the purpose of unskilled work, shall not be lawful except to such countries and on such terms and condi-tions as the Governor-General in Council, by notification in the Gazette of India, may specify

in this behalf

"(2) No Notification shall be made under sub-section (1) unless it has been laid in draft before both Chambers of the Indian Legislature and has been approved by a resolution of each Chamber, either without modification ent entries for the given a member of foot of such passage and clothing at the time the second secon ar a cheacease extensible date on the fluid with the of a second of the form of the first tenth of the first tenth of the form לו בר לו הרא א היי לו היי לו היי לו היי לו היי לו היי לו היי לו היי לו היי לו היי לו היי לו היי לו היי לו היי ל הרא היים לו הוא לו היים לו היים לו היים לו היים לו היים לו היים לו היים לו היים לו היים לו היים לו היים לו היי * Mercacina 1 Main no rivation thatten Guite in I m total I mith it chings

are with this no literation

Admission of Indians to Other Parts of the Empire -On the motion of the Government of India this question was discussed a the Imperial War Conferences, 1917 and 1415 and the poller accepted by the self-gorer ting tominions and the British Government wa embell d in the following re-olutions -

(1) It is an inh rent function of the floxerum ats of the several communities of the Brith Commonwealth Including India, that each should enjoy complete control of the co spection of its own population by means of ratriction on immigration from any of the ather communities

2) Britt h cit-ens domiciled in any Briti h country Including India, should be admitted into any other British country for vii for the purpose of picture or commerce, including temporary to Hence for the purpose of ducition such right shall not extend to a slett or temperary relidence for labour pur-

p) es or to p rmanent settlement
(1) In lians streads p rmanently domiciled in the other British countries should be allowed to bring in their wives and minor children on condition (a) That not more than one wife and her children shall be admitted for each such fadin and (b) that each individual so admitted shall be certified by the Government of India as being the lauful wife or child of

auch Indian

The first paragraph of this resolution has regularized the various restrictions on immigration which the s if-governing dominions have, from time to time adopted and which, without expressed differentiating against Indians are in practice as d in order to check Indian lumber itlin, the objections to which are stated to be not ricial or political but economic. An irralia prohibits the entry of any person who falls to pass a dictation test of not less than 50 words in any prescribed language New Zealand prohibits the entry of any person who has not received in adviser a permit from the Dominion Governm at which is re fused to any person regarded as unsuitable to settly in the country, South Africa prohibits the entry of any person do mid by the Minister of the Interfor in economic grounds or on account of life standard or habits of life to be unsuited to the requirements of the Union Canada prohibits the landing of any person who has come to the Dominion otherwise than by continuous journey from the country of which he is a native and unless he more than 25 per cent of the excess in the cost possesses in his own right 250 dollars. New-of his return passage and clothing over the foundland and the Irish Tree State impose

Relief Act, 1014 and by the guarantee known es the Smuts Gandhi agreement The substance of this agreement is embodied in the

following extracts from letters

(i) Mr Gorges Secretary for the Interior, Mr Gandhi Tune "Oth, 1914" With reto Mr Gandhi Tune oth, 1914 rard to the administration of existing laws, the Minister desires me to say that it always has been and will continue to be, the desire of the Government to see that they are administered in a just manner and with due regard to vested rights"

(ii) Mr Gandhi to Mr Gorges, July 7th, 1914

By vested rights I understand the right of an Indian and his successors to live and trade in the township in which he was living and triding to matter how often he shifts his re-idence or business from place to place in the same township '

This has been officially interpreted to mean "that the vested rights of those Indians who were then living and trading in townships, whether in contravention of the law or not

should be respected."

In 1920 an Asiatic Enquiry Commission was appointed to investigate the grievances of Indians regarding their rights to trade and hold land in the Union Their main recommendations were as follows -

(1) Law 3 of 1885 (Transvaal), the Gold Law of the Transval (Act No. 35 of 1908) Act No. 37 of 1919 should not be repealed

(2) There should be no compulsory repatria-

but tion of Asiatics

(3) Voluntary repatriation should be enbearinos

(4) There should be no compulsory segre-

gation of Asiatics but

- (5) A system of voluntary separation should be introduced under which municipalities should have right, subject to certain conditions ~
- (a) to lay out residential areas for Asiatics, (b) to set aside certain streets or portions of the town for Asiatic traders to which existing license holders should gradually be attracted

(6) These areas should be selected and allocated by a board of independent persons in consultation with the Municipal Council and Asiatic community

(7) In Natal the right of Asiatics to acquire and own land for farming or agricultural pur-

to the coast belt, say, 20 to 30 miles inland.

(8) A uniform 'License Law' applicable to all the Provinces of the Union should be possible be enacted. If that is impracticable, the law relating to the is-ue of Trade Licenses in the Cape Province, the Transvall and Natal should be assimilated in a comprehensive con solidating Act of Parliament providing, anter alıa

(a) That the granting of all licenses to trade (not being liquor licenacs) shall be entrusted to municipal bodies within the area of their jurisdiction, outside those arras, to divisional Councils in the Cape Province, and in the other Provinces to special Licensing Officers appoint-

ed by the Administrator

(b) The grounds upon which an application for the grant of a new license may be refused

(c) That the reasons for the refusal to grant any license shall be recorded, together with any evidence tendered for or against the application

(d) That, in the case of the refusal of a license on the ground that the applicant is not a fit and proper person to hold the same or to carry on the proposed business, there shall be a final appeal to a Special Appeal Board, appointed by the Administrator

(e) That municipal bodies shall have the right to prohibit the license holder, or any other person, from residing in any shop, store or other place of business

(9) There should be no relaxation in the enforcement of the Immigration Laws, and more active steps should be taken to deal with prohibited immigrants who have evaded the provisions of those laws

(10) The administration of the Asiatic poller of the Government should be placed in the hands of one official, under whose charge bluow come all administrative functions. together with the official records relating to This officer should also be entrusted Asintics with the duty of securing full statistics regarding islatics in the Union and of the arrivals in and departures from South Africa Details of all applications for trade licenses, and transactions in connection with the purchase of land and property made by Asiatics throughout the Union, should be sent to him in order to ensure the enforcement of the provisions of Section 8 of Act 22 of 1913

On the other hand, he should keep in close touch with the various sections of the Indian community, see that the laws are applied in a just manner, give a ready ear to any complaints or grievances and generally safeguard their

interests

From the above it will be observed that the Commission recommended the retention of a law prohibiting the ownership of land by Aslatics in the Transvaal, and another of its recommendations, threatened the right which Indians had previously enjoyed of acquiring and owning land in the Uplands of Natal Against this latter proposal the Government of India ear-nestly protested, but it was not accepted by the Union Government.

Present Position -Indians enjoy both the political and municipal franchise only in the Cape Province and the municipal franchise only in Natal In the remaining two provinces they are not entranchised. They are subjected to differential treatment in the matter of trading licenses, specially in the Transvaal Their immigration into the Union is barred and severe restrictions exist on inter-provincial migration In the Transvaul they are not allowed to acquire immovable property outside locations and on the Witwater and they are subject to the restrictions of the Gold Law

The anti-Asiatic party have made several Natal, further these Some of these such as efforts, especially in curtail the rights of Indians are merely irritating social disabilities, such as railway regulations debarring Indians from travelling in any other carriages except those reserved for them, and similar rules restricting their use of tramways at Durban, and excluding them from race courses and betting club rooms Examples of recent anti-Asiatic legislation of major importance are

First 1H. In the need the defection for the first terms of the could be full that before the could be need to be seen to the filling and to the points adrs will the delegation or reply to their reque t for the numbers of but the Government of Initia of a retail that to accompany the just a deputation to Lendon be would like the re-inters of the delecation to attend the meeting which the Government of India had aman, of to hold upon the Lith wptember, with leading in inters of the Lelsture and the Standing Importion Committee, so that the latter might have the new integer of hearing the delegation them by a before they advice the Covernment of India upon the situation delegation expressed their readiness to attend the meeting and then withdrew

Thereafter meetings of the Standing I migra tion Committee were held and the decision arrived at by the Government of India was communicated to His Majesty's Government

The report of Sir Samuel Wilson was published on the 5th October 1029 Another meeting of the Standing I migration Committee was held soon thereafter to consider the report and a further communication was addressed to His Majesty's Government on the subject

to the state of the transfer of the state of win'l le cultinated to a loint termittee of the two Houses of Parliament. In accordance In the decision a select committee was set up in Normber 1900. The Government of It live ununfected their views in a despatch to the Selective of State for India on the boxes of its the White Paper in so far as and to I the In lian population in I ast Africa With the permission of the foint Select Country of Larliament they also deputed the I in the normal of V 5 Stiniages Spettl, PC CH of their representative to project their representative to project of oral examin than such que tions as the Committee m to consider note any to refer to him. The Sele. Committee examined Mr. Sastri in July,

The report of the Committee was published rigulane u.k. in Incland, I ast Africa and India on the and November, 1931. The de Ulans of His Vigety's Government on the to omn dations of the Committee are awaited

During the year 1927, another matter which entract Government and the public in India
that the report of the local Government
Cemmi for which was appointed by the
Governo of Kenya in July 1926 to make
recommendations as to the establishment or exten lon of local Government for certain areas in the Colony.—The report of the Commission was sail mitted to the Governor of Kenya in Lebruary 1927. The recommendations made vere numerous and so far as Indians were concerned that involved a decrease in the proportion of Indian representation on the local bodies at Natrobi and Mombasa and the creation of an I urop an elected majority in both places. This caused re-entment among Indians in the Colony and resulted in the abstention from the Legislative Council of four out of five Indian representatives. The Government of India submitted representations to His Majesty's S cretary of State for India on the subject

In 1925 the Local Government (Municipalities) Ordinance was passed. This amended the law relating to Municipal Govt in Kenya to provide for the nomination of 7 unofficial Indian Members ns against 9 I propern Members to be I lected in Nairobl and for the nomination to the Muni-cipal Board of Mombasa of an equal number of Luropean and Indian Members, ite, 7

(3) Fiji and British Guiana—Emigration to I iji was stopped in 1917, under Rule 16 (B) of the Defence of India (Consolidated) Rules in pursuance of the general policy of stopping recruitment under the indentured system of emigration With a view to secure, if possible, a renewal of emigration to the Colony an unofficial mission composed of the Bishop of Polynesia and Mr Rankine, Receiver-General to the Fiji Government arrived in India in December 1919, and submitted a scheme of colonisation, which was referred to a committee of the Imperial Legislative Council on 4th February, 1020 To secure a favourable reception for the ernment cancelled all outmission the standing

o, and also from 2nd

In March 1928, following special inquiries by the Colonial Office, reports appeared in the press that a bill had been introduced in the House of Commons empowering His Majesty's Governm at to after the constitution of British Guinna by Order in Council The Government of India consulted in the matter the Standing Linigration Committee of the Indian Legislature and are now watching exents

(4) Other Parts of the Empire—The changes eventually introduced by the British Gulana (Constitution), Order in Council 1928, did not involve any differentiation against Indians and did not in any way infringe the provisions of the special declarators Ordinance which was passed by the Colonial Government in 1923 and which confers equality of status on all persons of Last Indian race resident in the Cotons—In Cevion, Mauritius, and Malaya, the position of Indians has on the whole been satisfactory, and the matters have gone smoothly The Government of India have now appointed their own Agents in Cevion and Malava question of the fixation of a standard minimum wage for Indian Letate labourers in Ceylon and Malaya has been the subject of negotiations between the Gove of India and the Colonial Governments ever since the emigration of Indian labour to the Colonies for the purpose of unskilled work was declared lawful in 1923 under the provisions of the Indian Emigration Act, 1922 far as Cevlon is concerned a settlement satisfactory to the Govt of India and that of Ceylon other outstanding quistlons affecting the interests of the labourers and the draft legislation to give effect to it was passed by the Ceylon Legislative Council in December 1927 as "Indian Labour Ordinance No 27 of 1927. The Standard Rates of Wages agreed upon were introduced with effect from the 1st January 1929 In 1931, however, it was decided with the concurrence of the Government of India to reduce these wages by 5 cents for men, 4 cents for women and 3 cents for children by way of readjustment owing to the price of rice issued from estates being fixed at its 4 80 instead of Rs 6 40 per bushel In regard to Malaya, Standard Wage Rates which are considered suitable by both the Indian and Malayan Governments have been introduced in certain areas and the question of their extension to the rest of Malaya is engaging attention

The rates so fixed were, however, reduced by 20 per cent with effect from the 5th October 1930 owing to acute depression in the rubber trade. The position is being watched by the Government of India and it is hoped that the rates originally agreed upon will be restored as soon as the present crisis has passed

In April 1924, the Government of Mauritius requested that emigration to the Colony might be continued for a further period of one year, but the Government of India in consultation with the Standing Committee on Emigration decided that consideration of the request should await the results of a local investigation Government of Mauritius agreed to receive an Officer for the purpose and to give him all

in a position at present to afford the cost which | facilities , and in December, 1924, an Indian it involves | Officer of Government, Kunwar Maharaj Singh, left India to conduct the necessary inquiry

> Kunwar Maharaj Singh's report was published by the Government of India in August 1925 The virious recommendations made in the report have been commended to the consideration of the Colonial Government.

> In February, 1926, the Government of India received a reply from the Colonial Government stating that they accepted the main conclusion formulated by Kunwar Maharaj Singh in regard to the renewal of emigration to Mauritius, viz, that no more unskilled Indian labour, should be sent to Mauritius either in the immediate or near future With regard to Kunwar Maharaj Singh's suggestions relating to other matters of interest to the Indian population now resident in the Island, the Colonial Govt expressed their willingness to give effect to several of them

The present position of Indians in the Dominions is that under the Canadian Dominion Election Act, Indians domiciled in Canada enjoy the federal franchise in eight out of the nine provinces In New Zealand, Indians enjoy the franchise on the same footing as all other British subjects In Australia, sub-section (5) of section 30 of the Commonwealth Electoral Act, 1918-24, was amended in 1925, by adding after the word "Asia" the words, "except British India" This meas ite gives the Commonwealth franchise to subjects of British India at present domiciled in Australia and is the fruition of the hopes held out by the Commonwealth Government to Mr Sastri on the occasion of his visit to Australia in As a result of the representations made in London in 1930 informally by the late Sir Muhammad Shafi at the instance of the Government of India to the Prime Minister of Australia, the electoral law of Queensland has also been revised to enfranchise the British Indians resident in that State It is, therefore, in Western Australia alone that Indians do not enjoy the suffrage in respect of election for the Lower House By Acts which have recently been passed by the Commonwealth Parliament, British Indians in Australia have been admitted to the benefits of Invalid and Old Age Pensions and Maternity allowances from which they were hitherto excluded as Asiatics Old Age Pension is payable to men above ... 5 years of age, or above 60 years, provided such persons are of good character and have resided continuously good character and have resided continuously for at least 20 years An Invalid Pension is obtainable by persons, who, being above 16 years of age and not in receipt of an Old Age Pension, have whilst in Australia, become permanently incapacitated for work by reason of an accident or by reason of being an invalid or blind, provided they have resided continuously in Australia for at least five years.

Maternity allowance to the amount of £5 is given to a woman of every child to which she gives birth in Australia, provided the child is born alive and the woman is an inhabitant on the Commonwealth or intends to settle there This Legislation removes the last grievance of the Indian community in Australia which was remediable by the Federal Government

caused by the Great War the number rapidly expanded from 1919 in spite of pressure on college accommodation. In addition to the ments had been made for the Committee to the chairmanship of Lord Lytton. Arrangements had been made for the Committee to the chairmanship of the chairmanship of the chair there are some youths of good family, including heirs of Indian States admitted into our public schools such as I ton and Harrow There are over 300 Indians at the Inns of Court London al orbs about half the total

The Advisers

It is well known that until a few years ago the voung Indian apart from inadequately created for their benefit a Bureau of Informa tion and appointed the late Sir Thomas Arnold to the charge of it under the title of I ducational to the charge of it under the title of Faucational their requirements. Subsequently a committee Adviser. The Bureau was located at 21, Crompedided over by Sir Edward Chamier recommendation, together with the National Indian mended the creation of Indian Bars, which Association and the Northbrook Society, which should have the effect of much reducing the were thus given spacious quarters for their number of Indians going to the Inns of Court social work among the voung men in An Act for he purpose was passed by the Indian the provincial advisory committee to Indian Legislature in 1926. help and advise intending students have been replaced in some instances by University Committees. The work of the Bureau rapidly expanded, and in consequence Lord Crewe in 1912 re-organised the arrangements under the re-organised the arrangements under the general charge of a Secretary for Indian students, Mr (now Sir) C. E. Mailet who resigned at the close of 1916. He was succeeded by Dr Arnold under the designation of I ducational Adviser for Indian Students to the Secretary of State. Mr N. C. Sen followed Sir T. Arnold as Local Adviser in London. At Oxford the Oriental Delegacy, and at Cambridge, the Inter-Callegiate Committee. at Cambridge the Inter-Collegiate Committee have been instituted to deal with Oriental students generally, whilst Local Advisers for Indian students have been appointed at Manchester, Fdinburgh and Glasgow

These arrangements underwent far reaching revision in the autumn of 1920 in connection with the getting up, under the Act of the previous year of a High Commissionership for India in the United Kingdom The "agency work" Sir William Meyer took ever from the Secretary of State included that connected with Indian students. Sir Thomas American with Indian students Sir Thomas Arnold ac cepted an appointment long pressed upon him as Professor of Arabic at the School of Oriental Studies, and the High Commissioner appointed Mr N C Sen and Dr Thomas Quayle as Joint Secretaries for the Education Department The administrative work hitherto divided between the India Office and 21, Cromwell Road was consolidated at the offices of the divided High Commissioner, thereby obviating a good deal of duplication of files and papers Dr Quayle is now Secretary in the Education lits own sports ground at Osterley, the Department of the Office of the High Commissioner and his colleague is Mr P K Dutt estimated at £15,000 Generous glits were

continue their investigations in India in the cold weather of 1921-22, but were abandoned in consequence of the refusal of the Legislative There are over 300 Indians at the Inns of Court Assembly to vote the necessary grant. This Since the war there has been a welcome in largely accounts for the somewhat tentative crease in the number of technical and industrial, form of the recommendations of the unanireceive in the number of technical and industrial torm of the recommendations of the unantended at the students. Altogether including technical and mous report published in October 1922 The medical students, there are fully 2,000 young opinion was expressed that the only permanent Indians (some five per cent of them women) in solution of the problem is to be found in the London. I dinburgh, Cambridge. Oxford, development of education in India Attendiately, I verpool and a few other centres to recommendations of the unantended in October 1922 The medical students, which is the only permanent of the only permanent in the original students and in India Attendiately, I verpool and a few other centres would result from giving effect to recommendations of the unantended in October 1922 The medical students, which is the only permanent opinion was expressed that the only permanent development of education in India Attendiately, I verpool and a few other centres would result from giving effect to recommendations. would result from glving effect to recommendations made for such development by previous commissions, and by the establishment of an Indian Bar The Committee held that it should be possible to secure admission both to coming under the influence of English friends reservations to the works of manufacturing of their families, were practically left to their firms in Great British for all Indian students own devices But in April 1909 Lord Morley, competent to profit by the facilities afforded, provided that some machinery existed to ensure their distribution to the places best suited to their requirements subsequently a committee

> The students have hosts of non-official friends and helpers and the report suggested that there should be a conference of representatives of all organisations interested in the social and intellectual welfare of young Indians in Great Britain to discuss the best means for co ordinating their efforts Accordingly the High Commissioner held a conference in July 1925. when plans were formulated to help to meet the needs of students more particularly in respect to suitable boarding accommodation in London The subject had been previously discussed at a meeting of the East India Association (April 27, 1925) when a paper was read by Mr F H Brown The conference came to the conclusion that, since non-official effort admittedly does not meet the need fully the hostel and club at 21, Cromwell-Road, should be maintained, more particularly to provide accommodation for new A small committee with Mr A Bonarjee (Warden of 21, Cromwell Road) as Secretary was established to assist students in obtaining suitable accommodation. The increasing number of students coming from Indian States raises the question whether the time has not come for provision to be made for them on lines similar to those adopted by the Education Department of the Office of the High Commissioner The Mysore State opened in 1929 an agency office at Grand Buildings, Trafalgar Square, and appointed a permanent Trade Commissioner

Under the presidency of Lord Hawke an Indian Gymkhana Club in 1921 acquired ing nying Cricket perhaps was the sport at the matches in these tournaments are large, which suffered most and for the second year especially in Calcutta, where the Indian has in succession, the famous Quadrangular tournation succession, the famous Quadrangular tournation Formula, had to be postpoped through what is more thoroughly understands it ment in Bombay had to be postponed, through what is more thoroughly understands it the Hindus refusing to participate This was The game is governed by the India the Hindus refusing to participate This was The game is governed by the India Football association in Bengal and the Western India to perform the selection committee of the Football Association in Western India the two Took National of Calal at Control which had to ship control of the man and of calal at Control which had to ship control of the man and of calal at Control which had to ship control of the man and of calal at Control which had to ship control of the man and of calal at Control which had to ship control of the man and of Indian Board of Cricket Control, which had to select the Indian team to go to England in 1932. This committee, however, kept in close touch with local tournaments all over the country with local tournaments all over the country and by the end of the year had formed an estimate of the form of over fifty players likely from Great Britain and the usual tournaments. estimate of the form of over fifty players likely to make the journey and had ear-marked them for trials later on

Indians play best as, despite the fact that India won the Olympic Games Hockey championship in 1928, the best hockey players in India are the Anglo-Indian and the Indian born European, though the game is largely plaved by Indians, the Muslims of the Punjab being very keen and able plavers Though the Bombay cricket able plavers able players Imough the bombay cricket Bombay Club, but there are one or two sporting bold their Condensation and Colombia Colombia and held their Quadrangular cricket tournaments as usual, but even these were affected by the political situation These games were played at Nagpur, Iahore, Secunderabad and Karachi as usual,

The visit of the English tennis team, who were in India in the early part of the year, gave tennis a big filip, and the contact Indian players had with these English stars undoubtedly did a lot towards improving their game In the International match. Great Retain heat India. International match, Great Britain beat India by five matches to two but the Indian players

put up a very fine performance

Towards the end of the year another International team visited India, Japan sending a team consisting of Satoh, Miki, Fujikurajiro and Kawachi and these also proved too good for India's best players

Fujikurajiro amazed all by his wonderful play and he even heat his own captain Satoh, in the and he even beat his own captain, Satoh, in the singles at Calcutta India is indebted to the South Club, for the visits of these International teams, and this club hopes to arrange for next year, a visit from a representative American tennis team This contact with players of International repute will undoubtedly improve Indian tennis and it ought not to be long before India takes her place among the foremost tennis playing

Hockey continued to be as popular as ever and additional interest was given to the various tournaments by the fact that in 1932 India was to send a team to Los Angeles to defend her title to send a team to Los Angeles to defend her title of hockey champions of the world — The Bombay of hockey champions of the world and Calcutta Customs stood out as the best sides

are bound to be their lot in 1932

Association Football continues to be the principal game of the European and the Army in India and the principal tournaments the IF A Shleid in Calcutta, the Durand Cup in Simla and the Rovers Cup in Bombay create wide interest to the game in increasing numbers and one simin and the Royers cup in Bombay create A summary of the chief sporting events of wide interest. The Indians in Bengal are taking A summary of the chief sporting events of the game in increasing numbers and one the year is given in the following pages

As was the case in 1930, sport suffered through for two purely Indian teams can hold their own he political troubles which were prevalent against the pick of the Military sides, which are through the year but it managed to keep its the strongest in the country. The attendances the strong fixing. Creater perhaps was the sport at the matches in these tournaments are large. Cricket perhaps was the sport at the matches in these tournaments are large,

chief centres of the game, and attemps are

from Great Britain and the usual tournaments which has only a short season, during the mon-Cricket and tennis are the two games which successful tournaments. The Welch Regiment successful tournaments. won the All-India Championship which in 1931 was played in Calcutta The Prince of Wales Volunteers and the Bombay Gymkhana were other successful fifteens

Golf is played everywhere, sometimes on improvised courses, like that of the Royal courses in the country, at Calcutta and Nasik, especially, while Gulmarg in Kashmir, has what is undoubtedly the best in the East

booming, especially amateur boxing in Western India where the Bombay Presidency Amateur Boxing Federation is doing very good work in fostering the sport. The Army naturally figures largely in amateur boxing circles in India and this is a sport which is a real controlled as any other in the country. is as well controlled as any other in the country Bengal now has a governing body for boxing and steps are being taken to provide one for the Punjab and Northern India The tournaments at Mussoorle and Lahore are well supported championships are held at The Military

Yachtung flourishes in Bombay and Naini Tal, Poona and Calcutta hold regattas during the year Of rowing there is little but enthusi-

asts generally manage to organise a race or two in Bombay, Poona, Calcutta and Naini Tal Athletics are in a bad way There is an Olympic Council but it is one in name only Athletics receive practically no encouragement at all and there is hardly a meeting in India worth calling the name Calcutta, Madras and Lahore caning the name calcutus, matras and manore usually have one sports meeting a year, but apart from these, the budding runner, jumper or field sportsman, has little inducement to keep in training Expert coaches are badly needed, there is not a cluder track in the country and though India possesses one or two sprinters. and though India possesses one or two sprinters of merit her atheletes generally are a long way behind those of Europe The Olympic Council behind those of Europe The Olympic Council is handicapped by lack of funds which explains

largely their comparative inactivity

The Turf.—Notwithstanding the general trade depression the Turf Clubs in India more than of hockey champions of the desiration of the year, the two premier tournaments, and Calcutta Customs stood out as the Beighton of the year, the two premier tournaments, largely their comparative many than the year, the two premier tournaments, largely their comparative many than the general trade of the Year. Notwithstanding the general trade of The Turf.—Notwithstanding the general trade of Turf Clubs in India more than depression the Turf Clubs in India more than depression the Turf Clubs in India more than depression the truncation of the trade of the Year's champion Star of Italy out of action, Tell year's champion Star of Italy out of action, Tell year's champion Star of Italy out of action, Tell year's champion Star of Italy out of action, Tell year's champion over to Bombay to Calcutta before coming over to Bombay to participate in the Western India classics of 1932 A feature of the year was the increased encouragement given to Indian-bred horses.
